

City of Portland Budget Concepts

FY 2026-27

Introduction

In preparation for another challenging budget year, Mayor Wilson directed city service areas last November to outline the costs of maintaining current services, as well as producing 3% and 10% reduction options for the General Fund and 5% options for rate-charging bureaus.

This process was designed to identify a range of potential options to inform the important decisions facing the City of Portland in the upcoming budget cycle.

The options included in this document illustrate impacts and tradeoffs that **could** be considered – **they are not intended to represent final decisions or the only possible approaches.**

Some of the items may move forward in the Mayor's Proposed budget as originally presented. Others may move forward, but with significant modifications. Many will not move forward at all. Their purpose is to offer a sense of the potential impacts under different options.

Scenario-based planning in budgeting is a common practice. Many municipalities prepare reduction scenarios to help leadership and the community understand trade-offs and make informed decisions, particularly during challenging fiscal years.

Mayor Wilson will continue to meet with Councilors to gather input and understand their priorities as part of the process of information-gathering and prioritizing. This information will be incorporated into the first iteration of a balanced budget for the City, as mandated by Charter.

Guide to Budget Concept Documents

Organization of Budget Concept Documents

This document is organized by service area. Each service area has the following:

1. A memo that overviews the budget gaps and concepts that responded to the Mayor's budget guidance.
2. A report that has each budget concept with details as described below.

Definitions

Budget Concepts

The Mayor's budget guidance to City bureaus, released in November 2025, directed bureaus to develop budget concepts showing options for multiple scenarios. Budget concepts are high level scenarios of what each bureau could reduce under different resource constraints. Budget concepts, unlike decision packages that come later in the budget process, do not have complete details and instead are starting points for budget discussions.

Budget Concept Type

- **Reduction:** Reduction concepts are scenarios in which budgets are reduced by the amount indicated in the Magnitude field
- **Add:** Addition concepts are scenarios in which budgets are increased OR in which current services that previously relied one-time funding instead receive ongoing funding.
- **Realignment:** Realignment concepts are scenarios in which an adjustment is made to how services or programs are funded or the bureau in which the activity expenditures and revenue is budgeted.

Magnitude

- Bureaus receiving **General Fund** were directed to develop three budget scenarios:

- **Current Level of Service:** This is how much it would cost to continue services at their current level, including inflation and the cost of continuing programs that are currently funded with expiring one-time funds.
 - **Note:** Some revenues in the Current Service Level scenarios are listed as “Miscellaneous Fund Allocation.” That title is used to show where there is a budget gap; it does not represent real revenue.
- **3% Reduction:** These scenarios align with a 3% reduction in General Fund revenues.
- **10% Reduction:** These scenarios align with a 10% reduction in General Fund revenues.
- **Non-General Fund** bureaus were directed to develop three budget scenarios:
 - **Current Service Level:** This is how much it would cost to continue services at their current level, including inflation and the cost of continuing programs that are currently funded with expiring one-time funds.
 - **Current Revenue Forecast (Non-GF):** These scenarios align with the current FY 2026–27 revenue forecast and associated rate guidance.
 - **5% Rate Reduction (Non-GF):** These scenarios align with a 5% reduction to forecasted FY 2026–27 rate revenues, including rates charged internally to City bureaus.

ELECTED OFFICIALS

Budget Concept 26402 - Reduction Scenario

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>3% Reduction</i>

Package Description

This package represents a 3% reduction below CAL. The package includes a \$370,096 reduction from the current service level scenario to CAL and an additional \$429,830 reduction to meet 3% of CAL. The proposed reduction includes \$215,090 in materials and services, the elimination of two FTE totaling \$367,479, and a \$217,356 pull from the Auditor's Reserve Fund. This is a total reduction of \$799,925 from the general fund revenue requested in our current service level budget scenario.

Service Impacts

This reduction scenario includes \$799,925 in modifications from what it would cost to maintain current services, or Current Service Level (CSL) budget. The Requested Budget is set at 3% below Current Appropriation Level. \$215,090 in potential reductions comes from cuts to materials and services, limiting the Office's capacity for outreach and eliminating budgets for equity trainings and other contracted services that advance Officewide strategic initiatives. \$367,479 in potential reductions comes from the elimination of two positions – a Performance Auditor II and an Administrative Specialist II. The remaining \$217,356 comes from increased revenue through a draw from the Auditor's Reserve Fund.

These potential modifications directly affect the Auditor's administrative independence and the Office's ability to deliver independent performance audits. One fewer performance auditor would mean fewer audits completed from the Office's annual schedule that follow government auditing standards, provide objective information to the public, and make the programs and services that Portlanders care about more efficient, effective, and equitable. Losing an Administrative Specialist would reduce our in-house human resource and finance operations capacity, which increases dependence on centralized functions within the City. Finally, the substantial draw on reserves would limit the Auditor's ability to independently manage emergencies, further risking the Office's real and perceived independence.

Equity Outcomes and Impact Tracking

Requested Budget cuts two FTE, eliminates equity trainings, and scales down outreach

The Auditor's FY 2026-27 Requested Budget includes up to \$799,925 in modifications from what it would cost to maintain current services, or Current Service Level (CSL) budget. The Requested Budget is set at 3% below Current Appropriation Level. \$215,090 in potential reductions comes from cuts to materials and services, limiting the Office's capacity for outreach and eliminating budgets for equity trainings and other contracted services that advance Officewide strategic initiatives. \$367,479 in potential reductions comes from the elimination of two positions – a Performance Auditor II and an Administrative Specialist II. The remaining \$217,356 comes from increased revenue through a draw from the Auditor's Reserve Fund.

Modifications impact Officewide equity initiatives, administrative independence, and Citywide accountability

The elimination of budgets for equity trainings and contracted services for strategic initiatives will slow the Office's equity and anti-racism work, requiring us to do more work in-house and with support from the Office of Equity and Human Rights. We will continue to prioritize equity training specific to each position's duties in professional development allowances. Reduction in outreach budgets will require us to forgo paid media opportunities, though we have preserved \$25,000 for community engagement and stipend payments to ensure we can deliver on the goals of the Office's Community Engagement Strategy. The elimination of the Administrative Specialist II position has limited impacts to direct services, but does reduce the Office's administrative independence and risks public trust in the Office's audits, systemic reviews, and enforcement actions.

The largest impact of our Requested Budget to the Office's equity outcomes is the loss of the Performance Auditor II position from the Auditor's Audit Services Division. The Division takes steps in the audit process to evaluate the effect of City services on all residents and any disparate outcomes for Portland's diverse communities. They begin by soliciting audit topic ideas online and directly through outreach to community groups. They prioritize audit topics that matter to the community when developing our annual audit schedule and use community focus groups to identify interest in suggested topics. During an audit, they brainstorm potential equity impacts to determine whether the program could be adversely affecting vulnerable communities, whether those disparities are being tracked or addressed, and who in the community they should consult during fieldwork. In many cases, data are not readily available to identify disparate impacts. In that case, auditors consider whether additional fieldwork is needed to assess potential disparities. Finally, in each audit, the Division reaches out to community members impacted by the program to share results. The loss of an auditor scales down the impacts of this work.

Auditing and administrative support are the few services we can scale down

The cuts offered by our Requested Budget are deep – they would weaken the Office's independent administrative capacity and reduce our ability to conduct audits. The cuts scale down the few services the Office can scale. Much of what our seven divisions do is legally mandated by City Charter and Code and cannot be piecemealed or discontinued. Scaling these services down minimizes impacts to systemically excluded communities as opposed to reducing direct services such as voter education, community archiving events and oral history collection, hybrid City Council and committee meeting and testimony support, timely and accessible administrative hearings, or systemic reviews and complaint intake provided by the Ombudsman.

Prioritizing these cuts over others protects the Office's direct services to systemically excluded communities

We prioritized these modifications over other options using a variety of factors ranging from the Office's legal mandates, likely impacts to direct services, and alignment with the Office's equity and anti-racism plans and goals. Two services that we have preserved in our Requested Budget but that are at risk of reductions if additional modifications are made are:

Voter education programming aimed towards hard-to-reach voters, including \$250,000 in contracts with community-based organizations to provide culturally-relevant ranked choice voting education, and additional resources for culturally specific digital, radio, and out-of-home advertising.

Community access, engagement, and partnership activities, which include archival workshops co-hosted with organizations like Don't Shoot PDX and Albina Musical Trust and oral history recordings that capture the lived experience of systemically excluded Portlanders and fill gaps in the City Archives.

These services are scalable and not made explicit in our legal mandates as articulated by City Charter and Code. However, they are critical to ensuring equitable participation in City elections and preserving the city's diverse history.

Community Engagement and Empowerment

Feedback from community engagement reinforced the importance of protecting vulnerable services that directly impact systemically excluded communities:

The Voter Education Steering Committee, which brought together Black Portlanders in 2025 to guide our voter education strategy for 2026 election, highlighted the need for community-led education planned for with Elections' \$250,000 in community education contracts.

Feedback from community partner co-hosts and attendees of City Archives events reinforced the benefit of dedicated Archives & Records Management staff who prioritize relationship-building with organizations led by systemically excluded Portlanders.

Meetings with community-based organizations representing systemically excluded communities such as the Coalition of Communities of Color, Equitable Giving Circle, the League of Women Voters, and Next Up underscored the need to improve access to the Office's services, including public communications and testimony registration, guidance to candidates running for office, and ranked choice voting education.

If our Requested Budget is included in the Mayor's Proposed Budget without further modifications, we do not plan on notifying stakeholders of the changes to service levels because direct impacts on systemically excluded communities will be minimal. However, if additional modifications are made to our budget that impact direct services we would engage community-based organizations led by systemically excluded communities, notifying them of service reductions and gathering input on strategies we might use to mitigate impacts to the communities they serve.

Federal Compliance Activities

The Auditor's Requested Budget maintains the two positions whose responsibilities include oversight for, and provision of ADA Title II, Civil Rights Title VI, and language access services, and maintains budgets for translation, especially sizable in our voter education program. It also maintains the position whose responsibilities include training, quality control, and monitoring of our Office's web content to ensure it is accessible to people with disabilities in compliance with Web Content Accessibility Guidelines Version 2.1, Level AA standards.

Budget Detail

Budget Concept 26268 - Current Service Level

Budget Concept Type	Magnitude
<i>Add</i>	<i>Current Level of Service</i>

Package Description

This package requests ongoing general fund appropriations required to meet current service level above what is allocated in the Auditor's Office FY27 CAL. This additional request solely represents the gap created by personal service increases and non-discretionary internal materials and services increases. From FY26 to FY27 personal services is projected to increase by about \$500,000, representing a 5.5% increase. Non-discretionary internal materials and services is increasing by about \$290,000, an 8.4% increase. The Auditor's Office recognizes the current budget constraints, and the current service level budget includes a \$50,000 reduction in materials and services that would not have an impact in our ability to maintain our current service level, as the funds primarily represent one time projects that will be completed in FY26.

The package also includes \$95,000 of one time general fund revenue to replenish the Auditor's Office Reserve Fund, keeping with the requirements of the FY 2019-20 budget note on the Auditor's Office Prior Year Underspending. Reserve funds were transferred to the general fund in FY25 bringing the balance of the reserve fund under the maximum \$500,000. The Office also had an underspend in FY25 of more than the amount required to replenish the sub-fund to the maximum \$500,000, the remainder of the Auditor's Office FY25 underspend remains with the General Fund year-end underspend.

Service Impacts

The package represents what the Auditor's Office requires to maintain current service levels. Funding the Office to this level would have no service impacts.

Equity Outcomes and Impact Tracking

Equity and anti-racism inform the Office's leadership priorities and strategic direction. However, these values are not made explicit in our legal mandates as articulated by City Charter and Code, and budget scarcity makes our commitments and service improvements in these areas especially vulnerable. We do not consider this work optional, though. This is why we are requesting an addition package and asking the Mayor to fund the Auditor's Office budget to Current Service Level. By not funding to Current Service Level, the following services will be vulnerable to reduction:

Voter education programming aimed towards hard-to-reach voters, including \$250,000 in contracts with community-based organizations to provide culturally-relevant ranked choice voting education, and additional resources for culturally specific digital, radio, and out-of-home advertising.

Community access, engagement, and partnership activities, which include archival workshops co-hosted with organizations like Don't Shoot PDX and Albina Musical Trust and oral history recordings that capture the lived experience of systemically excluded Portlanders and fill gaps in the City Archives.

Improvements to accessibility services provided by the Council Clerk and the Hearings Office which allow more Portlanders to participate in the legislative and quasi-judicial processes at the City.

Data-driven, community-informed systemic reviews from the Ombudsman that assess equity impacts of specific City programs and practices.

These services are critical to advancing the Auditor's Office's shared values of equity, inclusion, and accountability. They also fulfill goals of our Community Engagement Strategy to: inform systemically excluded Portlanders about our services; increase community input to make our services more relevant; and build and strengthen relationships and trust with organizations led by systemically excluded Portlanders. These services also advance commitments made in our divisions' Anti-Racist Results Based Accountability plans.

Equity outcomes are tracked using both quantitative and qualitative data. While methods vary by division, we have convened a Data Equity Workgroup to develop guidance and training for ethical, equitable, and consistent data collection, analysis and reporting practices that complement the City's demographic data standards. Quantitatively, we assess service equity using a variety of data that tells us who we are serving, and in some cases, how well we are serving them, including:

Post-election surveys that measure levels of awareness and understanding of ranked choice voting, disaggregated by race.

Demographics of researchers who request records from the City Archives, disaggregated by race.

Demographics of people who sign up for Council communications and testimony, disaggregated by race.

Demographics of complainants to the Ombudsman, disaggregated by race and tracked at each point in the complaint process from complaint intake to outcome, published in a public dashboard.

Qualitatively, we identify opportunities for improvement and support decision-making with input from community, including:

The Voter Education Steering Committee, which brought together Black Portlanders in 2025 to guide our voter education strategy for 2026 election.

Feedback from community partner co-hosts and attendees of City Archives events.

Annual focus groups, which solicit input from community-based organizations to inform which topics we audit.

Meetings with community-based organizations representing systemically excluded communities such as the Coalition of Communities of Color, Equitable Giving Circle, the League of Women Voters, and Next Up.

Community Engagement and Empowerment

Funding the Auditor's Office to Current Service Level means we can deliver on our equity commitments and continue to provide services to systemically excluded Portlanders. While all our services promote accountability and transparency, and build trust and participation in City government, some services more directly impact Portlanders by providing them information they need to vote or research the city's history, shape the Council's decisions, and ways to be heard when the City treats them unfairly:

Delivering ranked choice voting education through community contracts, advertising, and in-person outreach.

Providing archival education, oral history collection, and both virtual and in-person access to the City Archives.

Hosting hybrid City Council meetings and ensuring all Portlanders can testify on agenda items that matter to them.

Conducting impartial hearings and issuing accessible and timely decisions on appeals of City enforcement actions, a significant portion of which are related to vehicle tows and often involve Portlanders experiencing housing insecurity.

Handling complaints about City bureaus when they are related to fair, just, and equitable delivery of City services.

The Auditor's Office incorporates community organizations and community members into decision making in a variety of ways. Community partnerships (e.g. co-hosting events), one-on-one meetings with community-based organizations, focus groups, and surveys inform Officewide prioritization of resources and division-level policy decisions and service provision. One recent example, beyond those already highlighted, included community outreach conducted by Elections in the summer of 2025 to inform an administrative rule update that would increase candidate filing fees. Input was gathered through listening sessions co-hosted with League of Women Voters and Latino Network, conversations with policy staff at organizations like APANO, Next Up, East County Rising, Ebony Collective, and the Coalition of Communities of Color, and a community member survey which received over one thousand responses.

Federal Compliance Activities

Funding the Auditor's Office's budget to Current Service Level maintains the two positions whose responsibilities include oversight for, and provision of ADA Title II, Civil Rights Title VI, and language access services, and maintains budgets for translation, especially sizable in our voter education program.

This package would maintain the position whose responsibilities include training, quality control, and monitoring of our Office's web content to ensure it is accessible to people with disabilities in compliance with Web Content Accessibility Guidelines Version 2.1, Level AA standards.

Budget Detail		
100 - General Fund

Miscellaneous Fund Allocation	(\$95,000)	(\$370,095)
Sum:		\$0

CITY ADMINISTRATOR

Executive Summary

City Administrator Service Area—Executive Programs

The executive programs within the City Administrator's Service Area identified current service level, 3% and 10% reduction concepts at both the bureau and program levels, with bureau leadership coordinating with program managers to assess impacts and identify feasible reductions. Similarly, Portland Solutions Program identified current service level concepts for ongoing and one-time funded programs, as well as 3% and 10% reduction concepts where applicable, and used the cut concept framework to identify budget shortfalls and potential reduction options for the Shelter Services Program.

OFFICE OF THE CITY ADMINISTRATOR:

- **Current Service Level:** The Office of the City Administrator \$37,999 current service level concept funds professional development and travel budget for local, regional, and national conferences and engagement with other cities and local governments. If the resources are not provided, the City Administrator will have no budget for travel or professional development.
- **3% and 10% reduction.** Combined with the \$37,999 CSL reduction concept, the 3% or \$28,450 cut concept eliminates the City Administrator's external material services budget. If this cut is made, the City Administrator will only have sufficient resources for personnel and internal material costs to cover space rent and other essential costs. For the 10% cut target, two options were put forward. Option A reduces the City Administrator's Administrator Specialist III to 0.5 FTE and eliminates the office's entire external material service budget for travel to conferences and other opportunities to connect with other cities and partners nationwide. Option B eliminates the City Administrator's Administrative Specialist FTE. If selected, this option eliminates the scheduling and administrative functions necessary to support the City Administrator with the functions being filled by himself and other staff.

ASSISTANT CITY ADMINISTRATOR

- **Current Service Level:** The Assistant City Administrator submitted a roughly \$53k concept to cover internal service costs for space rent, risk management, and technology services, and \$6,500 for office supplies, and professional development. If the resources are not provided, the Assistant City Administrator Office will not have sufficient resources to cover the Office's internal material services budget.
- **3% and 10% cuts:** The 3% concept scenario cuts approximately \$23,950 from Office of the Administrator. To balance, the concept reduces one of the two Senior analysts to 0.9 FTE. The 10 percent reduction would reduce the FTE to .75 FTE. This will make it more challenging to staff the City Administrator and help to effectively lead the city organization.

ATTORNEY'S OFFICE

- **Current Service Level:** The City Attorney's Office did not submit a CSL package.

- **3% and 10% cuts:** The 3% cut concept amounts to a \$325,780 ongoing General Fund reduction. To balance, the Attorney's Office would eliminate one Chief Deputy City Attorney position. Combined with the 3%, the 10% cut concept amounts to a \$1,085,933 reduction. The office would cut two additional attorney positions and one paralegal. Eliminating these positions equates to a reduction of 5500 hours of attorney legal work which would cost over \$2.3 million to replace with outside counsel.

GOVERNMENT RELATIONS:

- **Current Service Level:** The Office of Government Relations submitted a \$45,000 CSL package. The CSL package amounts to a reduction in funds for temporary staffing for the State Relations Program during session for scheduling, supplemental communications, and administrative duties. Without support for time-intensive scheduling and administrative tasks, the result will be that higher paid executive level lobbyists and management staff will need to reduce lobbying duties in favor of administrative functions.
- **3% and 10% cuts:** When combined with the CSL reduction, the 3% cut concept amounts to a \$115,500 decrease in OGR's budget. The 3% cut reduces the State Relations Program's temporary staffing budget and eliminates the lease for office space in the Local Government Building in Salem. This office space serves the City's State Relations Program when the State Legislature is in session and during Legislative Days when program staff need to be present in Salem. To achieve the 10% reduction, the bureau would eliminate a position that supports a Government Relations' program.

CIVIC LIFE:

- **Current Service Level:** The Office of Civic Life did not submit a CSL package.
- **3% and 10% cuts:** Civic Life's 3% cut concept eliminates \$96,512 of space rent savings from the staff reductions that have occurred at Civic Life over the past several budget cycles. Combined with the 3% cut, the 10% cut eliminates \$321,708 in savings that resulted from lower space rent costs from Civic Life vacating the first floor of the Portland Building designed to accommodate 33 staff members. In the current year, Civic Life moved to the 5th floor of the Portland Building which has space for bureau's 10 FTE.

OFFICE OF EQUITY:

- **Current Service Level:** The Office of Equity did not submit a CSL package.
- **3% and 10% cuts:** Equity's 3% cut concept eliminates 1.0 Analyst III position that provides equity policy, implementation, and strategy Citywide. Combined with the 3% cut, the 10% cut eliminates \$136,555 in ongoing General Fund resources. This cut is balanced by reclassing an Analyst III Training Manager to an Analyst II and making it a part-time position.

SUSTAINABILITY OFFICER:

- **3% reduction; 10% reduction:** The Sustainability Officer's 3% concept cuts \$32,809 in Portland Clean Energy Fund dollars that support necessary meeting materials, facilities rental, security costs, participant support and technological services that support the Sustainability and Climate Commission. This concept was put forward as part of the Mayor's FY 2026-27 5% non-General Fund cut guidance.

PERFORMANCE OFFICE

- **Realignment:** The Performance Office realigns \$1,402,789 in General Fund ongoing resources and 6 FTE from the City Budget Office (1 FTE Analyst III, 1 FTE Analyst II), the 311 Program (2 FTE Coordinator II, 1 FTE Analyst II), and the Office of the Assistant City Administrator (1 FTE Manager II) to form the City's Performance Office in the City Administrator's Service Area.
- **3% reduction; 10% reduction:** The 3% concept reduces 0.25 FTE and \$40,084 in General Fund ongoing resources for the City Performance Office. Combined with the 3% cut, the 10% cut eliminates 1.0 FTE and \$140,280 in General Fund resources. Eliminating an entire position would reduce the Office's ability to lead collaborative efforts to improve service delivery and community experience.
- **Add concept: The Office includes a \$43,000 concept** to cover the budget shortfall created by the reclassification of Manager I to a Manager II that leads the Performance Office (approximately \$30k). This position is currently in the Office of the Assistant City Administrator. The request also includes \$13k to cover the cost of software and training for the Performance Office Team's 5 FTE, which is not included in the realignment concept. The realignment package only includes resources to cover the 5 FTE's personnel and internal material costs.

Portland Solutions

PORTLAND SOLUTIONS OPERATIONS

- **Current Service Level:** Portland Solutions Operations CSL concept is roughly \$78k. The concept is due to an ongoing budget shortfall from the Enhanced Services District Coordinator position costs. The position was not fully funded when it was realigned to Portland Solutions from the Community and Economic Service Area in FY 2025-26. The concept also includes \$8,000 in external material service resources that were reallocated to cover internal material service charges that have exceeded the cost of inflation. If the CSL is not funded, Portland Solution Operations may cut a position to balance to CAL.
- **3% reduction; 10% reduction:** Portland Solution Operations' 3% and 10% cut concept targets are incorporated in the Impact Reduction Program's 3% and 10% ongoing General Fund reductions.
- **Add concept: The submission includes a \$644,477 add concept** to fund 3 FTE (all limited term). The staff maintain funding for the 3 existing limited term staff that provide project management, communications, and administrative support to the Portland Solutions program. The concept funds the staff with PCEF resources.

IMPACT REDUCTION PROGRAM

- **Current Service Level:** IRP's \$296,176 CSL concept maintains the program's service level with the current year. The FY 26-27 program costs exceed inflation due primarily to the loss of ODOT funding which covered a portion of IRP's staff costs, price increases for contracted work, and the cost of utilities at the Property Storage warehouse that were not previously charged to the program. If funded at the CSL service level, the program estimates it will conduct approximately 7,670 campsite removals next year.

- **10% reduction:** This concept cuts IRP's budget by \$639K in General Fund Ongoing resources. The 10% reduction includes both IRP and Portland Solutions' Operations 10% cut target amounts. Combined with the Current Service Level (CSL) reduction, IRP's budget would decrease by roughly \$1M resulting in approximately 1,800 fewer campsite removals next year, or 5,879 compared to the CSL estimated target of 7,670.
- **Realignment package:** The concept funds campsite assessments (Central City Concern Clean Start) and micro-trash removal (Ground Score Association) with \$3.7M of PCEF resources (PCEF Strategic Program 22: Watershed Health). Interagency rates with property owning bureaus decrease by the commensurate amount.

STREET SERVICES COORDINATION CENTER

- **Current Service Level.** This \$4.2M concept maintains existing service levels for the Street Services Coordination Center Team. This resource level funds 11 LTE city outreach workers, 3 roving outreach contracted teams, the Ticket Home Program and transportation resources. This package does not fund the \$1M cash transfer to PBOT to help cover the cost of the derelict RV disposal fees. This concept is funded with one-time General Fund resources.

PUBLIC ENVIRONMENT MANAGEMENT OFFICE

- **Add concept:** This concept funds \$7,867,000 from PCEF for the Portland Environment Management Offices to fund ongoing storefront support economic development initiatives that have a direct nexus to climate action. Specifically, the funding will be direct service contracts and programs that provide sidewalk cleaning and lighting for active transportation; biohazard and trash from public spaces for environmental health; and public space activations to improve conditions along urban walking routes.
- **3% reduction; 10% reduction:** This concept cuts \$78,702 in external materials and services from PEMO's General Fund ongoing budget. This preserves staffing but reduces PEMO's ability to complete on-the-ground projects related to area stabilization and nuisance reduction, specifically around traffic and parking barriers. These funds are typically toward contracts for services to external vendors to complete the work. Combined with the 3% cut concept, the 10% concept cuts \$183,640 for on-the-ground fencing projects, area stabilization, and nuisance reduction.

SHELTER SERVICES PROGRAM

- **Alternative Shelter:** Portland Solution's \$35M current service level concept funds the existing eight Alternative City shelter sites (i.e., North Portland Road, Clinton Triangle, Weidler, Menlo Park, Multnomah, SW Naito Village, Reedway, and River District Navigation Center) and half the cost of the 11 limited term City staff. The Alternative Shelter CSL concept is funded with \$30.5M of realigned ongoing General Fund resources from PHB for shelter and site operator costs and \$1.1M of PCEF resources for City program staff. Together, this leaves a roughly \$3.35M budget shortfall in the FY 2026-27 Alternative Shelter CSL budget. If funding is not secured from the state, county, or another intergovernmental resources, the program will close 2 Alternative Shelter sites.
- **Overnight Shelter:** Portland Solution's Overnight Shelter current service level concept totals roughly \$19.8M which funds approximately 930 overnight shelter beds and two-day

center sites. The Overnight CSL concept identifies \$13.7M of PCEF resources (Strategic Program 5: Community Severe Weather Response), \$1.5M of Opioid funds, \$1M of General Fund set aside resources for the Sobering Center, and \$2M of estimated underspending/program carryover of State restricted resources for Overnight Shelter in the current year. Together, this leaves a roughly \$1.6M budget shortfall. If the funding gap is not closed with intergovernmental (non-General Fund) resources, the city will reduce the number of shelter beds available.

City Administrator

Budget Concept 26241 - AT - 3% Cut Concept

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

A 3% General Fund reduction of \$325,780 would require eliminating one Chief Deputy City Attorney position.

Service Impacts

Last year, the office cut three Attorney positions and reduced its external materials and services budget by 15%. To achieve a 3% reduction this year, the office would need to eliminate one Chief Deputy City Attorney position. The office expects much of this legal work can be absorbed by other attorneys. Some legal work may take longer than usual. Of note, however, is that office attorneys are already working extra hours (over 2,200 extra hours last year officewide) which can affect morale and retention.

Equity Outcomes and Impact Tracking

Community Engagement and Empowerment

Sum:	\$0	(\$325,780)

Budget Concept 26246 - AT - 10% Cut Concept

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

A 10% General Fund reduction is \$1,085,933. In addition to the 3% cut, it the office would need to cut an additional \$760,153 which eliminates two additional attorney positions and one paralegal. However, the work of the City Attorney's office is not optional. City Attorney's office work supports City Council priorities and essentially all City programs. The work must be performed by Deputy City Attorneys or more expensive outside counsel. Eliminating these positions equates to a reduction of 5500 hours of attorney legal work which would cost over \$2.3 million to replace with outside counsel.

Service Impacts

Last year, the office cut three Attorney positions and reduced its external materials and services budget by 15%. To achieve a full 10% reduction this year, the office would need to eliminate four positions: one Chief Deputy City Attorney, one Senior Deputy City Attorney, one Deputy City Attorney and one Paralegal. Cutting these positions likely will result in higher outside counsel costs for the City. The office would save just over \$1 million of personnel costs but outside counsel for that amount of attorney time would cost more than double at about \$2.3 million.

Some legal work may be absorbed by current staff. However, office attorneys absorbed the work of three positions cut last year, and office attorneys worked over 2,000 extra hours last year. The work of the City Attorney's office is not optional. The work supports Council priorities and must be performed by City Attorneys or more expensive outside counsel. City Attorneys are more cost effective, more efficient and more effective than outside counsel. They are familiar with City operations and have excellent working relationships with City staff which allows for consistent and comprehensive legal advice. Bureaus can be hesitant to use outside counsel knowing they will be billed by the hour which can result in serious and expensive problems down the road. City Attorneys are always available at a predictable low fixed cost to the City.

Budget Concept 26249 - CA - Portland Solutions - PEMO - PCEF Request (	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This concept funds \$7,867,000 from PCEF for the Portland Environment Management Offices to fund ongoing storefront support economic development initiatives that have a direct nexus to climate action. Specifically, the funding will be direct service contracts and programs that provide sidewalk cleaning and lighting for active transportation; biohazard, trash, and micro-trash removal from public spaces for environmental health; and public space activations to improve conditions along urban walking routes.

Service Impacts

The proposed funding will provide services that both promote economic development and improve livability while stabilizing business districts and enhancing climate action.

Specifically:

Sidewalk cleaning, trash removal: \$3,800,000. This funding cleans sidewalks in business districts throughout the city to provide safe, accessible pathways for visitors, staff, and the community. Last FY, this program continually cleaned over 44 miles of walking routes, removing an average of 25 tons of trash monthly from sidewalks and public spaces since it began in October 2025. This is trash that would have otherwise washed into the stormwater system, entered streams and rivers, or polluted bioswales or green spaces. This funding will increase our reach into more districts across the city and increase the total trash collected.

Sidewalk and pathway lighting enhancements: \$3,400,000. This funding provides pedestrian-level street tree lighting in key walking and biking corridors throughout the city. Data shows that our tree lighting provides enough lumens to have a measurable impact on street lighting levels, increasing safety and overall beautification and perception of spaces. Last FY, this program enhanced urban walking routes by installing pedestrian-level lighting on nearly 350 blocks. Funding is used to expand into new routes and maintain existing infrastructure.

Activations, Horticulture Services, and Biohazard Removal: \$600,000. This funding advances climate action and community joy through pedestrian and urban realm improvements that encourage walking and biking, such as art traffic wraps, community murals, and large-scale artworks. It also includes work to maintain green-spaces and planters through city horticulture services. Finally, it includes biohazard removals from public spaces that impede use of pedestrian and biking routes.

Our programs measure impact by tracking miles of sidewalks cleaned and illuminated, tons of litter and dumped debris removed, the number of contracts that meet workforce equity standards, and the total urban-realm activations that support people walking and biking.

Equity Outcomes and Impact Tracking

Our program uses a data driven approach to ensure our work delivers measurable, equitable impact. Surveys show many Portlanders don't feel safe walking at night—especially in the central city and District 1—and poor lighting is a top barrier, so we deploy functional and decorative sidewalk lighting to boost pedestrian activity, visibility, and sense of place. We also expand sidewalk cleaning in areas that have historically lacked investment, improving walking conditions and reducing biohazards for priority populations. Finally, by partnering with Clean Start and Cultivate Initiatives, we deliver public realm services through paid, low barrier jobs that embed stabilization supports, demonstrating how contracting can advance workforce equity while improving neighborhood conditions.

Community Engagement and Empowerment

Our work has been informed by several recent projects or surveys that undertook community input or insights from prior work:

Storefront Support Program Report (2026)

Portland Insights Survey (2024)

PedPDX Waking Priorities Survey (2019)

PedPDX Walking While Black Research (2019)

Portland Climate Emergency Workplan; Initiative T-1 (2022)

Our team also engages the public routinely through our Problem Solver Network meetings, which meet bi-weekly in 15 districts across the city. These meetings drive engagement that helps inform our work and empower community members to come to meetings to share insights, problems, and concerns about street conditions or city services for resolution.

Finally, our work is also informed by the recent Storefront Support Program outreach and engagement efforts.

Page 4 of 50

City Administrator

Run Time: 10:11:04 PM

If we are not funded for this program, we will likely become out of compliance with Urban Forestry Permitting and Development due to ornamental tree lighting regulations related to installation, repair, and replacement. We have over 1,000 trees coming due next fiscal year that must be inspected, permits renewed, and lighting replaced per permitting rules.?

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description This request is for \$4,211,796 of one-time General Fund resources to maintain existing service levels for the Street Services Coordination Center Team. This resource level funds 11 LTE outreach workers, 3 roving contracted teams, the Ticket Home Program and resources for Broadway Cab. This package does not fund the \$1M cash transfer to PBOT to help cover the cost of the derelict RV disposal fees. Note that \$246,351 in costs and a revenue plug are in the tech adjustment form to balance IMS charges for fleet, etc.

Budget Concept 26275 - CA - Portland Solutions - Alternative Shelter - CSL	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

The CSL total for the Alternative Shelter program in FY 26-27 is approximately \$35M to fund existing service levels. Funding assumptions include \$30.5M of ongoing General Fund realigned from PHB/HRS IGA; \$1.14M of PCEF resources for 11 limited FTE to support the shelter outreach program (this represents half of the personnel costs). The remaining 50% of the shelter team personnel costs are budgeted in the overnight shelter concept form and a \$3.35M revenue plug (the shortfall). This shortfall is budgeted in the grants fund so it is not captured as a General Fund request as the Mayor is seeking funding from the state, etc. If the Mayor does not secure the \$3.35M, the city will close 2 sites. Lastly, \$263K of IMS costs for this program was budgeted in the base requested budget, therefore the budget in this budget concept form is slightly lower than the overall budget.

Budget Concept 26279 - CA - Portland Solutions - Overnight Shelter - CSL

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This concept funds overnight shelter at the current service level. Resources include: \$13.4M of PCEF resources to fund shelter operator costs and half of the personnel costs of the Shelter Program team (11 LTE); \$1M of sobering center resources; \$2M of estimated program carryover from current year underspending of state committee resources restricted for overnight shelter; \$1.5M of opioid resources for recovery overnight beds. The shortfall is \$1.341M which is plugged using a non-GF resource per the Mayor's efforts to receive additional state resources in FY 26-27 for overnight shelter.

\$263K of IMS costs for this program was budgeted using PCEF resources in the base requested budget, therefore the budget in this budget concept form is slightly lower than the overall budget.

Budget Concept 26318 - GR - 3% Cut Concept

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

When combined with the CSL reduction, the 3% reduction would include a \$115,500 reduction in the Professional Services funds in EMS for the State Relations Program and a cancellation of lease of \$13,571 for office space in Salem in the IMS budget, and other minor EMS reductions.

Service Impacts

This reduction would include elimination of a lease held by the City for office space in the Local Government Building in Salem for the State Relations Program. This office space serves the City's State Relations Program when the State Legislature is in session and during Legislative Days when program staff need to be present in Salem. This space is utilized by staff as an off-campus location for strategy sessions and hosting City leaders and staff when they are in Salem. The building also provides off-street parking. Recent updates to the State Capital building have provided sufficient technology and physical amenities to allow for staff to work in the building with minimal need for dedicated space.

This reduction will also eliminate funds available to the State Relations Program for additional support through a Constituent Services Aide to do scheduling and supplemental communications duties. This work would be redistributed amongst the staff of the State Relations Program and other Office staff.

Equity Outcomes and Impact Tracking

N/A The Office of Government Relations elevates equity and anti-racism in the development of the State and Federal legislative agenda setting process, as well as other programmatic workplans, with internal equity tools and processes.

Sum:	\$0	(\$225,196)

Budget Concept 26346 - GR - 10% Cut Concept

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

When combined with the CSL and 3% reductions, this concept reduces the Professional Services funds for the State Relations Program by \$87,500. Further, it would cancel a lease for office space in Salem valued at \$13,571 which supports the State Relations Program. Lastly, it would cut 1.0 FTE that would dissolve the International Relations Program Manager position reducing personnel costs by \$213,821. All are General Fund sources.

Service Impacts

This reduction will eliminate funds available to the State Relations Program for additional support through a Constituent Services Aide to do scheduling and supplemental communications duties. This work would be redistributed amongst the staff of the State Relations Program and other Office staff. Additionally, this reduction would limit the ability for the State Relations Program to contract for additional lobbying services.

This reduction would include elimination of a lease held by the City for office space in the Local Government Building in Salem for the State Relations Program. This office space serves the City's State Relations Program when the State Legislature is in session and during Legislative Days when program staff need to be present in Salem. This space is utilized by staff as an off-campus location for strategy sessions and hosting City leaders and staff when they are in Salem. The building also provides off-street parking. Recent updates to the State Capital building have provided sufficient technology and physical amenities to allow for staff to work in the building with minimal need for dedicated space.

Cutting 1.0 FTE would eliminate the sole International Relations Program position. This position manages the City's Sister City Association network of nine non-profits, hosts the Sister City's Reception and Annual Report to Council, manages relationships with local consulates, facilitates 20 – 30 yearly inbound international delegations, and supports City leaders, elected officials, and staff on out-bound delegations. This work would have to be absorbed by either the Mayor's office, council officers, or by staff in the Office of Government Relations.

Equity Outcomes and Impact Tracking

The Office of Government Relations elevates equity and anti-racism in the development of the State and Federal legislative agenda setting process, as well as other programmatic workplans, with internal equity tools and processes.

Community Engagement and Empowerment

Eliminating the International Relations Manager position would impact the City's engagement with members of the international community residing in Portland, as well as with the official and honorary consular corps in Portland.

Budget Concept 26424 - CA - Portland Solutions - IRP CSL Concept

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

The Current Service Level (CSL) is defined as 5 FTE and \$15.3M in General Fund Ongoing, Interagency (IA) revenue, and Solid Waste Fund revenue for the Impact Reduction Program (IRP) to maintain FY 2025-26 service levels.

This request does not include Oregon Department of Transportation (ODOT) resources. In the past, IRP received funding through an Intergovernmental Agreement (IGA) with ODOT. That funding was not granted in FY 2025-26 and is still in question for FY 2026-27. If ODOT funding is appropriated, funds can only be used to address campsites on ODOT properties within the city limits.

The main drivers behind the increase cost between FY 2025-26 and FY 2026-27 to maintain current service levels is the need to fund the IRP staff without ODOT funding, price increases for contracted work, and utilities costs at the Property Storage warehouse that had not been previously expensed to the program.

Service Impacts

CSL funding would keep existing service levels in place, allowing IRP to process a similar number of camp reports, assessments and removals as in FY 2025-26. Projected FY 2026-27 totals* for these performance measures are:

Number of reports processed: 115,810

Number of assessments conducted: 41,062

Number of campsites removed: 7,670

Tons of material disposed: 4,534

*Projections based on work completed, plus an average Jul25-Jan26 monthly amount added for Feb-Jun 2026.

At the current service level, IRP will keep assessment turnaround time to 2-4 days and will be able to post encampments within the week they are assessed, typically. This is essential to minimizing costs while maintaining our current public space safety and sanitation standards. Through experience, particularly the experience of suspending camp removals during the COVID-19 pandemic, IRP staff have learned that once encampments have reached a threshold for health and safety risk, posting those encampments as quickly as possible is critical in managing the amount of time and cost required to mitigate camp impacts. The resources required to remove a high impact camp exponentially increase the longer the wait is to address said camp. Current service levels allow IRP to intervene before risks reach a tipping point and become a crisis.

Equity Outcomes and Impact Tracking

There are no anticipated changes to IRP's commitment to equity, or anticipated equity impacts.

By maintaining current service levels, IRP will be able to keep 113 contracted staff members employed doing the work of assessing, posting, and removing camps. An additional 48 contracted staff will be employed to provide tent-side waste collection and micro-trash removal. Maintaining current levels of contracted workers ensures IRP can preserve meaningful opportunities for people with lived experience of homelessness and poverty, as IRP contracts with homeless-to-work nonprofits and second-chance employers who provide easy entry jobs; a key path to stability.

Additionally, with no reductions to IRP personnel or contracted assessment teams, IRP can continue to provide equitable service to community members who report camps of concern or reach out to IRP directly for information. Camps will continue to be assessed for health and safety risks as a first step, allowing IRP to equitably address camps by prioritizing removals according to objective health and safety standards.

Community Engagement and Empowerment

City of Portland
Budget Concept Summary Report

Run Date: 2/9/26

Page 20 of 50

City Administrator

Run Time: 10:11:04 PM

The Current Service Level funding package does not include any service or programming cuts from current year (FY25-26) levels. The community will not experience any reductions or delays in Impact Reduction Program (IRP) services and can expect these same results:

IRP work crews assess each unique camp reported within 2-4 days, and camps are eligible to be reassessed every five days. IRP work crews respond promptly to community concerns, and IRP personnel are available to provide direct support and communication to community members who reach out for information.

Campsite reporting is done easily online or by phone. The 115,000+ reports expected in the coming fiscal year will be responded to promptly, and thousands of community members will continue to request the services of IRP in addressing camps impacting them near their home, business, school, park, or walking and biking path.

IRP will continue to be essential to the overall mission of Portland Solutions, which is a hub of City programs addressing homelessness and livability challenges. IRP plays an integral role in coordinated Portland Solutions efforts to enhance neighborhoods and respond to community needs. IRP will also continue to provide meaningful service to neighbors of the City's shelters and day centers - a key component in the continued success of the City's homeless services facilities.

Federal Compliance Activities

IRP would still be in compliance with the ORS 203.079, and there would be no changes to the City of Portland's Impact Reduction Program Campsite Removal and Property Storage Policy, a policy that goes above and beyond state law to ensure work is conducted thoughtfully, with compassion, and with the needs of people experiencing homelessness considered. The Campsite Removal and Property Storage policy was developed in collaboration with the Oregon Justice Resource Center, in response to a legal complaint brought against the City. The policy is the result of a legal settlement, and it includes notable provisions around giving ample warning to camp residents, requiring extensive training for contracted work teams, and explicit instruction around the preservation and storage of personal property.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	(\$296,176)	\$0
Sum:	(\$296,176)	\$0
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	(\$296,176)	\$0
Sum:	(\$296,176)	\$0

Budget Concept 26437 - CA - Portland Solutions - IRP 10% GF Cut Concept

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This concept cuts IRP's budget by \$639K in General Fund Ongoing resources, which includes both IRP and Portland Solutions' Operations 10% cut targets.

This cut package, if combined with Current Service Level (CSL) concept, would reduce the program budget by roughly \$1M. This cut is balanced via reductions in campsite removals (and a small amount of waste-processing tied to the reduction in removals). The budget for campsite removals, if approved, would be cut from \$8.9M to \$8M, a decrease of \$900K.

Service Impacts

Based on the current cost-per-campsite removal, this cut would represent an estimated ~1,800 fewer camp removals completed in FY 2026-27 than in FY 2025-26.

The current estimate relies on CSL average campsite removal costs, which does not account for the impact a decrease in removals may have on the growth in size of campsites being removed. When encampments remain unmitigated for longer periods of time, they tend to increase in scale and accumulate more debris. These larger-scale campsites require more time and resources to clear, resulting in higher per-site costs. Consequently, these raising expenses may further reduce the total number of removals IRP can complete in FY 2026-27.

Equity Outcomes and Impact Tracking

IRP is not making any cuts to the number of assessment teams in operation, ensuring camp removals are prioritized equitably, based on the level of health and safety risks present. However, a reduction in removal crews will mean fewer overall removals, which could lead to higher-impact camps throughout the city. Larger encampments with more structures and materials present have a disproportionate effect on community members with mobility disabilities, as the number of sidewalk obstructions often increase, and it could take longer for IRP to remove camps obstructing sidewalks.

The 10% cut included in this budget concept would also mean the loss of 9 jobs for IRP contracted work crews. IRP contracts with second-chance employers, and these 9 jobs represent easy-entry wage-earning opportunities for people with lived experience of homelessness, poverty, the criminal justice system, and/or substance-use recovery. These 9 jobs make a meaningful difference in building pathways towards stability for vulnerable people.

Community Engagement and Empowerment

With fewer camp removals performed, Portlanders will likely see camps becoming more impactful before they are addressed. There will be no changes to IRP personnel, but with the potential for increased frustration around the impacts of homeless camping in the city, more staff time may need to be devoted to direct communications with community members. While IRP's commitment to transparency and service will not change in FY 2026-27, regardless of funding, community members may have to wait longer for answers to their calls and emails when they reach out to IRP staff.

Another potential engagement impact could be felt by people experiencing homelessness in Portland. Although not required by ORS 203.079 and not mandated in the City's Impact Reduction Program Campsite Removal and Property Storage Policy, current procedure for IRP camp removal crews includes providing a final warning to camp residents 12-24 hours in advance of a scheduled removal. This is in addition to the minimum 72-hour notice required by Oregon State law. Currently, supervisors provide this day-ahead warning in almost every case, giving camp residents a confirmed date of the removal, and allowing them time to leave a posted area, or otherwise prepare themselves and their property before removal crews arrive. With fewer work crews, the practice of 12-24 hour warnings could happen less frequently or be discontinued.

Federal Compliance Activities

IRP would still be in compliance with the ORS 203.079, and there would be no changes to the City of Portland’s Impact Reduction Program Campsite Removal and Property Storage Policy, a policy that goes above and beyond state law to ensure work is conducted thoughtfully, with compassion, and with the needs of people experiencing homelessness considered. The Campsite Removal and Property Storage policy was developed in collaboration with the Oregon Justice Resource Center, in response to a legal complaint brought against the City. The policy is the result of a legal settlement, and it includes notable provisions around giving ample warning to camp residents, requiring extensive training for contracted work teams, and explicit instruction around the preservation and storage of personal property.

Although compliance should be achievable even with a 10% cut, IRP will also need to more closely monitor progress on compliance with another legal settlement (Tozer, et al. v. City of Portland Settlement Agreement). That settlement requires IRP to assess camps with sidewalk obstructions within 5 days and remove at least 500 campsites with identified sidewalk obstructions in a year’s time. Should the number of campsite reports received start to increase significantly, more funding may need to be shifted to accommodate additional assessment teams, potentially causing impacts and reductions to other parts of IRP work.

Sum:	(\$638,968)	\$0

Budget Concept 26440 - CA - Portland Solutions - IRP PCEF Swap Out

Budget Concept Type	Magnitude
Realignment	Current Level of Service

Package Description

This concept cuts 0 FTE and swaps revenue for \$3.7M in Interagency (IA) revenue with Portland Clean Energy Community Benefits Fund (PCEF) for the Impact Reduction Program (IRP) related to non-camp-related trash and debris removal, resulting in a net-neutral budget impact. (PCEF Strategic Program 22: Watershed Health).

IRP is funded by General Fund Ongoing, IA revenue, and Solid Waste Fund revenue. General Fund Ongoing and Solid Waste Fund revenue increase with the Inflation Factors, while IA revenue is calculated based on the remaining needs to fund the program and allocated to the PBOT/BES/Parks/Water based on the proportion of campsite removal costs for that bureau for the last two years.

This concept would entirely cover the cost of campsite assessments (Central City Concern Clean Start) and micro-trash removal (Ground Score Association), removing the cost burden placed on the IA revenue piece for those services. For example, PBOT's rate would decrease from \$6.8M to \$3.8M.

Service Impacts

This concept does not impact current service levels. This concept aligns with PCEF Strategic Program 22: Watershed Health and Program 29: Active Transportation. Interagency rates would decrease for the 4 property owning bureaus.

Equity Outcomes and Impact Tracking

There are no anticipated equity impacts.

Community Engagement and Empowerment

This funding concept does not include any service or programming cuts. The community will not experience any reductions or delays in IRP services. However, in using PCEF dollars to fund IRP's partnership with Ground Score Association, we are being responsive to our community partners who have expressed a desire to maintain autonomy from IRP budget volatility.

Federal Compliance Activities

IRP would still be in compliance with the ORS 203.079, and there would be no changes to the City of Portland's Impact Reduction Program Campsite Removal and Property Storage Policy.

Sum:	\$3,779,832	\$0

Budget Concept 26444 - CA - Portland Solutions - IRP PCEF Laundry Grant

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This concept cuts IRP's budget by \$639K in General Fund Ongoing resources, which includes both IRP and Portland Solutions' Operations 10% cut targets.

This cut package, if combined with Current Service Level (CSL) concept, would reduce the program budget by roughly \$1M. This cut is balanced via reductions in campsite removals (and a small amount of waste-processing tied to the reduction in removals). The budget for campsite removals, if approved, would be cut from \$8.9M to \$8M, a decrease of \$900K.

Service Impacts

Based on the current cost-per-campsite removal, this cut would represent an estimated ~1,800 fewer camp removals completed in FY 2026-27 than in FY 2025-26.

The current estimate relies on CSL average campsite removal costs, which does not account for the impact a decrease in removals may have on the growth in size of campsites being removed. When encampments remain unmitigated for longer periods of time, they tend to increase in scale and accumulate more debris. These larger-scale campsites require more time and resources to clear, resulting in higher per-site costs. Consequently, these raising expenses may further reduce the total number of removals IRP can complete in FY 2026-27.

Equity Outcomes and Impact Tracking

IRP is not making any cuts to the number of assessment teams in operation, ensuring camp removals are prioritized equitably, based on the level of health and safety risks present. However, a reduction in removal crews will mean fewer overall removals, which could lead to higher-impact camps throughout the city. Larger encampments with more structures and materials present have a disproportionate effect on community members with mobility disabilities, as the number of sidewalk obstructions often increase, and it could take longer for IRP to remove camps obstructing sidewalks.

The 10% cut included in this budget concept would also mean the loss of 9 jobs for IRP contracted work crews. IRP contracts with second-chance employers, and these 9 jobs represent easy-entry wage-earning opportunities for people with lived experience of homelessness, poverty, the criminal justice system, and/or substance-use recovery. These 9 jobs make a meaningful difference in building pathways towards stability for vulnerable people.

Community Engagement and Empowerment

With fewer camp removals performed, Portlanders will likely see camps becoming more impactful before they are addressed. There will be no changes to IRP personnel, but with the potential for increased frustration around the impacts of homeless camping in the city, more staff time may need to be devoted to direct communications with community members. While IRP's commitment to transparency and service will not change in FY 2026-27, regardless of funding, community members may have to wait longer for answers to their calls and emails when they reach out to IRP staff.

Another potential engagement impact could be felt by people experiencing homelessness in Portland. Although not required by ORS 203.079 and not mandated in the City's Impact Reduction Program Campsite Removal and Property Storage Policy, current procedure for IRP camp removal crews includes providing a final warning to camp residents 12-24 hours in advance of a scheduled removal. This is in addition to the minimum 72-hour notice required by Oregon State law. Currently, supervisors provide this day-ahead warning in almost every case, giving camp residents a confirmed date of the removal, and allowing them time to leave a posted area, or otherwise prepare themselves and their property before removal crews arrive. Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$150,000	\$0
Sum:	\$150,000	\$0

Budget Concept 26460 - CA - Sustainability Officer 5% non-GF reduction

Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This concept cuts \$32,809 in Portland Clean Energy Fund dollars that support necessary meeting materials, facilities rental, security costs, participant support and technological services that support the Sustainability and Climate Commission.

Service Impacts

The Sustainability and Climate Commission would not be able to use Portland.gov email addresses to conduct their meeting business, creating a high-risk scenario and violations of public meetings law. This reduction would also eliminate the use of the Zoom virtual meeting platform and would eliminate the ability to have hybrid participation for Commissioners, reducing their efficacy and ability to meet quorum. The cut in meeting resources would significantly impact the SCC's ability to meet and their work to update to the Climate Action Plan would be delayed or down scoped significantly to the Climate Change Risk Assessment alone, which is midway through completion and is not sufficient to meet the standards of C40 Cities for a Climate Action Plan, jeopardizing Portland's membership and meeting of the current leadership standards set by the organization. Participant stipends would be eliminated and public access and transparency to the SCC meetings would be eliminated as these tools allow for public participation and meeting to be recorded and posted to the City's website. Eliminating the ability to functionally meet and conduct their work, the Sustainability and Climate Commission would exist in name only.

Participation in municipal climate leadership-based membership organizations such as ICLEI, Carbon Neutral Cities Alliance and others would be called into question and likely result in removal of the City of Portland from their membership roles. Portland's climate disclosures to financial institutions would reflect a lack of an updated and timely climate action plan and could result in negative ratings as a result. Bureaus and service areas would receive limited technical assistance and guidance around how to meet existing and future climate and energy goals, stymying the progress and action required to meet City, state, federal and the international climate agreements the City is a signatory to.

Equity Outcomes and Impact Tracking

The reduction would eliminate the functionality of the newly created and seated Sustainability and Climate Commission. As the Sustainability office is minimally staffed by 2.0 FTE with a current lack of resources to meet its charge and minimal EMS to operate the Commission, there is no other reduction option to consider.

Community Engagement and Empowerment

The Sustainability and Climate Commission would not have the tools nor the resources to complete the work of climate governance. The SCC's charge to meet and conduct its work as an oversight body to the City of Portland would cease, leaving a vulnerability as the Commission is its own chapter in City code within Title 3 (Ch. 3.136). The phase I charter-directed charge for the responsibility of the Mayor and City Administrator to "advance the City's efforts to mitigate the human-made climate crisis and prioritize environmental justice initiatives" would be reassigned. The phase II charter reform regarding a climate oversight advisory body would be reneged upon, and the 20 seated commissioners would be dismissed a year into their 2 and 4 year appointed terms by City Council. The 20-member Sustainability and Climate Commission (SCC) is established to advance climate action across our city with a focus on environmental justice, City accountability to its sustainability and climate goals, and create and evaluate the City's Climate Action Plan.

Community engagement has been robust for the development of the Commission. The CSO engaged 12 community members in a workgroup to design the Commission function, composition and strategy to produce a discussion draft, while the Climate Commission Coordinator conducted research of other models across the United States. The SCC discussion draft resulted in internal engagement with City leadership, staff and a Climate Preparedness workgroup (now chartered as the Citywide Climate Practitioners Group). After developing the City Ordinance and receiving approval from City Council, the SCC Coordinator and CSO opened Commission applications for 8 weeks, engaged over 100 City staff members to share via their community pathways, shared the opportunity externally through individualized outreach and through the City of Portland's social media channels, reached over 2,000 community members, and responded to all 75 community inquiries received via e-mail and phone. 245 community members applied for the Commission, including 39 youth representatives (individuals ages 16 – 24), the second highest recruitment overall for any City advisory body.

Portlanders have been consistently engaged and involved in the development of this public-facing body and have participated in the public comment portions of the Commission's agenda with various topics related to the climate and sustainability charge of the advisory body, frequently urging for more action by the City. The absence of the functionality of the Commission would be noticed by the community and would erode trust and confidence in Portland's legacy of climate leadership. Engagement best practices have been enacted for the Commission's meetings, including stipends for Commissioners, meeting support and reimbursement for travel and child care expenses upon request, and providing light meals during the evening meeting time of the Commission in a City of Portland meeting space. Removing these participant supports will hinder full participation from Sustainability and Climate Commission members, and reduces public access and transparency to their work.

Federal Compliance Activities

Unknown at this time but likely impacts to federal compliance activities. If the reduction is enacted, bureaus and service area staff would need to take on the monitoring and analyzing of their own compliance with emerging State and as appropriate, Federal, guidance related to energy efficiency, carbon emissions, and other climate laws and policies. As many climate and sustainability related policies, programs and regulations have been relaxed or eliminated by the current Federal administration, the state and cities are expected to strengthen existing climate related policies or stand up new, more aggressive policies in order to meet the scientifically accepted timeline of carbon neutrality by year 2050 to avoid the worst impacts of human caused climate change.

Sum:	\$0	(\$32,809)

Budget Concept 26476 - CA - Portland Solutions - PDX Solutions Operations CSL	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

The CSL reduces Portland Solutions' personnel budget by roughly \$78k for the following: \$70k for an ongoing the budget shortfall from the Enhanced Services District Coordinator position that is funded with a mix of General Fund ongoing and revenue from Enhanced Service District. Unfortunately, the resources that moved over with the position did not fully cover the full cost of the position, including a facilitation contract that supports the work. The position realigned from the Community and Economic Development Service Area to Portland Solutions in the FY 25-26 Adopted Budget wherein the ongoing budget shortfall was documented. The CSL also includes \$8k for external material services for miscellaneous expenses such as travel and engagement with other jurisdictions experiencing homelessness and technology replacement. The shortfall has been covered by vacancy savings for the past several years.

Service Impacts

Absent vacancy savings, Portland Solutions Operations would likely have to cut a position to fund the budget shortfall.

Sum:	(\$78,700)		\$0

Budget Concept 26478 - CA - Portland Solutions - PEMO 3% GF Cut Concept

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept cuts \$78,702 in external materials and services (EMS). This preserves staffing but reduces our ability to complete on-the-ground projects related to area stabilization and nuisance reduction, specifically around traffic and parking barriers. These funds are typically toward contracts for services to external vendors to complete the work.

Service Impacts

Specifically, this cut will impact services related to supplies and installation of traffic and parking barriers used in areas with chronic nuisance issues.

Equity Outcomes and Impact Tracking

This option was selected over others because the use of traffic barriers is no longer the preferred intervention method for nuisance issues in the right-of-way.

The anticipated impact is low given that our use of traffic barriers as an intervention has dropped considerably over the last two calendar years, as the problems have decreased, particularly due to new and enhanced enforcement programs by others.

Community Engagement and Empowerment

Community engagement was not undertaken related to this proposal because this program has been an internal strategic tool used where others had failed or were not effective. Given that we have seen a decrease in the need for use of these barriers based on observations and intake, community engagement is not necessary.

Federal Compliance Activities

Not applicable.

Reduction	10% Reduction

Package Description

This concept cuts \$183,640 in external materials and services (EMS) related to area fencing installations. This preserves staffing but reduces our ability to complete on-the-ground fencing projects related for area stabilization and nuisance reduction. These funds are typically toward contracts for services to external vendors to complete the work.

Service Impacts

Specifically, this cut will impact service related to supplies and installation of fencing used in areas with chronic nuisance issues.

Equity Outcomes and Impact Tracking

This option was selected over others because our fencing initiatives are ramping down due to cost, complexity, and overall ongoing maintenance responsibilities.

The anticipated impact is low, given that our use of fencing as an intervention has generally ended, as we've triaged and completed many areas already and are no longer anticipating large-scale installations that would require this amount of funding.

Community Engagement and Empowerment

Community engagement was not undertaken related to this proposal because this program has been an internal strategic tool used where others had failed or were not effective.

Federal Compliance Activities

Not applicable.

Budget Concept 26489 - NI - Re-alignment

Budget Concept Type	Magnitude
Realignment	Current Level of Service

Package Description

The changes to the bureau in the realignment package eliminates one Part-time position (Currently funded at 0.65FTE) and changes it to a full-time position. Combined with re-classifications of 5 other positions results in a budget change of \$163,115 from EMS to personnel.

The Community Engagement Realignment is a citywide effort that will involve position transitions (eliminations, reclassifications, and moves from one organizational unit to another). This concept is for Civic Life specifically which is considered the central core bureau for this organization wide realignment effort.

As part of the Community Engagement Realignment process, these position changes are proposed in Civic Life:

- Reclassify Immigrant and Refugee Program Coordinator I to Coordinator II
- Reclassify or eliminate Advisory Bodies Program Analyst I and create Coordinator II
- Transition part-time admin specialist in the Youth Program to full time to support other civic leadership programs (Immigrant and Refugee and Tribal/Native Engagement)
- Eliminate existing Neighborhood Program positions and create a new single position
 - Eliminate Supervisor II and two Coordinator I positions
 - Create a coordinator III position to serve as liaison to DCOs.

Service Impacts

The transition of these positions will allow Civic Life to transition into a strategic engagement team with capacity to lead citywide equitable engagement initiatives and provide technical assistance and guidance across the organization for connecting public with government so that all people may participate in decision-making that impacts their communities. This will also bring Civic Life into alignment with the new form of government and the overall community engagement realignment effort.

Equity Outcomes and Impact Tracking

Anticipated equity impacts include:??

- Expanding internal capacity to support culturally responsive, accessible, and inclusive engagement practices across the entire organization.
- Reducing disparities in participation in City processes by standardizing equitable engagement expectations and supports.
- Strengthens advisory body structures to ensure diverse representation and more equitable access to decision-making.
- Aligns staffing and program functions with the new form of government to better serve all communities
- Improves consistency in how the City conducts equitable community engagement

Community Engagement and Empowerment

This concept is intended to align with overall community engagement realignment goals. While it does propose elimination of some positions to create others, the intent to reallocate resources to more effectively and efficiently serve all Portlanders through the provision of a strategic engagement team with capacity to lead citywide equitable engagement initiatives and provide technical assistance and guidance across the organization for connecting public with government so that all people may participate in decision-making that impacts their communities. The community was extensively engaged in the development of the overarching direction of the community engagement realignment project prior to Jan 2025 (Portland Engagement Project, Citywide Practices, etc.)

City Administrator

Budget Concept 26517 - CA - Office of the City Administrator - CSL

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>Current Level of Service</i>

Package Description

The CSL is defined as 2 FTE and \$987,003 in ongoing General Fund resources for the office of the City Administrator. Staff include the City Administrator and an executive assistant.

Due to a 15% increase in benefit costs and 2% merit increases the office would need an additional \$38,000 to maintain current service levels.

Service Impacts

The CSL assumes no travel or additional external materials and services that may be required by the fact that we have a new City Administrator. It is possible that the new City Administrator will have needs outside of what is currently budgeted.

Equity Outcomes and Impact Tracking

The CSL assumes no travel or additional external materials and services that may be required by the fact that we have a new City Administrator. It is possible that the new City Administrator will have needs outside of what is currently budgeted.

Budget Concept 26518 - CA - Office of the City Administrator - 3% GF Cut Concept	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept cuts roughly \$28,450 in M&S GF ongoing funds for the City Administrator's office. These funds would largely be pulled from the travel budget as well as the budget for citywide strategic planning.

Service Impacts

This reduction would reduce the City Administrator's ability to fund citywide strategic planning. It would also reduce the CA's ability to travel to conferences and other opportunities to connect with other cities and partners both locally and nationwide.

Equity Outcomes and Impact Tracking

The budget for this office is limited to two FTE and M&S resources. To meet the 3% target and avoid cuts to either FTE, cuts to M&S would be necessary.

Community Engagement and Empowerment

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$28,470)
Sum:	\$0	(\$28,470)
Revenue	One Time Cost	Ongoing Cost
General Fund Overhead	\$0	(\$28,470)
Sum:	\$0	(\$28,470)

Budget Concept 26519 - CA - Office of the City Administrator - 10% GF Cut Concept	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

Option A: This concept cuts 0.5 FTE and ~\$61,000 in GF ongoing resources for the executive assistant in the City Administrator's office as well as roughly \$28,450 in M&S GF ongoing funds. These funds would largely be pulled from the travel budget as well as the budget for citywide strategic planning.

Option B: This concept cuts 1 FTE in GF ongoing resources for the executive assistant in the City Administrator's office.

Service Impacts

Option A: This concept would significantly reduce the scheduling and administrative functions necessary to support the CA, functions that would need to be filled by other staff. It would also reduce the City Administrator's ability to fund citywide strategic planning. It would also reduce the CA's ability to travel to conferences and other opportunities to connect with other cities and partners nationwide.

Option B: This concept would eliminate the scheduling and administrative functions necessary to support the CA, functions that would need to be filled by other staff.

Equity Outcomes and Impact Tracking

The budget for this office is limited to two FTE and M&S resources. To meet the 10% target, both options A and B include FTE cuts. These cuts would make it more difficult for the CA to schedule their time and would require them to tap other resources to perform the scheduling and administrative functions. This cut may also result in more challenges for internal and external stakeholders hoping to connect with the CA.

Community Engagement and Empowerment

Cuts to administrative and scheduling support would make it more challenging for community members to access the CA.

Total	(1.00)	(\$103,418)	\$0	(\$59,850)	(\$171,180)

Budget Concept 26520 - CA - Assistant City Administrator - CSL

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

The CSL is defined as 3 FTE and \$832,580 in ongoing General Fund resources for the office of the Assistant City Administrator. Staff work directly for and report to the City Administrator. One of the FTE will be realigned to the Performance Management office. (note: the ACA position no longer exists and was replaced by an Analyst IV in the FY 25/26 budget process). There is a \$53,000 difference between revenue and expenditures.

Service Impacts

The CSL in this case will actually result in decreased capacity in the office of the City Administrator. In order to maintain (not expand) the current service level scope of services provided by the City Administrator's Office, additional staffing capacity is required due to a change in operational demands associated with the transition to a new City Administrator.

The new City Administrator (CA) has different and necessary support needs relative to the last CA in addition to the functions performed by existing staff, including active staffing and follow-through at stakeholder, bureau, and intergovernmental meetings to ensure alignment and execution and increased gatekeeping and coordination between the public, stakeholders, and the scheduling function. Meeting these needs requires a significant reallocation of senior staff time. Without additional staffing, this will directly reduce the office's ability to perform core functions that currently have no alternative landing place in the City's organizational structure.

Specifically, without an additional FTE, the office's capacity will be reduced in the following areas:

Project management of Citywide initiatives adopted by Council that require cross-bureau coordination. These projects continue to be passed by Council for administrative implementation and need to be managed;

Proactive monitoring and early engagement on legislation emerging from Council to support timely and effective implementation;

Management of executive-level recruitments and structural projects necessary to support the City's new form of government.

Currently, staffing in the City Administrator's Office is functionally divided between internal and external demands. One position is dedicated to internal bureau alignment, enterprise initiatives, Council follow-through, and service-area coordination. The remaining senior capacity is increasingly required to function in a Chief of Staff-style role providing direct, day-to-day support to the City Administrator.

Adding additional resources would be needed to maintain - not expand - existing service levels by preserving critical Citywide project management, legislative coordination, and implementation functions while enabling appropriate direct support to the City Administrator. Therefore, the CSL is effectively a reduction of service in this office.

Equity Outcomes and Impact Tracking

As articulated above, the CSL alone reflects a reduction in service in the office of the City Administrator.

Community Engagement and Empowerment

Miscellaneous Fund Allocation	(\$53,523)	\$0
Sum:	(\$53,523)	\$0

City Administrator

Budget Concept 26524 - CA - Assistant City Administrator - 3% GF Cut Concept

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept cuts 0.10 FTE from one of the two senior analysts in this office, for a savings of ~\$15,122 in GF ongoing resource from the office of the City Administrator.

Service Impacts

As articulated in the CSL document, the CSL actually reflects a decrease in capacity in the office of the City Administrator. In order to maintain (not expand) the current service level, scope of services provided by the City Administrator's Office, additional staffing capacity is required due to a change in operational demands associated with the transition to a new City Administrator.

Without additional staffing, the office's ability to perform core functions that currently have no alternative landing place in the City's organizational structure will be reduced. Such functions include project management of Citywide initiatives adopted by Council that require cross-bureau coordination (such politics continue to be passed by Council for administrative implementation and need to be managed); proactive monitoring and early engagement on legislation emerging from Council to support timely and effective implementation; management of executive-level recruitments and structural projects necessary to support the City's new form of government; active staffing for the City Administrator and follow-through at stakeholder, bureau, and intergovernmental meetings to ensure alignment and execution and increased gatekeeping and coordination between the public, stakeholders, and; citywide strategic planning leadership.

A reduction from 2 to 1.9 FTE would result in marginal decrease in capacity relative to the already reduced CSL.

Equity Outcomes and Impact Tracking

This reduction is not ideal in that it would limit the capacity of an already understaffed City Administrator's office in a pivotal time for the office, with a new City Administrator and a City Council entering their second year in this form of government as well as a city organization facing significant changes and budget challenges.

Given that the budget for this office includes 2 FTE and is almost entirely personnel, FTE cuts would be needed to meet the cut target.

Budget Concept 26527 - CA - Assistant City Administrator - 10% GF Cut Concept

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This concept cuts 0.25 FTE from one of the two senior analysts in this office, for a savings of ~\$59,875 in GF ongoing resource.

Service Impacts

As articulated in the CSL document, the CSL actually reflects a decrease in capacity in the office of the City Administrator. In order to maintain (not expand) the current service level, the scope of services provided by the City Administrator's Office, additional staffing capacity is required due to a change in operational demands associated with the transition to a new City Administrator.

Without additional staffing, the office's ability to perform core functions that currently have no alternative landing place in the City's organizational structure will be reduced. Such functions include project management of Citywide initiatives adopted by Council that require cross-bureau coordination (such politics continue to be passed by Council for administrative implementation and need to be managed); proactive monitoring and early engagement on legislation emerging from Council to support timely and effective implementation; management of executive-level recruitments and structural projects necessary to support the City's new form of government; active staffing for the City Administrator and follow-through at stakeholder, bureau, and intergovernmental meetings to ensure alignment and execution and increased gatekeeping and coordination between the public, stakeholders, and; citywide strategic planning leadership.

A reduction from 2 to 1.75 FTE would result in marked decrease in capacity relative to the already reduced CSL.

Equity Outcomes and Impact Tracking

This reduction is not ideal in that it would limit the capacity of an already understaffed City Administrator's office in a pivotal time for the office, with a new City Administrator and a City Council entering their second year in this form of government as well as a city organization facing significant changes and budget challenges.

Given that the budget for this office includes 2 FTE and is almost entirely personnel, FTE cuts would be needed to meet the cut target.

Budget Concept 26529 - OE - Office of Equity - 3% GF Cut Concept	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept cuts 1 FTE and \$40,967 in ongoing GF funding and reduces the Training Analyst position from Analyst III to Analyst II.

Service Impacts

Cutting the Analyst III position would negatively impact the Office of Equity and Human Rights' capacity to institutionalize equity throughout the City, potentially leading to inequitable service delivery.

Reclassifying the Training Analyst III position to Analyst II would decrease leadership capacity for the Training Program including mandatory Equity 101 training.

Equity Outcomes and Impact Tracking

This cut concept will negatively impact the Office of Equity and Human Rights' capacity to institutionalize equity throughout the City.

This reduction was selected due to limited options with diminishing staff capacity at the Office of Equity and Human Rights, to allow us to fill the vacant Training Analyst position, and to maintain current capacity for Civil Rights Title VI and Americans with Disabilities Act Title II compliance.

Community Engagement and Empowerment

This cut concept will negatively impact the incoming Equity Officer's capacity and ability to oversee all community access to City programs and information, including collaboration with the Engagement Officer.

Federal Compliance Activities

This reduction does not directly impact compliance with Federal, State and City laws and policies, including the Americans With Disabilities Act (ADA).

Budget Concept 26532 - OE - Office of Equity - 10% GF Cut Concept

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This concept cuts .1FTE \$136,555 in ongoing GF funding.

Service Impacts

Reducing costs for the Civil Rights and ADA Title II programs will create severe negative impacts on:

The City's ability to comply with U.S. DOJ laws requiring all web and mobile content to be accessible.

Review of public-facing IT platforms that are non-compliant. Decreased capacity could necessitate BTS and bureaus to procure contracted support services for this work.

Equity Outcomes and Impact Tracking

This cut concept will negatively impact community access to City programs and information.

The cut impacts all City programs and Service Areas by limiting capacity for a central ADA accessibility subject matter expert who averages 240+ consultations, 14+ trainings annually, along with future auditing of a sizeable digital footprint to track efforts to keep digital content accessible, with follow up support when corrective action is identified.

This reduction was selected due to limited options with diminishing staff capacity at the Office of Equity and Human Rights.

Community Engagement and Empowerment

This cut concept will negatively impact community access to City programs and information.

In the Office of Equity's 2023 Disability Engagement Community Survey, half of the respondents said that City meetings and events are important to them. Another 50% do not feel that local leaders are responsive to their needs. Nearly half of respondents don't know how to influence City decisions and 45% don't feel they have the power to influence City decisions about issues they find important.

Federal Compliance Activities

This reduction impacts compliance with Federal, State and City laws and policies, including the Americans With Disabilities Act (ADA).

Budget Concept 26540 - Performance Office--Realignment

Budget Concept Type	Magnitude
Realignment	Current Level of Service

Package Description

The CSL is defined as 6.0 FTE and \$1,402,789 in GF ongoing for the City Performance Office. The realignment involves the movement of staff and associated personnel and materials & services resources from the Office of the Assistant City Administrator (1 FTE Manager II), the 311 Program (2 FTE Coordinator II, 1 FTE Analyst II), and the City Budget Office (1 FTE Analyst III, 1 FTE Analyst II).

Service Impacts

This package realigns Service Innovation staff from the 311 Program and Performance Management staff from the Budget Office who are doing similar citywide work to form the core staff of a new City Performance Office in the Office of the City Administrator. This realignment will unify fragmented efforts, improve coordination, and provide the Performance Office with staff to drive enterprise-level performance analysis and continuous improvements that support service delivery to the community.

Equity Outcomes and Impact Tracking

The City Performance Office will support equitable outcomes by embedding equity considerations into how the City's defines and measures performance, allowing staff, leadership, and the community to see and understand disparities in service access and outcomes. Improving data quality and enabling citywide analysis will strengthen the City's ability to understand and address inequitable or inconsistent service delivery. Additionally, the Office's continuous improvement and service redesign efforts will focus on providing accessible and equitable that meet community needs. Finally, the Office's efforts to report on and improve City performance will help improve transparency, trust, and accountability to community members.

Community Engagement and Empowerment

This realignment package does not impact direct services to the community. However, proposed City Performance Office staff have been, and will continue to be, focused on collaborating with City programs to directly improving the accessibility, effectiveness, and responsiveness of services to the community through process improvement, online information and forms, communication enhancements, backend technology improvements, and data standardization. For example, this team created the one-point-of-contact campsite reporting form, centralized ADA accommodation request and discrimination reporting processes, the process for requesting assistance from a City Street Outreach Worker, and the single application process for temporary street use permits.

Federal Compliance Activities

No direct impact. However, the team has, and will continue to, work on process improvements related to federal compliance (Title II and Title VI of the Federal Civil Rights Act, Clean Water Act, etc.) as well as enhancing the City's ability to meet its own mandates and priorities.

Budget Detail

Total	1.00	\$173,098	\$0	\$81,279	\$267,619

Budget Concept 26542 - Performance Office--3% General Fund Ongoing Reduction

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept cuts 0.25 FTE and \$40,084 in (GF ongoing) for the City Performance Office in the Office of the City Administrator.

Service Impacts

This concept would cut 0.25 FTE from the Performance Office which will reduce the Office's ability to develop and maintain citywide performance metrics and dashboards that will support executive decision-making, budget analysis, and community transparency.

Equity Outcomes and Impact Tracking

This cut will reduce the Performance Office's capacity to a) measure performance and disparities in service access and outcomes; b) improve data quality and citywide analysis in order to understand and address inequitable or inconsistent service delivery; c) lead continuous improvement efforts to improve service delivery and accessibility; and d) report on City performance to improve transparency, trust, and accountability to community members.

Community Engagement and Empowerment

This cut package does not impact direct services to the community. However, this cut will reduce the Performance Office's ability to provide transparent reporting to the community on City performance and its capacity to work with City programs to improve the accessibility, effectiveness, and responsiveness of City services.

Federal Compliance Activities

No direct compliance impact.

Budget Concept 26543 - CA-Performance Office--10% reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This concept cuts 1.0 FTE and \$140,280 in General Fund ongoing for the Performance Office.

Service Impacts

This concept would cut 1.0 FTE from the Performance Office, equivalent to 20% of staff, which will significantly reduce the Office's ability to develop and maintain citywide performance metrics and dashboards that will support executive decision-making, budget analysis, and community transparency. This cut will also reduce the Office's ability to lead collaborative efforts to improve service delivery and community experience.

Equity Outcomes and Impact Tracking

This cut will reduce the Performance Office's capacity to a) measure performance and disparities in service access and outcomes; b) improve data quality and citywide analysis in order to understand and address inequitable or inconsistent service delivery; c) lead continuous improvement efforts to improve service delivery and accessibility; and d) report on City performance to improve transparency, trust, and accountability to community members.

Community Engagement and Empowerment

This cut package does not impact direct services to the community. However, this cut will significantly reduce the Performance Office's ability to provide transparent reporting to the community on City performance and its capacity to work with City programs to improve the accessibility, effectiveness, and responsiveness of City services.

Federal Compliance Activities

No direct impact. However, this cut will reduce the Performance Office's capacity to continue work on process improvements related to federal compliance (Title II and Title VI of the Federal Civil Rights Act, Clean Water Act, etc.) and its work to improve the City's ability to meet its own mandates and priorities.

Office of the Chief Financial Officer Jonas Biery, CFO

(He/Him) Jonas.Biery@portlandoregon.gov

February 9, 2026

TO: Ruth Levine, City Budget Officer Director

FROM: Jonas Biery, CFO

Executive Summary

Office of the Chief Financial Officer

The Office of the Chief Financial Officer (CFO) developed two General Fund reduction scenarios to respond to Citywide budget directives: a scenario achieving approximately a 3% reduction and an expanded scenario achieving approximately a 10% reduction. These scenarios rely primarily on staffing reductions, executive salary reallocations, contract savings, and assumed insurance market adjustments. Each represents a reduction to basic service levels of core Citywide financial functions that are performed by the divisions within the Office of the CFO.

The 3% reduction achieves approximately \$705,754 in ongoing General Fund savings, equivalent to 3.1% of the Office of the CFO budget. The 10% reduction builds directly on the 3% reductions and adds an additional \$837,710 to reach total ongoing savings of approximately \$1.54 million, or 10.2%. While the 10% reduction technically meets the higher reduction target, it does so at a significant operational and fiscal cost, including substantial revenue losses that far exceed the budgetary savings.

This executive summary describes the impacts of the 3% scenario first, followed by the additional reductions required to reach 10%. Note that both scenarios below also incorporate a reduction of approximately 5% in the two divisions funded primarily through enterprise interagency agreements – Risk Management Division and Public Finance & Treasury division.

3% General Fund Reduction Summary

The 3% scenario represents the minimum reduction necessary to meet the target. Even at this level, the impacts are material and affect nearly every CFO division.

Risk Management can absorb a partial reduction through the refilling of an existing position at a lower classification, reducing technical capacity during a period of increasing insurance complexity and claims exposure. Savings options also include an assumption of maximum potentially achievable reductions in property insurance premiums due to expected favorable market conditions, which cannot be guaranteed in future years. Offsetting a portion of the reduction is an allocation of 15% of the CFO's salary which will be recovered through rates charged by Risk Management. Collectively, these changes diminish the division's

ability to proactively manage claims and enterprise risk, increasing reliance on external vendors and elevating long-term exposure.

Treasury and Public Finance could eliminate staffing which would directly impact the City's ability to manage foreclosure activity, requiring foreclosure actions to be reduced from three to four cycles per year to once annually. As with Risk, 15% of the CFO's salary is reallocated to Treasury and Public Finance.

Within the CFO Office, 30% of the CFO's salary is reallocated from direct General Fund allocation to operational divisions to better align with how time is allocated amongst the divisions. This reallocation takes pressure off of the General Fund and allocates CFO time that provides Citywide benefit to non-General Fund divisions.

Accounting could reduce a portion of staffing with the trade-off of placing timely production of the Annual Comprehensive Financial Report (ACFR) at risk. Limited temporary contracted support could potentially mitigate this risk; however, the removal of internal expertise creates a high risk of failing to meet the federally required December 31 deadline for publication of the ACFR. Even with contracted assistance, institutional knowledge is diminished, internal controls are weakened, capacity for unexpected events would be destroyed even beyond current levels of inadequacy, and audit readiness would be compromised.

The Revenue Division reduction could include a small amount of ongoing contract savings related to work that is no longer needed and a manageable reduction to expenses in Operations.

Taken together, the 3% scenario introduces elevated compliance risk, reduces revenue recovery capacity, and weakens internal controls. Although the 3% scenario avoids the most severe service impacts, the City's core financial operations become notably more fragile and risks of failure could become both more frequent and severe. The organization's ability to absorb additional stress, such as vacancies, audit issues, or unexpected fiscal pressures, would be substantially compromised.

Incremental Reductions to Reach 10%

The 10% incremental reduction incorporates all the reductions described above and adds approximately \$837,710 in additional trade-offs to reach a total reduction of \$1.54 million.

The most significant additional impacts occur in the Revenue Division and Accounting Division.

To achieve the 10% target, the Revenue Division could reduce up to six additional positions in tax collection and auditing. The basic function of these roles is to directly generate revenue for the City through tax compliance enforcement, audit activity, and collections. The reduction would negatively impact the City's ability to identify noncompliance, pursue delinquent accounts, maintain equitable tax administration, and ultimately would reduce City revenue collection.

The estimated annual revenue loss associated with this service reduction ranges from a minimum of \$10.2 million annually up to \$24.5 million annually across the City General Fund, Portland Clean Energy Fund, Multnomah County, and Metro. In addition, the City would likely forfeit approximately \$394,000 in Metro matching funds tied directly to position reductions that would reduce collection services provided to Metro. The estimated revenue losses far exceed the \$1.5 million expense savings achieved by the budget reductions in this scenario, making the scenario fiscally counterproductive, though feasible. Beyond the direct revenue impacts, reduced enforcement

capacity also undermines voluntary compliance, shifting burden onto compliant taxpayers while risking increases in noncompliance.

Enterprise-Wide Implications

The cumulative effects of both scenarios include weakened internal controls, reduced revenue collection, slower foreclosure processing, delayed vendor payments, and increased exposure to audit, legal, financial and insurance risk. In recent years, the City has experienced the outcomes of historical and repeated underinvestment in these core financial services over many years. This underinvestment has been seen via material weaknesses identified in the City's annual financial audits, difficulties in assembling timely information for City Council and the public, and well-publicized gaps in the City's financial monitoring and controls. Further weakening of these resources will severely limit the City's ability to avoid these types of circumstances and will increase the likelihood and frequency of these types of events.

Equity implications are also substantial. Slower foreclosure activity affects housing stability and neighborhood revitalization. Payment delays disproportionately harm small businesses and community partners. Reduced enforcement capacity places greater burden on compliant taxpayers while allowing inequities in tax compliance to widen.

Budget Concept 26475 - MF - CFO 3% Concept

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This budget concept achieves approximately \$705,754 in ongoing General Fund savings (3.1%) for the Office of the Chief Financial Officer through a combination of staffing reductions, executive salary reallocations, limited contract savings, and assumed insurance market adjustments. Reductions are distributed across multiple divisions, including Risk Management, Treasury and Public Finance, Accounting, the CFO Office, and the Revenue Division. This package represents the minimum reduction necessary to meet the City's 3% General Fund target and results in reduced service levels for core Citywide financial functions.

Service Impacts

The 3% reduction results in reduced staffing capacity across nearly all CFO divisions, increasing operational and compliance risk. Impacts include diminished risk management and claims oversight, reduced foreclosure activity due to staffing reductions in Treasury and Public Finance, and increased risk to timely completion of the Annual Comprehensive Financial Report (ACFR) due to staffing reductions in Accounting. Overall, the package weakens internal controls and reduces the organization's ability to absorb unexpected workload, vacancies, or fiscal pressures.

Equity Outcomes and Impact Tracking

Equity impacts are indirect but material. Slower foreclosure processing may affect housing stability and neighborhood revitalization efforts. Reduced financial capacity increases the risk of delayed payments to vendors and community partners, which can disproportionately impact small businesses and nonprofit organizations. While this package avoids reductions to front-line revenue enforcement, the weakened financial infrastructure may still exacerbate inequities over time by limiting the City's ability to effectively manage and monitor public resources.

Budget Concept 26523 - MF - Accounting - CSL

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package removes the current service level plug and captures the necessary reductions to balance the budget for the Central Accounting team.

Service Impacts

Risks delay of ACFR production - delay in State SOS requirement; possible negative impacts to future WIFIA draw compliance, delays in vendor setup and payment processing. Would negatively impact Accounting's ability to assist bureaus reconcile capital project issues. Also, could cause delays in AP close.

Equity Outcomes and Impact Tracking

Delays or reductions in financial transparency weaken public accountability for equity-centered investments and limit community trust in fiscal stewardship. Payment delays place disproportionate financial strain on vendors least able to absorb cash-flow disruptions, increasing the risk of business failure and reducing participation in City contracting.

General Fund Discretionary	\$0	\$427,147
Miscellaneous Fund Allocation	\$0	(\$427,147)
Sum:	\$0	\$0

Budget Concept 26668 - MF - CFO Incremental Reductions to Reach 10% Concept

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This budget concept builds on the 3% reduction package and adds approximately \$837,710 in additional ongoing General Fund reductions, bringing total savings to approximately \$1.54 million (10.2%). The incremental reductions are achieved primarily through the elimination of additional staffing in the Revenue Division and Accounting Division, along with expanded executive salary reallocations. This package represents a significant reduction in core financial services and substantially alters the City's capacity to collect revenue, process payments, and maintain financial compliance.

Service Impacts

The incremental 10% reduction significantly impairs core financial operations. In the Revenue Division, reductions of up to six tax collection and auditing positions materially reduce enforcement and compliance capacity, resulting in an estimated \$10.2 million to \$24.5 million in annual revenue losses across the City General Fund, Portland Clean Energy Fund, Multnomah County, and Metro, as well as the loss of approximately \$394,000 in Metro matching funds. In Accounting, further staffing reductions result in extreme delays in vendor and partner payments and exacerbate risks to financial reporting, internal controls, and audit readiness. Collectively, these impacts move the organization from constrained operations into a high-risk environment with a significant likelihood of service failure.

Equity Outcomes and Impact Tracking

Equity impacts are significant and disproportionate under this package. Reduced revenue enforcement undermines equitable tax administration by allowing noncompliance to go unaddressed, shifting financial burden onto compliant taxpayers. Delays in vendor and partner payments disproportionately harm small businesses and community organizations that rely on timely City payments to maintain cash flow. Slower foreclosure processing and weakened compliance monitoring further exacerbate existing inequities related to housing stability and access to City services.

City Operations Tracy Warren, Deputy City Administrator

(She/Her) Tracy.Warren@portlandoregon.gov

DATE: February 9, 2026
TO: Ruth Levine, Director of the City Budget Office
FROM: Tracy Warren, Deputy City Administrator of City Operations
RE: FY 2026-27 Service Area Summary, Concept Submissions

The City Operations Service Area includes several organizations that are analyzing reorganization options and cuts of 20% as part of the Core Service Realignment effort that will be submitted at a later date. Bureaus that were not a part of 20% cuts prepared 3% and 10% Reduction Concepts (General Fund Bureaus), and 5% Reduction Concepts (Internal Service Bureaus) included in this submission.

Direction to bureaus was to identify two cut options for review by Service Area leadership. Unfortunately, there is no “low hanging fruit” to cut, no reduction option that does not have a service reduction. The concepts submitted represent our best thinking in terms of meeting reduction targets and continuing service at the highest possible level for the City and community.

The largest total cut and most complex reduction concept is from the Bureau of Fleet and Facilities. Several measures were selected to meet the 5% reduction target, service level(s) will be impacted although the selected mix of reductions represents our best effort to maintain focus on major projects and sustain core service provision.

The PDX 311 Program concepts include a realignment of staff to the City Administrator Performance Office, a Current Service Level Balancing Concept, and options for 3% and 10% that result in a cut to 7 positions if all reductions are taken. Analysis of options included several scenarios, all reducing customer service hours, and reductions of evening and weekend hours.

This submission also includes priority adds and realignment packages. The Office of Community-based Police Accountability has dedicated funding in code to draw upon, the Integrated Security Program that has urgent and priority security costs requested for City Hall services, the Small Donor Elections program add requests matching funds for the elections program, and Special Appropriations submits a request to fund ongoing support of the Portland Metro Levee System support. All submitted concepts are noted herein with a brief statement of impacts. Please let me know if I or our staff may provide any additional information.

FS – Fleet & Facilities: 5% Reduction Scenario

This concept **cuts** overall expenditures that span the Facilities Services Fund and the Fleet Operating Fund, creating collective savings of \$800,248 for general fund bureaus and \$1,121,329 in savings for non-general fund bureaus. Specific elements include terminating a lease for "swing space," cutting contracted security at the Business Center, reducing janitorial services, reducing the EMS budget, and cutting two FTEs (1 OSS II position is cut; funding is zeroed out for a Welder position). Service impacts are low, ranging from relocating teams within an existing building to potential for heightened vandalism in one location, as workflows have already adjusted for staffing changes.

CP – Integrated Security: 5% Reduction Concept

This concept **cuts** (\$95,491) from the City Hall security services budget by converting security guards from armed to unarmed. This transition implements a tiered security model that optimizes resources while the Executive Protection team remains armed, providing a high-level tactical response capability if needed. This change aligns with city-wide equity goals to make public spaces feel more accessible and less intimidating to the community.

CP – Integrated Security: Additional funding for elected officials protection services

This concept **adds** \$1.52 million ongoing to the existing funding for additional elected officials protection services. The added funding allows the Division to transition to a proactive, tiered protection model, which includes dedicated personnel for advanced site scouting, real-time threat monitoring, and 24-hour residential security when credible threats are identified.

CP - PDX 311: Staff Realignment to the Performance Office

This concept **realigns** (\$663,163) and 3.0 FTE from the PDX 311 Program to the City Administrator Performance Office. This realignment unifies fragmented efforts, improves coordination, and provides staff to drive enterprise-level performance analysis and continuous improvements.

CP - PDX 311: CSL Reduction - Cut 3.0 FTE

This concept **cuts** 3.0 FTE Customer Service Representative I positions and (\$407,700) to balance program expenditures with revenues. Eliminating these positions would reduce the program's overall capacity by 36,000 annual contacts and will have impacts on community experience and access, increasing hold times and shifting work to other City staff.

CP – PDX 311: 3% Reduction Concept

This concept **cuts** one Customer Service Representative I and (\$143,767). This reduction would reduce 2 weekend hours of operation from 8PM back to 6PM.

CP – PDX 311: 10% Reduction Concept

This concept **cuts** two Customer Service Representative I, one Dispatcher and (\$335,456). This reduction would reduce evening service from 8PM to 6PM every day, reducing overall capacity by approximately 72,000 annual contacts.

CP – COSA DCA: 3% Reduction Concept

This concept **cuts** (\$33k) and reclasses downward an Analyst III position to an Analyst I. This action impacts the capacity to provide project, program and other services to the City Operations Service Area.

CP – COSA DCA: 10% Reduction Concept

This concept **cuts** (\$110k) and impacts an Analyst III. At the time of submission, this reduction is under review and will either abolish or reclassify the position to a level that achieves the desired reduction.

CP - COSA DCA: Service Area Realignment

This concept is a placeholder to **realign** staff and resources, estimated to fund 3.50 FTE and \$886,086 for an Executive Assistant and Analyst III positions. Service impacts, equity outcomes, and community engagement details are still under analysis.

CP – Council Transition Placeholder

This concept is a placeholder for expected but to be determined costs associated with the 2026 election and potential for Council transition. The costs associated with early hiring, technology, facilities and other expenses associated with potential Council transition are under review and analysis, estimated at \$200k in this concept.

CP - Data and Privacy Office Realignment

This concept is a placeholder to **realign** 5.0 FTE and \$1.3 Million to establish the Data and Privacy Office. A plan is under development to implement Council legislation and direction. Technology needs associated with the office are being analyzed by the Bureau of Technology Services and may be prepared/submitted separately.

TS – Data and Privacy Office Data Platform

This request adds \$3.0 FTE and \$893k in the Bureau of Technology Services for the data services platform and tools associated with the Data and Privacy Office.

SA - 3% Reduction

This concept **cuts** (\$197,617) from Special Appropriations, excluding programs that are contractually or code-mandated. The impact primarily cuts 3% across the board and the competitive grant program allocation, reducing the funds available for external partners.

SA - 10% Reduction

This concept **cuts** (\$658,724) from the Special Appropriations excluding programs that are contractually or code-mandated. The impact primarily cuts 10% across the board and competitive grant program. This is a significant reduction to funding provided to external partners through these programs.

SA – Small Donor Elections: Add Elections Matching Funds

This concept **adds** \$900,000 in General Fund transfer resources for matching funds. Without these resources the program will continue to operate with a 50% reduction to match caps.

City of Portland

City Operations
Service Area
1221 SW 4th Ave. # 330
Portland, OR, 97204

503-865-6586

SA – Special Appropriations: Portland Metro Levee System (PMLS)

This concept **adds** \$200,000 to address the program’s estimated budget gap, and funds the city’s ability to staff and effectively participate and influence the United States Army Corps of Engineers’ (USACE) design work on the project, including contract management of consultant time spent on design, planning, coordination, milestone design and other work lead by the USACE and the projects nonfederal local sponsor, the Urban Flood Safety and Water Quality District.

PB – OCPA: Add Resources for FTE, Space Growth and Tenant Improvements

This request **adds** \$3.399 Million to the Office of Community-based Police Accountability budget to fund the expected costs associated with tenant improvements, facilities rent, and other office space expenditure. This concept is funded by, but does not exceed the funding floor of 5% of the Police Bureaus’ Annual Operation Budget.

PB – OCPA: Add Position Authority

This concept **adds** ongoing position authority for the Office of Community-based Police Accountability. This concept adds costs but still does not exceed the funding floor of 5% of the Police Bureaus’ Annual Operational Budget.

Sum:	\$0	\$0

Budget Concept 26226 - CP - PDX 311 Staff Realignment to the Performance Office	
Budget Concept Type	Magnitude
Realignment	Current Level of Service

Package Description

This Concept realigns (\$663,163) and 2.0 FTE Coordinator II, 1.0 FTE Analyst II from the PDX 311 Program to the City Administrator Performance Office.

Service Impacts

This package realigns Service Innovation staff from the 311 Program and Performance Management staff from the Budget Office who are doing similar citywide work to form the core staff of a new City Performance Office in the Office of the City Administrator. This realignment will unify fragmented efforts, improve coordination, and provide the Performance Office with staff to drive enterprise-level performance analysis and continuous improvements that support service delivery to the community.

Equity Outcomes and Impact Tracking

The City Performance Office will support equitable outcomes by embedding equity considerations into how the City's defines and measures performance, allowing staff, leadership, and the community to see and understand disparities in service access and outcomes. Improving data quality and enabling citywide analysis will strengthen the City's ability to understand and address inequitable or inconsistent service delivery. Additionally, the Office's continuous improvement and service redesign efforts will focus on providing accessible and equitable that meet community needs. Finally, the Office's efforts to report on and improve City performance will help improve transparency, trust, and accountability to community members.

Community Engagement and Empowerment

This realignment package does not impact direct services to the community. However, proposed City Performance Office staff have been, and will continue to be, focused on collaborating with City programs to directly improving the accessibility, effectiveness, and responsiveness of services to the community through process improvement, online information and forms, communication enhancements, backend technology improvements, and data standardization. For example, this team created the one-point-of-contact campsite reporting form, centralized ADA accommodation request and discrimination reporting processes, the process for requesting assistance from a City Street Outreach Worker, and the single application process for temporary street use permits.

Federal Compliance Activities

No direct impact. However, the team has, and will continue to, work on process improvements related to federal compliance (Title II and Title VI of the Federal Civil Rights Act, Clean Water Act, etc.) as well as enhancing the City's ability to meet its own mandates and priorities.

Budget Concept 26418 - CP - PDX 311 CSL Reduction - Cut 3.0 FTE	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package cuts 3 FTE Customer Service Representative I positions and (\$407,700) to balance program expenditures with revenues. A combination of costs exceeding general fund revenue appropriations for personnel services, IM&S escalation and other factors have steadily increased a funding gap resulting in this cut to rebalance the budget.

Service Impacts

PDX 311's customer service hours would remain 7 days a week, 7 a.m. - 8 p.m. and dispatch would remain 24/7. Eliminating 3 FTE Customer Service Representatives would reduce the program's overall capacity by 36,000 annual contacts. Reduced staffing will have real impacts on community experience and access, increase hold times, shift work to other City staff, and limit 311's ability to expand services.

Currently, the program is not meeting time-to-answer targets and has not been able to hire for positions approved in FY2025-26 to expand constituent service support.

Equity Outcomes and Impact Tracking

PDX 311's customer service hours would remain 7 days a week, 7 a.m. - 8 p.m. and dispatch would remain 24/7. Eliminating 3 FTE Customer Service Representatives would reduce the program's overall capacity by 36,000 annual contacts. Reduced staffing will have real impacts on community experience and access, increase hold times, shift work to other City staff, and limit 311's ability to expand services.

Currently, the program is not meeting time-to-answer targets and has not been able to hire for positions approved in FY2025-26 to expand constituent service support.

Community Engagement and Empowerment

Community members who contact 311 will experience longer hold times as a result of this cut.

Federal Compliance Activities

This cut does not impact the program's ability to support the City's federal compliance requirements.

Budget Concept 26426 - Additional funding for elected officials protection services	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This request adds \$1.52 million ongoing to the existing \$1.345 million of General Fund funding for additional elected officials protection services. This \$1.345 million is the combination of two FY 2026-27 budgeted cash transfers from the General Fund to Security totaling \$726,756 and FY 2026-27 interagency agreements with the councilors and the Mayor’s Office totaling \$618,521. This package also recommends these funding sources be consolidated into a single cash transfer from the General Fund to the Security program.

Security would budget this \$1.345 million in a cash transfer from the General Fund account (640020) and appropriate it in a security services account 529200. The General Fund would budget the \$1.345 million in the cash transfer to Facilities Services Fund account (650020).

Service Impacts

The current funding level of \$1.345 million is insufficient to meet the rising volume and sophistication of threats directed at public officials. This funding gap has resulted in a reactive security posture, often leaving gaps in coverage during high-profile community events or off-site meetings. By increasing the budget to \$2.865 million total, the Division can transition to a proactive, tiered protection model. This includes dedicated personnel for advanced site scouting, real-time threat monitoring, and 24-hour residential security when credible threats are identified. Without this investment, the City risks a critical security failure, potentially compromising the safety of elected officials and discouraging them from engaging in the face-to-face public service necessary for effective governance.

Equity Outcomes and Impact Tracking

Enhanced security is a fundamental component of an equitable democracy. Historically, council members from marginalized backgrounds—including women, people of color, and members of the LGBTQ+ community—face a disproportionate amount of harassment and targeted threats. This funding ensures that all officials, regardless of their background or the controversy of their policy positions, have the same level of protection. By providing a safe environment for diverse leaders to serve, we reduce the "safety tax" that often discourages underrepresented individuals from seeking public office. Success will be tracked by the reduction in unmitigated security incidents and qualitative feedback from Council offices regarding their perceived level of safety during public engagements.

Budget Concept 26630 - CP - COSA DCA 3% Reduction - Analyst Reclass	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept reclasses downward an Analyst III position to an Analyst I, reducing costs by \$33,129. This action will impact the Office capacity to provide project, program and other support services.

Service Impacts

This reduction would impact the capacity of the Office to provide project, program and analytical support to projects. Several transformative projects are occurring in the Service Area related to citywide core services, internal service fund governance, cost allocation and capital improvement projects, as well as the Citywide Asset Management lead by the prior staff in this position. If this reduction is taken, more support from existing leadership, management and staff as well as potentially the use of consultants could be expected in future projects.

30003008 - Analyst III	3.00	\$398,049	\$0	\$206,550	\$635,049
Total	3.00	\$398,049	\$0	\$206,550	\$635,049

Budget Concept 26633 - CP - PDX 311 10% Reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package eliminates 3 FTE Customer Service Representative I positions, 1 FTE Service Dispatch position, and \$479,222 in General Fund ongoing funding (10%), in addition to the 3 FTE already cut to balance the base budget. A total of 7 FTE equates to cutting 20% of staff positions, and this reduction would require ending all customer service at 6pm.

Service Impacts

Eliminating evening service at 6pm represents a 21% reduction in public service hours, during which 311 currently handles 15,000+ annual contacts. Eliminating 6 FTE customer service staff would reduce the program's overall capacity by 72,000 annual contacts. Reducing Dispatch staffing by 1 FTE increases reliance on overtime to meet minimum coverage, resulting in approximately \$16,000 in additional annual overtime costs within Dispatch.

Reduced staffing will have real impacts on community experience and access, increase hold times, shift work to other City staff, and limit 311's ability to expand services.

311 serves the entire City organization. Any reduction in 311's customer service hours will shift calls and work to higher cost teams, such as BOEC, Dispatch, Parking Enforcement, Constituent Services, and Portland Solutions, who would absorb this work less efficiently and at greater expense. These teams often operate with minimal staffing and higher salary positions, meaning costs shift rather than disappear, reducing overall City savings. Higher call volumes will likely divert to BOEC's Non-Emergency Public Safety Dispatch line, answered by 911 call takers. Evening non-emergency hold times—previously reduced by 311's evening hours—would likely increase again

Equity Outcomes and Impact Tracking

Eliminating 311 evening customer service would significantly reduce community access to City support. Residents who cannot call during daytime business hours—often those working multiple jobs, managing caregiving responsibilities, or lacking stable access to phones or internet—would lose a critical point of entry. This reduction also weakens support for priority programs serving houseless community members, including the Mayor's See Care Connect Initiative and City Outreach and Reunification efforts, all of which rely on 311 for timely intake and communication.

The loss of service hours also reduces bilingual language access and limits the City's ability to respond to ADA accommodation requests and discrimination complaints, which frequently arrive outside standard business hours. Overall, the cut diminishes service quality across all Service Areas and narrows the City's capacity to equitably engage and support community members who depend on 311 as their primary connection to City services.

Community Engagement and Empowerment

Eliminating 311's evening customer service hours would significantly reduce community access to essential City services, particularly for residents who cannot call during standard weekday business hours. Evening availability is often the best option for many community members to report issues, request information, or connect with programs – roughly 10-12% of 311's contacts occur after 6pm. Without these hours, residents face higher barriers to reaching the City for time sensitive needs, resulting in delayed service, inequitable access, and a diminished ability for the City to respond effectively to community concerns.

Federal Compliance Activities

Fewer 311 staff increases the likelihood of missed notifications, delayed responses, and unmet compliance timelines. For example, because 311 staff would not be available to take, triage, and route ADA accommodation requests, discrimination complaints, sewer overflow reports, and campsite reports, this cut would reduce the City's ability to meet federal Civil Rights Title II/VI compliance timelines, state and federal environmental quality permit requirements, and the terms of settlement agreements.

It would also reduce 311's ability to notify Portland Solutions, Public Works, and other City teams about urgent issues such as right-of-way hazards, campsites, abandoned vehicles, tree risks, graffiti, park safety concerns, and street maintenance needs. Closing customer service hours shifts all of 311's hazard reporting calls to 311 Dispatchers, resulting the potential need for overtime during high volume periods, like winter weather or emergency events, offsetting projected savings.

Budget Concept 26634 - CP - PDX 311 3% Reduction	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This request cuts 1 FTE Customer Service Representative I, overtime and operational resources, and \$143,767 (General Fund ongoing) for the 311 Program. This cut is in addition to the reduction of 3 FTE Customer Service Representative I positions due to base budget balancing.

Service Impacts

This cut would require closing the 311 Customer Service Center two hours early on weekends (at 6 p.m. rather than 8 p.m.). This would reduce hours available to the community by 6%. Eliminating 4 FTE Customer Service Representatives would reduce the program's overall capacity by 48,000 annual contacts. Reduced staffing will have real impacts on community experience and access, increase hold times, shift work to other City staff, and limit 311's ability to expand services.

311 serves the entire City organization. Any reduction in 311's customer service hours will shift calls and work to higher cost teams, such as BOEC, Dispatch, Parking Enforcement, Constituent Services, and Portland Solutions, who would absorb this work less efficiently and at greater expense. These teams often operate with minimal staffing and higher salary positions, meaning costs shift rather than disappear, reducing overall City savings. Higher call volumes will likely divert to BOEC's Non-Emergency Public Safety Dispatch line, answered by 911 call takers. Weekend evening non-emergency hold times—previously reduced by 311's weekend hours—would likely increase again.

Equity Outcomes and Impact Tracking

Reducing 311 weekend customer service would reduce community access to City support. This reduction also weakens support for priority programs serving houseless community members, including the Mayor's See Care Connect Initiative and City Outreach and Reunification efforts, all of which rely on 311 for timely intake and communication.

The loss of service hours also reduces bilingual language access and limits the City's ability to respond to ADA accommodation requests and discrimination complaints, which frequently arrive outside standard business hours. Overall, the cut diminishes service quality across all Service Areas and narrows the City's capacity to equitably engage and support community members who depend on 311 as their primary connection to City services.

Community Engagement and Empowerment

Reducing 311's weekend customer service hours would reduce community access to essential City services, particularly for residents who cannot call during standard weekday business hours. Without these hours, residents face higher barriers to reaching the City for time sensitive needs, resulting in delayed service, inequitable access, and a diminished ability for the City to respond effectively to community concerns.

Federal Compliance Activities

Fewer 311 staff and reduced service hours increases the likelihood of missed notifications, delayed responses, and unmet compliance timelines. For example, because 311 staff would not be available to take, triage, and route ADA accommodation requests, discrimination complaints, sewer overflow reports, and campsite reports, this cut would reduce the City's ability to meet federal Civil Rights Title II/VI compliance timelines, state and federal environmental quality permit requirements, and the terms of settlement agreements.

This cut would also reduce 311's ability to notify Portland Solutions, Public Works, and other City teams about urgent issues such as right-of-way hazards, campsites, abandoned vehicles, tree risks, graffiti, park safety concerns, and street maintenance needs. Closing customer service hours shifts all of 311's

Budget Concept 26479 - FS - 5% cut concepts	
Budget Concept Type	Magnitude
<i>Reduction</i>	<i>5% Rate Reduction (Non-GF)</i>

Package Description

Concept 3 cuts an array of expenditures that span the Facilities Services Fund and the Fleet Operating Fund. Because both funds have multiple rate models though which expenditures are allocated for cost recovery, each proposed cut has a different financial impact on City bureaus. Applying generic rate model assumptions, however, these cuts are collectively anticipated to create savings of \$800,248 for general fund bureaus (with individual bureaus' savings determined by their existing level of demand and the rate model that applies), and \$1,121,329 in savings for non-general fund bureaus (again, with the savings spread dependent on a variety of factors).

This scenario will also result in a reduction of forecasted revenue to the Water Bureau of \$1,011,521, as the primary cut in Concept 3 is the proposed termination by 7/1/26 of an optional month-to-month lease that Facilities has had with the Water Bureau since 2024 to provide temporary “swing space” for elected officials during City Hall’s remodel, and office space for miscellaneous City staff while Facilities awaits direction on a restack of downtown space and/or an RTO from the Mayor.

The following cuts characterize Cut Concept 3:

- 1) Termination of the month-to-month lease Facilities has with Water Bureau for “swing space” on TPB 5. Savings to Facilities blended rate: \$1,011,521 (\$413k to GF; \$599k to non-GF).
- 2) Cut the contracted security force at Facilities’ Business Center in NW Portland. Savings to Facilities’ hourly rate: \$170,000 (\$85k to GF; \$85k to non-GF).
- 3) Reduce janitorial services to blended rate customers downtown. Janitorial services are likely over-provided given low rates of building utilization. Savings to Facilities’ blended rate rent: \$261,000 (\$106k to GF bureaus; \$154k to non-GF bureaus).
- 4) Reduce EMS in CityFleet’s budget. Savings to CityFleet’s maintenance & repair rate: \$180k (\$85k to GF bureaus; \$95k to non-GF bureaus).
- 5) Cut one FTE in CityFleet (OSS II) and “zero out” funding for another FTE (Welder) that is being held open for an unusual circumstance until mid-FY 2026-27. Savings to CityFleet’s maintenance & repair rate: \$299k (\$111k to GF bureaus; \$188k to non-GF bureaus).

Service Impacts

Service impacts vary based on the proposed cut:

- 1) Low: City Operations teams on TPB 5 will need to move to another floor until their needs are more holistically addressed via a restack (likely TPB 11, which has adequate space for their needs, but fewer offices than these teams desire—a common downtown problem).
- 2) Low: Potential for heightened vandalism at Facilities’ Business Center and thus damage to the fleet equipment owned by Facilities’ O&M team. However, vandalism has notably decreased in the last year.
- 3) Low: Tasks that would be eliminated are those that are not easily noticed (e.g., high-dusting), or those that have questionable value (e.g., day porters in the 1900 Building, which is extremely underutilized).
- 4) Low: CityFleet’s EMS budget pays for everything from legally-mandated responsibilities (e.g., fuel tank inspections) to customer demand-driven costs (e.g., liquid fuel) to internal costs of operating the business (e.g., tool purchases and repairs). While the ultimate focus of the cut is TBD, it is presumed that citywide budget cuts will inherently reduce the number of vehicles being driven by bureaus, and thus customer demand-driven costs, such as fuel usage. Any cuts remaining after bureau demand decreases will be made to training, office supplies, capital tool replacements, and minor tool replacements.
- 5) Low: CityFleet believes it can cut 1 OSS II and still deliver on service levels by achieving more efficiency out of its remaining OSS II staff. CityFleet has had two Welder FTEs for many years, but was forced to go to one person functionally in this role after a catastrophic injury to one of the staff in 2023. Since then, CityFleet has adjusted workflows to manage with one FTE. It is not believed that the injured staff person will return to the role, and CityFleet has been “double-paying” for the FTE since 2023 (by having the FTE in its budget, and by paying the same amount in salary to the Risk fund for disability payments). CityFleet DOES NOT wish to cut the individual’s FTE unless the medical process is complete and it is conclusively determined the individual will not return to their role; it is critical to CityFleet that the role remain open to the individual to return to if they are medically stable and wish to return. However, CityFleet DOES wish to cut the double-payment of salary costs. Thus, the request to retain the FTE authority, but simply “zero out” this FTE’s costs in CityFleet’s budget until more information is known.

Run Date: 2/9/26
Run Time: 1:01:56 PM

Page 2 of 4

Equity Outcomes and Impact Tracking

Equity impacts by proposed cut:

- 1) None forecast
- 2) None forecast
- 3) Janitorial services are provided by Relay Resources. Cuts to services will result in fewer Relay staff who are dispatched to the downtown buildings.
- 4) Depends on activity cut, but none forecast.

Community Engagement and Empowerment

Community Engagement impacts by proposed cut:

- 1) None forecast
- 2) None forecast
- 3) None forecast – Facilities routinely adjusts service levels in the Relay contract as the renegotiation is done annually. The renegotiation for FY 2026-27 will kick off in Spring 2026.
- 4) None forecast.
- 5) None forecast.

Federal Compliance Activities

No element of this cut concept has a known nexus with federal compliance activities.

Budget Concept 26537 - CP - Integrated Security 5% cut concept	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This request cuts \$95,491 from the City Hall security services budget by converting security guards from armed to unarmed. Savings to bureaus from this cut will be in the form of reduced Facilities Services downtown office space blended rental rates. The cost reduction will be in Facilities Services City Hall security services budget, managed by Integrated Security, but not residing in the program's budget.

Service Impacts

This transition implements a tiered security model that optimizes resources while maintaining a secure environment. While general lobby and floor roaming guards will transition to unarmed status, the Executive Protection team and specific allied security officers will continue to remain armed. This strategic retention of armed personnel ensures the continuous safety of City Hall tenants and visitors by providing a high-level tactical response capability if needed. This hybrid approach provides adequate protection to staff and members of the public by combining the approachable presence of unarmed staff with the specialized oversight of armed professionals. Furthermore, new security protocols and enhanced surveillance integration have been put in place to ensure that City Hall remains one of the safest locations within Portland, balancing a welcoming public atmosphere with rigorous, behind-the-scenes safety measures.

Equity Outcomes and Impact Tracking

This change aligns with city-wide equity goals to make public spaces feel more accessible and less intimidating to community members who may have historically negative associations with armed enforcement. By utilizing unarmed personnel for primary public interactions, City Hall becomes a more welcoming environment. Integrated Security will track success by monitoring the frequency and outcomes of de-escalation interventions and conducting quarterly safety sentiment surveys among staff and visitors to ensure that both actual and perceived safety remains high.

Community Engagement and Empowerment

This concept responds to community feedback requesting the demilitarization of public service spaces. It empowers the public to engage with city government in an environment focused on service rather than enforcement. The Security Division will maintain an open feedback loop through the City Hall visitor desk, allowing the community to report their experiences with the tiered security model, ensuring that the public has a direct voice in how their safety is managed.

Federal Compliance Activities

This shift does not impact federal compliance mandates. All security personnel (both armed and unarmed) will continue to meet all state licensing requirements and certifications (e.g., DPSST). The transition ensures the City remains in compliance with internal risk management assessments while reducing the overall liability profile associated with a fully armed general security presence.

Budget Concept 26629 - PB - Add Discretionary Funding

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This request adds \$3,399,583 to the Office of Community Based Police Accountability (OCBPA) budget. This funding will primarily be used to cover the projected tenant improvements and space rent costs associated with new office space. This is a General Fund one-time request to pull resources that would otherwise be budgeted in the Police Oversight System Sub fund of the City-wide Obligations Reserve Fund. OCBPA staff will work with the City Budget Office before General Fund targets are realized for FY 2027-28 to ensure the proper amount of ongoing funding is provided to meet the bureau's needs.

Service Impacts

The funding for this request is already set aside in policy reserves. Moving the funding directly into the OCBPA budget will allow Facilities to proceed with the tenant improvements and rental agreement needed to provide the bureau with dedicated office space outside of the Portland Building.

Equity Outcomes and Impact Tracking

NA

Community Engagement and Empowerment

Office space that provides access to community members who are engaging with the City's Oversight System.

Federal Compliance Activities

Operationalizing the Oversight System is under paragraph 195 of the U.S. DOJ Settlement Agreement. The Oversight System will independently investigate sworn employees and supervisors thereof within the PPB promptly, fairly, and impartially, and impose discipline if determined appropriate by the CBPA, and make recommendations regarding police practices, policies, and directives to PPB with a primary focus on community concerns.

Budget Detail**100 - General Fund**

Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$3,000,000	\$0
Personnel	\$399,583	\$0
Sum:	\$3,399,583	\$0

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$3,399,583	\$0
Sum:	\$3,399,583	\$0

Budget Concept 26650 - PB - 20.0 FTE Authority

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This request adds the following ongoing position authority to the Office of Community Based Police Accountability (OCBPA). (Please note that in some cases these classifications are just placeholders as the exact position does not exist in the classification scale. Similar to Council Operations, these proxy positions will grant the authority to hire at the correct classification once the positions are actually created by BHR):

3.0 Manager 1
 4.0 Navigator
 6.0 Investigator 1
 1.0 Investigator 2
 1.0 Admin Specialist 3
 2.0 Analyst 3
 2.0 Coordinator 1
 1.0 Deputy City Attorney

No new funding is being requested to fund these positions. The General Fund target provided by the City Budget Office will cover the costs associated with these positions.

Service Impacts

Hiring this staff will allow OCPA to begin operations and comply with the voter-approved ballot measure to modify how police oversight is being conducted.

Equity Outcomes and Impact Tracking

NA

Community Engagement and Empowerment

The Community Board for Police Accountability (CBPA) is the independent governing body that, with support from the Office of Community-based Police Accountability (OCPA), makes up the City's newly established Oversight System.

The CBPA will conduct public education on the role of the Oversight System and community members' rights, keeping the community informed of its activities, how to file complaints, and receive input.

The outreach will be conducted in ways that are accessible in terms of language, abilities, and other considerations. Community engagement will include discussions on how to improve police practices and policy, which includes soliciting community input. Educate the public about the processes of the Oversight System and the corrective action goals.

Federal Compliance Activities

Operationalizing the Oversight System is under paragraph 195 of the U.S. DOJ Settlement Agreement.

The Oversight System will independently investigate sworn employees and supervisors thereof within the PPB promptly, fairly, and impartially, and impose discipline if determined appropriate by the CBPA, and make recommendations regarding police practices, policies, and directives to PPB with a primary focus on community concerns.

The OCPA will need staff to fulfill its purpose.

Special Appropriations

Budget Concept 26636 - SA - 3% Reduction

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This 3% reduction concept cuts \$197,617 from Special Appropriations excluding Small Donor Elections and other contractually required programs.

Special Appropriations are budgeted programs that are not tied to a specific bureau and typically support citywide initiatives. These programs are often council initiated and include internal services, external contracts, code mandated activities, and non competitive external grants.

The FY 2026-27 CAL target includes 20 Special Appropriations programs. Of these, four programs are tied to existing contracts or code requirements and cannot be reduced.

Service Impacts

Special Appropriations that are contractually and charter required are not reduced below the CAL target level.

The impact will cut the competitive grant program allocation which will reduce the amount of funds available for Special Appropriations competitive grants to external partners.

The remaining allocation for the competitive grant program will be reimaged by coordinating with the Community Engagement Office, the Grant Makers Group and the Executive Order Impact Team to develop a citywide funding model with a focus on council priorities and District Office funding needs.

Please note that there are also Special Appropriations programs moving into bureaus that are better aligned with bureaus (employee training budgets to BHR) or are under discussion for moving (Columbia River Levee) to bureaus.

Equity Outcomes and Impact Tracking

This budget will be realigned internally to meet the requirements of the Mayor's Executive Order regarding the programming of external funds. The goal is to implement a citywide approach to competitive grants that will focus on council priorities and equitable funding across districts with annual reporting by districts.

Community Engagement and Empowerment

The Grants Management Division will work closely with the Community Engagement Office to develop the competitive grant program and rely on their office to take the lead on community engagement.

Federal Compliance Activities

The Grants Management Division will continue to work closely with the Executive Order Impact Team to ensure the city is in compliance with federal regulations.

Budget Detail

General Fund Overhead	\$0	\$0
Sum:	\$0	(\$197,617)

Budget Concept 26637 - SA - 10% Reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This 10% reduction concept cuts \$658,724 from Special Appropriations competitive grant program.

Special Appropriations are budgeted programs that are not tied to a specific bureau and typically support citywide initiatives. These programs are often council initiated and include internal services, external contracts, code mandated activities, and non-competitive external grants.

The FY 2026-27 CAL target includes 20 Special Appropriations programs. Of these, four programs are tied to existing contracts or code requirements and cannot be reduced.

Service Impacts

Reduction from a competitive grant allocation of \$730,313 to \$71,489. This is a significant cut to funding to our external partners.

Equity Outcomes and Impact Tracking

Impact is a significant reduction to competitive grants to our external partners through the Special Appropriations programs.

Community Engagement and Empowerment

The Grants Management Division will work closely with the Community Engagement Office for community engagement.

Federal Compliance Activities

The Grants Management Division will continue to work closely with the Executive Order Impact Team to ensure the city is in compliance with federal regulations.

Budget Concept 26677 - SA - Small Donor Elections Matching Funds	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This request adds \$900,000 in General Fund ongoing resources for the Small Donor Elections program for matching funds.

Service Impacts

The Small Donor Elections program requires \$2.2 million in funding for the 2026 and 2028 election cycles, to have a reasonable chance of solvency. The program was originally estimated to cost 0.2% of the General Fund, but because it has been underfunded by slightly increasing percentages each year, its ongoing appropriation amount of approximately \$1.3 million is only about 0.13% of the General Fund, a 41% shortfall.

In FY2025-26, with a CAL target of \$1.31 million, the Portland Elections Commission had to cut the amount of matching funds available to candidates from 100% of the statutory amount to 35%. The Commission was later able to partially restore match caps (raising them from 35% to 50%) after Council added \$825,525 of one-time funds to the program’s FY2025-26 budget.

Match caps are set by statute to ensure that, when combined with the private funds campaigns can realistically raise, candidates have enough resources to run competitive campaigns in the current campaign finance environment. If the program’s match caps are cut significantly – including the current 50% cut – the program’s ability to achieve its purpose is severely impaired.

See the Equity Outcomes section for the program’s purpose.

Equity Outcomes and Impact Tracking

The purpose of the Small Donor Elections program is “to prevent corruption, and the appearance of corruption, caused by the real and perceived coercive influence of large financial contributions on candidates' positions and on their actions, if elected to office.”

The program can only fulfill its purpose if participating candidates are able to raise enough to run a competitive campaign using small contributions and matching funds alone. This structure makes elected leaders accountable to all Portlanders – not just large political contributors – and increases public’s trust in Portland’s democracy and government.

Without the additional \$900,000, the program will remain 41% underfunded and must continue to operate with a 50% reduction to match caps. At this level, candidates cannot raise enough to mount a competitive campaign and the program cannot achieve its intended purpose.

The Portland Elections Commission publishes longitudinal data on metrics of Portland’s democracy and the program’s performance – including equity metrics – in its biennial report, available on the program’s website. Some of this information can be found in real time on the program’s public dashboard.

Community Engagement and Empowerment

The experts on the Portland Elections Commission developed the \$2.2 million estimate of required funding in FY2025-26 through FY2028-29, to give the program a reasonable chance of solvency for the 2026 and 2028 elections. It is a conservative estimate. Even with the additional \$900,000, match caps may still need to be reduced – though not to a level that would prevent the program from achieving its purpose.

Voters approved a Charter amendment requiring the Portland Elections Commission to annually inform the Mayor and Council of the funding the Small Donor Elections program needs to be solvent. The Charter also requires the Portland Elections Commission to collectively reflect the diversity of the city. The Commission holds monthly open meetings at which the program required funding level is reviewed and updated.

Budget Concept 26682 - SA - Portland Metro Levee Systems (PMLS)	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

Package Description:

The requested budget of \$200,000 would close the Program's estimated budget gap for FY27. The remaining amount of estimated expenses would be covered by one-time discretionary funds that were allocated by Council in previous years into a policy set-aside to be used in future years to advance critical City interests related to the Portland Metro Levee System (PMLS), including the U.S. Army Corps of Engineers' (USACE's) congressionally funded PMLS Project. This Project will have significant impacts on diverse City assets, resources, residents, and regional economic stability. The Project is required for federal recertification of the local levee system, and that recertification is essential for continued development and redevelopment within the managed floodplain. Sustained, significant City staff work through the design and construction of this Project, expected to conclude in FY33, is needed to ensure the Project is aligned with City requirements and priorities. The total estimated budget needs for the Program for FY27 are \$1.2 million, in line with the \$1.2 million requested for FY26 for City work on the PMLS Project. The \$1.2 million would cover the expected costs for the City to effectively participate in and influence the USACE's planned design work on its PMLS Project in FY27, including Citywide project management and City staff and consultant time spent on design planning, coordination, and milestone design reviews for design work led by USACE and the Project's Nonfederal Local Sponsor, the Urban Flood Safety and Water Quality District (District) that manages the local levee system.

The bureaus that are expected to need to engage most significantly in FY27 to protect their mission-driven interests are Portland Bureau of Transportation, Portland Parks and Recreation, Portland Bureau of Environmental Services, Portland Permitting and Development, and Portland Water Bureau, but note that the proposed budget for the Program will only cover the costs for non-ratepayer-funded bureaus. Ratepayer-funded bureaus are proposed to continue covering their own staff costs on the Project through ratepayer revenue in FY27. Program staff note that there is significant uncertainty about USACE's ability to meet its currently ambitious project schedule for FY27. There is also significant uncertainty about the likelihood and extent of any reimbursement by the District for City staff time on the project. Due to these uncertainties, there is also uncertainty about whether there will ultimately be a \$200,000 funding gap for the PMLS Program for FY27. Program staff believe it would be reasonable for City Council to wait to consider the extent of any funding gap and how to close it during the Fall 2026 TAO process.

Service Impacts

All components of this request serve to strengthen the Portland Metropolitan Levee System's protection of lives, property, and critical infrastructure within the managed floodplain in line with federal standards. Supporting City staff time, related consultant support, and City project management on the PMLS project helps ensure that the project moves forward, meets City requirements, and aligns with City interests. The potential consequences of not funding this work include the Corps' project not aligning with City requirements, interests, and long-standing goals for the area, not meeting community expectations, and not being completed in a timely manner. The existing PMLS is structurally vulnerable during high water, and unless the PMLS can be improved to better protect lives and property in compliance with current federal levee standards, the levee system will be ineligible to achieve FEMA accreditation. Loss of FEMA accreditation or would put all of the properties behind the levees into the mapped floodplain. If this happened, a string of significant, adverse economic consequences would ensue for the Portland community.

Additional detail about impact of loss of FEMA accreditation of the local levee system: If the levee system lost federal accreditation, then local governments with land use authority like the City of Portland would have to implement new and onerous development standards in the area, as it would no longer be mapped by FEMA as a protected area with reduced flood risk. This would lead to various development constraints that would make development practically and economically infeasible in the area. In addition, properties behind the levees would be mapped into the floodplain by FEMA, and then many property owners would be required to purchase NFIP or private flood insurance without subsidized rates. There would also likely be a decrease in property values in the area and associated reduced revenues to public entities. For these reasons, the City and our partners must continue to make progress toward levee certification and accreditation; as long as the region is making good progress toward this end, FEMA is holding off on starting the next accreditation cycle.

Equity Outcomes and Impact Tracking

Flood risk affects disproportionately impacts lower-income communities, and the PMLS Project will reduce flood risk in the Columbia Corridor.

- The history of Vanport, the 1948 flood, and the displacement caused by the flood—especially for the Black population of Vanport—are inequities our region is still struggling to address. There are many examples that show that flood loss disproportionately affects lower income populations, especially lower-income BIPOC communities. The most vulnerable residents are the least equipped to deal with emergency situations and have the hardest time recovering. For that reason, the Corps prioritized reducing the potential for life loss and improved evacuation times in their evaluation and recommendations for the PMLS Project, and they have included non-structural elements to augment flood risk education and improved awareness of evacuation routes in the managed floodplain.
- The PMLS project will reduce the risk of flooding in the former Peninsula Drainage District No. 2 (PEN2) basin, which is one of the most populated areas in the system, including some low- and fixed-income residents. Through their recommendations, the Corps has focused on addressing the risk of cascading failures beginning at the railroad embankment as we saw in 1948, as well as the risk of overtopping in that basin, both of which have the greatest risk for the people in the lowest lying areas, like the residents of the Fox Run RV Park.
- Additionally, the PMLS Project study will help to shore up a levee system that protects over 59,000 jobs, including warehouse, shipping, and manufacturing jobs, many of which provide on-the-job training and advancement opportunities for people without college degrees.

Levee system recertification has an equity nexus; unsubsidized flood rates that would result from a de-certified levee system would disproportionately impact low-income residents.

- The PMLS Project addresses multiple weaknesses in the PMLS that will need to be addressed to recertify the levees. Property owners—residential, industrial, and commercial—behind accredited levees have access to low-cost flood insurance through FEMA’s National Flood Insurance Program. Behind accredited levees, flood insurance is generally voluntary. Without accreditation many property owners would be required to purchase flood insurance at unsubsidized rates, affecting lower-income residents the most.

City engagement with the Corps’ PMLS project is expected to help protect or enhance environmental resources and public facilities and infrastructure for the benefit of historically underserved communities living in the vicinity of the Corps’ PMLS Project.

- A higher concentration of BIPOC communities reside in the floodplain protected by the PMLS compared to many other areas of the City. PBOT, PPR, and PPD’s active participation in the planning and design of the Corps’ PMLS Project will promote compliance with local development requirements and alignment with City interests for the benefit of those communities and the broader City. City involvement is expected to help protect existing environmental resources, parks, and green spaces and upgrade streets, sidewalks, and trails within the project footprint.

Community Engagement and Empowerment

The District is the Nonfederal Local Sponsor of the PMLS Project and is solely responsible for community engagement on the Project. With that said, because the City has significant experience and expertise in engaging the Portland community on major transit projects, including in the Columbia Corridor, City staff (particularly PBOT staff) regularly offer the District its perspective and recommendations on effective engagement with the community regarding the Project.

Federal Compliance Activities

This is a federally authorized and funded Project. The Project’s official sponsors—USACE and the District—are responsible for ensuring the Project complies with federal requirements.

Budget Concept 26684 - CP - BTS - Data Platform Services	
Budget Concept Type	Magnitude
Realignment	Current Revenue Forecast (Non-GF)

Package Description

This concept funds 3.0 FTE and \$893K in the Bureau of Technology Services for the data services platform and tools associated with the Data and Privacy Office.

This concept funds the software platform, staff, and materials and services to support the Data and Privacy Office. The desire for a realignment of resources will be effectuated by allocating the costs of the Data Services and Tools Concept to bureaus without appropriating additional resources (requiring them to internally realign resources for the increase in rates without additional revenues). The cost recovery plan would be for realigned resources to be incorporated into the Data Services rate model, which uses a three-year average of FTE to allocate costs to partner bureaus.

MEMORANDUM

To: City Administrator Raymond Lee III

From: Deputy City Administrator Donnie Oliveira

Re: Community & Economic Development Gap Closing Concepts

The Community and Economic Development Service Area (CEDSA) focuses on economic development, urban development, housing, climate, arts and culture, spectator venues, and children and families. The CEDSA bureaus rely on a variety of funding sources, including a relatively small portion of General Fund as well as dozens of additional sources, many of which are dedicated toward addressing specific City and community priorities. With over 70% of CEDSA's budget going directly to community via grants, loans and similar programs, we work to ensure Portland's future is resilient, sustainable, and prosperous.

Since the Mayor's guidance was issued on November 21, the Community and Economic Development bureaus have been working to build a fiscally responsible budget plan. In developing cut scenarios this year, bureaus prioritized realistic, implementable reductions that align with legal requirements, Council and Mayoral priorities, and community needs.

This memorandum highlights proposed concepts to close service level funding gaps, General Fund reduction targets, and other key considerations for review and discussion.

Portland Permitting & Development

Development permitting activity in Portland has been impacted by high interest rates, low investor confidence, negative public perception of Portland, and declining market value for existing buildings since the pandemic. PP&D revenues have declined substantially in recent years due to low development levels, which are expected to continue into FY 2026-27 and beyond. While PP&D has decreased expenditures through workforce reductions, both natural attrition and layoffs, budgeted expenditures still outweigh projected revenues by approximately \$6.2 million in FY 2026-27.

To close this gap, PP&D has put forward options that address both expenditures and revenues. These options include reducing FTE, further drawing on remaining contingency, implementing fee increases, or Council choosing to allocate alternative revenue sources such as General Fund. A combination of options is viable.

The City of Portland is committed to providing meaningful access. To request translation, interpretation, modifications, accommodations, or other auxiliary aids or services, contact 311 (503-823-4000) for Relay Service & TTY: 711

In October 2025, the Tree Regulation Program was transferred from Parks to PP&D. Since that time, PP&D has been working to understand the funding levels necessary to continue prior years' service levels for the program and has identified an annual shortfall of approximately \$2.9m to achieve those service levels. This shortfall is included in the \$6.2m shortfall discussed above. Options to close the funding gap include reducing FTE, which would require a reduction in service expectations and/or changing compliance policies in need of regulations, or drawing on funding from other sources, such as Parks' allocation of PCEF if eligible, in order maintain prior service levels.

Prosper Portland

In the three years since Prosper Portland's Board approved its [Financial Stability Plan](#) (FSP) in 2023, the Board and City Council have approved measures to sustain operations and programs through increased General Fund, creation of the Strategic Investment Fund, and adoption of seven new TIF districts that provided a foundation for future funding and programming to help implement Advance Portland. However, General Fund reductions in the FY 2025-26 budget and declining property values in several of the new TIF districts present decreases to the current year budget, as well as potential longer-term impacts to implementing the FSP and future projects and programs. The General Fund allocation for FY 2025-26 resulted in a 22% decrease in ongoing General Fund. Part of the programming was maintained in FY 2025-26 through \$2 million in one-time resources that are expiring on June 30, 2026.

Organizational efficiencies can help offset some of the reductions caused by the \$2 million one-time expiration. However, as proposed, the expiration of the \$2 million one-time funding and the additional 3% (\$340,000) and 10% (\$1,100,000) reduction scenarios substantially reduce current service levels for workforce partner funding programming and for the Inclusive Business Resource program. With these concepts, programming is maintained for the Business Advancement Team, Office of Small Business, Neighborhood Prosperity Network, and Small Business Lending and Asset Management programs.

Prosper is requesting to restore \$2.1m in on-going resources to advance the Storefront Support Program, as presented to Council in February 2026. This includes \$1m for citywide grants, \$500,000 for event grants, and \$600,000 for the Office of Small Business. An additional \$500,000 would support 2.0 FTE in PP&D to provide navigation services to small businesses.

Portland Housing Bureau

The Portland Housing Bureau (PHB) has not identified any current service level funding gaps. As most of PHB's General Fund – a minor proportion of the overall budget - is used to support administrative and operational functions, reductions to achieve the 3% (\$390,976) and 10% (\$1,223,593) targets were identified in these areas, with support from other funding sources where available.

As previously disclosed to Council, approximately \$106 million of PHB resources has been identified as previously unbudgeted housing funds. PHB looks forward to working with Council and supporting Council deliberations and decision-making about these funds.

Bureau of Planning and Sustainability

The Bureau of Planning and Sustainability (BPS) faces current service level funding gaps in the Planning, Climate, Community Technology and Internal Services divisions, four of five divisions where general fund is applied. Generally, these divisions solved the funding gap by cutting FTE or backfilling with other

funding sources such as grants. For budget reductions, the bureau is putting forth 3% and 10% cuts totaling \$406,297 and \$1,506,636, respectively in the aforementioned divisions.

The Graffiti Program requests \$970,330 of general fund ongoing to maintain service at a level lower than FY 2025-26 but similar to that provided in recent years with one-time resources. This would bring the ongoing total to \$1.9m annually. Without these requested resources, a lower base funding level would result in reducing existing support for volunteer cleanup efforts, staffing levels, and the amount of graffiti the program can directly abate at no cost to businesses and residents.

On October 13, 2025, the Mt. Hood Cable Regulatory Commission (MHCRC) passed a resolution recommending that the member jurisdictions withdraw or dissolve the MHCRC by June 30, 2026. This decision is prompting a series of technical changes in BPS's budget.

The Office of Arts & Culture

Work is underway at the Office of Arts & Culture as the City prepares to take over operational oversight of the P's venues from Metro by June 30, 2027. Recognizing the increased effort of this highly complex process over the next two years, Arts & Culture is requesting additional staff capacity. The Office has submitted an add package of \$400,000 of one-time GF funding for a dedicated, limited-term Transition Manager (Analyst IV) to support the transition of Portland's Centers for the Arts operations. The Office has met the 3% (\$112,015) and 10% (\$373,384) reduction targets by reducing event sponsorships by 5-10 sponsorships for arts and culture events and cutting approximately 45-55 small grants to artists, respectively.

Budget Concept 26253 - DX - Restore Arts and Culture Double Cut	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

During FY 2025-26, bureaus were directed to reduce ongoing General Fund resources by 8 percent. That reduction was applied to the Office of Arts & Culture by Vibrant Communities staff. During the subsequent budget transition to the Community & Economic Development service area, the reduction was inadvertently applied a second time, resulting in a total reduction of 16 percent.

During the Fall TAO, \$357,000 was added back as one-time General Fund funding, but this did not correct the ongoing reduction. This decision package restores \$357,000 in ongoing General Fund resources so the Office of Arts & Culture can maintain its current service level.

Service Impacts

Arts & Culture relies on ongoing General Fund support for grantmaking to individual artists and small arts organizations, sponsorships of art activations and cultural events, and the management and maintenance of the City’s public art collection. Without this restoration, the Office would need to reduce grant awards and scale back program activities to match the reduced ongoing funding. It would also leave the Office of Arts & Culture with a disproportionate reduction in ongoing General Fund resources because the cut was applied twice.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

The restoration of ongoing General Fund resources supports the Office of Arts & Culture’s ability to advance equitable access to arts funding across Portland. These resources help ensure that community based arts programs and individual artists, particularly those historically underrepresented or operating with limited resources, can continue to participate in City supported opportunities without disruption resulting from unintended funding reductions.

Community Engagement and Empowerment

The Office of Arts & Culture’s vision is to place arts at the center of public life for all Portlanders, with most of its work directly supporting community participation through grants to individual artists and arts organizations, sponsorships of art activations and cultural events, and investments in public art throughout the city. For context, \$357,000 is equivalent to approximately 72 grants awarded to individual artists and small arts organizations through Arts & Culture’s Small Grants Program, helping sustain community-based activities across Portland.

Sum:	\$0	\$357,000

Budget Concept 26264 - DX - DCA Office CSL Add Request

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>Current Level of Service</i>

Package Description

This package seeks additional funding to sustain current service levels necessary to effectively meet service area needs in the Deputy City Administrator's Office. Required internal costs for operating the office increased by 309% which is far less than the 2.65% increase in the current appropriation levels of General Fund provided. This request is for \$221,756.

If funding is not received, bureaus of the service area would need to contribute a portion of their revenues to fill the existing gap.

Service Impacts

If funding is not received, bureaus of the service area could be asked to contribute a portion of their revenues to fill the existing gap. This could provide less funding towards programs in each bureau, but it is hoped that by dividing across multiple bureaus that this impact will be lessened.

It is desirable to coordinate these increased DCA Office costs with an internal service area overhead model with the enterprise efficiencies realignment, though the realignment plans have not solidified enough to be able to include that at the time of submission.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Insufficient funding to the DCA Office would primarily affect administrative and coordination functions that support programs across the Community & Economic Development Service Area. A reduction in administrative services would strain the office's ability to provide timely support and assistance to programs and bureaus within the service area, many of which are responsible for implementing plans and initiatives designed to advance equitable outcomes. Reduced capacity could slow coordination, reporting, and internal support functions, potentially affecting the consistency and effectiveness with which these programs are able to carry out their equity-focused work.

Community Engagement and Empowerment

The DCA Office supports community engagement and empowerment by providing administrative and coordination support to programs and bureaus within the Community & Economic Development Service Area that deliver services directly to the public.

Federal Compliance Activities

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$221,756)
Sum:	\$0	(\$221,756)

Budget Concept 26445 - DX - A&C - 3% Event Sponsorship Cut

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>3% Reduction</i>

Package Description

This package will reduce the GF appropriations for the Arts & Culture Program by 3% or \$112,015 in adherence to the current budget guidance. The impact of this cut will be offset by cutting 5-10 sponsorships for arts and culture events.

Service Impacts

Arts and culture event sponsorships typically range from \$10,000 to \$25,000 each. A \$112,015 reduction would eliminate approximately 5-10 community event sponsorships, directly reducing the number of arts and cultural experiences available to Portland residents.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Because sponsorships often support free or low-cost events and programs led by nonprofit, community-based organizations, and culturally specific organizations, this reduction would limit access to arts and cultural programming for communities that face barriers to participation.

Community Engagement and Empowerment

Arts and culture sponsorships support highly visible, community-centered events such as book and film festivals, temporary public art installations like the Coraline Cat Trail, and free summer concert series. These events create accessible entry points for residents to engage in public life, activate public spaces, and foster a sense of belonging. They also support broader economic development goals by driving foot traffic to local business districts and encouraging direct community investment.

Reducing funding for these sponsorships would limit the City's ability to support events that bring people together in shared public experiences and reduce opportunities for community engagement, cultural participation, and neighborhood-level economic activity.

Federal Compliance Activities

Arts and culture event sponsorships are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Detail**100 - General Fund**

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$112,015)
Sum:	\$0	(\$112,015)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$112,015)
Sum:	\$0	(\$112,015)

Budget Concept 26446 - DX - A&C - 10% Small Grants & Sponsorships cut

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package implements a 10% reduction (\$373,384) to the Arts & Culture Program's General Fund appropriations. The reduction is distributed across two primary areas: a 7% decrease in outgoing small grants (\$261,369) and a 3% decrease in sponsorship funding (\$112,015).

Service Impacts

Grants through Arts & Culture's Small Grants Program range from \$500 to \$5,000 each, with most grants awarded in the \$4,000 - \$5,000 range. A 7% reduction (\$261,369) to the Small Grants Program would result in approximately 45-55 fewer grants awarded to artists, in turn resulting in 45-55 fewer publicly accessible performances, exhibits, or other works of art available to the community. This reduction would significantly limit the program's ability to support arts activations, community events, and related economic activity, including downtown foot traffic.

Arts and culture event sponsorships typically range from \$10,000 to \$25,000 each. A 3% cut (\$112,015) would eliminate approximately 5-10 community event sponsorships, directly reducing the number of arts and cultural experiences available to Portland residents.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

GF funded Small Grants support individual artists, art collectives, and arts-focused businesses, with an emphasis on diversity, accessibility, and community impact. A 7% reduction would disproportionately affect artists and communities that rely on small-scale grants to produce publicly accessible work, further limiting equitable access to arts and cultural participation across Portland. Small Grants to non-profit arts organizations that provide access to high-quality arts experiences to K-12 students would continue to be funded through the Arts Access Fund.

A cut to sponsorships would impact free or low-cost events and programs led by nonprofit, community-based, and culturally specific organizations, limiting access to arts and cultural programming for communities that face barriers to participation.

Community Engagement and Empowerment

This cut proposal reduces funding for arts grants that support community-facing performances, exhibits, and other works of art available to the general public. While the cut does not reduce direct City-delivered services, it reduces community-facing cultural resources that contribute to community pride, activation of public spaces, cultural tourism, and support for local businesses.

Reducing funding for these sponsorships would limit the City's ability to support events that bring people together in shared public experiences and reduce opportunities for community engagement, cultural participation, and neighborhood-level economic activity. Arts and culture sponsorships support highly visible, community-centered events such as book and film festivals, temporary public art installations like the Coraline Cat Trail, and free summer concert series. These events create accessible entry points for residents to engage in public life, activate public spaces, and foster a sense of belonging. They also support broader economic development goals by driving foot traffic to local business districts and encouraging direct community investment.

Federal Compliance Activities

Arts & Culture's Small Grants Program is in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Detail**100 - General Fund**

External Materials and Services	\$0	(\$373,384)
Sum:	\$0	(\$373,384)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$373,384)
Sum:	\$0	(\$373,384)

Budget Concept 26450 - DX - A&C - Portland'5 Transition Mgr. Add	
Budget Concept Type	Magnitude
Add	Other

Package Description

This package is to add \$261,187 of ongoing GF funding for a dedicated Transition Manager (Analyst IV) to support the transition of Portland'5 Centers for the Arts operations following Metro's discontinuation of management on June 30, 2027, with operations transitioning on July 1, 2027 to the City, a City-contracted venue operator, or a hybrid model. The position will coordinate with Metro's transition team and internal City partners to ensure continuity of operations and minimize service disruption during the transition period.

This position will lead the RFP process to identify new operator(s) and coordinate interdependent workstreams with Procurement, BHR (including labor relations, employee relations, benefits administration, workforce risk and training, HR systems, and classification/compensation), Facilities, Risk, BTS, and Budget/Finance to meet the approximately 18-month transition timeline. Following July 1, 2027, the role will transition into ongoing contract management responsibilities, potentially overseeing multiple venue-related contracts.

Service Impacts

Without a dedicated Transition Manager, the City faces significant risk in coordinating the transfer of operations from Metro, including the transition of 60 full-time staff and 400 part-time staff. Failure to adequately manage this transition could result in service and programming disruptions, delayed or canceled events, and potential temporary building closures at major cultural venues, including Keller Auditorium, Antoinette Hatfield Hall, and Arlene Schnitzer Concert Hall. These impacts would directly affect public access to cultural programming, contractual obligations with performers and promoters, and the City's reputation as a reliable venue operator.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Portland'5 Centers for the Arts provide broadly accessible cultural programming that serves residents across the region and supports a diverse workforce of artists, technicians, and service staff. Disruptions to venue operations could disproportionately affect workers and communities that rely on consistent employment and affordable access to arts and cultural events. Ensuring a smooth transition supports continued access to cultural experiences and employment opportunities that contribute to inclusive economic participation.

Community Engagement and Empowerment

Portland'5 venues play a significant role in community engagement and economic vitality, bringing approximately 800,000 people downtown annually, generating an estimated \$90 million in economic activity, and supporting more than 500 full- and part-time jobs. A well-managed transition helps preserve these community-facing benefits by maintaining uninterrupted programming, supporting downtown activation, and sustaining partnerships with artists, audiences, and local businesses.

Federal Compliance Activities

Denial of this add may introduce indirect compliance risks. Oregon Revised Statutes (ORS) establish requirements governing the transfer of programs from a governmental entity to a nonprofit or another government. Without dedicated staff to coordinate and oversee this transition, the City could be at risk of failing to meet statutory obligations. This request provides the staffing capacity needed to ensure the transition is managed in accordance with applicable ORS and compliance standards.

Budget Concept 26481 - DX - Office of the DCA - Transfer of Position Funding from BPS for Two FTE

Budget Concept Type	Magnitude
<i>Realignment</i>	<i>Other</i>

Package Description

This request will move funding and position authority for two FTEs from BPS to the Deputy City Administrator for the Community and Economic Development Service Area to support ongoing program needs. This transfer formalizes funding for positions that have been working for the DCA Office during the charter amendment transition. The positions will be funded with \$450,056 of ongoing General Fund discretionary resources transferred from BPS.

Service Impacts

This package enhances management capacity and program support within the Office of the DCA – C&ED, strengthening the office's ability to deliver its core responsibilities and maintain continuity of operations. Without this added capacity, the office would face increased constraints in managing workload demands and advancing key program priorities.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

The Office of the DCA oversees programs that directly serve communities across Portland. These programs play a critical role in advancing equitable access to housing, economic opportunity, and cultural resources -particularly for historically underserved communities. By strengthening internal management and program support, this package helps ensure these programs are delivered consistently, responsively, and with an equity-centered focus.

Community Engagement and Empowerment

The Office of the DCA provides internal management and administrative support that enables the coordination and continuity of existing community engagement and empowerment activities. This package supports the office's ability to maintain those functions.

Federal Compliance Activities

This package does not jeopardize compliance of any required activities.

Budget Concept 26247 - PP&D Current Service Level

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This scenario represents the additional resources necessary to maintain currently budgeted services and staffing levels. The scenario assumes 0% fee changes as a baseline. Additional resources needed are currently estimated at approximately \$3,237,649.

Options to maintain current service levels include:

1. Draw on contingency – FY 2026-27 beginning reserve balance is projected to approximately \$11.7 million in the Development Services Fund
2. Fee adjustments – for every 1% increase in fees, this would generate an estimated \$661,823 in additional ongoing revenue, or enough to maintain services of approximately 3 FTE.
3. Additional funding from alternative revenue source(s) – examples: General Fund one-time or ongoing; full interagency support for public infrastructure programs
4. Any combination #1-3

The full funding gap amount will depend on the outcomes of interagency agreement negotiations with public infrastructure bureaus. Once these dollar figures are known, this concept can be updated to reflect those decisions.

Service Impacts

If funding materializes to cover the gap between projected revenue and expenditures, PP&D would be able to maintain current budgeted staffing and services levels. This avoids cuts that would impact permitting and inspection timelines. Extending timelines adds cost to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the city.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Maintaining status quo service levels preserves current equity programming at PP&D and a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. The PP&D culture has become more equipped to address the needs of customers who are Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities.

Community Engagement and Empowerment

Current PP&D staffing and programming include the Empowering Neighborhoods Program which focuses on reaching equitable outcomes for Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities. Customers of this program are assisted with compliance and permitting issues. They typically have received an enforcement letter from the City about work that needs to be completed on their residential or commercial property to bring their property into compliance with building and zoning codes. Maintaining this program keeps the bureau's current level of community engagement and empowerment in place.

Federal Compliance Activities

With this request, federal, state and local code compliance will remain at current levels.

Sum:	(\$3,237,649)	\$0

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	(\$3,237,649)	\$0
Sum:	(\$3,237,649)	\$0

Budget Concept 26248 - PP&D Tree Permitting Current Service Level PCEF

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This scenario represents the amount of additional funding necessary to maintain currently budgeted services and staffing in the Tree Permitting Program. This program was transferred from Parks to PP&D on October 1, 2025. The annual PCEF allocation transferred with the program is insufficient to support the 26 FTE positions that moved from Parks to PP&D. Estimated additional revenues of \$2,941,392 million annually are needed to fully recover costs and fund the program in its entirety.

Service Impacts

Since its transfer to PP&D, the Tree Permitting Program has experienced extended timelines and challenges in meeting service level expectations. Extending timelines adds costs to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the City. This package allows PP&D to maintain services at budgeted levels.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Portland's urban forest is unevenly distributed, and the Parks Bureau's recent Tree Canopy Monitoring Report highlights a decline in overall canopy coverage. Advancing tree equity means ensuring that all neighborhoods and communities have access to healthy, well-maintained trees. The Tree Regulation Program is responsible for administering City regulations that protect the urban forest. These services are provided citywide, both as required by code and in response to customer requests. Through ongoing equity training, PP&D Tree Regulation staff have strengthened their understanding of the barriers and challenges faced by underserved communities, improving their ability to support residents more effectively. Without sufficient funding, the program's capacity to engage in this work will be impacted.

Community Engagement and Empowerment

Maintaining currently budgeted service levels keeps current levels of community engagement in place. Should service levels be cut, the program's capacity to engage communities would be put at risk.

Federal Compliance Activities

With this request, federal, state and local code compliance will remain at current levels.

Budget Detail

203 - Development Services Fund

Expense	One Time Cost	Ongoing Cost
Contingency	\$0	(\$2,941,392)
Sum:	\$0	(\$2,941,392)

229 - PDX Clean Energy Community Benefits Fund

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$2,941,392)
Sum:	\$0	(\$2,941,392)

Budget Concept 26417 - PP&D Transportation Review Program Reduction

Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

This scenario represents the cuts necessary to bring expenditures in line with revenues for the Transportation Review Program. The Transportation Review Program transferred to PP&D on July 1, 2024. Fees were not set at cost recovery while they were at PBOT and remain below cost recovery today. The interagency agreements were put in place with the expectation that the funding would supplement fee revenues to fully support the program. Full interagency support has not happened. This scenario assumes interagency agreements (both revenue and expense) related to this program are ceased and the program is solely supported by fees and charges for services. PP&D would need to eliminate 5 budgeted positions, all of which are vacant at this time. The estimated savings generated from this concept is \$834,604. Alternatively, should full staffing be maintained, PP&D would need to increase fees by 42% to fully close the gap in FY 2026-27.

Service Impacts

PP&D is proposing to eliminate vacant positions to close the budget shortfall to minimize service impacts in FY 2026-27. However, this program is currently understaffed and unable to meet customer service expectations. Eliminating vacant positions would leave the program unable to staff up to meet customer demand/service expectations if City and bureau leadership were to decide to hire.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

By eliminating vacant positions instead of filled positions, PP&D is able to maintain current equity programming, and avoid reductions to a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. Transportation infrastructure is significantly lacking or below standard in many areas of the City with high socio-economic and racial diversity. The work of the development staff in this program help ensure development in those areas contribute to the local transportation needs within the constraints of City code.

Community Engagement and Empowerment

By eliminating currently vacant positions PP&D is minimizing any impacts to community engagement.

Federal Compliance Activities

PP&D performs work to meet several state and local statute and code requirements. The elimination of vacant positions does not change the statutes and code requirements or impact the bureau's capacity to meet the code requirements in a timely manner.

Budget Concept 26422 - PP&D Tree Permitting Program Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

This scenario represents the cuts necessary to bring expenditures in line with currently budgeted revenues for the Tree Permitting Program. This program was transferred from Parks to PP&D on October 1, 2025. The annual PCEF allocation transferred with the program is insufficient to support the 26 FTE positions that moved from Parks to PP&D. The estimated savings generated by this concept is \$1,794,656. PP&D would need to eliminate 12 positions, 6 of which are filled and 6 vacant.

Service Impacts

The elimination of 10 positions within Portland Parks & Recreation from the Tree Regulation Program in the FY 2025–26 Approved Budget has increased wait times for non-development permitting and compliance inspections from 2 weeks in June 2025 to 7 weeks in January 2026. This has resulted in increased applicant/customer complaints and non-compliance with Title 11 (Tree Code). If an additional 12 positions are eliminated, there would be significant delays to any non-mandated timelines, inability to effectively implement Title 11 (Tree Code) requirements, increases in non-compliance with Title 11, and eliminate resiliency in the program’s responsibilities in the event of staff absences.

Within this package, four of the six filled positions eliminated are within the Compliance section. Tree replanting verifications would cease, the investigation of dead, dying, dangerous trees, work done without tree permits and improper tree work would be transferred to the Non-Development section staff. Non-development permitting (tree removal and replanting, tree pruning, root pruning, tree attachment including ornamental lighting, and chemical application) would be further delayed. All work would need to be prioritized, which may result in perceived permitting inequities, increased customer complaints and non-compliance with Title 11.

The remaining two of the six filled positions proposed to be eliminated are within the Intake, Support and Analysis section. This would result in delays in response to and routing of inquiries/complaints from the 823-TREE phone line and Trees email address, which is currently 2 days. 15-minute appointment times for tree permitting questions may be restricted, resulting in reducing customer service. With the Business Systems Analyst (BSA) position elimination, performance metrics required by the recently adopted Urban Forest Plan would be restricted to the current PP&D Dashboard for development permitting reviews and eliminate any advancement in capturing geographic urban tree canopy data via TreePlotter due to tree removal and replanting permitting. Additionally, the BSA tracks the Program’s fee recovery for capital improvement projects and interagency agreements and implementing AMANDA7 revisions for permitting streamlining.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Insufficient funding and staffing for Portland’s tree permitting, regulation, and enforcement program would directly undermine the City’s stated equity commitments. 2035 Comprehensive Plan, Portland Climate Action Plan, and Urban Forest Management Plan all recognize that tree canopy is not distributed evenly across the city. Neighborhoods with higher proportions of low-income residents, renters, and communities of color, particularly in East Portland, experience significantly lower canopy coverage and higher exposure to extreme heat. These same policy documents commit the City to reducing these disparities. When the regulatory system lacks the capacity to track removals, enforce mitigation, or ensure compliance with Title 11, the result is predictable: tree loss accelerates most in the very neighborhoods the City has pledged to prioritize.

Under-resourcing the program also weakens the City’s ability to uphold equitable access to environmental benefits, a principle embedded in Portland’s Equity Goals and Strategies and the Racial Equity Roadmap. Trees are not merely aesthetic amenities; they are public health infrastructure. They reduce heat-related illnesses, improve air quality, and provide psychological and social benefits. When enforcement is inconsistent or delayed, wealthier property owners and developers are better positioned to navigate the system, pay penalties, or replace trees on their own. Meanwhile, lower-income communities—already facing disproportionate environmental burdens—are left with fewer protections and fewer opportunities to benefit from canopy growth. A weak enforcement system effectively widens the gap between neighborhoods with resources and those without.

Community Engagement and Empowerment

Inadequate staffing limits the City's ability to conduct outreach, education, and technical assistance in communities that have historically been excluded from planning processes. Portland's equity policies emphasize culturally responsive engagement and the removal of structural barriers. Yet without sufficient personnel, the tree program cannot meaningfully support residents who may not be familiar with permitting requirements, who face language barriers, or who need help navigating the process. This leads to unintentional violations, frustration, and a sense that the system is inaccessible, conditions that run counter to the City's equity commitments.

Insufficient funding erodes public trust. Portland's equity framework stresses transparency, accountability, and fair treatment across all communities. When violations go unaddressed, when mitigation is not verified, or when permit reviews take excessively long, the system appears arbitrary. Communities that have historically experienced underinvestment are often the first to notice when government systems fail to deliver on promises. A poorly resourced tree program risks reinforcing perceptions that environmental quality and public services are unevenly protected across the city.

Predictable and consistent enforcement benefits not only the environment but also residents, developers, and businesses. Clear permitting pathways reduce delays, improve compliance, and create a level playing field. When staff have the capacity to educate applicants, conduct timely inspections, and follow through on enforcement actions, the system becomes more transparent and trusted. Investing in this program is not merely an environmental choice; it is a governance choice that strengthens accountability, supports sustainable development, and aligns Portland with both state mandates and its own long-standing values.

Federal Compliance Activities

A well-funded and fully staffed tree permitting, regulation, and enforcement program is essential for the City of Portland to meet its own environmental, climate, and livability commitments. Portland's urban forest is recognized in Title 11 of the Portland City Code (Tree Code) as a vital public asset that provides stormwater management, heat-island reduction, air-quality improvement, and neighborhood character. Title 11 explicitly states that the City's policy is to "protect and enhance the urban forest" and to manage trees as a shared resource across public and private property. Yet these goals cannot be met without the personnel and financial capacity to review permits, monitor compliance, and enforce regulations consistently. Under-resourcing the program undermines the very outcomes the Tree Code was designed to achieve.

Oregon state law reinforces this responsibility. Statewide Planning Goal 6 (Air, Water, and Land Resources Quality) and Goal 5 (Natural Resources, Scenic and Historic Areas, and Open Spaces) require local governments to conserve natural resources and protect environmental quality. Trees are explicitly recognized in local inventories and natural resource overlays as resources that contribute to watershed health, wildlife habitat, and climate resilience. Portland's compliance with these statewide goals depends on its ability to administer a functioning regulatory system, one that can evaluate tree removal proposals, ensure mitigation is properly implemented, and prevent unlawful cutting. Without adequate staffing, the City risks falling short of its obligations under Oregon's land-use framework.

The City's own climate and equity policies further underscore the need for a robust tree program. The Portland Climate Action Plan, the 2035 Comprehensive Plan, and the Urban Forest Management Plan all identify tree canopy expansion as a core strategy for reducing urban heat, improving public health, and addressing disparities in East Portland and other historically underserved neighborhoods. These policies call for increasing canopy to 33 percent citywide, a target that cannot be met if tree loss from development and private removal continues unchecked. A well-resourced permitting and enforcement team is the mechanism that turns these policy commitments into real-world outcomes, ensuring that mitigation plantings occur, that heritage trees are protected, and that violations are addressed promptly and fairly.

Budget Concept 26425 - PP&D Current Revenue Forecast

Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

This scenario represents the cuts necessary to bring expenditures in line with the current revenue forecast, assuming no fee changes or alternative revenue. The total savings generated by this concept is \$3,377,915. These savings are accomplished through the elimination of 19.0 FTE vacant positions, taken broadly across the entire bureau. This scenario assumes 0% rate increases to PP&D fees. If PP&D were to increase fees by 5% there would be no funding gap and no positions would need to be eliminated.

Service Impacts

PP&D is proposing to eliminate vacant positions to close the budget shortfall to minimize service impacts. Any cuts to filled positions would impact permitting and inspection timelines. Extending timelines adds cost to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the city.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

By eliminating vacant positions instead of filled positions, PP&D is able to maintain current equity programming and avoid reductions to a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. The PP&D culture has become more equipped to address the needs of customers who are Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities.

Community Engagement and Empowerment

By eliminating vacant positions instead of filled positions, the bureau is able to maintain staffing the PP&D Empowering Neighborhoods Program which focuses on reaching equitable outcomes for Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities. Customers of this program are assisted with compliance and permitting issues. They typically have received an enforcement letter from the City about work that needs to be completed on their residential or commercial property to bring their property into compliance with building and zoning codes. Without the staff dedicated to this program the bureau's ability provide these services would be at risk.

Federal Compliance Activities

PP&D performs work to meet several state and local statute and code requirements. The elimination of vacant positions does not change the statutes and code requirements or impact the bureau's capacity to meet the code requirements in a timely manner.

Budget Concept 26427 - PP&D 5% Rate Reduction	
Budget Concept Type	Magnitude
<i>Reduction</i>	<i>5% Rate Reduction (Non-GF)</i>

Package Description

This scenario represents the cuts necessary to bring expenditures in line with a 5% rate reduction level of revenue. These are cuts in addition to those from the current revenue forecast scenario. The total savings generated from this budget concept is \$2,103,023. This concept includes a 13.0 FTE reduction. The savings and FTE reduction from this concept are in addition to the current revenue forecast scenario.

Service Impacts

The cuts proposed in this concept are taken broadly across several programs, resulting in overall staff reductions that would impact permitting and inspection timelines. Extending timelines adds cost to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the city. Impacted by these cuts are the process management team, which acts as a single point of contact for larger development projects, permitting and office support roles for the building program, site development and compliance program inspectors, supervisor positions, and staff supporting the Empowered Communities Program.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

These cuts include reductions to current equity programming at PP&D, and reductions to a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. The PP&D culture has become more equipped to address the needs of customers who are Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities.

Community Engagement and Empowerment

These cuts include staff in the PP&D Empowering Neighborhoods Program, which focuses on reaching equitable outcomes for Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities. Customers of this program are assisted with compliance and permitting issues. They typically have received an enforcement letter from the City about work that needs to be completed on their residential or commercial property to bring their property into compliance with building and zoning codes. Without the staff dedicated to this program the bureau's ability provide these services would be at risk.

Federal Compliance Activities

PP&D performs work to meet several state and local statute and code requirements. The reduction in workforce from these cuts would not eliminate the statutes and code requirements but would impact the bureau's capacity to meet the code requirements in a timely manner.

Budget Concept 26521 - PP&D OSB Permitting Support	
Budget Concept Type	Magnitude
<i>Add</i>	<i>Other</i>

Package Description

Action Item: Implement a dedicated concierge permitting team through PP&D that will work directly with the Office of Small Business to help streamline the permitting process and support businesses as they navigate regulatory requirements. Additionally, expand the support services to include contracted professional architectural guidance, code compliance assistance, commercial tenant support, and site feasibility analysis.

PP&D Funding Request
 PP&D is requesting funds to support two full-time positions dedicated to assisting businesses with permit navigation. These roles will provide direct, hands-on guidance to businesses engaged with Prosper Portland through the Office of Small Business and the Business Advancement Team’s recruitment and retention efforts. Support will also extend to businesses participating in Prosper Portland’s grant and loan programs, as well as other strategic projects and initiatives.

Prosper Funding Request
 Prosper Portland is making a separate funding request to contract with architectural and design services to assist businesses in navigating the permitting process. These services will provide design-related support such as site planning, schematic design, code compliance, and other technical requirements delivered by professional architectural/design firms. Prosper Portland will oversee the design assistance component through its Office of Small Business and will coordinate referrals with PP&D to ensure seamless support.

This funding will also provide small businesses with access to specialized services focused on commercial tenanting and site feasibility, helping to reduce vacancy rates. These services will include site selection aligned with the business’s pro forma, lease review and negotiation support, and construction and space suitability assessments, including occupancy, building use, zoning, and permit requirements. While primarily intended as pre-construction support, businesses may also access additional resources such as digital marketing, AI-driven operational enhancements, human resources coaching, and bookkeeping and accounting support.

Service Impacts

This add package is designed to increase access and improve the experience for businesses seeking support from the Office of Small Business (OSB) for permitting navigation, while also assisting businesses working directly with PP&D that require architectural expertise to complete permitting, design review, or code compliance processes.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Criteria will be developed to prioritize underserved businesses who are unable to pay architectural or development services. All business accessing the Office of Small Business and the support services will be tracked and reported by Prosper Portland. In its first eight months, the Office has served over 600 businesses. It is anticipated that these added services could directly provide 100-200 businesses with permitting support services.

In addition to these outputs, we will also be tracking vacancy rates, private investment and overall performance of businesses districts across the city to measure the impact of these investments.

Community Engagement and Empowerment

The Office of Small Business (OSB) and PP&D maintain regular engagement with business owners across the city. Service needs have been identified through ongoing tracking of requests and challenges reported by businesses to both OSB and PP&D, as well as through direct engagement with Inclusive Business Resource Network partners and individual business outreach.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Sum:	\$0	\$2,941,392

Budget Concept 26254 - Prosper - CSL \$1M Add Back - WF

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>Current Level of Service</i>

Package Description

Consistent with the Budget Note and Budget Note response; Prosper Portland has identified \$2.1 million in reductions through organizational efficiencies and program reductions to adjust to the expiring one-time General Fund (GF) Resources. This package would maintain the GF-funded level of service Prosper Portland provided in FY 2025-26. During the FY 2025-26 budget process, Prosper Portland's ongoing General Fund was reduced from \$14.7 million to \$11.1 million. Of this reduction, \$2 million was added back as one-time funding expiring in FY 2026-27.

1. Organizational Efficiencies and Reductions: \$1.1 million

Consistent with Mayor's Office FY 2025-26 direction and budget note, \$1.1 million of the cut is being addressed via organization-wide efficiencies and reduced positions or positions being held vacant until future funding becomes available and applying those savings to GF programming where applicable. Anticipated position changes include:

- Integrating Recreational Cannabis Tax (RCT) related small business activities and funding into the Inclusive Business Resource Network (IBRN); eliminating one position previously funded by RCT funds; and, allocating associated RCT funds to backfill for a portion of the GF cut.
- Cost savings via reclassifying two vacant project manager level positions to lower classifications supporting IBRN and Neighborhood Prosperity Network.
- Integrating RCT related grant activities into place-based financial assistance team; reducing General Fund allocation to citywide lending and real estate staffing; proportionately reallocating staffing and activities to funding made available by putting holds on two vacancies related to TIF based work.
- Proportionately reducing administrative staffing supporting citywide programming currently funded by General Fund.

Restoration of the \$1.1 million would provide ongoing service levels supporting economic and urban development activities citywide and within newer TIF districts where funding is currently not available or limited. Restoration would also restore funding for full and robust IBRN services (via General Fund and RCT) and maintain organizational support levels at FY 2025-26 levels.

2. Workforce Development Contract Reductions: \$1 million

Current service level funding from General Fund includes \$1.6 million in funding for Workforce Development programs making up 44% of the total funding when complemented by CDBG, Community Opportunities & Enhancements Program funding and Enterprise Zone resources. In addition to Prosper Portland and City resources, Worksystems Inc. receives state and federal funding.

The loss of approximately \$1M of this one-time funding will result in the elimination of adult career coaching services through the Economic Opportunity Program and youth career coaching services through NextGen, all of which is subcontracted through Worksystems Inc.

3. Alternative Add-Back Proposals

Prosper Portland would recommend add-backs in other program offers in lieu of restoring the savings and funding reductions in this package. Specifically, Prosper Portland proposes adding back funds from the above savings and cuts to business retention and expansion and traded sector marketing activities (\$750k) and professional services offered to small businesses through a partnership between Portland Permitting and Development and Prosper's Office of Small Business (\$600k). Access to these third-party professional services would help small businesses with site selection, design, and tenant improvement planning.

Service Impacts

1. Organizational efficiencies and reductions: The restoration of funding related to positions being identified for reduction will provide additional capacity for full implementation of the IBRN program, including with more senior staff able to carry a greater volume of work, and to support project management and relationship management activities in citywide lending and real estate activities where TIF is limited or non-existent, particularly in new TIF districts where TIF resources are delayed.

2. Workforce Development: The restoration of \$1 million in Workforce Development will maintain current service levels (outside any cuts taken in the 3% and 10% scenarios). This will retain access to career coaching for approximately 500 youth participants and 600 adult participants at the following organizations: IRCO, New Avenues for Youth, POIC, PCC, Portland Youth Builders, Central City Concern, Our Just Futures, SE Works, and Trash for Peace.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to all of the objectives in the Advance Portland plan:

- Objective 1: Propel Inclusive Economic Growth and Innovation
- Objective 2: Promote Equitable Wealth Creation
- Objective 3: Foster a Vibrant Central City and Commercial Districts
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

Initial concepts and parameters have been shared with the Prosper Portland Community Budget Committee (CBC) and the Prosper Portland Board of Commissioners (Board); however, the final concepts here have not been shared with the CBC and Board at the time of submittal. Concepts will be further shared with the CBC and Board during budget updates in February and March. The CBC will provide a formal letter providing input on the concepts in April in advance of the City and Prosper's Proposed Budgets.

Direct services impacted include access to workforce development programs for more than 1,100 Portlanders citywide; more limited staffing to build relationships, support community engagement via Community Leadership Committees and working groups, and respond to lending, major projects, and real estate partnership opportunities within new TIF districts.

Federal Compliance Activities

These programs are in compliance with all federal regulations and will continue to be in compliance even if the reduction is taken.

Sum:	\$0	(\$1,033,376)

Prosper Portland

Budget Concept 26457 - Prosper - 3% Cut

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

The Community Workforce Navigator Program (CWNP) is a neighborhood-based initiative to help unemployed and underemployed residents access jobs and workforce development resources.

A \$340,000 reduction to Workforce Development would eliminate three of the four existing Community Workforce Navigator Program positions, reducing participant access from 500 to just 125 individuals. With only one service provider remaining, staff would need to reassess the program's effectiveness and internal capacity to retain the program, which could ultimately lead to its complete elimination. Providers affected include Rosewood Initiative, Division Midway Alliance, Portland Community College (serving the Cully neighborhood), and Urban League, which delivers services citywide.

Service Impacts

Approximately 300-500 individuals would no longer receive workforce support services.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to the following objectives in the Advance Portland plan:

Objective 2: Promote Equitable Wealth Creation

Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

Approximately 300-500 Portlanders would no longer receive workforce support services.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Sum:	\$0	(\$339,917)

Budget Concept 26458 - Prosper - 10% Cut - WF

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

The Community Workforce Navigator Program (CWNP) is a neighborhood-based initiative to help unemployed and underemployed residents access jobs and workforce development resources.

A cut of \$601,000 to Workforce Development would eliminate the CWNP, cutting services to approximately 500 individuals who receive support through CWNP and would also eliminate four workforce provider employees at the community-based organizations that deliver these services. Providers affected include Rosewood Initiative, Division Midway Alliance, Portland Community College (serving the Cully neighborhood), and Urban League, which delivers services citywide.

This concept is associated with a 3% cut for the Community Workforce Navigator Program. The amount in this concept represents the remaining 7% to get to a 10% overall cut proposal.

Service Impacts

More than 500 Portlanders will no longer receive neighborhood workforce support services.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

Reduction	10% Reduction

Package Description

The Inclusive Business Resource Network (IBRN) is a citywide program that brings multiple services for small business into a single network for entrepreneurs. Prosper Portland invests in 15 community-based partners (see list below) who specialize in serving small businesses across all stages and industries. Each year, IBRN serves more than 600 businesses with individualized advising in areas such as strategic business growth, capital access and financial forecasting, industry specific support, regulations and compliance. The program also provides peer-to-peer support, workshops, and access to professional services including legal services, bookkeeping and accounting support, and capital advising.

Community-based partners currently funded through IBRN (FY 2025-26): APANO, Built Oregon, Hacienda CDC, Hispanic Metropolitan Chamber, Livelihood NW, Micro Enterprise Services of Oregon (MESO), Native American Youth and Family Center (NAYA), Neighborhood House, NuProject, NW Native Chamber, PCC Small Business Development Center, Principia Business Law, TiE Oregon, Vibrant Future, Xcelerate Women.

Service Impacts

This cut would result in 175 fewer small business owners receiving services. Loss of funding at this level would eliminate 2 to 3 partnerships from the network, likely resulting in impacts to partner organization staff, and reducing community-based capacity to deliver business advising and technical assistance supports. It is unknown at this time which organizations would be impacted by the funding loss.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to the following objective in the Advance Portland plan:

Objective 2: Promote Equitable Wealth Creation

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

This cut would result in 175 fewer small business owners receiving services. Loss of funding at this level would eliminate 2 to 3 partnerships from the network, likely resulting in impacts to partner organization staff, and reducing community-based capacity to deliver business advising and technical assistance supports. It is unknown at this time which organizations would be impacted by the funding loss.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Budget Concept 26461 - Prosper - CSL \$1.1M Reduction- Org Efficiencies

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

Consistent with the Budget Note and Budget Note response; Prosper Portland has identified \$2.1 million in reductions through organizational efficiencies and program reductions to adjust to the expiring one-time General Fund (GF) Resources. This package would maintain the GF-funded level of service Prosper Portland provided in FY 2025-26. During the FY 2025-26 budget process, Prosper Portland's ongoing General Fund was reduced from \$14.7 million to \$11.1 million. Of this reduction, \$2 million was added back as one-time funding expiring in FY 2026-27.

(1) Organizational Efficiencies and Reductions: \$1.1 million

Consistent with Mayor's Office FY 2025-26 direction and budget note, \$1.1 million of the cut is being addressed via organization-wide efficiencies and reduced positions or positions being held vacant until future funding becomes available and applying those savings to GF programming where applicable. Anticipated position changes include:

- Integrating Recreational Cannabis Tax (RCT) related small business activities and funding into the Inclusive Business Resource Network (IBRN); eliminating one position previously funded by RCT funds; and, allocating associated RCT funds to backfill for a portion of the GF cut.
 - Cost savings via reclassifying two vacant project manager level positions to lower classifications supporting IBRN and Neighborhood Prosperity Network.
 - Integrating RCT related grant activities into place-based financial assistance team; reducing General Fund allocation to citywide lending and real estate staffing; proportionately reallocating staffing and activities to funding made available by putting holds on two vacancies related to TIF based work.
 - Proportionately reducing administrative staffing supporting citywide programming currently funded by General Fund.
- Restoration of the \$1.1 million would provide ongoing service levels supporting economic and urban development activities citywide and within newer TIF districts where funding is currently not available or limited. Restoration would also restore funding for full and robust IBRN services (via General Fund and RCT) and maintain organizational support levels at FY 2025-26 levels.

(2) Workforce Development Contract Reductions: \$1 million

Current service level funding from General Fund includes \$1.6 million in funding for Workforce Development programs making up 44% of the total funding when complemented by CDBG, Community Opportunities & Enhancements Program funding and Enterprise Zone resources. In addition to Prosper Portland and City resources, Worksystems Inc. receives state and federal funding.

The loss of approximately \$1M of this one-time funding will result in the elimination of adult career coaching services through the Economic Opportunity Program and youth career coaching services through NextGen, all of which is subcontracted through Worksystems Inc.

(3) Alternative Add-Back Proposals

Prosper Portland would recommend add-backs in other program offers in lieu of restoring the savings and funding reductions in this package. Specifically, Prosper Portland proposes adding back funds from the above savings and cuts to business retention and expansion and traded sector marketing activities (\$750k) and professional services offered to small businesses through a partnership between Portland Permitting and Development and Prosper's Office of Small Business (\$600k). Access to these third-party professional services would help small businesses with site selection, design, and tenant improvement planning.

Service Impacts

(1) Organizational efficiencies and reductions: The restoration of funding related to positions being identified for reduction will provide additional capacity for full implementation of the IBRN program, including with more senior staff able to carry a greater volume of work, and to support project management and relationship management activities in citywide lending and real estate activities where TIF is limited or non-existent, particularly in new TIF districts where TIF resources are delayed.

(2) Workforce Development: The restoration of \$1 million in Workforce Development will maintain current service levels (outside any cuts taken in the 3% and 10% scenarios). This will retain access to career coaching for approximately 500 youth participants and 600 adult participants at the following organizations: IRCO, New Avenues for Youth, POIC, PCC, Portland Youth Builders, Central City Concern, Our Just Futures, SE Works, and Trash for Peace.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to all of the objectives in the Advance Portland plan:

- Objective 1: Propel Inclusive Economic Growth and Innovation
- Objective 2: Promote Equitable Wealth Creation
- Objective 3: Foster a Vibrant Central City and Commercial Districts
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

Initial concepts and parameters have been shared with the Prosper Portland Community Budget Committee (CBC) and the Prosper Portland Board of Commissioners (Board); however, the final concepts here have not been shared with the CBC and Board at the time of submittal. Concepts will be further shared with the CBC and Board during budget updates in February and March. The CBC will provide a formal letter providing input on the concepts in April in advance of the City and Prosper's Proposed Budgets.

Direct services impacted include access to workforce development programs for more than 1,100 Portlanders citywide; more limited staffing to build relationships, support community engagement via Community Leadership Committees and working groups, and respond to lending, major projects, and real estate partnership opportunities within new TIF districts.

Federal Compliance Activities

These programs are in compliance with all federal regulations and will continue to be in compliance even if the reduction is taken.

Budget Concept 26462 - Prosper Add - Storefront Report: Event Grants	
Budget Concept Type	Magnitude
Add	Other

Package Description

Action Item: C.8. Providing funding for events, operations, or projects.

The Events and Film Office elevates Portland’s event and film industries to drive inclusive economic development, strengthen Portland’s cultural identity, and support a thriving, creative economy.

This funding would support two funding opportunities:

- Large Event Grant Fund, which supports the recruitment, retention, and stabilization of events that drive high foot traffic and draw out-of-state attendees. Large event grants typically range between \$20,000 - \$50,000.
- Uniquely Portland Grant showcases Portland’s vibrant communities while bringing people together in the heart of our central city and neighborhood business districts. Awards will range from \$500 to \$7,500 to support community-driven events and placemaking activities that communicate vibrancy, joy, and uniquely Portland culture to broader audiences. The Uniquely Portland grant can be leveraged to prioritize events and activations that align with strategic initiatives like night-time activations or in priority locations. Night-time activations are a component of the proposed actions within the Storefront Support Program.

Service Impacts

For FY 2025-26, the team is on track to award more than a dozen large-scale events drawing an estimated 480,000 attendees. The Uniquely Portland Grant Program opened in January and will provide 20-30 grants to community events and activations throughout the city.

With a \$500,000 investment, we expect to support 7-8 large events and 20-30 community events.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

All grantees are asked and evaluated on belonging, inclusivity, and accessibility. Efforts include:

- ADA compliant venue and transportation
- Multilingual materials/interpretation
- The event’s content—performances, speakers, activities, vendors, art, music, food, etc.—reflects and celebrates a wide range of perspectives

All grantees are required to submit an impact report, which includes data about attendance, budget, community impact, and testimonials.

Community Engagement and Empowerment

This program will support approximately 40 events that will potentially draw close to 500,000 people, providing attendees with an opportunity to feel a sense of civic pride and encourage civic engagement.

The Uniquely Portland grant requires the event to be free, and the large event grant prioritizes free or low-cost events.

In the past three years, working with hundreds of event producers and community organizations these grant programs work to address event pain points. Including:

- Funding sustainability
- Open rolling applications
- Access to additional marketing and capacity building resources

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Budget Concept 26463 - Prosper Add - Storefront Report: Citywide Grants	
Budget Concept Type	Magnitude
Add	Other

Package Description

Action Item: D.4. The small business Prosperity Investment Program (PIP) grant is currently only available in Tax Increment Finance districts with available budget. These include the Central Eastside, Cully, Gateway Regional Center, Interstate Corridor, Lents Town Center, Old Town, and North Macadam. Total grant funding within TIF districts awarded in FY 2024-25 was just over \$1.5M.

A summary of the program guidelines is as follows.

- Process: Open year-round with a rolling application process.
- Eligible Recipients: Businesses and property owners of properties with a tenant under lease. Property must be zoned or have an allowed use of Commercial, Employment, Industrial, or MultiDwelling.
- Eligible Improvements: Grant funds may be used for both physical improvement (hard costs) and eligible consulting assistance (soft costs). Eligible hard costs include signage, lighting, storefront, or mechanical systems, tenant improvements, roofs, parking lots, landscaping or other permanent fixtures. Eligible soft costs include project development services such as architectural, structural engineering, environmental, market or financial analysis associated with physical construction.
- Funding: Grants provide 75% funding match for approved project hard and soft costs; total grant may not exceed \$75,000. Grant funds for soft costs may not exceed \$25,000.

This funding request would expand the Prosperity Investment Program along key corridors citywide and beyond TIF districts.

Funding will also support Action Item: C.2. continue the Repair and Restore grant to small businesses impacted by physical and economic damage due to break-ins and vandalism.

Repair and Restore will continue a targeted focus on security prevention measures to support Portland's small businesses and storefronts. This funding would prioritize improvements such as roll-down doors and windows, enhanced lighting, surveillance systems, and reinforced entryways to help deter property crime and vandalism.

In tandem with this funding, we also seek support for updating city codes to allow the legal installation of roll-down security features, which are currently restricted. These changes are essential to address ongoing safety concerns for businesses.

Service Impacts

This would add grant funds to allocate citywide and staffing to support getting those funds out to Portland small businesses.

The average PIP grant allocated is \$45,000 and the average Repair grant is about \$3,000.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to all of the objectives in the Advance Portland plan:

- Objective 1: Propel Inclusive Economic Growth and Innovation
- Objective 2: Promote Equitable Wealth Creation
- Objective 3: Foster a Vibrant Central City and Commercial Districts
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for grant clients to assist with impact tracking.

Community Engagement and Empowerment

This program directly serves small businesses and property owners in Portland.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Budget Concept 26491 - Prosper Add - Storefront Report: OSB

Budget Concept Type	Magnitude
<i>Add</i>	<i>Other</i>

Package Description

Action Item: E.3. Implement a dedicated concierge permitting team through PP&D that will work directly with the Office of Small Business (OSB) to help streamline the permitting process and support businesses as they navigate regulatory requirements. Additionally, expand the support services to include contracted professional architectural guidance, code compliance assistance, commercial tenanting support, and site feasibility analysis.

PP&D Funding Request

A separate funding request will be submitted by PP&D to support two full-time positions dedicated to assisting businesses with permit navigation. These roles will provide direct, hands-on guidance to businesses engaged with Prosper Portland through OSB and the Business Advancement Team's recruitment and retention efforts. Support will also extend to businesses participating in Prosper Portland's grant and loan programs, as well as other strategic projects and initiatives.

Prosper Funding Request

Prosper Portland will contract with architectural and design services to assist businesses in navigating the permitting process. These services will provide design-related support such as site planning, schematic design, code compliance, and other technical requirements delivered by professional architectural/design firms. Prosper Portland will oversee the design assistance component through its Office of Small Business and will coordinate referrals with PP&D to ensure seamless support.

This funding will also provide small businesses with access to specialized services focused on commercial tenanting and site feasibility helping to reduce vacancy rates. These services will include site selection aligned with the business's pro forma, lease review and negotiation support, and construction and space suitability assessments, including occupancy, building use, zoning, and permit requirements. While primarily intended as pre-construction support, businesses may also access additional resources such as digital marketing, AI-driven operational enhancements, human resources coaching, and bookkeeping and accounting support.

Service Impacts

This add package is designed to increase access and improve the experience for businesses seeking support from the Office of Small Business (OSB) for permitting navigation, while also assisting businesses working directly with PP&D that require architectural expertise to complete permitting, design review, or code compliance processes.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Criteria will be developed to prioritize underserved businesses who are unable to pay architectural or development services. All businesses accessing the Office of Small Business and the support services will be tracked and reported by Prosper Portland. In its first 8 months OSB has served over 600 businesses. It is anticipated that these added services could directly provide 100-200 businesses with permitting support services.

In addition to these outputs we will also be tracking vacancy rates, private investment and overall performance of business districts across the city to measure the impact of these investments.

Community Engagement and Empowerment

OSB and PP&D maintain regular engagement with business owners across the city. Service needs have been identified through ongoing tracking of requests and challenges reported by businesses to both OSB and PP&D, as well as through direct engagement with Inclusive Business Resource Network partners and individual business outreach.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Budget Concept 26675 - Prosper - CSL \$1M Add

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

Consistent with the Budget Note and Budget Note response; Prosper Portland has identified \$2.1 million in reductions through organizational efficiencies and program reductions to adjust to the expiring one-time General Fund (GF) Resources. This package would maintain the GF-funded level of service Prosper Portland provided in FY 2025-26. During the FY 2025-26 budget process, Prosper Portland's ongoing General Fund was reduced from \$14.7 million to \$11.1 million. Of this reduction, \$2 million was added back as one-time funding expiring in FY 2026-27.

1. Organizational Efficiencies and Reductions: \$1.1 million

Consistent with Mayor's Office FY 2025-26 direction and budget note, \$1.1 million of the cut is being addressed via organization-wide efficiencies and reduced positions or positions being held vacant until future funding becomes available and applying those savings to GF programming where applicable. Anticipated position changes include:

- Integrating Recreational Cannabis Tax (RCT) related small business activities and funding into the Inclusive Business Resource Network (IBRN); eliminating one position previously funded by RCT funds; and, allocating associated RCT funds to backfill for a portion of the GF cut.
- Cost savings via reclassifying two vacant project manager level positions to lower classifications supporting IBRN and Neighborhood Prosperity Network.
- Integrating RCT related grant activities into place-based financial assistance team; reducing General Fund allocation to citywide lending and real estate staffing; proportionately reallocating staffing and activities to funding made available by putting holds on two vacancies related to TIF based work.
- Proportionately reducing administrative staffing supporting citywide programming currently funded by General Fund.

Restoration of the \$1.1 million would provide ongoing service levels supporting economic and urban development activities citywide and within newer TIF districts where funding is currently not available or limited. Restoration would also restore funding for full and robust IBRN services (via General Fund and RCT) and maintain organizational support levels at FY 2025-26 levels.

2. Workforce Development Contract Reductions: \$1 million

Current service level funding from General Fund includes \$1.6 million in funding for Workforce Development programs making up 44% of the total funding when complemented by CDBG, Community Opportunities & Enhancements Program funding and Enterprise Zone resources. In addition to Prosper Portland and City resources, Worksystems Inc. receives state and federal funding.

The loss of approximately \$1M of this one-time funding will result in the elimination of adult career coaching services through the Economic Opportunity Program and youth career coaching services through NextGen, all of which is subcontracted through Worksystems Inc.

3. Alternative Add-Back Proposals

Prosper Portland would recommend add-backs in other program offers in lieu of restoring the savings and funding reductions in this package. Specifically, Prosper Portland proposes adding back funds from the above savings and cuts to business retention and expansion and traded sector marketing activities (\$750k) and professional services offered to small businesses through a partnership between Portland Permitting and Development and Prosper's Office of Small Business (\$600k). Access to these third-party professional services would help small businesses with site selection, design, and tenant improvement planning.

Service Impacts

1. Organizational efficiencies and reductions: The restoration of funding related to positions being identified for reduction will provide additional capacity for full implementation of the IBRN program, including with more senior staff able to carry a greater volume of work, and to support project management and relationship management activities in citywide lending and real estate activities where TIF is limited or non-existent, particularly in new TIF districts where TIF resources are delayed.

2. Workforce Development: The restoration of \$1 million in Workforce Development will maintain current service levels (outside any cuts taken in the 3% and 10% scenarios). This will retain access to career coaching for approximately 500 youth participants and 600 adult participants at the following organizations: IRCO, New Avenues for Youth, POIC, PCC, Portland Youth Builders, Central City Concern, Our Just Futures, SE Works, and Trash for Peace.

Budget Concept 26477 - PHB - Eliminate 1.0 FTE Data Analyst Position	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

The package eliminates a vacant Housing Management Assistant position funded by GF and CDBG. Eliminating the position will free up \$144K of general fund resources through direct defunding and realignment of resources

Service Impacts

The bureau currently has a small number of staff who provide data analysis for the many critical policies that the bureau is advancing. The loss of one housing management analyst position will reduce the amount of analytical support that the bureau is able to provide and eliminate 1.0 FTE position on the bureau's Data & Systems team.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

The position in consideration is vacant; the package doesn't impact the bureau's equity goals.

Community Engagement and Empowerment

Regarding housing goals, the cut of this analyst positions will reduce the amount of analytical support that the bureau is able to provide.

Federal Compliance Activities

Budget Concept 26487 - PHB - Tech Service BTS IA reduction	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

The package proposes reduction to the interagency agreement between PHB and BTS.

Service Impacts

With this reduction, the bureau will lose the one embedded BTS employee, Applications Analyst at the Bureau. This will eliminate the Bureau's ability to design and implement new software solutions, and reduce the support provided for the loans subsidiary portfolio-Housing Development Software (HDS).

Budget Concept - 2800.Equity Outcomes and Impact Tracking

The reduction is administrative in nature and doesn't have a potential equity impact

Community Engagement and Empowerment

This cut does not impact community engagement and environment.

Federal Compliance Activities

Not applicable

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$0	(\$251,980)
Sum:	\$0	(\$251,980)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$251,980)
Sum:	\$0	(\$251,980)

Budget Concept 26490 - PHB - Administrative cost reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package helps achieve the General Fund reduction target by decreasing discretionary External Materials and Services, without affecting core programs or service delivery. External Materials and Services are reduced by \$120,000, eliminating the bureau's miscellaneous expense allocation, which previously supported office supplies, meetings, advertising, professional services, and computer supplies. In addition, the travel and training budget is reduced by \$34,289, representing a 20% cut to that category.

Service Impacts

The reduction should have minimal impact of the bureau's services. Core programs and service delivery should remain intact as the packages focuses on reducing discretionary spending and shifting cost to other eligible funding sources, rather than eliminating positions or program activities. The impact would be limited to tighter control in items like travel, training and miscellaneous office expenses while essential legal services and staffing capacity will continue to be supported through alternative funding sources.

Budget Concept - 2800.Equity Outcomes and Impact Tracking

Professional development investment in the bureau staff and unforeseen miscellaneous needs could be impacted as part of this cut.

Community Engagement and Empowerment

The change would have little to no impact on broader Community Engagement and Empowerment. The package preserves core housing programs and service capacity, allowing the bureau to maintain its current service level. The reductions are limited to discretionary costs and administrative realignments.

Budget Concept 26242 - BPS CSL - Climate - One FTE Reduction	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

The program has approximately a \$204,512 shortfall in the base budget, caused by the end of a multi-year flexible grant (Multifamily Reserve/SD-14). This flexible grant has carried the cost of 1 FTE for several years, after prior year cuts to GFOG. If not addressed, the base budget shortfall will require elimination of 1 FTE from the program. This position supports the renewable fuels program, the commercial energy reporting program, and the gas leaf blower program.

Service Impacts

The program currently enforces Home Energy Score program, provides professional/technical support and enforcement for the Renewable Fuel Standard, provides technical support related to commercial building energy reporting, advises Council on climate-related policy proposals, tracks, analyzes, and communicates communitywide carbon emissions trends and information, contracts with local small energy consulting businesses like Earth Advantage, Efficiency for Everyone, Parametrix, and Lighthouse Consulting, and pays for the City's membership dues for peer city networks and organizations like Carbon Neutral Cities Alliance, Urban Sustainability Directors Network, Northwest Energy Coalition, Zero Energy Ready Oregon, Oregon Solar + Storage Industries Association, and Community Energy Project. Loss of 1 FTE would force the program to suspend one or more of these program areas. This specific position was selected because it is the position supported by the expiring grant funds.

Equity Outcomes and Impact Tracking

This program's north stars are the Climate Emergency Declaration and the 100% Renewable Energy Resolution. Each of these are expressions of the City's policy direction on equitable decarbonization and climate justice. Reducing this position harms BPS's ability to provide support to Portland's largely Latino landscaping business community, which is an important part of implementing the Equitable Gas Leaf Blower program. It also reduces BPS's ability to work in the field with local retail gas stations as part of implementing the Renewable Fuel Standard. This position has been in the process of identifying culturally competent outreach methods for retail gas stations, which are owned by and employ a significant number of immigrants and people of color.

Community Engagement and Empowerment

This position has supported frontline customer service support to the Equitable Gas Leaf Blower program, an unfunded mandate. BPS uses a portion of this position's workplan to respond to constituent calls from the public and the landscaping business community. The landscaping industry in Portland employs a significant number of Latino community members. BPS has observed a high level of intense emotions surrounding this program. At a time when federal law enforcement presents a material threat to Latino lives, enforcement of this program is particularly sensitive. We have already witnessed examples of conflict between community activists, landscape workers and the City related to the policy, and this position helps mitigate those dynamics. There is a high volume of constituent calls associated with this program. It is important that we preserve the limited, insufficient staffing resources were we able to devote to its implementation.

Federal Compliance Activities

The FTE supports compliance activities for the Commercial Building Energy Reporting program (ENN 5.05), the Renewable Fuels Standard program (ENN 6.02), and the Equitable Gas Leaf Blower program (ENN 3.05.)

Budget Concept 26243 - BPS - CommTech - Base Budget Shortfall	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

The base budget for Community Technology currently has a \$92,937 shortfall. This is the result of rising staff costs relative to inflation, the planned dissolution of the Mt. Hood Cable Commission which reduced IGA revenue to the program, and a more challenging environment to request federal grants. The proposed response to this is to eliminate a vacant Analyst III position (35% General Fund-supported, in the Broadband and Digital Program) at \$74,089, and subtract the remainder from the \$200,000 annual Digital Inclusion Grant program.

Service Impacts

The loss of the Analyst III position from Community technology is happening in tandem with the planned dissolution of the Mt. Hood Cable Regulatory Commission, and staffing of the operations of that commission had been a large share of the work of this position (the share not funded by the General Fund). The General Fund part of the position had been involved in managing the City's digital inclusion strategy, assisting Government Relations on matters of telecommunications and digital equity policy at the state and federal level, and providing direction to the Digital Inclusion Grant Fund. Some of that capacity is lost with this cut, though core functions can be absorbed by the remaining managers and staff.

Reducing the Digital Inclusion Grant Fund by approximately \$20,000 will not have significant service impacts. However, it is pertinent to note that the Digital Inclusion Fund has recently undergone a charter revision. The focus of the program has shifted from intrinsic digital access (device distribution and basic skills training) toward an economic mobility and community development approach, where digital access is deemed essential to workforce advancement, education, health, and access to other critical services.

Community Technology's Digital Inclusion Fund has been nationally recognized by the National Digital Inclusion Alliance (an organization which combines grassroots community engagement with technical knowledge, research, and coalition building to advocate on behalf of people working in their communities for digital equity) as an annual Trailblazers Awardee on multiple occasions. Significant investments in the Digital Inclusion Fund will augment our program's ability to contribute toward Portlanders' economic mobility and community development, will strengthen our disposition to leverage our Fund for additional resources with external partners, such as Comcast, Verizon, etc., and enhance our profile on the national stage for erasing digital access barriers.

Equity Outcomes and Impact Tracking

The proposed elimination of Analyst III position will not have an impact on the work related to the Digital Inclusion Fund, as this position has been vacant since end of March 2025. The Chief of Community Technology has made staff adjustments to accommodate this vacancy without staff, equity, and programmatic outcome impacts.

Community Engagement and Empowerment

The program has been evolving from device distribution and basic digital skills training to a more comprehensive economic mobility and community development model reflects our commitment to authentic community engagement. This approach recognizes that communities themselves are experts in identifying their needs and developing solutions. By investing in partnerships with community-based organizations, we ensure that digital equity initiatives are culturally responsive and tailored to the specific barriers and opportunities within diverse neighborhoods across Portland.

The Digital Inclusion Fund empowers communities by providing resources that enable residents to leverage technology for meaningful life improvements. Whether accessing telehealth services, pursuing educational opportunities, advancing in the workforce, or connecting with vital social services, our investments help Portlanders overcome systemic barriers to opportunity. This empowerment extends beyond individual benefit. When community members gain digital skills and access, they become advocates and resources within their own networks, creating a multiplier effect that strengthens entire communities.

Significant investment in the Digital Inclusion Fund creates sustainable infrastructure for community empowerment. Rather than providing one-time interventions, we are building long-term capacity within communities to advocate for their needs, develop digital literacy programs that reflect their values, and create pathways to economic opportunity that honor community strengths and aspirations. This approach recognizes that true digital equity emerges from empowered communities, not from top-down solutions.

Loss of 1 FTE from the program and reduction in the grant funding has an incremental impact reducing the City's capacity to support community and economic development.

Federal Compliance Activities

The Community Technology program helps maintain the City's compliance with state and federal laws governing telecommunications and internet providers. The loss of this FTE reduces our capacity to participate in federal and state policy development in defense of local government authority.

Budget Concept 26247 - PP&D Current Service Level

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This scenario represents the additional resources necessary to maintain currently budgeted services and staffing levels. The scenario assumes 0% fee changes as a baseline. Additional resources needed are currently estimated at approximately \$3,237,649.

Options to maintain current service levels include:

1. Draw on contingency – FY 2026-27 beginning reserve balance is projected to approximately \$11.7 million in the Development Services Fund
2. Fee adjustments – for every 1% increase in fees, this would generate an estimated \$661,823 in additional ongoing revenue, or enough to maintain services of approximately 3 FTE.
3. Additional funding from alternative revenue source(s) – examples: General Fund one-time or ongoing; full interagency support for public infrastructure programs
4. Any combination #1-3

The full funding gap amount will depend on the outcomes of interagency agreement negotiations with public infrastructure bureaus. Once these dollar figures are known, this concept can be updated to reflect those decisions.

Service Impacts

If funding materializes to cover the gap between projected revenue and expenditures, PP&D would be able to maintain current budgeted staffing and services levels. This avoids cuts that would impact permitting and inspection timelines. Extending timelines adds cost to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the city.

Equity Outcomes and Impact Tracking

Maintaining status quo service levels preserves current equity programming at PP&D and a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. The PP&D culture has become more equipped to address the needs of customers who are Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities.

Community Engagement and Empowerment

Current PP&D staffing and programming include the Empowering Neighborhoods Program which focuses on reaching equitable outcomes for Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities. Customers of this program are assisted with compliance and permitting issues. They typically have received an enforcement letter from the City about work that needs to be completed on their residential or commercial property to bring their property into compliance with building and zoning codes. Maintaining this program keeps the bureau's current level of community engagement and empowerment in place.

Federal Compliance Activities

With this request, federal, state and local code compliance will remain at current levels.

Budget Detail

203 - Development Services Fund

Expense	One Time Cost	Ongoing Cost
Contingency	(\$3,237,649)	\$0
Sum:	(\$3,237,649)	\$0

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	(\$3,237,649)	\$0
Sum:	(\$3,237,649)	\$0

Budget Concept 26248 - PP&D Tree Permitting Current Service Level PCEF

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This scenario represents the amount of additional funding necessary to maintain currently budgeted services and staffing in the Tree Permitting Program. This program was transferred from Parks to PP&D on October 1, 2025. The annual PCEF allocation transferred with the program is insufficient to support the 26 FTE positions that moved from Parks to PP&D. Estimated additional revenues of \$2,941,392 million annually are needed to fully recover costs and fund the program in its entirety.

Service Impacts

Since its transfer to PP&D, the Tree Permitting Program has experienced extended timelines and challenges in meeting service level expectations. Extending timelines adds costs to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the City. This package allows PP&D to maintain services at budgeted levels.

Equity Outcomes and Impact Tracking

Portland's urban forest is unevenly distributed, and the Parks Bureau's recent Tree Canopy Monitoring Report highlights a decline in overall canopy coverage. Advancing tree equity means ensuring that all neighborhoods and communities have access to healthy, well-maintained trees. The Tree Regulation Program is responsible for administering City regulations that protect the urban forest. These services are provided citywide, both as required by code and in response to customer requests. Through ongoing equity training, PP&D Tree Regulation staff have strengthened their understanding of the barriers and challenges faced by underserved communities, improving their ability to support residents more effectively. Without sufficient funding, the program's capacity to engage in this work will be impacted.

Community Engagement and Empowerment

Maintaining currently budgeted service levels keeps current levels of community engagement in place. Should service levels be cut, the program's capacity to engage communities would be put at risk.

Federal Compliance Activities

With this request, federal, state and local code compliance will remain at current levels.

Budget Concept 26253 - DX - Restore Arts and Culture Double Cut

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

During FY 2025-26, bureaus were directed to reduce ongoing General Fund resources by 8 percent. That reduction was applied to the Office of Arts & Culture by Vibrant Communities staff. During the subsequent budget transition to the Community & Economic Development service area, the reduction was inadvertently applied a second time, resulting in a total reduction of 16 percent.

During the Fall TAO, \$357,000 was added back as one-time General Fund funding, but this did not correct the ongoing reduction. This decision package restores \$357,000 in ongoing General Fund resources so the Office of Arts & Culture can maintain its current service level.

Service Impacts

Arts & Culture relies on ongoing General Fund support for grantmaking to individual artists and small arts organizations, sponsorships of art activations and cultural events, and the management and maintenance of the City's public art collection. Without this restoration, the Office would need to reduce grant awards and scale back program activities to match the reduced ongoing funding. It would also leave the Office of Arts & Culture with a disproportionate reduction in ongoing General Fund resources because the cut was applied twice.

Equity Outcomes and Impact Tracking

The restoration of ongoing General Fund resources supports the Office of Arts & Culture's ability to advance equitable access to arts funding across Portland. These resources help ensure that community based arts programs and individual artists, particularly those historically underrepresented or operating with limited resources, can continue to participate in City supported opportunities without disruption resulting from unintended funding reductions.

Community Engagement and Empowerment

The Office of Arts & Culture's vision is to place arts at the center of public life for all Portlanders, with most of its work directly supporting community participation through grants to individual artists and arts organizations, sponsorships of art activations and cultural events, and investments in public art throughout the city. For context, \$357,000 is equivalent to approximately 72 grants awarded to individual artists and small arts organizations through Arts & Culture's Small Grants Program, helping sustain community-based activities across Portland.

Miscellaneous Fund Allocation	\$0	\$357,000
Sum:	\$0	\$357,000

Budget Concept 26254 - Prosper - CSL \$1M Add Back - WF

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>Current Level of Service</i>

Package Description

Consistent with the Budget Note and Budget Note response; Prosper Portland has identified \$2.1 million in reductions through organizational efficiencies and program reductions to adjust to the expiring one-time General Fund (GF) Resources. This package would maintain the GF-funded level of service Prosper Portland provided in FY 2025-26. During the FY 2025-26 budget process, Prosper Portland's ongoing General Fund was reduced from \$14.7 million to \$11.1 million. Of this reduction, \$2 million was added back as one-time funding expiring in FY 2026-27.

1. Organizational Efficiencies and Reductions: \$1.1 million

Consistent with Mayor's Office FY 2025-26 direction and budget note, \$1.1 million of the cut is being addressed via organization-wide efficiencies and reduced positions or positions being held vacant until future funding becomes available and applying those savings to GF programming where applicable. Anticipated position changes include:

- Integrating Recreational Cannabis Tax (RCT) related small business activities and funding into the Inclusive Business Resource Network (IBRN); eliminating one position previously funded by RCT funds; and, allocating associated RCT funds to backfill for a portion of the GF cut.
- Cost savings via reclassifying two vacant project manager level positions to lower classifications supporting IBRN and Neighborhood Prosperity Network.
- Integrating RCT related grant activities into place-based financial assistance team; reducing General Fund allocation to citywide lending and real estate staffing; proportionately reallocating staffing and activities to funding made available by putting holds on two vacancies related to TIF based work.
- Proportionately reducing administrative staffing supporting citywide programming currently funded by General Fund.

Restoration of the \$1.1 million would provide ongoing service levels supporting economic and urban development activities citywide and within newer TIF districts where funding is currently not available or limited. Restoration would also restore funding for full and robust IBRN services (via General Fund and RCT) and maintain organizational support levels at FY 2025-26 levels.

2. Workforce Development Contract Reductions: \$1 million

Current service level funding from General Fund includes \$1.6 million in funding for Workforce Development programs making up 44% of the total funding when complemented by CDBG, Community Opportunities & Enhancements Program funding and Enterprise Zone resources. In addition to Prosper Portland and City resources, Worksystems Inc. receives state and federal funding.

The loss of approximately \$1M of this one-time funding will result in the elimination of adult career coaching services through the Economic Opportunity Program and youth career coaching services through NextGen, all of which is subcontracted through Worksystems Inc.

3. Alternative Add-Back Proposals

Prosper Portland would recommend add-backs in other program offers in lieu of restoring the savings and funding reductions in this package. Specifically, Prosper Portland proposes adding back funds from the above savings and cuts to business retention and expansion and traded sector marketing activities (\$750k) and professional services offered to small businesses through a partnership between Portland Permitting and Development and Prosper's Office of Small Business (\$600k). Access to these third-party professional services would help small businesses with site selection, design, and tenant improvement planning.

Service Impacts

1. Organizational efficiencies and reductions: The restoration of funding related to positions being identified for reduction will provide additional capacity for full implementation of the IBRN program, including with more senior staff able to carry a greater volume of work, and to support project management and relationship management activities in citywide lending and real estate activities where TIF is limited or non-existent, particularly in new TIF districts where TIF resources are delayed.

2. Workforce Development: The restoration of \$1 million in Workforce Development will maintain current service levels (outside any cuts taken in the 3% and 10% scenarios). This will retain access to career coaching for approximately 500 youth participants and 600 adult participants at the following organizations: IRCO, New Avenues for Youth, POIC, PCC, Portland Youth Builders, Central City Concern, Our Just Futures, SE Works, and Trash for Peace.

Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to all of the objectives in the Advance Portland plan:

- Objective 1: Propel Inclusive Economic Growth and Innovation
- Objective 2: Promote Equitable Wealth Creation
- Objective 3: Foster a Vibrant Central City and Commercial Districts
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

Initial concepts and parameters have been shared with the Prosper Portland Community Budget Committee (CBC) and the Prosper Portland Board of Commissioners (Board); however, the final concepts here have not been shared with the CBC and Board at the time of submittal. Concepts will be further shared with the CBC and Board during budget updates in February and March. The CBC will provide a formal letter providing input on the concepts in April in advance of the City and Prosper's Proposed Budgets.

Direct services impacted include access to workforce development programs for more than 1,100 Portlanders citywide; more limited staffing to build relationships, support community engagement via Community Leadership Committees and working groups, and respond to lending, major projects, and real estate partnership opportunities within new TIF districts.

Federal Compliance Activities

These programs are in compliance with all federal regulations and will continue to be in compliance even if the reduction is taken.

Sum:	\$0	(\$1,033,376)

Budget Concept 26260 - BPS - Graffiti Abatement Status Quo Request (add)

Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

BPS' internal services are funded with a bureau overhead model that pulls from five different sources – Solid Waste, PCEF, MHCRC, a few grants, and on-going General Fund (GFOG). The financial structure is based on FTE within each contributing bureau program and the federal overhead rate. This creates a consistent year-to-year calculation to fund shared resources using otherwise restricted funds like Waste, MHCRC and PCEF. The use of a consistent model addresses concerns about the color of money and is aligned with federal guidelines on how restricted revenue sources can contribute to overhead.

This year, BPS' base internal services revenue is lower than the amount needed to cover existing internal services staff. This is due to a lower federal rate this year, staff costs rising faster than inflation, and falling GFOG contributions resulting from prior year cuts. About 20-30% of the bureau's internal services funding is GFOG.

This creates a situation where the base budget, before re-alignment, has cuts. Based on guidance from CBO we have flagged this gap under the Current Level of Service mechanism. This represents 2 FTE. To the extent we want the 20% re-alignment to be the only cuts taken in those teams, the bureau is asking for General Fund resources to supplement our usual funding model. In the absence of these resources a cut of one (1) additional FTE from technical services and one (1) FTE from Equity and Engagement would be necessary, above the 20% planned re-alignment cut. This translates into reduced capacity for engagement and data analysis within the service area.

Service Impacts

If not addressed this revenue shortfall will require a cut of one (1) additional FTE from technical services and one (1) FTE from Equity and Engagement would be necessary, above the 20% planned re-alignment cut. The technical services team provides database development and analysis for a variety of bureau and service area functions. Loss of one FTE will reduce the service area's capacity for data management and analysis. That same team is also losing another FTE related to re-alignment to create a new enterprise-wide data and privacy office. The Equity and Engagement Team supports engagement best practices across the bureau, supports specific engagement events, helps maintain relationships with community organizations, staffs the Community Involvement Committee, and supports equity analysis and best practices for both internally- and externally-facing decisions. This reduction would reduce the bureau's capacity to incorporate equity into decision making. These options were selected because they are the only internal service teams where the level of service provided has some discretion. The Director's Office, Procurement and HR functions are already minimally staffed with only a few people, and Communications was previously removed from the bureau with Re-alignment. The volume of funding flowing through the bureau makes cuts to finance and accounting risky.

Equity Outcomes and Impact Tracking

The loss of 1 FTE from the Equity and Engagement Team would reduce capacity to perform equity analysis and maintain best practices for both internally- and externally facing decisions. This reduction would reduce the bureau's capacity to incorporate equity into decision making as well as conducting equity analysis on programs, projects, policies, and the legislative agenda.

Community Engagement and Empowerment

The loss of 1 FTE from the Equity and Engagement Team reduces the bureau's capacity to maintain engagement best practices across the bureau, support specific engagement events, and maintain relationships with community organizations. This reduction would reduce the bureau's capacity to incorporate equity into decision making.

Federal Compliance Activities

The Equity and Engagement Team staffs the state-mandated Community Involvement Committee and supports language access requirements. The loss of 1 FTE will not prevent continued compliance.

Budget Concept 26261 - BPS - Planning Status Quo Request	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

The base budget for the BPS Long Range Planning program is \$430,000 less than what is necessary to pay for existing staff and basic materials and services. With the base budget, approximately 2.3 FTE of current permanent staffing are being funded by temporary grant funding. The budget also includes a bare-bones budget for consulting and materials (EMS/IMS), funded by both one-time grants and the General Fund. Consulting services are used to conduct economic analyses and procure other specialized professional planning and urban design services that are beyond internal staff expertise. The most significant internal materials and services need is for printing and mailing costs associated with community engagement and legally required notices. Accordingly, it was not an option to reduce consultant and materials budgets to zero. While the one-time use of grants to fill budget holes solves a short-term budget gap, it exposes the program to greater risk in the future if grant revenue dries up. Funding staff with one-time grants also impacts staff morale as they may perceive a reduction in job security.

Service Impacts

Without this uncertain funding from external grant sources, the Planning Division function would not be able to maintain current level of service to deliver priority projects and support ongoing multi-bureau work. Not stabilizing the Planning function's funding will impact the Bureau's ability to both fulfill planning functions mandated by the state and also respond to future Mayoral and City Council initiatives. Examples of state mandates include the Economic Opportunities Analysis update and the Housing Production Strategy implementation, monitoring and reporting. Examples of recent Mayoral and Council priorities include convening inter-agency meetings to respond to community concerns about emergency management and response in the CEI Hub (in parallel with the CEI Hub Policy Project); the Unified Housing Strategy; the Council directive to evaluate and make recommendations to improve the design review process; and the Code Alignment Project, an effort to align conflicting regulations across multiple titles of the city code that regulate development and can help streamline regulations and process to facilitate housing production and economic development.

Equity Outcomes and Impact Tracking

Generally, the Planning Division's five programs are aimed at advancing equitable outcomes in land use planning and reversing the historical harms caused by land use planning. The programs endeavor to do this in myriad ways, including: creating more opportunities for affordable and market rate housing in high-amenity, transit-accessible areas of the city like the Inner Eastside; maintaining the City' Economic Vulnerability Index to inform policy development; preparing the Housing Production Strategy to identify city actions to facilitate needed housing for all incomes, stages and wages through 2045; facilitating middle housing, childcare facilities and home occupations; developing tools to mitigate or reduce displacement risks for lower-income communities; and focusing on the preservation of historic/cultural resources important to Black and under-represented communities.

Community Engagement and Empowerment

Without maintaining current resources, the Planning division within BPS will not be able to fulfill the above obligations and will generally have less capacity to respond to community requests and initiatives. Recent examples of this work include ongoing partnerships with Albina Vision Trust (AVT), the 1803 Fund, and the 82nd Ave Coalition. Bureaus are working closely with AVT to develop land use, street network and urban design/public realm framework plans that will help implement the 50-year Community Investment Plan vision for the Lower Albina area—an effort which is supported by an \$800,000 federal Reconnecting Communities planning grant. Without sustainable staffing and consulting budgets, the program will struggle to take on this kind of work and will have limited resources to meet local match requirements often associated with grants.

Federal Compliance Activities

Much of the work the Planning Division performs is responsive to state mandates that require the city to update and maintain the Comprehensive Plan, conduct regular updates to the Economic Opportunities Analysis, the Housing Needs Assessment and the Housing Production Strategy and as well as make periodic updates to the Zoning Code to ensure compliance with newly adopted state legislation. The Planning programs base budget is approaching levels where compliance activities are threatened.

Budget Concept 26264 - DX - DCA Office CSL Add Request	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package seeks additional funding to sustain current service levels necessary to effectively meet service area needs in the Deputy City Administrator’s Office. Required internal costs for operating the office increased by 309% which is far less than the 2.65% increase in the current appropriation levels of General Fund provided. This request is for \$221,756.

If funding is not received, bureaus of the service area would need to contribute a portion of their revenues to fill the existing gap.

Service Impacts

If funding is not received, bureaus of the service area could be asked to contribute a portion of their revenues to fill the existing gap. This could provide less funding towards programs in each bureau, but it is hoped that by dividing across multiple bureaus that this impact will be lessened.

It is desirable to coordinate these increased DCA Office costs with an internal service area overhead model with the enterprise efficiencies realignment, though the realignment plans have not solidified enough to be able to include that at the time of submission.

Equity Outcomes and Impact Tracking

Insufficient funding to the DCA Office would primarily affect administrative and coordination functions that support programs across the Community & Economic Development Service Area. A reduction in administrative services would strain the office’s ability to provide timely support and assistance to programs and bureaus within the service area, many of which are responsible for implementing plans and initiatives designed to advance equitable outcomes. Reduced capacity could slow coordination, reporting, and internal support functions, potentially affecting the consistency and effectiveness with which these programs are able to carry out their equity-focused work.

Community Engagement and Empowerment

The DCA Office supports community engagement and empowerment by providing administrative and coordination support to programs and bureaus within the Community & Economic Development Service Area that deliver services directly to the public.

Federal Compliance Activities

Budget Concept 26425 - PP&D Current Revenue Forecast	
Budget Concept Type	Magnitude
	Current Revenue Forecast (Non-GF)

Package Description

This scenario represents the cuts necessary to bring expenditures in line with the current revenue forecast, assuming no fee changes or alternative revenue. The total savings generated by this concept is \$3,377,915. These savings are accomplished through the elimination of 19.0 FTE vacant positions, taken broadly across the entire bureau. This scenario assumes 0% rate increases to PP&D fees. If PP&D were to increase fees by 5% there would be no funding gap and no positions would need to be eliminated.

Service Impacts

PP&D is proposing to eliminate vacant positions to close the budget shortfall to minimize service impacts. Any cuts to filled positions would impact permitting and inspection timelines. Extending timelines adds cost to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the city.

Equity Outcomes and Impact Tracking

By eliminating vacant positions instead of filled positions, PP&D is able to maintain current equity programming and avoid reductions to a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. The PP&D culture has become more equipped to address the needs of customers who are Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities.

Community Engagement and Empowerment

By eliminating vacant positions instead of filled positions, the bureau is able to maintain staffing the PP&D Empowering Neighborhoods Program which focuses on reaching equitable outcomes for Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities. Customers of this program are assisted with compliance and permitting issues. They typically have received an enforcement letter from the City about work that needs to be completed on their residential or commercial property to bring their property into compliance with building and zoning codes. Without the staff dedicated to this program the bureau's ability provide these services would be at risk.

Federal Compliance Activities

PP&D performs work to meet several state and local statute and code requirements. The elimination of vacant positions does not change the statutes and code requirements or impact the bureau's capacity to meet the code requirements in a timely manner.

Total	(19.00)	(\$2,055,622)	\$0	(\$1,165,036)	(\$3,377,915)

Budget Concept 26427 - PP&D 5% Rate Reduction	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This scenario represents the cuts necessary to bring expenditures in line with a 5% rate reduction level of revenue. These are cuts in addition to those from the current revenue forecast scenario. The total savings generated from this budget concept is \$2,103,023. This concept includes a 13.0 FTE reduction. The savings and FTE reduction from this concept are in addition to the current revenue forecast scenario.

Service Impacts

The cuts proposed in this concept are taken broadly across several programs, resulting in overall staff reductions that would impact permitting and inspection timelines. Extending timelines adds cost to developers through additional loan carrying costs, which would make the City a barrier to development. Maintaining staffing and services levels helps create an economic environment favorable to development and attracting investment to the city. Impacted by these cuts are the process management team, which acts as a single point of contact for larger development projects, permitting and office support roles for the building program, site development and compliance program inspectors, supervisor positions, and staff supporting the Empowered Communities Program.

Equity Outcomes and Impact Tracking

These cuts include reductions to current equity programming at PP&D, and reductions to a workforce that has had years of equity training, increased awareness of the challenges faced by those in underserved communities, and customer service training. The PP&D culture has become more equipped to address the needs of customers who are Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities.

Community Engagement and Empowerment

These cuts include staff in the PP&D Empowering Neighborhoods Program, which focuses on reaching equitable outcomes for Indigenous people, Black people, immigrants and refugees, people of color, and people with disabilities. Customers of this program are assisted with compliance and permitting issues. They typically have received an enforcement letter from the City about work that needs to be completed on their residential or commercial property to bring their property into compliance with building and zoning codes. Without the staff dedicated to this program the bureau's ability provide these services would be at risk.

Federal Compliance Activities

PP&D performs work to meet several state and local statute and code requirements. The reduction in workforce from these cuts would not eliminate the statutes and code requirements but would impact the bureau's capacity to meet the code requirements in a timely manner.

Budget Concept 26432 - BPS - MHCRC PEG Revenues Transition

Budget Concept Type	Magnitude
Realignment	Current Revenue Forecast (Non-GF)

Package Description

On October 13, 2025, the Mt. Hood Cable Regulatory Commission (MHCRC) passed a resolution recommending that the member jurisdictions withdraw or dissolve the MHCRC by June 30, 2026. The MHCRC's recommendation is based on the decline in cable franchise fee revenue, which is expected to continue. Declining revenue has made the existing MHCRC structure unsustainable. The City of Portland has signed the dissolution agreement (as approved in November 2025 by City Administrator Jordan).

For decades, the MHCRC has been a valuable resource for member jurisdictions, community media centers, cable subscribers and our communities through cable franchise negotiations and enforcement, robust Public Access Education and Government (PEG) funding, and Community Technology Grants, among other things. This resource is currently managed by BPS on behalf of the MHCRC through an IGA, in Fund 855.

Upon MHCRC dissolution, PEG funding will flow directly to Cities rather than the MHCRC. This budget concept recognizes that new revenue. PEG resources are restricted funds, which can only be spent on a limited set of capital investments, including supporting government access to cable television services, equipment for development of content for community access cable channels, and supporting community media centers. Much of it is committed to existing grants made by the MHCRC. Up to 10% of PEG funds can be used for administration of the funds, including staff time to ensure compliance with funding restrictions.

This budget concept recognizes this new revenue.

Service Impacts

This concept is necessary to provide financial management of cable television PEG resources currently under MHCRC control, after it dissolves.

The CBO has recommended a post-MHCRC financial structure involving sub funds. We will likely need 2-3 subs funds to distinguished different PEG revenue flows: 1) City of Portland PEG, 2) post-855 fund resources remaining, and potentially 3) new IGA PEG revenue generated MHCRC jurisdictions starting on July 1, 2026.

Portland's share of annual PEG revenue is approximately \$2 million. Additionally, after the MHCRC dissolves, the 855 Fund will still have a balance of approximately \$5.1 million, including outstanding advances to community media centers and MHCRC grants. Approximately 70% of PEG Resources in 855 Fund balance (unallocated reserves) will also be transferred to the City of Portland upon MHCRC's dissolution, which will amount to one-time resources of roughly \$5 million.

BPS's Community Technology Program would continue to manage these funds, and \$460,000 would be appropriated in FY 27.

Equity Outcomes and Impact Tracking

PEG funds are dedicated resources cities receive from cable broadcasters to invest in local public programming and communication tools. They are used to support community access to cable television broadcasts. This includes ensuring under-represented communities have tools they need to create local television content, and accessibility to local government decision-making as part of local programming.

Community Engagement and Empowerment

Portland's Community Media Center, Open Signal, receives capital funding through this PEG revenue via the MHCRC. These resources are used for capital investments to support community access to cable television broadcasts. With this budget change, that support would continue through BPS. In the past, MHCRC has provided some funding to support capital improvements to support City Council and other Commission broadcasting. This is distinct from operational funding, which is provided through the General Fund (indirectly supported by cable television franchise revenue).

The MHCRC has also managed a grant program that awards grants to community organizations, with staff overseeing grant issuance, grantee support, and compliance monitoring. This fiscal year marks the final round of community tech grants under the Commission. New grants would not occur due to diminishing cable related resources, but under a new IGA, BPS would manage all legacy MHCRC grants, including both those awarded in previous fiscal years and grants issued in the current cycle, through their completion. The decision to end the grant program was based on diminishing resources and the desire to prioritize stability for the Community Media Centers.

Federal Compliance Activities

There are a variety of federal laws and rules governing the use of cable franchise revenue and PEG funds. This proposal facilitates ongoing compliance with those rules. Failure to establish appropriate new financial structures in the aftermath of MHCRC dissolution could put the City at risk of violating those laws/rules.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	\$460,000
Sum:	\$0	\$460,000

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	\$0
Intergovernmental	\$0	\$460,000
Sum:	\$0	\$460,000

Budget Concept 26434 - BPS - Climate - Additional cut	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

Cut the remaining General Fund allocation to Climate, Energy, and Sustainable Development, leaving the program supported only with grants, PCEF and Solid Waste Funds. This cut would come from external materials and services.

If combined with the 3% and 10% cuts, the total general fund cut to this program would be \$158,620.

Service Impacts

This scenario was considered because the current General Fund allocation to this program is small, at only \$158,620. This cut removes the majority of the program external materials and services budget. It would require cutting the Home Energy Score program, all professional/technical support for the Renewable Fuel Standard, all membership dues for peer city networks and organizations like Carbon Neutral Cities Alliance, Urban Sustainability Directors Network, Northwest Energy Coalition, Zero Energy Ready Oregon, Oregon Solar + Storage Industries Association, and Community Energy Project. This cut would be on top of an approximate \$205,000 shortfall in the base budget, caused by the end of a multi-year flexible grant. If not addressed, the base budget shortfall will require elimination of 1 FTE from the program.

Equity Outcomes and Impact Tracking

Frontline communities have historically been underserved by climate- and energy-related programs and investments and under-represented in decision making. Ensuring a just distribution of the benefits of climate actions and addressing the unequal burdens of the impacts of climate change requires intentional policy development and program design.

Cuts to the Home Energy Score program will limit access to free assessments and upgrades that improve comfort, reduce bills, and promote energy efficiency for homeowners and home sellers at or below 80% median income. The elimination of professional/technical support for the Renewable Fuel Standard will impact air pollution and carbon emissions which disproportionately impact low-income and vulnerable communities. Workforce development will also be negatively impacted based on lost opportunities of new markets for biofuels and associated increases in economic activities.

Community Engagement and Empowerment

The inability to participate in peer city networks and organizations significantly limits our ability to connect and engage with the communities doing this work and impacted by this work. It diminishes the City's voice on climate initiatives and collaboration and leaves a void in our connection with real time needs and concerns.

Federal Compliance Activities

The elimination of professional/technical support for the Renewable Fuel Standard (RFS) will make it much harder for the City to enforce compliance with the RFS. This threatens the integrity of the entire effort, greatly hampering the transition away from fossil fuels to alternative energy sources.

The elimination of funds for the Home Energy Score program implementation partner, Earth Advantage, means that the City will not be able to enforce compliance with the Home Energy Score policy (Ordinance No. 188143, PCC 17.108.) Home Energy Score requires Portland homeowners to post their home's Home Energy Score when listing or advertising it for sale.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$137,620)
Sum:	\$0	(\$137,620)
Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$137,620)
Sum:	\$0	(\$137,620)

Budget Concept 26435 - BPS - Climate - EMS 10% cut	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

Cut 10% of the General Fund allocation to Climate, Energy, and Sustainable Development. The cut would reduce external materials and services by \$16,000, shrinking the scope of climate-related contracts.

Service Impacts

This would shrink the scope of climate-related contracts to perform greenhouse gas modeling, research, facilitation services, and support for the Multifamily Energy Benchmarking Pilot and the Renewable Fuels TAC. This \$16,000 cut would be on top of an approximate \$205,000 shortfall in the base budget, caused by the end of a multi-year flexible grant. If not addressed, the base budget shortfall will require elimination of 1 FTE from the program.

Equity Outcomes and Impact Tracking

Frontline communities have historically been underserved by climate- and energy-related programs and investments and under-represented in decision making. Ensuring a just distribution of the benefits of climate actions and addressing the unequal burdens of the impacts of climate change requires intentional policy development and program design.

With half of Portland residents living in multifamily properties, more of those residents being from vulnerable communities, and a greater likelihood of being low-income households, losing capacity for the Multifamily Energy Benchmarking Pilot continues to keep these residents at a disadvantage in respects to climate justice and resilience.

Community Engagement and Empowerment

Reduction of EMS reduces our capacity to outreach and communicate with communities most impacted by climate and greenhouse gas emissions. It will lower our ability to engage with the Renewable Fuels TAC and reduce the contract support we have for reaching impacted communities.

Federal Compliance Activities

These programs are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$16,000)
Sum:	\$0	(\$16,000)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$16,000)
Sum:	\$0	(\$16,000)

Budget Concept 26436 - BPS - Climate - EMS 3% cut	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

Cut 3% of GF allocation to Climate, Energy, and Sustainable Development. Due to the small amount of General Fund resources in this program, this would shrink the scope of climate-related contracts by \$5,000.

Service Impacts

This would shrink the scope of climate-related contracts by \$5,000, which by itself would not have a significant impact on the program. This would be on top of an approximate \$205,000 shortfall in the base budget, caused by the end of a multi-year flexible grant. If not addressed, the base budget shortfall combined with this cut will require elimination of 1 FTE from the program.

Equity Outcomes and Impact Tracking

Frontline communities have historically been underserved by climate- and energy-related programs and investments and under-represented in decision making. Ensuring a just distribution of the benefits of climate actions and addressing the unequal burdens of the impacts of climate change requires intentional policy development and program design.

Community Engagement and Empowerment

The loss of a small amount of funding for climate-related consultant contracts will not have a significant impact on engagement activities. Climate-related engagement in 2027 will be centered on the new Climate and Sustainability Commission, which is not impacted by this cut.

Federal Compliance Activities

These programs are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$5,000)
Sum:	\$0	(\$5,000)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$5,000)
Sum:	\$0	(\$5,000)

Budget Concept 26438 - BPS - Graffiti - 10% cut	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This program provides cleanup support to small businesses impacted by graffiti. The program only has three primary expenses, City staff time, graffiti removal contractors, and volunteer graffiti removal supplies. This proposal would cut all volunteer graffiti removal supplies and reduce resources for City graffiti removal contractors, amounting to \$92,000.

Service Impacts

This \$92,000 reduction would cut all volunteer graffiti removal supplies and reduce resources for City graffiti removal contractors. Graffiti removal will be reduced by roughly 39,000 square feet from the base budget proposal.

Equity Outcomes and Impact Tracking

The presence of graffiti has a pronounced negative impact on economic development. Reduced City resources for graffiti removal shifts the burden of graffiti removal onto already struggling small businesses. In addition, many graffiti removal contractors are themselves emerging minority-owned small businesses, and this cut reduces contracting opportunities for them.

Community Engagement and Empowerment

This cut would reduce resources used to buy graffiti removal supplies used by community volunteers.

Federal Compliance Activities

These programs are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Concept 26439 - BPS - Graffiti - 3% cut	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This program provides cleanup support to small businesses impacted by graffiti. The program only has three primary expenses, City staff time, graffiti removal contractors, and volunteer graffiti removal supplies. This proposal would cut all volunteer graffiti removal supplies and reduce resources for City graffiti removal contractors, amounting to \$27,000.

Service Impacts

This \$27,000 reduction would cut all volunteer graffiti removal supplies and reduce resources for City graffiti removal contractors. Graffiti removal will be reduced by roughly 12,000 square feet from the base budget proposal.

Equity Outcomes and Impact Tracking

The presence of graffiti has a pronounced negative impact on economic development. Reduced City resources for graffiti removal shifts the burden of graffiti removal onto already struggling small businesses. In addition, many graffiti removal contractors are themselves emerging minority-owned small businesses, and this cut reduces contracting opportunities for them.

Community Engagement and Empowerment

This cut would reduce resources used to buy graffiti removal supplies used by community volunteers.

Federal Compliance Activities

Reduction	3% Reduction

Package Description

This package will reduce the GF appropriations for the Arts & Culture Program by 3% or \$112,015 in adherence to the current budget guidance. The impact of this cut will be offset by cutting 5-10 sponsorships for arts and culture events.

Service Impacts

Arts and culture event sponsorships typically range from \$10,000 to \$25,000 each. A \$112,015 reduction would eliminate approximately 5-10 community event sponsorships, directly reducing the number of arts and cultural experiences available to Portland residents.

Equity Outcomes and Impact Tracking

Because sponsorships often support free or low-cost events and programs led by nonprofit, community-based organizations, and culturally specific organizations, this reduction would limit access to arts and cultural programming for communities that face barriers to participation.

Community Engagement and Empowerment

Arts and culture sponsorships support highly visible, community-centered events such as book and film festivals, temporary public art installations like the Coraline Cat Trail, and free summer concert series. These events create accessible entry points for residents to engage in public life, activate public spaces, and foster a sense of belonging. They also support broader economic development goals by driving foot traffic to local business districts and encouraging direct community investment.

Reducing funding for these sponsorships would limit the City's ability to support events that bring people together in shared public experiences and reduce opportunities for community engagement, cultural participation, and neighborhood-level economic activity.

Federal Compliance Activities

Arts and culture event sponsorships are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Concept 26446 - DX - A&C - 10% Small Grants & Sponsorships cut	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package will reduce the GF appropriations for the Arts & Culture Program by 7% or \$261,369 in adherence to the current budget guidance. The impact of this cut will be offset by cutting a significant number of outgoing small grants.

Service Impacts

Grants through Arts & Culture’s Small Grants Program range from \$500 to \$5,000 each, with most grants awarded in the \$4,000 - \$5,000 range. A 7% reduction to the Small Grants Program would result in approximately 45-55 fewer grants awarded to artists, in turn resulting in 45-55 fewer publicly accessible performances, exhibits, or other works of art available to the community. This reduction would significantly limit the program’s ability to support arts activations, community events, and related economic activity, including downtown foot traffic.

Equity Outcomes and Impact Tracking

GF funded Small Grants support individual artists, art collectives, and arts-focused businesses, with an emphasis on diversity, accessibility, and community impact. A 7% reduction would disproportionately affect artists and communities that rely on small-scale grants to produce publicly accessible work, further limiting equitable access to arts and cultural participation across Portland. Small Grants to non-profit arts organizations that provide access to high-quality arts experiences to K-12 students would continue to be funded through the Arts Access Fund.

Community Engagement and Empowerment

This cut proposal reduces funding for arts grants that support community-facing performances, exhibits, and other works of art available to the general public. While the cut does not reduce direct City-delivered services, it reduces community-facing cultural resources that contribute to community pride, activation of public spaces, cultural tourism, and support for local businesses.

Federal Compliance Activities

Arts & Culture’s Small Grants Program is in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Detail		
100 - General Fund

External Materials and Services	\$0	(\$373,384)
Sum:	\$0	(\$373,384)
Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$373,384)
Sum:	\$0	(\$373,384)

Budget Concept 26447 - BPS - Community Technology 3% Cut	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This concept cuts one Coordinator II position in the Broadband and Digital Equity Program (fulling loaded cost is \$193,228). This responds to both the 3% cut and a \$92,368 shortfall in the base budget, totaling \$182,368. The additional \$10,860 in staff savings would be directed to the Digital Inclusion Grant program, increasing that annual grant funding to \$210,000.

Service Impacts

The cut will reduce staffing capacity to support digital access and inclusion in the community and reduce the amount of support we provide to grant recipients receiving resources to do work in this area. To mitigate this, another Coordinator II in the Franchise Utility program will split their time to maintain capacity for both programs.

Further investments in the Digital Inclusion Fund will augment our program’s ability to contribute toward Portlanders’ economic mobility and community development, will strengthen our disposition to leverage our Fund for additional resources with external partners, such as Comcast, Verizon, etc, and enhance our profile on the national stage for erasing digital access barriers.

Equity Outcomes and Impact Tracking

The Coordinator III-CPPW position leads development and management of Digital Inclusion grant initiatives and manages grantee communications. The program tracks and reports on grant outcomes. This cut reduces City support for digital inclusion initiatives in the community. This is partially offset by a modest increase in grant funds for the Digital Inclusion grants.

Examples of Digital Inclusion grant recipients include:

- Future Generations Collaborative (FGC) to provide basic digital skills training.
- Hispanic Metropolitan Chamber (HMC) to establish a Digital Navigator program.
- The Somali American Council of Oregon (SACOO) to establish a Digital Navigator Program.

Community Engagement and Empowerment

The Coordinator III-CPPW position supports digital inclusion coalition meetings. This cut reduces City support for digital inclusion initiatives in the community. This is partially offset by a modest increase in grant funds for the Digital Inclusion grants.

Federal Compliance Activities

These programs are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Concept 26448 - BPS - Community Technology 10% Cut	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This concept cuts one Coordinator II position in the Broadband and Digital Program (fulling loaded cost is \$193,228) and eliminates the annual \$200,000 Digital Inclusion Grants. This responds to both the 10% cut and a \$92,368 shortfall in the base budget, totaling \$393,228.

Service Impacts

The staffing cut will reduce capacity to support digital access and inclusion in the community and will reduce the amount of technical support we can give to existing grantees. To mitigate this another Coordinator II in the Franchise Utility program will split their time to maintain capacity for both programs.

Cutting the Digital Inclusion Grants will impact community organizations doing work to improve digital literacy and access; which is an economic development tool. The intention would be to keep the program active and prepare for available funds in subsequent FYs. We are in substantive discussions with Verizon, Comcast, and other private sector partners to secure additional funding and build a stronger, more sustainable program through expanded partnerships. However, contributions from these partners are not yet assured, and this cut would reduce the likelihood of successful private partnerships.

Community Technology's Digital Inclusion Fund has been nationally recognized by the National Digital Inclusion Alliance (an organization which combines grassroots community engagement with technical knowledge, research, and coalition building to advocate on behalf of people working in their communities for digital equity) as an annual Trailblazers Awardee on multiple occasions.

Equity Outcomes and Impact Tracking

The Digital Inclusion Fund supports community-based organizations (CBOs) or nonprofit organizations in designing and delivering digital access programs for under-served and historically marginalized groups in Portland. These funds help break the cycle of digital exclusion through workforce/professional development tools, entrepreneurship opportunities, and civic engagement as it empowers access to lift the voice of communities into larger conversations about community and economic development.

Examples of Digital Inclusion grant recipients include:

- Future Generations Collaborative (FGC) to provide basic digital skills training.
- Hispanic Metropolitan Chamber (HMC) to establish a Digital Navigator program.
- The Somali American Council of Oregon (SACOO) to establish a Digital Navigator Program.

Community Engagement and Empowerment

The Digital Inclusion Fund supports community-based organizations (CBOs) or nonprofit organizations in designing and delivering digital access programs. These programs increase the number of people equipped to participate in community governance and economic activity.

Federal Compliance Activities

These programs are in compliance with all regulations and will continue to be in compliance even if the reduction is taken.

Budget Concept 26449 - BPS - PCEF - Position Adds	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

Add 4 ongoing FTE to the BPS PCEF Administrative Team to increase capacity to better manage growing volume and complexity of reporting, contracts, outgoing grants, and to assist PCEF-funded bureaus better track outcomes and maintain accountability. The request includes three classifications: one Coordinator IV, one Analyst III, and two Coordinator II's. This also includes a proportional increase of funding to BPS' Internal Services budget through a bureau overhead model used to support shared resources such as the bureau director's office, technical services, people services, operations, and office rent.

The request increases the administrative budget by \$1,030,514, including \$765,726 for the Personnel and \$264,788 for BPS Overhead at 34.58%.

Service Impacts

Without this increase, we will be constrained in our ability to (1) publicly report on program outcomes, and (2) limited in our ability to continue meeting our commitments in the CIP, such as launching remaining programs or issuing annual community grants at a sustained level.

Equity Outcomes and Impact Tracking

PCEF's equity goals depend on the program's ability to effectively move resources reliably and responsibly to community-based organizations and other partners, especially those with limited administrative capacity. Additional staffing strengthens PCEF's equity infrastructure by supporting timely payments, consistent grant and contract oversight, clear performance expectations, and accurate outcome tracking. This request will improve PCEF's ability to monitor whether investments are reaching our priority communities and delivering intended benefits, and to course correct when they are not.

Community Engagement and Empowerment

These additional positions will support PCEF's ability to provide transparent, two-way engagement by helping community members understand what is being funded, where investments are landing, and whether projects are delivering intended benefits for priority populations.

Federal Compliance Activities

PCEF programs are in compliance with all regulations and will continue to be in compliance even if the addition is not provided.

Budget Concept 26453 - BPS - Waste - Commercial Waste System Review Project	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

Commercial Waste System Review Project. This is a \$325,000 spending concept, representing a planned draw from Solid Waste Fund reserves. The commercial waste system regulatory structure has not been reviewed by Portland in 20 years. BPS has initiated a three-year project to evaluate the current 'open market' system and consider what alternative will best serve the city and community members. This budget concept does not reflect the full cost of this project, which includes some external materials and services and staff time that are already included in the base budget for the Waste and Recycling Division. This planned spending has been included in the five-year forecast for the Solid Waste Fund.

- Spending under this concept from the Solid Waste Fund includes:
- Surveys of residents in multifamily dwellings and property managers (\$100,000)
 - Study of route efficiency for commercial garbage trucks (\$75,000)
 - Commercial waste system modeling of operations and costs (\$150,000)

Service Impacts

Successfully completing a commercial waste system review is much needed for the City of Portland. The commercial waste system represents up to or more than \$300 million in spending each year by businesses, multifamily properties, construction sites, schools and commercial properties. It has been 20 years since the City evaluated this system.

Equity Outcomes and Impact Tracking

Multifamily properties, local businesses, and schools pay for garbage and recycling service in the city's commercial 'open market' system. In this system, multifamily residents have had less access to opportunities for recycling and composting, less transparency and predictability with costs. System affordability, access and service quality are among the proposed success criteria for the project. This is important because increased costs for garbage service have been an increasing complaint from managers of multifamily properties, and the quality of service provided to multifamily properties has been less consistent historically. The research conducted under the project may identify opportunities to create better transparency, affordability, and equitable access in ways that ultimately benefit residents from vulnerable communities and locally owned small businesses.

Community Engagement and Empowerment

This project will directly engage community members and critical roles within our waste system: residents, businesses, property managers, and waste collection companies. We will gather quantitative and qualitative information and perspectives on how well the existing system of collection that serves multifamily properties and commercial properties does in meeting the City's and customers' needs and values.

Federal Compliance Activities

State law clearly delegates to cities the authority to regulate waste collection systems. Accepting this budget concept expenditure will help ensure that we can deliver this project to thoroughly assess, then update and modernize the important regulatory structure that oversees commercial garbage and recycling collection. It will help determine the future regulatory and compliance regime that will best serve businesses, multifamily residents and the City's overall needs and values.

External Materials and Services	\$0	\$325,000
Sum:	\$0	\$0

Budget Concept 26454 - BPS - Planning - 10% cut	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

A 10% cut in the Planning budget is \$603,000. To achieve this level of cuts, this package proposes to cut four positions from the District Liaison/Area Planning team, totaling approximately \$760,000, to achieve a 10% cut while maintain a modest (\$157,000) EMS budget for professional consulting services.

Service Impacts

This cut would require the elimination of 4 FTE of permanent planning staff. The loss of 4 FTE represents a significant reduction of resources - a 10% cut in financial resources and a nearly 14% cut in staffing levels (4 of 29 staff). These cuts will substantially constrain the Planning Division's capacity to perform core, mandatory functions, and severely limit the Division's ability to take on new projects. The Planning Division will continue to work on projects that are currently in the pipeline that implement the Housing Production Strategy, such as the Inner East Rezoning Project but will not have the capacity to do any other area-specific planning projects. Examples of other area-specific projects completed in recent years include: the Lower Southeast Rising Plan, the West Portland Town Center Plan and Montgomery Park Area Plan, each of which implemented the Comprehensive Plan and created additional capacity for housing and businesses. BPS Planning will have significantly reduced capacity to support community initiatives such as the Albina Vision Trust's Community Investment Plan.

The inability to conduct area-specific planning will also limit the City's ability to plan for complete neighborhoods and coordinate land use with transportation investments, which is a hallmark of Portland planning. The Planning program will have less capacity to be responsive to evolving priorities, development trends, and the priorities of elected leaders. The recent Council resolution directing additional evaluation of the Design Review process is an example.

Equity Outcomes and Impact Tracking

The Comprehensive Plan controls the distribution of growth and change and can have a significant impact on who benefits and who is burdened. Zoning has historically been used to reinforce segregation and protect privileged communities from change while directing change to communities with fewer resources. The program is working to reverse harm by promoting land use changes that increase housing access and choice in high-income, high-opportunity communities. BPS centers equity in all planning initiatives to provide a more affordable and healthy future for all Portlanders. These reductions will greatly limit BPS' ability to do targeted planning and proactively address disparities. These positions are closely connected to underrepresented communities who have experienced the disproportionate burdens of past planning harms, positioning the staff to make the best efforts possible to achieve equitable outcomes in the work due to increased understanding of the unique needs and history of different communities in the City.

Community Engagement and Empowerment

Community engagement is central to the area planning team's work. These reductions will significantly hamper BPS' ability to engage the community and be responsive to their needs.

The program currently assigns a dedicated planner to each of the four council districts of the city. These planners (District Liaisons) answer neighborhood and community zoning and land use questions; help neighborhoods connect with staff contacts in other bureaus to help resolve neighborhood issues; and provide presentations such as the ABCs of land use to facilitate greater involvement in the land use process. Cuts to the District Liaison program will limit BPS' capacity to be responsive to community needs and questions as well as Planning staff's ability to engage community in future decision making.

Federal Compliance Activities

This cut removes some staff capacity that is typically used to respond to state land use planning mandates. With these cuts the program will have limited capacity to respond if the legislature creates new mandates in the coming year; which will potentially create at least short-term lapses in compliance.

Budget Detail

Total	(4.00)	(\$468,000)	\$0	(\$256,108)	(\$759,912)

Budget Concept 26455 - BPS - Planning - 3% cut	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

At this level the cuts can be offset by grant funding to cover an additional \$181,000 in personnel costs. Staffing is an eligible expense on several grant-supported planning projects, including Inner SE Rezoning work, floodplain work, and the critical energy infrastructure hub. Additional grant funding is available to support external materials and consulting for these projects.

Service Impacts

The impact of these cuts is that additional permanent staff are being put on less stable one-time grant funding. This will lead to a more significant budget shortfall in future budget years. With this cut, an additional position in planning is at risk in future years if continued grant funding is not obtained. With this added cut, 3-4 positions are now dependent on grant funding each year. That scale of risk each year represents a significant reduction of resources that will substantially constrain the Planning function's ability to carry out basic long range planning functions and comply with state mandated requirements to maintain the Comprehensive Plan and ensure Zoning Code regulations comply with evolving state regulations, particularly related to housing production. General fund reductions in Planning over the last decade have incrementally reduced the program to about 60% of the size it was a decade ago.

Equity Outcomes and Impact Tracking

Planning programs support all Portlanders, affecting housing and economic development and environmental protections.

The Comprehensive Plan controls the distribution of growth and change and can have a significant impact on who benefits and who is burdened. Zoning has historically been used to re-enforce segregation and protect privileged communities from change while directing change to communities with fewer resources. The program is working to reverse harm by promoting land use changes that increase housing access and choice in high-income high-opportunity communities.

Community Engagement and Empowerment

The BPS Planning program incorporates community engagement into all of its projects and activities, as required by statewide land use law and the City's Comprehensive Plan. As stated above, if grant funding does not continue to be available, our ability to do robust community engagement into the future will be compromised by staff capacity limitations.

Federal Compliance Activities

This cut shifts some staff capacity that is typically used to respond to state land use planning mandates onto one-time grant funding to complete existing grant projects. This preserves staff capacity and state compliance expertise in the short term, but means that we may not have adequate staff capacity to respond if the legislature creates new mandates in the coming year.

Sum:	\$0	(\$181,000)

Budget Concept 26457 - Prosper - 3% Cut	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

The Community Workforce Navigator Program (CWNP) is a neighborhood-based initiative to help unemployed and underemployed residents access jobs and workforce development resources.

A \$340,000 reduction to Workforce Development would eliminate three of the four existing Community Workforce Navigator Program positions, reducing participant access from 500 to just 125 individuals. With only one service provider remaining, staff would need to reassess the program’s effectiveness and internal capacity to retain the program, which could ultimately lead to its complete elimination. Providers affected include Rosewood Initiative, Division Midway Alliance, Portland Community College (serving the Cully neighborhood), and Urban League, which delivers services citywide.

Service Impacts

Approximately 300-500 individuals would no longer receive workforce support services.

Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City’s strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to the following objectives in the Advance Portland plan:

- Objective 2: Promote Equitable Wealth Creation
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

Approximately 300-500 Portlanders would no longer receive workforce support services.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Sum:	\$0	(\$339,917)

Budget Concept 26458 - Prosper - 10% Cut - WF

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

The Community Workforce Navigator Program (CWNP) is a neighborhood-based initiative to help unemployed and underemployed residents access jobs and workforce development resources.

A cut of \$601,000 to Workforce Development would eliminate the CWNP, cutting services to approximately 500 individuals who receive support through CWNP and would also eliminate four workforce provider employees at the community-based organizations that deliver these services. Providers affected include Rosewood Initiative, Division Midway Alliance, Portland Community College (serving the Cully neighborhood), and Urban League, which delivers services citywide.

This concept is associated with a 3% cut for the Community Workforce Navigator Program. The amount in this concept represents the remaining 7% to get to a 10% overall cut proposal.

Service Impacts

More than 500 Portlanders will no longer receive neighborhood workforce support services.

Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to the following objectives in the Advance Portland plan:

Objective 2: Promote Equitable Wealth Creation

Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

More than 500 Portlanders will no longer receive neighborhood workforce support services.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Sum:	\$0	(\$260,630)

Budget Concept 26459 - Prosper - 10% Cut - IBRN	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

The Inclusive Business Resource Network (IBRN) is a citywide program that brings multiple services for small business into a single network for entrepreneurs. Prosper Portland invests in 15 community-based partners (see list below) who specialize in serving small businesses across all stages and industries. Each year, IBRN serves more than 600 businesses with individualized advising in areas such as strategic business growth, capital access and financial forecasting, industry specific support, regulations and compliance. The program also provides peer-to-peer support, workshops, and access to professional services including legal services, bookkeeping and accounting support, and capital advising.

Community-based partners currently funded through IBRN (FY 2025-26): APANO, Built Oregon, Hacienda CDC, Hispanic Metropolitan Chamber, Livelihood NW, Micro Enterprise Services of Oregon (MESO), Native American Youth and Family Center (NAYA), Neighborhood House, NuProject, NW Native Chamber, PCC Small Business Development Center, Principia Business Law, TiE Oregon, Vibrant Future, Xcelerate Women.

Service Impacts

This cut would result in 175 fewer small business owners receiving services. Loss of funding at this level would eliminate 2 to 3 partnerships from the network, likely resulting in impacts to partner organization staff, and reducing community-based capacity to deliver business advising and technical assistance supports. It is unknown at this time which organizations would be impacted by the funding loss.

Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to the following objective in the Advance Portland plan:

Objective 2: Promote Equitable Wealth Creation

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

This cut would result in 175 fewer small business owners receiving services. Loss of funding at this level would eliminate 2 to 3 partnerships from the network, likely resulting in impacts to partner organization staff, and reducing community-based capacity to deliver business advising and technical assistance supports. It is unknown at this time which organizations would be impacted by the funding loss.

Federal Compliance Activities

We will not fall out of compliance with any regulations if this concept is approved.

Budget Concept 26461 - Prosper - CSL \$1.1M Reduction- Org Efficiencies	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

Consistent with the Budget Note and Budget Note response; Prosper Portland has identified \$2.1 million in reductions through organizational efficiencies and program reductions to adjust to the expiring one-time General Fund (GF) Resources. This package would maintain the GF-funded level of service Prosper Portland provided in FY 2025-26. During the FY 2025-26 budget process, Prosper Portland's ongoing General Fund was reduced from \$14.7 million to \$11.1 million. Of this reduction, \$2 million was added back as one-time funding expiring in FY 2026-27.

(1) Organizational Efficiencies and Reductions: \$1.1 million

Consistent with Mayor's Office FY 2025-26 direction and budget note, \$1.1 million of the cut is being addressed via organization-wide efficiencies and reduced positions or positions being held vacant until future funding becomes available and applying those savings to GF programming where applicable. Anticipated position changes include:

- Integrating Recreational Cannabis Tax (RCT) related small business activities and funding into the Inclusive Business Resource Network (IBRN); eliminating one position previously funded by RCT funds; and, allocating associated RCT funds to backfill for a portion of the GF cut.
- Cost savings via reclassifying two vacant project manager level positions to lower classifications supporting IBRN and Neighborhood Prosperity Network.
- Integrating RCT related grant activities into place-based financial assistance team; reducing General Fund allocation to citywide lending and real estate staffing; proportionately reallocating staffing and activities to funding made available by putting holds on two vacancies related to TIF based work.
- Proportionately reducing administrative staffing supporting citywide programming currently funded by General Fund.

Restoration of the \$1.1 million would provide ongoing service levels supporting economic and urban development activities citywide and within newer TIF districts where funding is currently not available or limited. Restoration would also restore funding for full and robust IBRN services (via General Fund and RCT) and maintain organizational support levels at FY 2025-26 levels.

(2) Workforce Development Contract Reductions: \$1 million

Current service level funding from General Fund includes \$1.6 million in funding for Workforce Development programs making up 44% of the total funding when complemented by CDBG, Community Opportunities & Enhancements Program funding and Enterprise Zone resources. In addition to Prosper Portland and City resources, Worksystems Inc. receives state and federal funding.

The loss of approximately \$1M of this one-time funding will result in the elimination of adult career coaching services through the Economic Opportunity Program and youth career coaching services through NextGen, all of which is subcontracted through Worksystems Inc.

(3) Alternative Add-Back Proposals

Prosper Portland would recommend add-backs in other program offers in lieu of restoring the savings and funding reductions in this package. Specifically, Prosper Portland proposes adding back funds from the above savings and cuts to business retention and expansion and traded sector marketing activities (\$750k) and professional services offered to small businesses through a partnership between Portland Permitting and Development and Prosper's Office of Small Business (\$600k). Access to these third-party professional services would help small businesses with site selection, design, and tenant improvement planning.

Service Impacts

- (1) Organizational efficiencies and reductions: The restoration of funding related to positions being identified for reduction will provide additional capacity for full implementation of the IBRN program, including with more senior staff able to carry a greater volume of work, and to support project management and relationship management activities in citywide lending and real estate activities where TIF is limited or non-existent, particularly in new TIF districts where TIF resources are delayed.
- (2) Workforce Development: The restoration of \$1 million in Workforce Development will maintain current service levels (outside any cuts taken in the 3% and 10% scenarios). This will retain access to career coaching for approximately 500 youth participants and 600 adult participants at the following organizations: IRCO, New Avenues for Youth, POIC, PCC, Portland Youth Builders, Central City Concern, Our Just Futures, SE Works, and Trash for Peace.

Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to all of the objectives in the Advance Portland plan:

- Objective 1: Propel Inclusive Economic Growth and Innovation
- Objective 2: Promote Equitable Wealth Creation
- Objective 3: Foster a Vibrant Central City and Commercial Districts
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking.

Community Engagement and Empowerment

Initial concepts and parameters have been shared with the Prosper Portland Community Budget Committee (CBC) and the Prosper Portland Board of Commissioners (Board); however, the final concepts here have not been shared with the CBC and Board at the time of submittal. Concepts will be further shared with the CBC and Board during budget updates in February and March. The CBC will provide a formal letter providing input on the concepts in April in advance of the City and Prosper's Proposed Budgets.

Direct services impacted include access to workforce development programs for more than 1,100 Portlanders citywide; more limited staffing to build relationships, support community engagement via Community Leadership Committees and working groups, and respond to lending, major projects, and real estate partnership opportunities within new TIF districts.

Federal Compliance Activities

These programs are in compliance with all federal regulations and will continue to be in compliance even if the reduction is taken.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$1,081,895)
Sum:	\$0	(\$1,081,895)

Miscellaneous Fund Allocation	\$0	(\$1,081,895)
Sum:	\$0	(\$1,081,895)

Budget Concept 26477 - PHB - Eliminate 1.0 FTE Data Analyst Position	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

The package eliminates a vacant Housing Management Assistant position funded by GF and CDBG. Eliminating the position will free up \$144K of general fund resources through direct defunding and realignment of resources

Service Impacts

The bureau currently has a small number of staff who provide data analysis for the many critical policies that the bureau is advancing. The loss of one housing management analyst position will reduce the amount of analytical support that the bureau is able to provide and eliminate 1.0 FTE position on the bureau's Data & Systems team.

Equity Outcomes and Impact Tracking

The position in consideration is vacant; the package doesn't impact the bureau's equity goals.

Community Engagement and Empowerment

Regarding housing goals, the cut of this analyst positions will reduce the amount of analytical support that the bureau is able to provide.

Federal Compliance Activities

Not Applicable

Budget Detail

General Fund Discretionary	\$0	(\$144,231)
Sum:	\$0	(\$144,231)

Budget Concept 26486 - PHB - Eliminate Additional 1.0 FTE Data Analyst Position	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

The package eliminates the Housing Business Systems Analyst, Assistant position funded by GF and CDBG. Eliminating the position will free up \$154,282 in general fund resources through direct defunding and realignment of resources.

This package is an additional 7% that is associated with the 3% FTE cut package for a total cut of \$298,513.

Service Impacts

The bureau currently has a small number of staff who provide data analysis for the many critical policies that the bureau is advancing. The loss of two analyst positions will reduce the amount of analytical support that the bureau is able to provide and eliminate 2 junior positions on the bureau's Data & Systems team.

Equity Outcomes and Impact Tracking

The positions in consideration are vacant; the package doesn't impact the bureau's equity goals.

Community Engagement and Empowerment

Regarding housing goals, the cut of two analyst positions will reduce the amount of analytical support that the bureau is able to provide.

Federal Compliance Activities

Not Applicable

Budget Concept 26487 - PHB - Tech Service BTS IA reduction	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

The package proposes reduction to the interagency agreement between PHB and BTS.

Service Impacts

With this reduction, the bureau will lose the one embedded BTS employee, Applications Analyst at the Bureau. This will eliminate the Bureau's ability to design and implement new software solutions, and reduce the support provided for the loans subsidiary portfolio-Housing Development Software (HDS).

Equity Outcomes and Impact Tracking

The reduction is administrative in nature and doesn't have a potential equity impact

Community Engagement and Empowerment

This cut does not impact community engagement and environment.

Federal Compliance Activities

Internal Materials and Services	\$0	(\$251,980)
Sum:	\$0	(\$251,980)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$251,980)
Sum:	\$0	(\$251,980)

Budget Concept 26490 - PHB - Administrative cost reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package helps achieve the General Fund reduction target by decreasing discretionary External Materials and Services, without affecting core programs or service delivery. External Materials and Services are reduced by \$120,000, eliminating the bureau's miscellaneous expense allocation, which previously supported office supplies, meetings, advertising, professional services, and computer supplies. In addition, the travel and training budget is reduced by \$34,289, representing a 20% cut to that category.

Service Impacts

The reduction should have minimal impact of the bureau's services. Core programs and service delivery should remain intact as the packages focuses on reducing discretionary spending and shifting cost to other eligible funding sources, rather than eliminating positions or program activities. The impact would be limited to tighter control in items like travel, training and miscellaneous office expenses while essential legal services and staffing capacity will continue to be supported through alternative funding sources.

Equity Outcomes and Impact Tracking

Professional development investment in the bureau staff and unforeseen miscellaneous needs could be impacted as part of this cut.

Community Engagement and Empowerment

The change would have little to no impact on broader Community Engagement and Empowerment. The package preserves core housing programs and service capacity, allowing the bureau to maintain its current service level. The reductions are limited to discretionary costs and administrative realignments.

Federal Compliance Activities

Not Applicable

General Fund Discretionary	\$0	(\$154,289)
Sum:	\$0	(\$154,289)

Budget Concept 26492 - BPS - Director's Office 10% cut

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This cut reduces the BPS Directors Office and remaining Operations Team by 1 FTE.

Service Impacts

This cut reduces the BPS Directors Office and remaining Operations Team by 1 FTE. This cut removes staff who manage public records and provide training to other bureau staff on how to manage records. This cut was selected because it is one of only a few remaining administrative positions in the Director's Office that is not being re-aligned.

Equity Outcomes and Impact Tracking

The cut reduces transparency in decision-making. Reduced transparency can lead to reduced consideration of equity consequences in decision-making.

Community Engagement and Empowerment

The cut reduces public access to public records, and removes expertise related to records retention. This will impact public access to information related to land use planning, waste, and climate.

Federal Compliance Activities

This cut removes staff who manage public records, and provides training to staff on how to manage records. The cut will remove expertise related to public records access, adding risk that the bureau will fail to retain or release records as required by law.

Sum:	\$0	\$2,941,392

Budget Concept 26673 - BPS - Graffiti Abatement Status Quo Request (reduction)	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

BPS' internal services are funded with a bureau overhead model that pulls from five different sources – Solid Waste, PCEF, MHCRC, a few grants, and on-going General Fund (GFOG). The financial structure is based on FTE within each contributing bureau program and the federal overhead rate. This creates a consistent year-to-year calculation to fund shared resources using otherwise restricted funds like Waste, MHCRC and PCEF. The use of a consistent model addresses concerns about the color of money and is aligned with federal guidelines on how restricted revenue sources can contribute to overhead.

Service Impacts

If not addressed this revenue shortfall will require a cut of one (1) additional FTE from technical services and one (1) FTE from Equity and Engagement would be necessary, above the 20% planned re-alignment cut. The technical services team provides database development and analysis for a variety of bureau and service area functions. Loss of one FTE will reduce the service area's capacity for data management and analysis. That same team is also losing another FTE related to re-alignment to create a new enterprise-wide data and privacy office. The Equity and Engagement Team supports engagement best practices across the bureau, supports specific engagement events, helps maintain relationships with community organizations, staffs the Community Involvement Committee, and supports equity analysis and best practices for both internally- and externally-facing decisions. This reduction would reduce the bureau's capacity to incorporate equity into decision making. These options were selected because they are the only internal service teams where the level of service provided has some discretion. The Director's Office, Procurement and HR functions are already minimally staffed with only a few people, and Communications was previously removed from the bureau with Re-alignment. The volume of funding flowing through the bureau makes cuts to finance and accounting risky.

Equity Outcomes and Impact Tracking

The loss of 1 FTE from the Equity and Engagement Team would reduce capacity to perform equity analysis and maintain best practices for both internally- and externally facing decisions. This reduction would reduce the bureau's capacity to incorporate equity into decision making as well as conducting equity analysis on programs, projects, policies, and the legislative agenda.

Community Engagement and Empowerment

The loss of 1 FTE from the Equity and Engagement Team reduces the bureau's capacity to maintain engagement best practices across the bureau, support specific engagement events, and maintain relationships with community organizations. This reduction would reduce the bureau's capacity to incorporate equity into decision making.

Federal Compliance Activities

The Equity and Engagement Team staffs the state-mandated Community Involvement Committee and supports language access requirements. The loss of 1 FTE will not prevent continued compliance.

Sum:	\$0	(\$970,330)

Budget Concept 26675 - Prosper - CSL \$1M Add	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

Consistent with the Budget Note and Budget Note response; Prosper Portland has identified \$2.1 million in reductions through organizational efficiencies and program reductions to adjust to the expiring one-time General Fund (GF) Resources. This package would maintain the GF-funded level of service Prosper Portland provided in FY 2025-26. During the FY 2025-26 budget process, Prosper Portland's ongoing General Fund was reduced from \$14.7 million to \$11.1 million. Of this reduction, \$2 million was added back as one-time funding expiring in FY 2026-27.

1. Organizational Efficiencies and Reductions: \$1.1 million

Consistent with Mayor's Office FY 2025-26 direction and budget note, \$1.1 million of the cut is being addressed via organization-wide efficiencies and reduced positions or positions being held vacant until future funding becomes available and applying those savings to GF programming where applicable. Anticipated position changes include:

- Integrating Recreational Cannabis Tax (RCT) related small business activities and funding into the Inclusive Business Resource Network (IBRN); eliminating one position previously funded by RCT funds; and, allocating associated RCT funds to backfill for a portion of the GF cut.
- Cost savings via reclassifying two vacant project manager level positions to lower classifications supporting IBRN and Neighborhood Prosperity Network.
- Integrating RCT related grant activities into place-based financial assistance team; reducing General Fund allocation to citywide lending and real estate staffing; proportionately reallocating staffing and activities to funding made available by putting holds on two vacancies related to TIF based work.
- Proportionately reducing administrative staffing supporting citywide programming currently funded by General Fund.

Restoration of the \$1.1 million would provide ongoing service levels supporting economic and urban development activities citywide and within newer TIF districts where funding is currently not available or limited. Restoration would also restore funding for full and robust IBRN services (via General Fund and RCT) and maintain organizational support levels at FY 2025-26 levels.

2. Workforce Development Contract Reductions: \$1 million

Current service level funding from General Fund includes \$1.6 million in funding for Workforce Development programs making up 44% of the total funding when complemented by CDBG, Community Opportunities & Enhancements Program funding and Enterprise Zone resources. In addition to Prosper Portland and City resources, Worksystems Inc. receives state and federal funding.

The loss of approximately \$1M of this one-time funding will result in the elimination of adult career coaching services through the Economic Opportunity Program and youth career coaching services through NextGen, all of which is subcontracted through Worksystems Inc.

3. Alternative Add-Back Proposals

Prosper Portland would recommend add-backs in other program offers in lieu of restoring the savings and funding reductions in this package. Specifically, Prosper Portland proposes adding back funds from the above savings and cuts to business retention and expansion and traded sector marketing activities (\$750k) and professional services offered to small businesses through a partnership between Portland Permitting and Development and Prosper's Office of Small Business (\$600k). Access to these third-party professional services would help small businesses with site selection, design, and tenant improvement planning.

Service Impacts

1. Organizational efficiencies and reductions: The restoration of funding related to positions being identified for reduction will provide additional capacity for full implementation of the IBRN program, including with more senior staff able to carry a greater volume of work, and to support project management and relationship management activities in citywide lending and real estate activities where TIF is limited or non-existent, particularly in new TIF districts where TIF resources are delayed.

2. Workforce Development: The restoration of \$1 million in Workforce Development will maintain current service levels (outside any cuts taken in the 3% and 10% scenarios). This will retain access to career coaching for approximately 500 youth participants and 600 adult participants at the following organizations: IRCO, New Avenues for Youth, POIC, PCC, Portland Youth Builders, Central City Concern, Our Just Futures, SE Works, and Trash for Peace.

Equity Outcomes and Impact Tracking

Outcomes are guided by Advance Portland, the City's strategic plan for economic development <https://www.advanceportland.com/>. Prosper Portland reports on these goals at minimum annually to ensure that the agency is working toward inclusive economic growth.

If funding is reinstated, these programs would continue to contribute to all of the objectives in the Advance Portland plan:

- Objective 1: Propel Inclusive Economic Growth and Innovation
- Objective 2: Promote Equitable Wealth Creation
- Objective 3: Foster a Vibrant Central City and Commercial Districts
- Objective 4: Connect Portlanders to High Quality Jobs

Prosper Portland collects geographic and demographic data for clients to assist with impact tracking

Community Engagement and Empowerment

Initial concepts and parameters have been shared with the Prosper Portland Community Budget Committee (CBC) and the Prosper Portland Board of Commissioners (Board); however, the final concepts here have not been shared with the CBC and Board at the time of submittal. Concepts will be further shared with the CBC and Board during budget updates in February and March. The CBC will provide a formal letter providing input on the concepts in April in advance of the City and Prosper's Proposed Budgets.

Direct services impacted include access to workforce development programs for more than 1,100 Portlanders citywide; more limited staffing to build relationships, support community engagement via Community Leadership Committees and working groups, and respond to lending, major projects, and real estate partnership opportunities within new TIF districts.

Federal Compliance Activities

These programs are in compliance with all federal regulations and will continue to be in compliance even if the reduction is taken.

Bob Cozzie, Deputy City Administrator

Robert.Cozzie@portlandoregon.gov
1120 SW 5th Avenue
Portland, OR 97204
503-865-6047

DATE: February 9, 2026
TO: City Budget Office
FROM: Bob Cozzie, DCA of Public Safety
RE: FY 2026-27 Service Area Scenario Budgets

Gap Between Initial Appropriation and Current Service Level

The Public Safety Service Area (PSSA) faces a significant structural gap between current service levels and the resources available from its General Fund Current Appropriation Level (CAL). This gap is driven by several intersecting factors across bureaus, including staffing and compensation pressures, escalating Internal Materials and Services (IMS) costs, the expiration of one-time funding, and changes in program delivery requirements.

1. Staffing and Compensation Pressures Outside the Initial Appropriation

Most public safety bureaus experienced higher than usual turnover from 2020-2022, along with hiring freezes and reductions in resources. The pipeline for recruitment, hiring, and training of new responders can take 18-36 months. Each bureau has a five-year staffing plan with assumptions on hiring and separations, including anticipated retirements. While the bureaus continue to hire, there is a high cost of trainees and recruits along with coaching premiums and overtime needed to maintain staffing targets.

The City's General Fund CAL approach does not include cost-of-living adjustments (COLA) within bureaus' initial appropriations. While bureaus can typically request support for these adjustments through the Spring Technical Adjustments Ordinance (TAO), the size of this year's citywide shortfall has brought additional scrutiny to those requests. As a result, health benefit increases and COLA-related gaps are now explicitly identified within the base budget gap for most public safety bureaus.

2. Internal Materials and Services (IMS) Cost Growth

Across all public safety bureaus, costs for centrally provided services, such as Fleet, Facilities, Risk, and Technology, have increased faster than the general inflation assumed in the General Fund CAL methodology. For the PSSA in FY27, this results in an estimated **\$4.6 million funding gap** attributable to IMS increases alone.

3. Expiration of One-Time Funding

A substantial portion of the current service level has been supported by one-time resources over the past several years. As those funds expire, bureaus face significant gaps that must be closed to maintain existing programs. Key examples include:

Portlandgov

PortlandORGov

@PortlandGov

- **Portland Police Bureau (PPB):** \$12.5M structural gap, due to overtime needed to cover vacancies and large number of officers in training.
- **Portland Fire & Rescue (PF&R):** \$9.3M gap driven by overtime to meet minimum staffing on a shortened workweek and reliance on grants/one-time funding for the CHAT program.
- **Bureau of Emergency Communications (BOEC):** \$1.2M gap to continue the dispatcher training pipeline.
- **Community Safety Division:** \$7.7M gap primarily from the expiration of one-time gun violence prevention funding.
- **Enterprise Services (FITCOG):** \$227K gap due to the absence of ongoing support for program coordination infrastructure.

4. Other Structural Cost Pressures

Several programmatic and contractual changes over the past two years have introduced new recurring costs that are not reflected in the General Fund CAL base:

- **PF&R:** \$1.7M related to the retire/rehire program. Under contract terms, 26 employees have indicated intent for a one-year return, triggering additional expense, including retirement costs not covered by the Fire and Police Disability and Retirement Fund.
- **Portland Street Response (PSR):** \$855K gap due to a misalignment between funding assumptions and actual entry-level wages along with a 5% OSPRP salary increase.
- **Enterprise Services:** \$742K related to the removal of core service realignment savings before corresponding position eliminations were implemented.

Reduction scenarios, and what the impact of those scenarios would be on services.

Public safety bureau budgets are predominantly comprised of personnel costs, with nearly 2,300 FTE, 80% of which are front line. Given this structure, even modest budget reductions risk affecting staffing and frontline service delivery. In developing reduction scenarios, bureaus prioritized preserving core emergency response functions and minimizing direct impacts on personnel. The following summaries outline the major reductions proposed across bureaus and describe the anticipated service impacts if these scenarios were implemented.

Bureau of Emergency Communications:

BOEC's reduction scenarios focus on scaling back internal support and operational flexibility while prioritizing core 911 call-taking and dispatch functions. Proposed cuts include eliminating night-time security, reducing operational overtime for six months of the year, and cutting training, coaching premiums, and quality assurance reviews. Further reductions require the reduction of workforce in call taker/dispatcher and administrative support.

Portland Police Bureau:

PPB's reduction scenarios include scaling back overtime, civilian support programs, and targeted enforcement efforts to preserve core patrol staffing for as long as possible. Proposed cuts include reducing mission and backfill overtime, eliminating the Public Safety Support Specialist program, Victim Services Unit, and Advanced Academy, and cutting fleet, training, and technology resources. Deeper cuts would halt officer hiring in FY 2027, creating long-term impacts on staffing and response capacity. These reductions would result in longer response times, fewer community engagement services, and diminished capacity to address property and violent crime through proactive enforcement or investigations.

Portland Fire & Rescue:

Portland Fire & Rescue's reduction scenarios focus on equipment, staffing, and internal support functions. Initial proposed cuts include reducing the apparatus replacement budget and turnout gear inventory. The bureau proposes increases to fees to get the bureau closer to cost recovery for permitting programs, though increasing expenses for the public. More significant reductions would reduce on-duty firefighter staffing. These changes would increase response times, reduce geographic coverage, and diminish service reliability. Additional risks include lower Insurance Services Office (ISO) ratings, increased apparatus downtime, and less redundancy in protective equipment for firefighters.

Portland Bureau of Emergency Management:

PBEM's reduction scenarios focus on vacant position reclassifications, vehicle reductions, and cuts to materials and services. While core emergency management functions would continue, the bureau's ability to recruit experienced staff, support planning, and sustain coordination efforts would be limited. These reductions avoid direct program cuts but reduce long-term operational capacity.

Office of the DCA of Public Safety

The Office of the DCA of Public Safety's reduction scenarios include eliminating several PSR responder and aftercare teams, reducing the Office of Violence Prevention (OVP) and Ceasefire capacity, and scaling back EMS resources. These changes would reduce access to non-police crisis response and weaken Portland's violence prevention infrastructure. While core staffing is preserved where possible, nearly all programmatic resources rely on expiring one-time funds, limiting the ability to sustain existing service levels.

Budget Concept 26245 - EC - Training Pipeline CSL Add	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This package is to extend the eight limited term dispatcher positions that have been funded with vacancy savings preserved in the training pipeline for the past three years. These positions allow the bureau to over hire trainees to stay ahead of normal staff attrition. It takes 18-24 months for a trainee to become fully certified in 9-1-1 call taking and dispatch.

Service Impacts

The elimination of the training pipeline could result in the bureau not being able to stay ahead of staff attrition and result in a reduction of certified staff able to answer 9-1-1 calls and dispatch emergency services.

Equity Outcomes and Impact Tracking

Community Engagement and Empowerment

Federal Compliance Activities

Budget Detail

Miscellaneous Fund Allocation	\$1,118,816	\$0
Sum:	\$1,118,816	\$0

Position Detail

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30000034 - Emerg Commun Dispatcher, Sr	8.00	\$646,544	\$0	\$422,808	\$1,118,816
Total	8.00	\$646,544	\$0	\$422,808	\$1,118,816

Budget Concept 26545 - EC - Fund Training Pipeline	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

A budget note in FY22 allowed BOEC to keep under-spending in a training pipeline sub-fund to allow the bureau to over-hire trainees while the bureau worked to return staffing to full capacity. This package requests the continuation of the training pipeline sub-fund, funded with projected underspend in FY26. It will fund the eight limited term positions for another year.

Service Impacts

The training pipeline has increased BOEC’s Certified Senior Dispatcher FTE from 62 (August 2022) to 89 (projected December 2025). Over the same period, average 911 call wait times decreased from 84 seconds to 21 seconds. Because dispatch certification takes up to 24 months, the pipeline is essential to maintaining service levels and responding to community demand.

Equity Outcomes and Impact Tracking

Continuing to fund a training pipeline allows BOEC leadership to maintain service levels and respond to community demand while simultaneously addressing attrition. This equilibrium between employee attrition and recruitment supports meeting national 9-1-1 call answering standards, providing equitable access to services, and optimizing employee workload. While trust is difficult to quantify, community concern remains from the extended hold times experienced during 2020–2022. Sustaining timely call answering and dispatch supports public confidence by demonstrating that emergency calls will be answered without delay.

Community Engagement and Empowerment

This proposal supports behind-the-scenes staffing capacity for a universally accessed public service. While not a direct community program, it ensures the City can continue to meet public expectations for fast, reliable 911 response.

Federal Compliance Activities

There are no federal compliance requirements related to this pipeline.

Budget Detail

202 - Emergency Communication Fund

Revenue	One Time Cost	Ongoing Cost
Beginning Fund Balance	\$1,118,816	\$0
Miscellaneous Fund Allocation	(\$1,118,816)	\$0
Sum:	\$0	\$0

Budget Concept 26546 - EC - Night-time Security	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would eliminate overnight security services at the Bureau of Emergency Communications facility. Night-time security was implemented during the COVID-19 pandemic to support employee safety and deter theft of employee vehicles. Eliminating this service would remove dedicated security presence during overnight hours.

Service Impacts

Security staffing is provided through a contract and does not affect BOEC's core 911 operations. Removing overnight security would reduce visible deterrence and on-site response to incidents involving employee vehicles or facility grounds. The reduction does not directly affect staffing or emergency call-taking capacity but could have an impact on staff morale or retention.

Equity Outcomes and Impact Tracking

This reduction package primarily affects call takers and dispatchers working overnight shifts. Some staff will perceive the reduction as an increased personal safety risk. Prior to having nighttime security, the campus experienced separate incidents involving individuals accessing the property, harassing employees at the parking gate, and entering the building. One incident resulted in a City vehicle and radio being stolen. These 24/7 emergency communications personnel require secure working conditions; however, despite the campus supporting BOEC, PBEM, and BTS, BOEC is the only bureau paying for the security costs.

Community Engagement and Empowerment

This contract does not provide services to the public and has no community-facing component. The proposal affects only internal staffing conditions. No external engagement or notification is anticipated.

Federal Compliance Activities

There are no federal compliance requirements related to this contracted security service.

Budget Detail		
202 - Emergency Communication Fund		
Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$0	(\$325,922)
Sum:	\$0	(\$325,922)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$325,922)
Sum:	\$0	(\$325,922)

Budget Concept 26549 - EC - Operational Overtime Reduction	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would eliminate operational overtime outside of peak summer demand periods. The bureau would reduce approximately 860 overtime hours per month for six months of the year. Staffing coverage during non-summer months would rely solely on regular schedules, reducing flexibility to address unplanned absences, training backfill, or workload surges.

Service Impacts

BOEC uses overtime to maintain minimum staffing needs due to vacancies, critical incidents, surge spikes, and training supplementation. A reduction in overtime may lead to delayed call-answer times, longer incident hold times prior to dispatch, increased employee workload, and extended certification times for new staff. It would also limit the bureau's ability to adjust for periods of surge call volume and multi-agency critical incidents while meeting national 9-1-1 call answering standards. Overtime usage is tracked internally, and call performance is measured through national 9-1-1 standards. This reduction will require the bureau to prioritize essential coverage within significantly constrained resources.

Equity Outcomes and Impact Tracking

Reductions in staffing flexibility may impact call response times, particularly during off-peak months with unexpected surges. This proposal was selected as a partial reduction to avoid cutting filled positions or full-year coverage.

Community Engagement and Empowerment

BOEC's services are not discretionary or targeted by geography. There is no direct engagement associated with this overtime adjustment, and the public may not be notified unless service levels change significantly. The proposal primarily affects internal staffing capacity.

Federal Compliance Activities

There are no direct federal compliance obligations tied to overtime levels.

Budget Detail		
202 - Emergency Communication Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$422,546)
Sum:	\$0	(\$422,546)
Revenue	One Time Cost	Ongoing Cost
Intergovernmental	\$0	(\$178,465)
Miscellaneous Fund Allocation	\$0	(\$244,081)
Sum:	\$0	(\$422,546)

Budget Concept 26553 - EC - Reduce Training & Travel	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would decrease funding for bureau training and travel by 60%. Fewer staff would be able to attend external trainings, conferences, and professional development opportunities. Required training would be prioritized, but discretionary or supplemental training activities would be reduced or deferred.

Service Impacts

This reduction would limit BOEC's ability to invest in workforce development and peer support roles. Fewer personnel would participate in industry training or conferences, though core operational training would continue. Bureau performance measures that could be negatively affected include the BOEC stay/retention survey satisfaction score, the percentage of BOEC employees with access to professional development opportunities, and the number of interactions between BOEC staff and community members beyond calls.

Equity Outcomes and Impact Tracking

Reduced access to training and travel will impact long-term staff development, retention, and advancement, especially for less senior employees or those seeking specialized skills required for internal promotion. It also limits BOEC's ability to stay current with emerging technologies and accessibility improvements in the 9-1-1 system. This reduction will negatively affect BOEC's ability to achieve Goal 3, objective 2 of the PSSA strategic plan: increasing focus on the overall wellbeing of the public safety workforce by building a culture of professional development and continuous learning.

Community Engagement and Empowerment

This proposal does not impact direct community services but may indirectly affect caller experience if internal training or support roles are scaled back. No external engagement is associated with this package, and no community notification is anticipated.

Federal Compliance Activities

The bureau will continue to meet federally required training standards for 911 call-taking and dispatch. This reduction does not impact compliance with federal mandates.

Budget Detail		
202 - Emergency Communication Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$143,857)
Personnel	\$0	\$0
Sum:	\$0	(\$143,857)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$143,857)
Sum:	\$0	(\$143,857)

Budget Concept 26556 - EC - Continuing Education Reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package contains a reduction to in-service and other training overtime opportunities, as well as funds for other external training opportunities. It would also reduce quality assurance reviews.

Service Impacts

BOEC’s QA program reviews phone and radio interactions to validate policy compliance and operational consistency. A reduction in reviews would reduce the bureau’s capacity to assess systemwide performance trends, correct individual deficiencies, and tailor staff training. BOEC tracks QA data internally, and fewer reviews may reduce the granularity of performance oversight. Affected performance measures in the PSSA strategic plan would include the percentage of medical and fire calls that are compliant with International Academies of Emergency Dispatch (IAED) Accredited Center of Excellence (ACE) standards and IAED ACE award status.

Equity Outcomes and Impact Tracking

Regular training and quality assurance reviews help ensure consistent call handling across shifts and personnel. This supports trauma-informed and equitable services for community members. A reduction in training hours and quality assurance may create performance gaps that affect underserved populations or complex calls requiring Civil Rights accommodations (language access, deaf or hard of hearing, behavioral health needs). This also delays recommendations to improve protocols that could benefit these same populations. The reduction will negatively affect BOEC’s actions under Goal 1, Objective 3 of the PSSA strategic plan: measure, evaluate, and improve public safety response performance and outcomes.

Community Engagement and Empowerment

BOEC’s services are not discretionary or targeted by geography. There is no direct engagement associated with this overtime adjustment, and the public may not be notified unless service levels change significantly.

Federal Compliance Activities

There are no direct federal compliance obligations tied to this package.

Budget Detail

202 - Emergency Communication Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$85,247)
Personnel	\$0	(\$152,403)
Sum:	\$0	(\$237,650)

Revenue	One Time Cost	Ongoing Cost
Intergovernmental	\$0	(\$47,530)
Miscellaneous Fund Allocation	\$0	(\$190,120)
Sum:	\$0	(\$237,650)

Budget Concept 26564 - EC - Administrative Support Reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package would eliminate four administrative support FTE at BOEC, representing a 20% reduction in the bureau's already lean non-responder staffing. These positions support critical internal functions that enable frontline 9-1-1 operations, compliance, planning, and intergovernmental communication. While the reduction preserves direct call-taking and dispatch capacity, it would significantly constrain the bureau's operational support systems and long-term planning.

Service Impacts

Removing four administrative positions would slow or limit functions such as internal communications, onboarding, compliance reporting, partnership coordination, and strategic planning. Remaining staff would absorb additional responsibilities, potentially leading to delays, reduced responsiveness, and increased workload for both administrative and frontline staff. These roles indirectly support performance standards by maintaining the infrastructure and processes that keep operations running smoothly. While 9-1-1 services would continue, organizational effectiveness would be diminished.

Equity Outcomes and Impact Tracking

Every department at BOEC is currently working with limited staffing. Further administrative reductions would impact the bureau's ability to support frontline responders, engage with the community, and participate in statewide 9-1-1 initiatives. These positions support Civil Rights compliance, language access coordination, community-informed policy development, and operational equity. Eliminating these roles would reduce capacity to deliver equitable, inclusive services and increase strain on emergency communications personnel. BOEC does not currently track equity outcomes by position type but recognizes that operational infrastructure directly affects equitable service delivery.

Community Engagement and Empowerment

Administrative staff play a behind-the-scenes role in supporting BOEC's limited external engagement functions. They help coordinate interagency efforts, support outreach, and manage data and public communication. Reducing these positions would limit the bureau's ability to respond to community inquiries, prepare for community events, or sustain partnerships with organizations that serve historically underrepresented populations.

Federal Compliance Activities

Administrative staff support compliance with federal standards, including Title VI, ADA coordination, and required reporting. Eliminating these positions would not remove BOEC's obligations, but would reduce internal capacity to meet them consistently or proactively.

Budget Concept 26566 - EC - Dispatcher Positions & Hiring Reduction	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This package would reduce six dispatcher positions, along with the coaching premiums and contracts needed for recruitment and hiring. As the bureau is near full staffing now, it would likely need to cancel an academy or layoff trainees. The time to recruit, hire, and train can take up three years so any delays in hiring can prevent the bureau from staying ahead of normal attrition in the future. Staffing reductions would decrease call-taking and dispatch capacity and reduce administrative and operational support functions. The bureau would need to adjust staffing models and service delivery to account for reduced personnel availability.

Service Impacts

Reduced dispatcher staffing would limit BOEC’s ability to respond to call volume, potentially increasing 911 answer times and delaying dispatch. BOEC monitors call-answer and dispatch times through national standards, which may be harder to meet with reduced staffing. Affected bureau performance measures may include the percentage of 911 calls answered within 15 seconds and the percentage of 911 calls answered within 20 seconds.

Equity Outcomes and Impact Tracking

A reduction in capacity of Portland's 911 center will lead to service delays as community members experience longer hold times and increased call volume. These changes will disproportionately impact communities that already experience higher rates of violent crime, medical fragility, and barriers to accessing 9-1-1 (limited English proficiency, disabilities). Reversing our strategic staffing plan also harms current and future employees. Call takers and dispatchers experience depression, anxiety, PTSD, and suicidal ideation at higher rates than other first responders. Adequate staffing maintains healthier workloads and recovery time between crises. Cutting trainees mid-program signals unreliability as an employer, creating significant recruitment challenges.

Community Engagement and Empowerment

911 service is universally accessed and not tied to specific community programming. While the public would not be engaged directly on staffing levels, service quality could be visibly impacted. If answer times increase, BOEC may need to coordinate public messaging or manage service expectations.

Federal Compliance Activities

BOEC is not subject to specific federal staffing mandates but follows national benchmarks for call-answering and dispatch performance. The bureau will continue to meet basic training and certification standards as required by the state for 911 operations.

Budget Concept 26565 - EM - 3% Reduction Package	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This 3% reduction package would achieve ongoing savings by reclassifying four existing vacant positions to lower classifications, reflecting anticipated salary savings. In addition, the package would reduce program expenses by eliminating five bureau vehicles. These actions would lower administrative and operational capacity but would not immediately eliminate filled positions or active programs.

Service Impacts

Reclassifying vacant positions would limit the bureau's ability to recruit at higher skill or experience levels. Eliminating a vehicle may reduce flexibility for fieldwork or partner coordination. PBEM tracks program activity internally but is not tied to specific performance measures for these functions. Affected bureau performance measures may include PBEM's voluntary turnover rate.

Equity Outcomes and Impact Tracking

This package avoids direct reductions to community-serving programs but may reduce staff capacity to support equitable emergency planning, partner coordination, or engagement. The proposal prioritizes vacancy management over filled-position cuts. Reclassifying vacant positions will negatively affect PBEM's strategic action under Goal 3, objective 4 of the PSSA strategic plan: increase focus on the overall wellbeing of the public safety workforce and system: develop the PSSA as an organization to meet the vision and strategy.

Community Engagement and Empowerment

This package does not reduce specific community programs, but resource limitations may affect outreach efforts, event support, or planning work with external partners over time.

Federal Compliance Activities

This reduction does not affect grant compliance or required planning activities.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost

Miscellaneous Fund Allocation	\$0	\$0
Sum:	\$0	\$0

Budget Concept 26595 - EM - 10% Reduction Package	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This 10% reduction package would abolish two vacant positions (Emergency Services Manager and Policy Advisor) in addition to the items listed in the 3% reduction package. These reductions would decrease staffing capacity and operational support functions across PBEM.

Service Impacts

Eliminating vacant positions would reduce the bureau’s Emergency Operation’s capabilities and support. PBEM tracks program activity internally but is not tied to specific performance measures for these functions.

Equity Outcomes and Impact Tracking

This package avoids direct reductions to community-serving programs but may reduce staff capacity to support equitable emergency planning, partner coordination, or engagement. The proposal prioritizes vacancy management over filled-position cuts. Abolishing these vacant positions will negatively affect PBEM’s strategic actions under Goal 1, objective 3 of the PSSA strategic plan: measure, evaluate, and improve public safety response performance and outcomes; as well as objective 4: improve citywide coordination for response to major events.

Community Engagement and Empowerment

This package does not reduce specific community programs, but resource limitations may affect outreach efforts, event support, or planning work with external partners over time.

Federal Compliance Activities

This reduction does not affect grant compliance or required planning activities.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$427,800)
Sum:	\$0	(\$427,800)

Sum:	\$0	(\$427,800)

Budget Concept 26244 - FR - CHAT CSL Add	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This package is to continue the \$2M funding for funding 12 FTE in the CHAT program to maintain its current staffing level. The \$2M of funding is coupled with \$2.2M of grant funding included in the base budget with an additional 12 FTE.

Service Impacts

The CHAT Program addresses the challenge of low-acuity medical calls that strain emergency services and hospital emergency departments. By deploying a paramedic and emergency medical technician team, CHAT provides on-site care, reduces unnecessary transports, and connects clients to appropriate healthcare providers.

Equity Outcomes and Impact Tracking

CHAT serves individuals who face barriers to accessing timely medical care, including people experiencing housing instability or limited access to primary care. Maintaining current service levels supports equitable access to non-emergency medical response and reduces unnecessary emergency department use. If funding is not continued, service reductions would disproportionately affect populations that rely on low-barrier medical services.

Community Engagement and Empowerment

CHAT provides direct, community-based medical services through on-scene care and referrals to appropriate healthcare and social service providers. The program serves individuals citywide and focuses on addressing non-emergency medical needs in the community. This request maintains existing service delivery and does not expand the program's scope or population served. The program primarily advances external, community-focused wellbeing outcomes.

Federal Compliance Activities

There are no associated federal compliance activities.

Budget Concept 26270 - FR - Retire-Rehire Retirement CSL Add	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This package funds retirement-related costs associated with retire-rehire employees under the Portland Fire Fighters Association (PFFA) contract. Eligible employees may elect a one-year retire-rehire extension with six months' notice. As of November 2025, 26 employees have indicated intent to retire-rehire in May 2026. OPSRP costs for retire-rehire employees are not reimbursed by the Fire and Police Disability and Retirement Fund levy and must be supported by the General Fund. Increased healthcare costs have made retire-rehire staffing more expensive than overtime or new hires. This request maintains current service levels.

Service Impacts

Retire-rehire employees support continuity of operations during periods of transition caused by retirements and hiring timelines. Funding these costs allows PF&R to maintain current staffing capacity and emergency response readiness. Without this funding, PF&R would need to reduce staffing or reconfigure operations, increasing response times and creating coverage gaps. Maintaining current staffing levels supports consistent emergency response and reduces the risk of service disruptions during periods of elevated workforce turnover.

Miscellaneous Fund Allocation	\$1,735,405	\$0
Sum:	\$1,735,405	\$0

Budget Concept 26271 - FR - Fire Overtime	
Budget Concept Type	Magnitude
<i>Add</i>	<i>Current Level of Service</i>

Package Description

This package provides \$5.75 million to fund backfill overtime necessary to maintain Portland Fire & Rescue's current staffing targets. PF&R projects the need for approximately 276,000 hours of backfill overtime in the coming fiscal year. Existing appropriations are insufficient to cover this level of overtime, and a portion of current funding is one-time in nature. This request replaces expiring one-time resources with ongoing funding to sustain current service levels and avoid reductions in operational readiness. This accounts for anticipated retirements, separations, and hiring timelines.

Service Impacts

Without this funding, PF&R would be required to reduce overtime and make significant operational changes, including service delivery. These reductions would increase response times, create gaps in coverage, and limit the bureau's ability to manage simultaneous incidents. Longer response times could negatively affect the City's Insurance Services Office (ISO) rating, increasing insurance costs for residents and businesses. PF&R uses data-driven analysis to assess operational impacts, including response times, call volume, geographic risk factors, and service equity considerations.

Equity Outcomes and Impact Tracking

Maintaining current overtime levels supports equitable access to timely emergency response across the city. PF&R monitors response time and coverage data to track impacts and inform resource allocation decisions. A data-driven approach to determining the least-bad option to achieve this reduction would be conducted to determine where service cuts would occur. Factors must consider equity impacts and FMA vulnerability measures, call types, environmental risk factors, economic risk factors, and response times.

Community Engagement and Empowerment

This package supports core emergency response services provided citywide and does not represent a discrete program or direct community engagement activity. Maintaining current staffing and response capacity ensures consistent service delivery for residents and businesses.

Federal Compliance Activities

There are no associated federal compliance activities.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
Personnel	\$0	\$5,753,600
Sum:	\$0	\$5,753,600

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	\$5,753,600
Sum:	\$0	\$5,753,600

Budget Concept 26574 - FR - Reduce Apparatus Replacement	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would decrease PF&R's apparatus replacement budget by the cost of one fire engine. The current \$6.5 million annual replacement budget is already below the level needed to maintain a sustainable fleet lifecycle. Reducing funds further would delay planned replacements, increase the number of aging vehicles in service, and raise long-term maintenance costs. Older equipment can impact reliability, safety, and the City's ISO (Insurance Services Office) rating, which affects property insurance rates citywide.

Service Impacts

This reduction removes approximately \$1.2 million from the apparatus replacement budget, equivalent to one fire engine. The current budget of \$6.5 million does not fully meet PF&R's projected apparatus lifecycle needs. Deferring replacements increases maintenance costs and asset risk, and may reduce equipment reliability. The bureau tracks apparatus age, condition, and compliance with National Fire Protection Association (NFPA) standards. Fleet performance is monitored internally and considered in the City's ISO evaluation.

Equity Outcomes and Impact Tracking

Fleet reductions do not directly affect service areas, but over time, aging equipment may increase the risk of in-service failures or delayed responses. These issues may negatively affect PF&R's strategic actions under Goal 1, objective 3 of the PSSA strategic plan: Improve public safety response capabilities: measure, evaluate, and improve public safety response performance and outcomes.

Community Engagement and Empowerment

This proposal does not involve a program with direct community engagement. Apparatus replacement is an internal support function that enables field operations. If reduced funding leads to degraded response reliability over time, community-facing impacts may follow. As this is an internal capital investment, no external notification or outreach is planned.

Federal Compliance Activities

There are no federal compliance requirements associated with this apparatus replacement funding.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Capital Outlay	\$0	(\$1,200,000)
Sum:	\$0	(\$1,200,000)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$1,200,000)
Sum:	\$0	(\$1,200,000)

Budget Concept 26575 - FR - CHAT Federal Earmark Revenue	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package continues the \$2M funding for funding 12 FTE in the CHAT program to maintain its current staffing level. The \$2M of funding is coupled with \$2.2M of grant funding included in the base budget with an additional 12 FTE.

Service Impacts

The CHAT Program addresses the challenge of low-acuity medical calls that strain emergency services and hospital emergency departments. By deploying a paramedic and emergency medical technician team, CHAT provides on-site care, reduces unnecessary transports, and connects clients to appropriate healthcare providers.

Equity Outcomes and Impact Tracking

CHAT serves individuals who face barriers to accessing timely medical care, including people experiencing housing instability or limited access to primary care. Maintaining current service levels supports equitable access to non-emergency medical response and reduces unnecessary emergency department use. If funding is not continued, service reductions would disproportionately affect populations that rely on low-barrier medical services.

Community Engagement and Empowerment

CHAT provides direct, community-based medical services through on-scene care and referrals to appropriate healthcare and social service providers. The program serves individuals citywide and focuses on addressing non-emergency medical needs in the community. This request maintains existing service delivery and does not expand the program's scope or population served. The program primarily advances external, community-focused wellbeing outcomes.

Federal Compliance Activities

There are no associated federal compliance activities.

Budget Detail

217 - Grants Fund

Revenue	One Time Cost	Ongoing Cost
Intergovernmental	\$1,500,000	\$0
Miscellaneous Fund Allocation	(\$1,500,000)	\$0
Sum:	\$0	\$0

Budget Concept 26576 - FR - Increase Prevention Fees	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This concept would increase Prevention-related fees by approximately 40 percent to generate additional revenue without increasing service volume or workload.

Service Impacts

Prevention services, including plan reviews, inspections, and code enforcement, would continue at current levels. The fee increase would improve cost recovery for these services without requiring new FTE or operational changes.

Equity Outcomes and Impact Tracking

The increase would shift a greater share of cost recovery to fee payers, including residents, small businesses, nonprofits, and community organizations. Higher fees may increase financial barriers to code compliance, safety upgrades, business development, and community programming, particularly for smaller or resource-constrained entities. Higher fees may disproportionately affect small businesses, nonprofits, and community organizations with limited resources. These impacts may reduce access to safety services or delay compliance upgrades. While the proposal supports fiscal sustainability, PF&R recognizes that increased fees may create burdens for historically underserved or lower-resourced communities. This option was selected over frontline service reductions to preserve emergency response capacity.

Community Engagement and Empowerment

Fee adjustments would be posted publicly, and stakeholders notified per standard practice. The change primarily affects external users. No targeted engagement is planned beyond required public notice.

Federal Compliance Activities

There are no associated federal compliance activities.

Budget Detail

100 - General Fund

Revenue	One Time Cost	Ongoing Cost
Charges for Services	\$0	\$1,600,000
Miscellaneous Fund Allocation	\$0	(\$1,600,000)
Sum:	\$0	\$0

Budget Concept 26577 - FR - Turnout Reduction	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would phase out Portland Fire & Rescue’s current 1:1 turnout gear model, in which each firefighter is issued two full sets of gear (A-set and B-set). Removing the second set would reduce replacement costs but require operational changes to manage gear availability for laundering and decontamination. The change could increase logistical demands on staff and reduce redundancy in protective equipment access.

Service Impacts

Phasing out the second turnout set would reduce PF&R’s turnout gear inventory and lower projected replacement costs by approximately \$250,000. However, the bureau would need to establish a system for tracking, storing, and distributing shared or loaner gear, especially during laundering or decontamination. This logistical shift will require additional staff time or process changes, offsetting some of the projected savings. Turnout readiness is monitored internally but not tied to external performance measures. Bureau performance measures that may be negatively affected include the number of PF&R health and safety incidents.

Equity Outcomes and Impact Tracking

This reduction does not directly impact community-facing services but may increase internal exposure risk or inconvenience for firefighters who lack immediate access to clean gear. Operationally, this could affect personnel working high-frequency or high-risk shifts. The bureau selected this option to avoid frontline staffing impacts but recognizes the need to monitor logistical equity across work sites and schedules. These issues may negatively affect PF&R’s strategic action under Goal 3, objective 1 of the PSSA strategic plan: Increase focus on the overall wellbeing of the public safety workforce and system: support the physical and mental health and wellness of public safety personnel.

Community Engagement and Empowerment

Turnout gear is an internal safety and equipment resource and is not part of a direct service to community members. No external engagement or community notification is anticipated. This proposal primarily affects internal operational processes.

Federal Compliance Activities

There are no direct federal compliance requirements tied to turnout gear inventory. However, PF&R follows National Fire Protection Association (NFPA) guidelines, and changes in gear availability may require internal review to ensure continued adherence to safety standards.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$250,000)
Sum:	\$0	(\$250,000)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$250,000)
Sum:	\$0	(\$250,000)

Budget Concept 26579 - FR - Reduce Emergency Operations On-duty Staffing	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This reduction package outlines a range of potential cuts to Portland Fire & Rescue’s Emergency Operations, based on funding availability. If the bureau did not receive funding to maintain the Current Service Level, it would reduce On-Duty Staff by 12 per day (\$6 million). An additional \$4.9 million (3%) cut would reduce on-duty staffing by another 10, and a further \$11.3 million (7%) would remove 20 more. While layoffs are not anticipated in most scenarios, affected personnel would be reassigned to the traveler pool to cover vacancies. For the purpose of having a concrete understanding of the scale of potential cuts, a reduction of 10 FTE would translate to closing two single-company fire stations and eliminating one two-person rescue from service. Any reduction would create significant gaps in response coverage, increase response times, and limit the bureau’s ability to manage simultaneous incidents.

Service Impacts

PF&R would be required to make significant operational changes, including service delivery. These reductions would increase response times, create gaps in coverage, and limit the bureau’s ability to manage simultaneous incidents. Longer response times could negatively affect the City’s Insurance Services Office (ISO) rating, increasing insurance costs for residents and businesses. PF&R uses data-driven analysis to assess operational impacts, including response times, call volume, geographic risk factors, and service equity considerations. Bureau performance measures that could be negatively affected include the percentage of calls with a ladder truck on scene within four minutes and the percentage of structure fires contained before the fire progressed from the starting point.

Equity Outcomes and Impact Tracking

Maintaining current service levels supports equitable access to timely emergency response across the city. PF&R monitors response time and coverage data to track impacts and inform resource allocation decisions. A data-driven approach to determining the least-bad option to achieve this reduction would be conducted to determine where service cuts would occur. Factors must consider equity impacts and FMA vulnerability measures, call types, environmental risk factors, economic risk factors, and response times. These issues may negatively affect PF&R’s strategic actions under Goal 1, objective 1 of the PSSA strategic plan: improve public safety response capabilities: deploy the right responder to the right call, in a timely manner; and objective 3: measure, evaluate, and improve public safety response performance and outcomes.

Community Engagement and Empowerment

This package supports core emergency response services provided citywide and does not represent a discrete program or direct community engagement activity. Maintaining current staffing and response capacity ensures consistent service delivery for residents and businesses.

Federal Compliance Activities

There are no associated federal compliance activities

Budget Concept 26277 - PL - Police Overtime	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This package provides \$11.2 million to fund backfill overtime necessary to maintain Portland Police Bureau's current staffing targets. PPB projects the need for approximately 215,000 hours of backfill overtime in the coming fiscal year. Existing appropriations are insufficient to cover this level of overtime, and a portion of current funding is one-time in nature. This request replaces expiring one-time resources with ongoing funding to sustain current service levels and avoid reductions in operational readiness. This accounts for anticipated retirements, separations, and hiring timelines.

Service Impacts

Without this funding, PPB would be required to reduce overtime and make significant operational changes, including service delivery. These reductions would increase response times, create gaps in coverage, and limit the bureau's ability to manage simultaneous incidents.

Equity Outcomes and Impact Tracking

Maintaining current overtime levels supports equitable access to timely emergency response across the city. PPB monitors response time and coverage data to track impacts and inform resource allocation decisions. A data-driven approach to determining the least-bad option to achieve this reduction would be conducted to determine where service cuts would occur. Factors must consider equity impacts, call types, economic risk factors, and response times.

Community Engagement and Empowerment

This package supports core emergency response services provided citywide and does not represent a discrete program or direct community engagement activity. Maintaining current staffing and response capacity ensures consistent service delivery for residents and businesses.

Federal Compliance Activities

There are no associated federal compliance activities.

Miscellaneous Fund Allocation	\$0	(\$9,477,684)
Sum:	\$0	\$0

Budget Concept 26581 - PL - Public Safety Support Specialist Program Elimination	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would eliminate the Public Safety Support Specialist (PS3) program. Calls currently handled by PS3s would either return to sworn police officers for response or, in some cases, go unanswered. The elimination would shift responsibility for low-acuity, non-emergency tasks back to patrol officers, reducing available sworn capacity for higher-priority calls and increasing demand on patrol staffing.

Service Impacts

The PS3 program provides civilian response to low-acuity, non-emergency calls for service. Reducing or eliminating the program would increase reliance on sworn officers for these calls, affecting deployment flexibility and response prioritization.

Equity Outcomes and Impact Tracking

PS3s support response equity by helping ensure non-emergency calls are not deprioritized. Eliminating the program may disproportionately impact individuals reporting property crime or quality-of-life issues.

Community Engagement and Empowerment

The PS3 program provides visible, community-based presence in responding to lower-priority calls and supporting community policing goals. The program was designed in part to build trust and reduce harm through non-sworn engagement. Eliminating the program would reduce the City's capacity to deliver alternative response models and lessen opportunities for direct civilian interaction. Public notification may be needed if response expectations shift. Elimination of this program will negatively affect PPB's strategic action under Goal 1, objective 2 of the PSSA strategic plan: improve public safety response capabilities: identify and develop culturally and situationally appropriate response strategies.

Federal Compliance Activities

This program does not have direct federal compliance obligations.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$84,000)
Internal Materials and Services	\$0	(\$88,490)
Personnel	\$0	(\$5,461,616)
Sum:	\$0	(\$5,634,106)

Miscellaneous Fund Allocation	\$0	(\$5,634,106)
Sum:	\$0	(\$5,634,106)

Position Detail					
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30002611 - Public Safety Support Specialist	(42.00)	(\$2,703,355)	\$0	(\$2,009,280)	(\$4,751,834)
Total	(42.00)	(\$2,703,355)	\$0	(\$2,009,280)	(\$4,751,834)

Budget Concept 26591 - PL - Victim Services Unit Elimination

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would eliminate the Portland Police Bureau's Victim Services Unit. Victim Services Specialists currently support victims of serious crimes, including felony sexual assault, trafficking, bias crimes, and robbery, by providing guidance and coordination alongside investigators. If eliminated, responsibility for victim support would shift to the Multnomah County District Attorney's Victim Assistance Program. PPB would no longer provide direct victim advocacy services during investigations.

Service Impacts

The Victim Services Unit consists of non-sworn specialists who provide crisis response, case navigation, and referral services to victims throughout the investigative process. Eliminating the unit would reduce coordination between investigators and advocates and remove direct victim support within PPB. The bureau would rely solely on external partners for advocacy services. No changes to investigative staffing are included in this proposal.

Equity Outcomes and Impact Tracking

The Victim Services Unit primarily serves victims of violent and identity-based crimes, including individuals from historically marginalized communities. Elimination may reduce access to trauma-informed support for survivors, particularly those less likely to engage with the criminal justice system. The proposal may disproportionately impact women, youth, LGBTQ+ individuals, and BIPOC community members. Eliminating the Victim Services Unit would negatively affect PPB's strategic action under Goal 4, objective 3 of the PSSA strategic plan: strengthen prevention, recovery and resilience capabilities: enhance recovery efforts to help individuals and communities rebuild and restore stability after emergencies.

Community Engagement and Empowerment

This program delivers community-facing services through victim advocacy and support. Specialists respond directly to victims and facilitate access to legal, medical, and social services. Eliminating the unit would reduce the City's capacity to provide trauma-informed services. The bureau may need to notify partner agencies and adjust referral pathways. The program advances community wellbeing through external, survivor-focused support.

Federal Compliance Activities

While not federally mandated, some aspects of advocacy support may align with best practices encouraged by federal grant programs and victim rights standards. No direct federal compliance obligations are tied to this program.

Position Detail						
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total	
Total	(6.00)	(\$583,471)	\$0	(\$347,711)	(\$975,818)	

Budget Concept 26601 - PL - Overtime Reduction

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This reduction would make multiple reductions to overtime and staffing, including reducing backfill overtime (\$6M for 65,000 hours), reduce programmatic overtime (\$560k for 6,000 hours), and reduce on-call response (\$660k). The package could be implemented in full or partially, allowing for scaled reductions based on funding availability and operational priorities. This would eliminate overtime for programmatic missions and decrease overtime available for investigations and backfill to support patrol staffing. Without mission overtime, the bureau would be unable to staff targeted enforcement or initiative-based projects outside regular staffing levels. A reduction of investigative overtime and on-call positions would slow investigative timelines and reduce flexibility in responding to time-sensitive cases. Fewer officers would be available on shift to respond to calls for service, resulting in increased response times and reduced staffing flexibility. The bureau would need to prioritize calls and adjust deployment to account for reduced coverage.

Service Impacts

With less overtime available to cover absences, the bureau may operate below target staffing levels on some shifts. This would reduce capacity to respond to lower-priority calls and increase response times overall. Mission overtime enables the bureau to conduct focused enforcement in response to emerging trends, seasonal spikes, or community complaints. Eliminating this capacity would reduce flexibility and limit proactive deployments. The loss of investigative overtime will delay critical evidence collection and interviews during off-hours, potentially damaging homicide clearance rates and overall case assignments. The bureau tracks response times and officer availability as key performance indicators. Reduced overtime would also limit flexibility to reassign staff during surges or major incidents.

Equity Outcomes and Impact Tracking

Reduced coverage may disproportionately affect communities that experience higher rates of violence, property crime, and chronic safety concerns. Delayed investigative response may erode trust, especially in neighborhoods already facing service disparities. Reducing missions may disproportionately impact communities experiencing elevated rates of auto theft, traffic injuries, or retail crime. The bureau would use data to guide deployment but may be less able to meet targeted response times citywide. These reductions will negatively affect PPB's strategic actions under Goal 1, objective 3 of the PSSA strategic plan: Improve public safety response capabilities: measure, evaluate, and improve public safety response performance and outcomes. This proposal was selected to avoid eliminating full-time positions.

Community Engagement and Empowerment

This is not a direct community program but may lead to changes in public service experience, particularly for non-emergency calls. While public notification is not planned, any noticeable delays in service could affect community satisfaction or expectations.

Federal Compliance Activities

This reduction does not affect any federal compliance requirements.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$7,219,549)
Sum:	\$0	(\$7,219,549)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$7,219,549)
Sum:	\$0	(\$7,219,549)

Budget Concept 26606 - PL - Advanced Academy	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would eliminate or significantly reduce the Advanced Academy, a 10-week training program completed by recruits following the Basic Academy. The Advanced Academy builds additional skills in communication, decision-making, legal application, and tactics. Eliminating the program would reduce post-academy training and professional development for new officers.

Service Impacts

The Advanced Academy supplements state-mandated Basic Academy training with Portland-specific policies, practices, and expectations. It includes scenario-based instruction, cultural competency modules, and tactical decision-making. Without this program, officers would move directly from the Basic Academy to field training.

Equity Outcomes and Impact Tracking

The Advanced Academy is one of the bureau’s primary platforms for engaging officers with equity-focused content and community voices. Programs like Talk A Mile, Vanport history, and community-led discussions are featured. Removing this structured engagement may reduce exposure to equity concepts early in an officer’s career and limit opportunities to align training with community expectations.

Community Engagement and Empowerment

While not a direct service program, the Advanced Academy incorporates community-led education components and storytelling by Portland residents and service providers. Eliminating the program would remove these interactions from the training pipeline. Community members engaged in past sessions may need to be informed if their participation is discontinued.

Federal Compliance Activities

The Advanced Academy is not federally required. The bureau would continue to meet DPSST certification and federally mandated training standards.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$1,203,025)
Sum:	\$0	(\$1,203,025)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$1,203,025)
Sum:	\$0	(\$1,203,025)

Budget Concept 26612 - PL - IGA Reductions

Budget Concept Type	Magnitude
<i>Reduction</i>	<i>Current Level of Service</i>

Package Description

This reduction would eliminate three intergovernmental agreements between the City of Portland and the Multnomah County District Attorney's Office, which fund specialized support for prosecution and victim services. The contracts provide: (1) staffing for an Auto and Organized Retail Theft Task Force, (2) three full-time DA Investigators for Portland cases, and (3) advocacy support for survivors of domestic violence. Canceling the contracts would end the City's direct financial support for these DA Office functions.

Service Impacts

Eliminating these contracts would reduce the DA's capacity to investigate and prosecute auto and retail theft cases, provide pre-trial investigative support, and deliver on-scene advocacy for high-risk domestic violence survivors. The Auto/Retail Theft Task Force and DA Investigators are focused on Portland-specific cases, and their loss may slow case processing or reduce enforcement coordination. Domestic violence programs would lose dedicated advocacy support, requiring survivors to seek help through separate systems. These reductions would likely impact strategic plan goals tied to crime reduction, case clearance, and trauma-informed public safety response.

Equity Outcomes and Impact Tracking

Each of the affected programs supports populations that experience disproportionate harm: communities impacted by retail theft and car theft, crime victims requiring timely investigation, and survivors of domestic violence. Impacts may be most acute for lower-income neighborhoods, women, LGBTQ+ individuals, and BIPOC residents. Eliminating these contracts reduces capacity for focused deterrence, timely case support, and culturally responsive victim services. These reductions were selected due to the external nature of the contracts and their reliance on one-time or non-General Fund resources.

Community Engagement and Empowerment

While none of the three programs are formal community-facing initiatives, all respond to public concerns or deliver essential support services. Domestic violence advocacy provides direct survivor engagement, while task force and investigative roles support community safety through backend legal coordination. The public may not be directly notified of these changes, but the absence of services may become visible through slower resolution of cases or decreased access to immediate victim assistance. Coordination with partner agencies may be required to mitigate disruption.

Federal Compliance Activities

These contracts are not tied to federal compliance mandates.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$1,318,799)
Sum:	\$0	(\$1,318,799)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$1,318,799)
Sum:	\$0	(\$1,318,799)

Budget Concept 26614 - PL - Technology Rationality	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would decrease expenditures for technology equipment, including laptops, mobile devices, and related hardware. Fewer devices would be available for staff, potentially requiring shared use, delaying replacement of aging hardware, or reducing functionality in field and office operations. The reduction would lower ongoing technology costs but may affect user access and equipment reliability.

Service Impacts

Technology equipment supports daily operational needs across administrative, investigative, and patrol functions. Reducing device availability may require staff to share equipment or rely on outdated hardware. Replacement schedules may be extended, affecting productivity, connectivity, or access to software tools.

Equity Outcomes and Impact Tracking

This reduction does not directly affect public-facing services but could indirectly affect response or administrative timelines if equipment becomes unreliable or inaccessible. This option was selected over frontline service reductions and reflects an internal cost-saving measure.

Community Engagement and Empowerment

This proposal affects internal operations and equipment allocation. It does not involve direct service delivery or community engagement. No outreach or notification is anticipated, as the impact is limited to bureau technology infrastructure.

Federal Compliance Activities

This reduction does not affect federal compliance requirements. Any changes to technology procurement would continue to meet applicable data security and communications standards.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$0	(\$1,445,307)
Sum:	\$0	(\$1,445,307)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$1,445,307)
Sum:	\$0	(\$1,445,307)

Budget Concept 26616 - PL - Officer and Hiring Reductions	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

If the Police Bureau did not receive funding for Current Service Level and was required to implement a 10% reduction, it would need to halt officer hiring for FY 2026–27 leading to a reduction in force of 68 FTE. Depending on attrition before the end of FY 2026, further reductions could require layoffs. Because of the long period of training and probation, this reduction would create staffing gaps in future years. The most direct service impact would be to precinct patrol, likely resulting in longer response times and reduced coverage.

Service Impacts

Halting hiring would reduce the pipeline of new officers available to fill patrol and specialty assignments in future years. As current officers separate or retire, unfilled positions would strain remaining resources. Most new officers require 18–24 months to complete training and probation. The bureau tracks staffing levels, response times, and patrol deployment coverage as key performance indicators, all of which would be affected by this reduction.

Equity Outcomes and Impact Tracking

Precinct patrol reductions could disproportionately affect areas with higher call volumes and fewer alternative safety resources. Longer response times and reduced visibility may impact trust in public safety services, particularly in historically underserved communities. The bureau monitors geographic response coverage and service equity and would use data to prioritize deployment. This reduction was identified as the least-preferred option due to its long-term operational impacts.

Community Engagement and Empowerment

This proposal would affect core patrol services citywide. The public may experience increased wait times or reduced presence in their neighborhoods.

Federal Compliance Activities

The bureau will continue to meet federally mandated training and certification requirements. There are no direct federal compliance obligations affected by a hiring pause

Budget Detail		
100 - General Fund

Budget Concept 26617 - PL - Eliminate Retire/Rehire Program

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would eliminate the retire/rehire program, which allows eligible police staff to return to work following retirement. While retire/rehire employees are more expensive than overtime or new hires, they provide additional staffing hours. Eliminating the program would increase reliance on overtime from existing staff and reduce staffing flexibility during periods of transition.

Service Impacts

The retire/rehire program supports continuity by retaining experienced personnel while the bureau has a staffing shortage. Ending the program would reduce temporary staffing capacity and increase the need for overtime backfill by active-duty officers.

Equity Outcomes and Impact Tracking

This change primarily affects internal staffing models and does not have direct service impacts on the public. However, reduced flexibility may contribute to uneven workload distribution or response delays. The program was selected for reduction due to its higher per-hour cost relative to other staffing strategies.

Community Engagement and Empowerment

The retire/rehire program is an internal staffing mechanism and does not provide direct programmatic impact.

Federal Compliance Activities

There are no federal compliance obligations related to the retire/rehire program.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$1,139,703)
Sum:	\$0	(\$1,139,703)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$1,139,703)
Sum:	\$0	(\$1,139,703)

Budget Concept 26618 - PL - Reduce Fleet	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would decrease the number of vehicles available for patrol operations. Fewer vehicles would increase the need for officers to operate in partner units, reducing deployment flexibility and potentially increasing response times, particularly during peak demand periods.

Service Impacts

Fewer patrol vehicles would constrain how officers are deployed across precincts and shifts. Increased reliance on partner cars or delayed vehicle availability may reduce responsiveness to calls for service. Fleet availability is not a tracked performance measure, but response times and patrol readiness could be indirectly affected. Maintenance and vehicle rotation schedules may also be impacted.

Equity Outcomes and Impact Tracking

Fleet reductions could limit geographic coverage and delay response in higher-call-volume areas. This may disproportionately affect communities that rely more heavily on police services or experience slower baseline response times.

Community Engagement and Empowerment

While not a community-facing program, vehicle availability affects frontline visibility and response presence. Residents may notice slower response or fewer officer units in the field.

Federal Compliance Activities

This reduction does not impact any federally required programs.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$0	(\$2,038,656)
Sum:	\$0	(\$2,038,656)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$2,038,656)
Sum:	\$0	(\$2,038,656)

Budget Concept 26619 - PL - Reduce Administrative and Desk Clerk Staffing	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would eliminate several Police Administrative Support Specialist positions and remove desk clerk staffing at North and East Precincts. Without administrative support, scheduling, reporting, and records duties would shift to sworn personnel, reducing their availability for specialized assignments and fieldwork. Desk clerk eliminations would close North and East Precincts to walk-in public access, centralizing all in-person bureau services at Central Precinct. These changes would reduce internal operational support and limit community access to precinct services.

Service Impacts

Sworn personnel would assume administrative tasks previously performed by support staff, reducing time available for investigations, supervision, or other specialized duties. Public-facing services such as walk-in reporting, package delivery, and general inquiries would no longer be available at North and East Precincts. Only Central Precinct would remain open for in-person access, potentially increasing workload at that location and reducing geographic accessibility for residents. While service continuity would be maintained, efficiency and convenience would be affected.

Equity Outcomes and Impact Tracking

Desk services at North and East Precincts are often used by community members who face language barriers, limited digital access, or distrust of phone-based interactions. Reducing public access may disproportionately impact immigrant communities and individuals without reliable technology. Shifting administrative work to sworn staff could also reduce responsiveness in specialized units. These changes were selected due to their focus on administrative functions, but may affect service equity in practice.

Community Engagement and Empowerment

Desk clerks provide one of the bureau's few non-emergency, in-person points of contact with the public. Eliminating access at two precincts limits opportunities for walk-in reporting and community interaction. While no direct outreach is planned, signage or web updates may be required to inform the public of new access locations. Reduced support staffing also lowers internal capacity to coordinate external engagement activities.

Federal Compliance Activities

There are no direct federal compliance obligations tied to administrative or desk clerk staffing.
Bureau: PPB

Budget Concept 26625 - PL - External Materials and Services reductions	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This reduction would decrease spending on external materials and services (EMS), including training, service contracts, software, and supplies. The bureau would need to scale back training opportunities, delay or cancel contracts, and reduce purchases of operational supplies. This package would reduce up to \$3.5M of the bureau's \$17M EMS budget, 21%.

Service Impacts

Training programs may be limited to mandatory sessions only, reducing opportunities for skill development or leadership training. Software and contracted services may be reduced, potentially affecting efficiency or modernization efforts. Supply reductions could limit availability of non-critical equipment. These impacts would affect internal operations rather than direct service delivery.

Equity Outcomes and Impact Tracking

Reduced training and operational support may limit internal capacity to advance equity-related initiatives, particularly if equity-focused contracts or community engagement tools are affected. Staff development opportunities may also be unevenly reduced. This option was selected to preserve frontline public safety services.

Community Engagement and Empowerment

This is not a direct service reduction but could affect community-facing functions.

Federal Compliance Activities

This reduction does not affect any federal compliance requirements.

Sum:	\$0	(\$3,586,249)

Budget Concept 26250 - PX - Add FITCOG CSL	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This package keeps the FITCOG program at current service level.

Service Impacts

The Focused Intervention Team Community Oversight Group (FITCOG) mission is to work closely with the Commissioner-in-Charge of the Portland Police Bureau, the leadership of PPB, and FIT members and command to understand, inform and provide recommendations to the city's efforts to reduce gun violence in Portland. This is done by remaining informed about gun violence trends, PPB, and FIT strategies, other City of Portland programs and priorities in supporting this work, and best practices for prevention, intervention, and response.

Equity Outcomes and Impact Tracking

The FITCOG provides recommendations to the FIT members, the Police Chief, and Commissioner-in-Charge of the PPB to reduce gun violence by focusing on areas including but not limited to:

- Allocations of City of Portland resources (example: staffing, training, technology, funding) to support FIT in accomplishing its mission of reducing gun violence;
- FIT members and command's recruitment, hiring, performance, and retention;
- Community outreach and policing efforts;
- Collaboration with community organizations working with individuals at risk for, or currently engaged with, or previously involved in gun violence;
- Identification and implementation of best practices; (example: 21st Century Policing, Precision policing, etc.)
- Publish analysis of FIT data with an equity lens to address public concerns around racial and class disparities in policing efforts;
- Address areas of community concern such as racial profiling, use of force, and service gaps;
- Provide constructive critique, while holding a balanced view between community perception and the realities police face every day in the line of duty.

Community Engagement and Empowerment

- The FITCOG's membership includes a broad spectrum of community members:
- Community members with lived experience in gun violence and/or impacted by gun violence
 - Community members with expertise in working with at-risk community members in mentorship, life skills, restorative justice, education, outreach and other intervention skills
 - Community members with knowledge and expertise in intra-community violence
 - Community members with gun violence victim advocacy experience
 - Community members within communities exposed to or impacted by gun violence

Federal Compliance Activities

Total	1.00	\$114,795	\$0	\$63,350	\$186,927

Budget Concept 26256 - PX - Add Ceasefire CSL	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This package keeps the Ceasefire program at current service level. This concept form requests funding to maintain the program. In addition, it converts a portion of ongoing EMS budget to provide resources for a coordinator that is considered essential to the program. Without this adjustment, the program would be significantly reduced or discontinued. This request sustains existing staffing, contracts, and coordination capacity necessary to continue current program activities.

Service Impacts

The majority of Ceasefire’s current funding consists of one-time General Fund resources that expire in FY 2025–26. Without continued funding, the City would have extremely limited ability to support contracts or grants for gun violence reduction activities under the Ceasefire model. Maintaining current funding allows the program to continue delivering focused deterrence interventions and coordinating partners at existing levels. This request does not expand services, staffing, or scope beyond current operations.

Equity Outcomes and Impact Tracking

Ceasefire is a focused deterrence strategy aimed at addressing the most high-risk individuals in our community. It operates proactively and holistically, employing a harm reduction approach rooted in data-driven strategies and best practices.

Community Engagement and Empowerment

Ceasefire begins with a problem analysis that identifies individuals within a community at greatest risk of violence and helps tailor an intervention to reduce that risk.

Federal Compliance Activities

The impacts to BIPOC communities could theoretically have impacts under federal mandates.

Budget Detail			
100 - General Fund

Total	1.00	\$114,795	\$0	\$63,350	\$186,927

Budget Concept 26257 - PX - Add OVP CSL	
Budget Concept Type	Magnitude
<i>Add</i>	<i>Current Level of Service</i>

Package Description

This package keeps the Office of Violence Prevention (OVP) programs at current service level. This includes the Safe Blocks and Rose City Self Defense programs.

Service Impacts

A large share of OVP's current revenue is GF one-time funding that is expiring in FY26. There will be extremely limited ability to contract, engage with the community, or grant funds for gun violence reduction without the continuation of these one-time dollars.

Equity Outcomes and Impact Tracking

OVP serves and employs a number of communities, including the BIPOC and youth communities in Portland. Reducing the team's funding could have negative impacts to its efficacy and ability to serve these communities according to best and emerging practices.

Community Engagement and Empowerment

OVP partners with Community-Based Organizations (CBOs) through the grant program by providing essential services to historically disenfranchised communities. The OVP programs fund community enhancement efforts, host public safety events, and administer federal grant dollars the program has received.

Federal Compliance Activities

The impacts to BIPOC communities could theoretically have impacts under federal mandates.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	\$1,379,083
Sum:	\$0	\$1,379,083

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	\$1,379,083
Sum:	\$0	\$1,379,083

Budget Concept 26398 - PX - Eliminate 1 PSR Aftercare Team (2 FTE)	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This reduction would eliminate one PSR-Aftercare team, consisting of a Community Health Worker and Peer Support Specialist.

Service Impacts

This cuts one PSR-Aftercare team or 2 FTE. These positions were intended to expand PSR's Aftercare team to provide real-time PEER support 7 days a week. Without these positions, we will only be able to continue Aftercare support 5 days a week.

Equity Outcomes and Impact Tracking

People experiencing mental health crisis, houselessness or are otherwise marginalized are likely to be disproportionately impacted by this reduction. Eliminating these positions will negatively affect PSR's ability to meet City Council's and Mayor's objective of 24/7 capacity, however, there are no other areas in EMS or IMS which are not critical for operations. This reduction would negatively affect PSR's strategic actions under Goal 3, objective 4 of the PSSA strategic plan: Increase focus on the overall wellbeing of the public safety workforce and system: develop the Public Safety Service Area as an organization to meet the vision and strategy.

Community Engagement and Empowerment

This reduction will have a direct effect on the community. Aftercare Teams provide follow up and long-term stabilization services to clients after the initial 911 call. This is integral in realizing long-term success for clients to meet their goals. On average, these positions will support approximately 2.09 clients per day. Reduction of 1 Aftercare team will result in 16 clients per week not being supported or 832 clients per year. Reduction hinders PSRs ability to assist clients with securing food, housing, medical care, and other basic needs, which reduces strain on first response systems over the long term. Reduction also creates additional workload for existing staff which is already past reasonable limits/expectations.

Federal Compliance Activities

Aftercare teams work to support clients with access to interpretation as well as emotional and systems support when navigating complex systems, receiving care and/or resources.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$329,637)
Sum:	\$0	(\$329,637)

30003526 - Peer Support Specialist	(1.00)	(\$59,280)	\$0	(\$46,276)	(\$110,091)
30003675 - Community Health Worker	(1.00)	(\$72,987)	\$0	(\$50,491)	(\$129,061)
Total	(2.00)	(\$132,267)	\$0	(\$96,767)	(\$239,152)

Budget Concept 26399 - PX - Eliminate Two PSR Responder teams	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This reduction would eliminate two (2) PSR Responder Teams, consisting of 1 Mental Health Crisis Responder and 1 Community Health Medical Responder per team (4 FTE total).

Service Impacts

Elimination of these positions will increase PSR Overtime costs if it is to continue operations in the expanded hours of 0600-0000. Since PSR does not currently mandate overtime, this may result in gaps in service when no PSR rigs are in service.

Equity Outcomes and Impact Tracking

People experiencing mental health crises, houselessness or are otherwise marginalized are likely to be disproportionately impacted by this reduction. Eliminating these positions will negatively affect PSR's ability to meet City Council's and Mayor's objective of 24/7 capacity and will result in a reduction of PSR's 2025 expanded hours. However, there are no other areas in EMS or IMS which are not critical for operations. This reduction would negatively affect PSR's strategic actions under Goal 3, objective 4 of the PSSA strategic plan: Increase focus on the overall wellbeing of the public safety workforce and system: develop the Public Safety Service Area as an organization to meet the vision and strategy.

Community Engagement and Empowerment

This reduction will have a direct effect on the community. Responder units are the responders to the 911 call for service from community members in crisis and reduction hinders PSRs ability to respond to 911 calls in a timely manner. On average, 1 PSR Responder team will respond to approximately 6.44 calls per day or 25.76 per week. 2025 average response time was 54 minutes, well above the desired 30 minutes. Reduction to the Responder Teams will likely worsen response times and create additional workload for existing staff. As PSRs call volumes steadily increase by approximately 20% each year, this issue will compound.

Federal Compliance Activities

Responder Teams respond to 911 calls for service and utilize interpretation services, cultural competency, trauma-informed care and client centered approaches to determine the root cause of crisis and assist clients in crisis stabilization.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost

30003600 - Community Health Medic	(2.00)	(\$137,781)	\$0	(\$98,463)	(\$246,784)
Total	(4.00)	(\$298,378)	\$0	(\$203,943)	(\$525,147)

Budget Concept 26400 - PX - Reduce OVP and CF External Materials & Services	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This package would decrease The Office of Violence Prevention (OVP) and Ceasefire's EMS budgets for staff education, travel, and community events.

Service Impacts

This cut will eliminate the programs' discretionary EMS budgets, for things like continuing education, providing food at events, and travel to pursue professional development. Providing food is a very important engagement tool for these programs; it increases engagement with community members and incentivizes participation in events. Ensuring staff members have resources to pursue professional development, trainings, and relationship building with others in the industry is very important to program efficacy and staff retention. Eliminating these budget item risks OVP and Ceasefire remaining informed of best and emerging practices and building relationships that serve the program and our community to reduce violence.

Equity Outcomes and Impact Tracking

OVP and Ceasefire serve and employ a number of communities in Portland, but primarily community members living in disinvested neighborhoods, who tend to be people of color and people earning lower wages. Reducing the teams' ability to travel and provide food at events could have negative impacts to its efficacy and ability to serve these communities according to best and emerging practices. Both programs' budgets are almost entirely comprised of one-time funding. Nearly all of the ongoing funding is consumed by staff positions with small budgets for EMS and IMS. These smaller operational cuts will meet the budget directives and also preserve all staffing positions and minimizing negative impacts. The disproportionate impact of gun violence on Black and Brown communities is stubbornly stark: Black Portlanders are 7.7 times more likely to be killed by gun violence compared to White Portlanders, down from a difference of 12.8 times in 2022. These reductions will negatively affect these programs' strategic actions under Goal 2 of the PSSA strategic plan: enhance collaboration internally, with partner agencies, and with the community, as well as under Goal 4: strengthen prevention, recovery, and resilience capabilities.

Community Engagement and Empowerment

This reduction will have a direct effect on several hundred community members. Food and catering costs are services directly provided to community members as incentives for participation at events. This reduction is being made to satisfy budget direction and as such doesn't advance either internal or external outcomes. Reduction hinders these programs' ability to remain aware of services and strategies to serve people with high needs and ultimately meet public safety goals.

Federal Compliance Activities

These programs are not tied to any specific federal mandates or grant requirements. The City remains responsible for upholding Title VI and other civil rights protections across all services. Reductions in community programming do not directly violate those broader obligations.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$50,000)
Sum:	\$0	(\$50,000)
Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$50,000)
Sum:	\$0	(\$50,000)

Budget Concept 26401 - PX - Eliminate CF Coordinator III	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This reduction would eliminate a Ceasefire Coordinator III position.

Service Impacts

Losing this position will eliminate engagement capacity on behalf of the Ceasefire team, which is already very small. This can reduce the program's credibility and relationships in the community.

Equity Outcomes and Impact Tracking

Ceasefire's staff is 75% BIPOC, so this will have a direct impact, either in the lost position or in the added duties from a reduced team. This will also impact BIPOC community members with whom Ceasefire works either as CBO's or as referred clients. The impacts of gun violence disproportionately affect Black and Latinx Portlanders, as well as people experiencing homelessness, and reduced capacity will almost certainly have a direct impact on these communities. Reduction of a position in the Ceasefire team would reduce Ceasefire's capacity to meet the Mayor and Council's priority of reducing gun violence in Portland, but its budget is almost entirely comprised of one-time funding. There simply are not enough ongoing dollars to meet the budget directives and also preserve all staffing positions.

Community Engagement and Empowerment

This reduction will affect the community. Ceasefire coordinates directly with law enforcement and community members to reduce gun violence. Ceasefire's model relies on partnerships with community-based organizations that employ people with lived experience with gun violence to conduct outreach and intensive case management of individuals who are at the highest risk of gun violence. In other words, Ceasefire employs BIPOC community members internally, funds BIPOC community organizations externally, and serves BIPOC communities at the highest risk of gun violence. From Jan. 1, 2024 - Nov. 30, 2025, Ceasefire conducted 411 assessments and engaged 319 individuals in contracted services. Reducing Ceasefire's staffing would reduce its capacity to maintain this number of referrals and risks increased incidents of gun violence without meeting the need for services. Ceasefire would need to provide some notice to community partners so that they have appropriate points of contact for future work with Ceasefire. This decision is being made to satisfy budget direction and as such doesn't advance either internal or external outcomes. Reduction hinders Ceasefire's ability to coordinate services for people with high needs and also creates additional workload for existing staff. This reduction would negatively affect Ceasefire's strategic actions within the PSSA strategic plan under Goal 4, objective 1: Strengthen prevention, recovery, and resilience capabilities: improve prevention measures to safeguard community health, safety, and stability.

Federal Compliance Activities

These programs are not tied to any specific federal mandates or grant requirements. The City remains responsible for upholding Title VI and other civil rights protections across all services. Reductions in community programming do not directly violate those broader obligations.

Budget Concept 26403 - PX - Further Reduce OVP External Materials & Services	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This reduction would further reduce the Office of Violence Prevention's (OVP) EMS budget.

Service Impacts

This cut will further reduce OVP's EMS budget and will impact its ability to administer its violence prevention and community engagement programs such as hosting monthly Community Peace Collaborative meetings, Trauma Victims Impacted Families (TVIF), Safer Portland Grants, and supplement efforts to engage youth.

Equity Outcomes and Impact Tracking

OVP serves and employs a number of communities in Portland, but primarily community members living in disinvested neighborhoods, who tend to be people of color and people earning lower wages. Reducing the team's ability to contract and grant funds will have negative impacts to its efficacy and ability to serve these communities according to best and emerging practices. This cut reduces the program's ability to contract and grant funds for gun violence prevention, which limits OVP's reach and credibility with community and partners. OVP's budget is almost entirely comprised of one-time funding. Nearly all of the ongoing funding is consumed by staff positions with small budgets for EMS and IMS. These operational cuts will meet the budget directives and also preserve all staffing positions and minimizing negative impacts.

Community Engagement and Empowerment

This reduction will have a direct effect on several hundred community members. OVP will have to reduce violence prevention and community engagement programs such as hosting monthly Community Peace Collaborative meetings, Trauma Victims Impacted Families (TVIF), Safer Portland Grants, and supplement efforts to engage youth. This decision is being made to satisfy budget direction and as such doesn't advance either internal or external outcomes. This reduction hinders OVP's ability to engage with people with high needs, its ability to remain aware of services and strategies to serve people with high needs, and ultimately meet public safety goals.

Federal Compliance Activities

These programs are not tied to any specific federal mandates or grant requirements. The City remains responsible for upholding Title VI and other civil rights protections across all services. Reductions in community programming do not directly violate those broader obligations.

Sum:	\$0	(\$112,012)

Budget Concept 26428 - PX - Cut Community Violence Initiatives	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would eliminate current one-time funded initiatives in the Office of the Public Safety DCA, including a limited term Analyst II position in FITCOG and EMS budgets for the Office of Violence Prevention, Safe Blocks, Rose City Self Defense, Ceasefire, and FITCOG.

Service Impacts

This cut would severely limit or eliminate the Office of the Public Safety DCA's work in gun and violent crime reduction, targeted intervention, and community engagement. It cuts 100% of FITCOG's budget, 95% of Ceasefire's EMS budget, and over 60% of OVP's EMS budget. This cut will significantly reduce these programs' ability to meet the Mayor and Council's priority of reducing gun violence in Portland.

Equity Outcomes and Impact Tracking

These programs serve a number of communities in Portland, but primarily community members living in disinvested neighborhoods, who tend to be people of color and people earning lower wages. However, these programs are currently supported by one-time funds that cannot be absorbed by ongoing funds.

Community Engagement and Empowerment

This reduction will have a direct effect on the community. A cut of this magnitude means a significant reduction or elimination of critical violence prevention and community engagement programs such as hosting monthly Community Peace Collaborative meetings, Trauma Victims Impacted Families (TVIF), Safer Portland Grants, oversight of the Focused Intervention Team (FIT), and several other activities and initiatives meant to reduce violence in Portland. Several hundred community members will be directly affected, but the whole City of Portland will feel the impacts. This decision is being made to satisfy budget direction and as such doesn't advance either internal or external outcomes. Reduction hinders these programs' ability to coordinate services for people with high needs and also creates additional workload for employees.

Federal Compliance Activities

These programs are not tied to any specific federal mandates or grant requirements. The City remains responsible for upholding Title VI and other civil rights protections across all services. Reductions in community programming do not directly violate those broader obligations.

DATE: February 9, 2026

RE: Public Works Service Area Gap Closing Concepts

Cc: Interim Director Sonia Schmanski, Director Ting Lu, Director Millicent Williams

Since the Mayor's Guidance was published on November 21, the bureaus in the Public Works Service Area have worked to develop a fiscally responsible budget plan. The first portion of that plan was submitted on January 23, informing Current Service Level funding gaps. This memorandum transmits the second portion of that work, which details the set of gap-closing concepts, General Fund reduction targets, and rate reduction guidance, to support review and discussion.

Public Works bureaus were directed to submit realistic, implementable budget reduction concepts. To ensure alignment with legal, policy, and community priorities, bureaus were asked to not propose reductions to programs required to meet legal or regulatory obligations, programs explicitly prioritized by Council or the Mayor, or items without a feasible implementation path.

Where feasible, bureaus were also asked to hold harmless programs that support clearly identified community priorities. Finally, to support transparency and informed decision-making, bureaus were requested to present proposed reductions alongside a complete listing of programs, enabling review of the full range of options considered.

While individual bureaus used different internal processes to develop their concepts, all applied the same guiding parameters. Each Public Works bureau faces separate but similar challenges. Below is a summary of those challenges, the resulting gaps, the prioritization approaches taken toward developing gap-closing scenarios, and a summary of the resulting concepts.

Portland Bureau of Transportation

Despite effective cost control in the Transportation Operating Fund, other factors are negatively affecting the five-year forecast and are driving a \$25 million ongoing General Transportation Revenue (GTR) shortfall, including: State Highway Fund losses of \$18.5 million from the referral of HB 3991 (state gas tax increases) and a revised weight-mile revenue forecast from the Oregon Department of Transportation; parking revenue losses of \$8.4 million due to

The City of Portland

503-823-4000 or 3-1-1

lower than expected citation revenue collections and adjustments to future year meter revenue assumptions; and increases in central services costs of \$3 million due to higher than forecasted rates. These negative factors are slightly offset by an assumption of additional Transportation Network Company Fee revenues and additional savings in future year debt service costs.

The ongoing shortfall will need to be addressed either through programmatic reductions or new resources.

The total General Transportation Revenue pool currently supports \$164 million in ongoing expenses. These expenses are spread across 19 programs covering everything from paving to parking enforcement. Of the \$164 million in expenses, \$61 million is for required services such as debt service, central services interagency agreement, General Fund overhead, and credit card fees for meter transactions. Another \$34 million is allocated to programs such as derelict RV removal, paving, and street sweeping that received additional support from the Mayor and Council in FY 2025-26. If both of these expenditure pools are held harmless, only about \$70 million remains in available programs from which to take reductions.

To formulate the reduction options, Transportation began with the formulated reduction list from last year's budget process and held harmless the expenditure pools mentioned above. Last year's list prioritized existing investments in revenue generating activities, equitable access to services, and balancing community priorities with available resources. To achieve a \$25 million reduction package, cut proposals need to total roughly 35% across all programs that remain eligible for reduction. The concepts submitted today are focused in those areas – with considerable consequences for services. The bureau is also exploring multiple new revenue options that would provide alternatives to programmatic reductions.

Portland Parks & Recreation

At Current Service Level, the Parks Levy does not generate sufficient revenue to sustain existing services through the end of the levy period, and it experiences a deficit between \$1.6 million and \$3.0 million in FY 2026-27 through FY 2028-29. That deficit grows to \$10.1 million in the final year of the Parks Levy. Absent corrective action, the levy balance is projected to go negative in FY 2028-29, resulting in \$18.1 million at the end of the levy period. To address this gap, PPR has developed reductions totaling \$7.0 million intended to reduce or eliminate deficits over the forecast period and maintain a positive balance.

The primary drivers for this change in the forecast include increases in central services costs of \$13.75 million and \$2.7 million in health benefit costs - both due to higher than forecasted rates. These negative impacts were offset by an improved revenue forecast, for a net change of \$7.0 million.

In addition to developing concepts to close the Current Service Level gap, the bureau was directed to develop additional concepts to address the directed \$8.1 million in General Fund reductions.

To approach this overall 8.4% reduction in expenditures, the bureau developed a prioritization lens that classifies investments based on their necessity and impact on service delivery. 'Core Requirements' are foundational obligations that are appropriately in the base budget and should be reduced only as a last resort. 'Critical' investments are those for which reductions or eliminations would result in a high impact on community experience and service delivery. 'Important' investments support effective operations and advance broader City goals but may be considered for reduction first. This framework was developed collaboratively with bureau leadership and in partnership with bureau stakeholders and was applied through concept development and selection.

The resulting set of concepts prioritize generating new revenue, optimizing existing capacity, and reductions to non-core functions. The next tier looks primarily in areas where PPR is not the sole community provider

of the service. This approach emphasizes programming. The last tier impacts services solely delivered by PPR, including daily maintenance and care of parks and natural areas, availability of community centers, and programming for some underserved populations.

Utilities

Bureaus with enterprise funds were directed to develop three budget scenarios, (1) a scenario that reflects current service level, (2) a scenario aligned with the current FY 2026–27 revenue forecast and associated rate guidance, and (3) a scenario accommodating a 5% reduction to forecasted FY 2026–27 rate revenues. These scenarios were intended to clearly surface the operational, regulatory, and customer impacts of different rate and expenditure tradeoffs.

- Under the **Budget Scenario 1** (baseline scenario), the combined rate increase of 7.5% is necessary to support Water and BES budgets at Current Service Level.
- For **Budget Scenario 2**, Water Bureau and the Bureau of Environmental Services (BES) developed budget concepts totaling \$4.3 million in operating reductions (\$1.0 million for Water and \$3.3 million for BES). These reductions align with the prior FY 2026–27 forecasted combined rate increase of 6.36% and represents a reduced service level relative to Current Service Level.
- In **Budget Scenario 3**, the bureaus developed additional concepts totaling \$11.4 million (\$3.3 million for Water and \$8.1 million for BES) to accommodate a 5% reduction to forecasted FY 2026–27 rate revenues. These reductions would have measurable impacts on customer service levels, ongoing operations, and the condition of water, sewer, and stormwater infrastructure.

In addition to budget reductions, Water Budget Scenarios 2 and 3 rely on issuing longer-term Water Revenue Bonds through FY 2029–30 to finance the Water Capital Improvement Program including the Bull Run Treatment Projects. While this approach moderates retail water rate increases during the five-year forecast, it is not recommended because it places greater financial burden to future generations and increases total customer costs over time due to higher interest expense.

Collectively, these scenarios illustrate a fundamental policy tradeoff between near-term rate moderation and long-term system sustainability, regulatory risk, and total customer cost.

Sincerely,

Priya Dhanapal, P.E.
Deputy City Administrator
Public Works

Budget Concept 26225 - Scenario 2 Business Support	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The reductions proposed in this package reflect a balance approach seeking to limit impacts on our ability to provide business support services to BES to fulfill our core mission and services to Portlanders. The majority of the reduction is taken from a vacant Bureau Administration Analyst III position, with the workload will be distributed appropriately among current staff as much as possible.

Service Impacts

A Bureau Administration Analyst III vacant position will be eliminated from the business support group which will have opportunity costs and a negative impact on our capacity to provide comprehensive internal administrative and support services to facilitate smooth operations bureau-wide. The bureau's entire travel budget is also eliminated, resulting in no in-person presence at important conferences and other missed opportunities.

Equity Outcomes and Impact Tracking

We will have less resources to support equity objectives and outcomes are written into grants, Intergovernmental Agreements, and contracts to encourage increased utilization of historically underutilized businesses. The business services group will also have less capacity to works closely with the Equity Team to promote and support recruitment and employee retention strategies.

Community Engagement and Empowerment

A reduction in business support services that encourage accountability, consistency, transparency in program activities that better connect Portlanders to their infrastructure systems services.

Federal Compliance Activities

In the short term these reductions have a minimal impact on federal compliance activities.

Budget Detail			
600 - Sewer System Operating Fund			
Expense	One Time Cost	Ongoing Cost	
External Materials and Services	(\$110,000)		\$0
Personnel	(\$114,525)		\$0
Sum:	(\$224,525)		\$0
Revenue	One Time Cost	Ongoing Cost	
Charges for Services	\$0		\$0
Miscellaneous Fund Allocation	(\$224,525)		\$0
Sum:	(\$224,525)		\$0

Position Detail					
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30003983 - Coordinator II - CPPW	(1.00)	\$0	\$0	\$0	\$0
Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26452 - Scenario 3 Business Support	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

The reductions proposed in this package reduce business services staff and programs that result in impacts on our ability to provide comprehensive administrative support services to facilitate timely and effective operations bureau-wide. Proposed reductions to this program also include an FTE that provides budget and contract support to the program. These proposed reductions will also eliminate an Analyst II position that supports budget development and administration, establishing and maintaining contracts, IT asset tracking and cost savings, web site functionality, and other business analytical needs.

Service Impacts

Two vacant positions will be eliminated from business support to include a Bureau Administration Analyst III position and a Revenue Programs Administration Coordinator II position, causing delays in providing administrative and support functions that guide BES employees toward efficient, cost-effective processes and practice. An Analyst II position will also be reduced that supports three important program areas (Env. Compliance, and Information Systems and Mapping) leaving only 1 FTE to provide all budget, contracts, operational, and financial support to a group of 135 staff. The remaining dollar reduction is taken from delays in executing our partnership with Lake Oswego to build a new, state-of-the-art wastewater treatment facility to replace the old plant and provide better long-term coverage of services.

Equity Outcomes and Impact Tracking

Equity objectives and outcomes are written into grants, Intergovernmental Agreements, and contracts to encourage increased utilization of historically underutilized businesses. With these reductions, there will be less resources to support this work. Additionally, the business services group will have less ability to works closely with Human Resources, the bureau's Equity Team, and with hiring managers to promote and support recruitment and employee retention strategies.

Community Engagement and Empowerment

Our long-term partnership with Lake Oswego will be negatively impacted from delays in meeting our obligations that are part of our agreement. Likewise, a reduction in technical assistance that supports City collection capacity and connect Portlanders to their infrastructure systems.

Federal Compliance Activities

If the Lake Oswego project is delayed long term, there may be an impact in the city's capacity to meet requirements in the Clean Water Act (formally referred to as the Federal Water Pollution Control Act).

Budget Concept 26525 - Scenario 2 CIP and Project Management Office	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

Reductions in this program include a vacant budget analyst II cut, and a \$1M dollar reduction in transitory dollars out of the \$6.9M Transitory dollar budget.

Service Impacts

The budget analyst position had been vacant while other priority positions were filled in the PMO. Permanently reducing the budget analyst means that budget functions, delivery manual stewardship and updates continue to be distributed to other staff, including project managers. Transitory budget is used to cover unforeseen work such as emergency projects, previously capitalizable work (O&M non-capitalizable, urgent work, planning and monitoring to better inform capitalizable work), and decommissioning or similar capital-adjacent work. Out of the 6.9M budget, 3M are already allocated for the FY. A reduction of 1M leaves 2M to address emergency projects in the FY.

Position Detail					
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30003006 - Analyst I	(1.00)	\$0	\$0	\$0	\$0
Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26526 - Scenario 2 Integrated Planning	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

Proposed reduction to professional services contract budget for planning and engineering support.

Service Impacts

Reduced contract funding will increase work assigned to staff, which will likely result in longer turnaround times for non-urgent requests. Will reduce by 50% consultant support for transitions on ArcPro (required by CGIS/BTS) and consultant support for incorporating AI improvements to Operations & Maintenance team's processes that evaluate asset condition.

Equity Outcomes and Impact Tracking

The impact will be less work done or work done more slowly for improvements in the community.

Community Engagement and Empowerment

This reduction is unlikely to impact community engagement and empowerment activities.

Federal Compliance Activities

Compliance with Environmental Regulations (e.g., Clean Water Act, federal wastewater and stormwater permits) will need to be prioritized.

Budget Detail

600 - Sewer System Operating Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	(\$230,000)	\$0
Sum:	(\$230,000)	\$0

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	(\$230,000)	\$0
Sum:	(\$230,000)	\$0

Budget Concept 26528 - Scenario 2 Leadership	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description This package includes reductions to security contracts and and a Manager III position.
Service Impacts Supports reduction in Manager III's in consolidated BES/Water organization change. Existing three divisions will need to be re-assigned following core service realignment and engagement reset. Security budget reduced by approximately 16%; reduced security presence at selected sites; increasing reliance on controls like alarms, video.
Equity Outcomes and Impact Tracking Reduced presence at select sites, may result in an increase in illegal activities or activities that require funding for repair, replacement, cleanup later on those sites.
Community Engagement and Empowerment Security contract is internal to protect staff and sites.
Federal Compliance Activities N/A

Budget Detail		
600 - Sewer System Operating Fund		
Expense	One Time Cost	Ongoing Cost

Total	(2.00)	\$0	\$0	\$0	\$0

Budget Concept 26530 - Scenario 2 Strategy	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description A reduction of 1.3 FTE and professional services contract budget for regulatory support.
Service Impacts Staffing impacts are associated with Remediation and Communications teams. This will require prioritization and shifting of responsibilities within PWSA, particularly to clarify coverage of certain critical functions related to City remediation obligations. Contract budget reduction for regulatory support will be covered by deprioritizing other non-critical staff assignments.
Equity Outcomes and Impact Tracking 0.3 FTE Communications provided internal and external communications and engagement support.
Community Engagement and Empowerment The 0.3 FTE reduction in communications provided internal and external communications and engagement support.
Federal Compliance Activities This reduction will require clarification of roles to maintain coverage of certain critical functions related to environmental cleanup and federal compliance activities.

Total	(1.30)	\$0	\$0	\$0	\$0

Budget Concept 26531 - Scenario 2 Technical Services - Environmental Compliance	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

Proposed reductions to this program include two reductions: 1 FTE and funding for a seasonal employee.

1) The FTE reduction is an Analyst II position dedicated to supporting the development and stewardship of the City Codes, Rules, and Manuals that serve to effectively and safely manage wastewater and stormwater to serve the public, to recover water resources, and to protect human and environmental health.

2) The seasonal position supports regulatory requirements of the NPDES MS4 permit, by identifying illicit discharges to our stormwater system so that appropriate corrective action can be taken.

Service Impacts

1) Eliminating this position will result in 33% lost productivity and delays in writing and revising the Bureau's codes, rules, and manuals. This could result in outdated City Codes that do not meet state or federal regulatory requirements, an inability to hold the regulated public accountable, and an inability to adapt to changes in billing, engineering, or regulatory standards. This would also impact multi-bureau or Public Works code collaboration requested by Council (i.e., the cross-bureau Code and Policy Coordination Group CAP1 and CAP2 initiatives) and updates that will need to be completed during organizational transition/integration.

2) SPCR relies on this funding for seasonal fieldwork supporting required Illicit Discharge Elimination Program dry weather outfall screening. Elimination will require using higher-paid staff inside or outside the program to do this work. Moving the work to another work unit would require retooling of the business processes to ensure effective handoffs back to SPCR for investigation and enforcement, and potential renegotiation with DEQ for changes in the regulatory approach under the MS4 permit. This reduction could also result in violation of the NPDES MS4 permit and civil penalties.

Equity Outcomes and Impact Tracking

Reductions will have adverse equity impacts in multiple ways.

1) Ongoing revision and adjustment of City Codes, Rules, and Manuals is essential to tuning the regulations to evolving community priorities and outcomes. Current work includes revising codes to incorporate ADA language and improving code coordination to expedite development processes (some of which lead to new affordable housing). Both efforts would be impacted by this reduction, and both support equity objectives.

2) Seasonal positions have proven to be one of the few gateways with which to attract entry-level candidates into public sector career paths. With positions like this one, BES can hire and train candidates with less experience and overcome some of the institutional bias of technical and environmental fields that lack diversity on many fronts (e.g., ethnicity, gender, and the differently abled).

Community Engagement and Empowerment

Community Engagement and Empowerment impacts from the FTE reduction are a 33% reduction in new and revised City Codes and Rules being brought to the community for public review and comment, shifting of accountabilities from the regulated community to the public, and a lower level of service for responding and addressing City Codes and Rules that don't generate the intended community benefit.

Federal Compliance Activities

Both reductions have adverse federal compliance implications.

1) Eliminations will result in reduced productivity and delays in writing and revising the Bureau's codes, rules, and manuals. This could result in outdated City Codes that do not meet state or federal regulatory requirements and an inability to adapt to changes in regulatory standards. Current code revisions include updates to incorporate ADA requirements. This position helps to ensure that City codes, rules, and manuals are designed to meet all BES regulatory requirements and objectives. The reduction will represent a 1/3 reduction in Analysts that support this objective and will weaken the mechanisms used to comply with federal and state regulations.

2) The loss of seasonal funding will put BES at risk of non-compliance with the federal NPDES MS4 stormwater permit. The work is a requirement of the permit. Reduction will require shifting the work to existing employees with full workloads and possible gaps in getting required work done for the 2026 dry season.

Budget Detail

600 - Sewer System Operating Fund

Expense	One Time Cost	Ongoing Cost
Personnel	(\$203,500)	\$0

City of Portland
Budget Concept Summary Report
Bureau of Environmental Services

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	(\$203,500)	\$0
Sum:	(\$203,500)	\$0

Position Detail					
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30003007 - Analyst II	(1.00)	\$0	\$0	\$0	\$0
Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26550 - Scenario 3 Engineering Services - Design Services	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

The proposed reductions in the package include an Engineering Services Support Coordinator II position and a Surface Water Restoration engineer position.

Service Impacts

Coordinator II, ESG Support - Position is needed to support Engineering Standards and Practices committee, which supports CIP specifications and details which are needed as foundational elements to consistency and quality. If eliminated, the support will continue in a less optimized manner by having engineering staff that are assigned to CIP projects allocate some time to support S&P items. There could be staff available once the joint utility planning effort is completed.

Equity Outcomes and Impact Tracking

The coordinator II position supports development of Engineering standards and specifications, including interfacing with product vendors. With the loss of this position, there will be reduced outreach internally to develop standards and also delays in getting standards revised and updated. There could be a reduction in the quality of assets built to serve the community. There will also be a reduction in supporting vendors to demonstrate products that could be used on our projects. There is a risk of reduced compliance with engineering requirements. This position was selected because it is vacant and funded by operating. For the Surface Water engineer, the reduction is driven by reduced work in the surface water portfolio, which due to funding limitations is a lower priority compared to sanitary sewage and stormwater. The work in the surface area portfolio does improve communities that are underserved by improving natural habitats and reducing surface flooding.

Community Engagement and Empowerment

For the Coordinator II position there will also be a reduction in supporting vendors to demonstrate products that could be used on our projects. So there will be a customer service and potential business opportunity reduction. For the Surface Water engineer, reduced restoration and localized flooding projects will have an impact on services to the community.

Federal Compliance Activities

Cutting the coordinator II position will result in reduced support to facilitate standards updates, thereby increasing risk of outdated specifications that do not meet state and federal requirements. Most projects support meeting the Federal Clean Water Act and having updated standards and specifications will reduce the risk of potential noncompliance. There could be loss of support for coordinating and updating ADA ramp details where stormwater drainage is needed. For the Surface Water engineer, there could be a reduction in City efforts to comply with the Endangered Species Act federal compliance.

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total	
Total	(1.00)	\$0	\$0	\$0	\$0	

Budget Concept 26551 - Scenario 3 Leadership	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal includes a reduction of Health, Safety, and Security personal and an additional 4% reduction to the security contract budget.

Service Impacts

The 20% staff reduction in HSSE would shift responsibilities among team members, to other parts of the bureau, or pause certain work to prioritize meeting regulatory requirements and addressing the bureau’s greatest risks. BES will experience delays in non-mandatory work, policy updates, and reduce safety presence. Contract reduction will result in less security patrols increasing risk to our facilities and protected natural sites.

Equity Outcomes and Impact Tracking

Reduced security presence at protected natural sites may result in an increase in illegal activities or activities that require additional funding for repair, replacement, and cleanup activities.

Community Engagement and Empowerment

The reductions are primarily internal-facing to protect staff and sites.

Federal Compliance Activities

Health and safety-related compliance activities will need to be prioritized which may increase risk of noncompliance with federal mandates.

Reduction	5% Rate Reduction (Non-GF)

Package Description

The proposed reductions in this package impact two different programs including the Environmental Remediation set aside and changing the classification of a Manager vacant position.

Service Impacts

This reduction to the set aside funding for future environmental remediation obligations will ultimately result in higher future borrowing, higher future rates of increase, or a combination of both. Change in classification of Manager will be done in coordination with development of Joint Utility structure.

Equity Outcomes and Impact Tracking

These reductions have impact associated with generational equity, pushing the cost burden to the future rate payers.

Community Engagement and Empowerment

N/A

Federal Compliance Activities

These reductions will result in requiring additional funding in subsequent years to pay for future environmental remediation costs to comply with federal laws.

Budget Detail

600 - Sewer System Operating Fund

Revenue	One Time Cost	Ongoing Cost
Charges for Services	(\$1,026,000)	\$0
Sum:	(\$1,026,000)	\$0

608 - Environmental Remediation Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	(\$1,000,000)	\$0
Personnel	(\$26,000)	\$0
Sum:	(\$1,026,000)	\$0

Budget Concept 26560 - Scenario 3 Technical Services - Environmental Compliance	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

- Proposed reudctions to this program include four changes: three FTE and funding for a seasonal employee.
- 1) One FTE reduction is an Analyst II position dedicated to supporting the development and stewardship of the City Codes, Rules, and Manuals that serve to effectively and safely manage wastewater and stormwater to serve the public, to recover water resources, and to protect human and environmental health.
 - 2) Funding for the seasonal position supports regulatory requirements of the NPDES MS4 permit, by identifying illicit discharges to our stormwater system so that appropriate corrective action can be taken.
 - 3) One FTE reduction is Environmental Technician II dedicated to implementing the Stormwater Facility Inspection program to ensure property owner compliance with O&M plans for stormwater treatment facilities.
 - 4) One FTE reduction is an Environmental Specialist responsible for administering the Submeter Program, which is for commercial customers who discharge a volume of water to the sewer that is significantly more or less than the incoming water. In addition to ensuring accurate billing of commercial customers, this program also collects ~\$300K of revenue/year.

Service Impacts

- 1) Eliminating the Analyst II position will result in 33% lost productivity and delays in writing and revising the Bureau’s codes, rules, and manuals. This could result in outdated City Codes that do not meet state or federal regulatory requirements, an inability to hold the regulated public accountable, and an inability to adapt to changes in billing, engineering, or regulatory standards. This would also impact multi-bureau or Public Works code collaboration requested by Council (i.e., the cross-bureau Code and Policy Coordination Group CAP1 and CAP2 initiatives) and updates that will need to be completed during organizational transition/integration.
- 2) SPCR relies on this funding for seasonal fieldwork supporting required Illicit Discharge Elimination Program dry weather outfall screening. Elimination will require using higher-paid staff inside or outside the program to do this work. Moving the work to another work unit would require retooling of the business processes to ensure effective handoffs back to SPCR for investigation and enforcement, and potential renegotiation with DEQ for changes in the regulatory approach under the MS4 permit. This reduction could also result in violation of the NPDES MS4 permit and civil penalties.
- 3) Eliminating the Env. Tech II position will result in the completion of 30% fewer inspections, while the number of new private stormwater facilities continues to grow at approximately 300/year. The loss of this position will result in not meeting the NPDES MS4 Stormwater Management Plan annual inspection goal of 1500 inspections/year. In addition, there will be significant reductions in support to the Clean River Rewards (CRR) and shifting those responsibilities back to the CRR (Revenue Division) team.
- 4) The work of this position is essential in maintaining accurate and consistent billing of charges and credits for discharge volumes of thousands of commercial and industrial users. Cutting the Env. Specialist position will require all work and related functions to move to the BES Revenues program, because elimination of this position would result in the loss of hundreds of thousands of dollars in BES revenue, inaccurate (overcharge and undercharge) billing of thousands of commercial and industrial users, noncompliance with City Code, and potentially placing regulated industries in noncompliance.

Equity Outcomes and Impact Tracking

- Reductions will have adverse equity impacts in multiple ways.
- 1) Ongoing revision and adjustment of City Codes, Rules, and Manuals is essential to tuning the regulations to evolving community priorities and outcomes. Current work includes revising codes to incorporate ADA language and improving code coordination to expedite development processes (some of which lead to new affordable housing). Both efforts would be impacted by this reduction, and both support equity objectives.
 - 2) Seasonal positions have proven to be one of the few gateways with which to attract entry-level candidates into public sector career paths. With positions like this one, BES can hire and train candidates with less experience and overcome some of the institutional bias of technical and environmental fields that lack diversity on many fronts (e.g., ethnicity, gender, and the differently abled).
 - 3) Loss of the Env. Tech. II position will decrease the community benefit of stormwater treatment facilities due to lack of oversight and accountability for operation and maintenance. This includes facilities like public schools, where these features provide environmental education opportunities to underserved communities.
 - 4) Loss of the Env. Specialist position could result in inequitable billing of BES commercial and industrial customers. This could disadvantage small businesses.

Community Engagement and Empowerment

Reductions will have adverse equity impacts in multiple ways.

- 1) Ongoing revision and adjustment of City Codes, Rules, and Manuals is essential to tuning the regulations to evolving community priorities and outcomes. Current work includes revising codes to incorporate ADA language and improving code coordination to expedite development processes (some of which lead to new affordable housing). Both efforts would be impacted by this reduction, and both support equity objectives.
- 2) Seasonal positions have proven to be one of the few gateways with which to attract entry-level candidates into public sector career paths. With positions like this one, BES can hire and train candidates with less experience and overcome some of the institutional bias of technical and environmental fields that lack diversity on many fronts (e.g., ethnicity, gender, and the differently abled).
- 3) Loss of the Env. Tech. II position will decrease the community benefit of stormwater treatment facilities due to lack of oversight and accountability for operation and maintenance. This includes facilities like public schools, where these features provide environmental education opportunities to underserved communities.
- 4) Loss of the Env. Specialist position could result in inequitable billing of BES commercial and industrial customers. This could disadvantage small businesses.

Federal Compliance Activities

Three reductions have adverse federal compliance implications.

- 1) Eliminations will result in reduced productivity and delays in writing and revising the Bureau’s codes, rules, and manuals. This could result in outdated City Codes that do not meet state or federal regulatory requirements and an inability to adapt to changes in regulatory standards. Current code revisions include updates to incorporate ADA requirements. This position helps to ensure that City codes, rules, and manuals are designed to meet all BES regulatory requirements and objectives. The reduction will represent a 1/3 reduction in Analysts that support this objective, and will weaken the mechanisms used to comply with federal and state regulations.
- 2) The loss of seasonal funding will put BES at risk of non-compliance with the federal NPDES MS4 stormwater permit. The work is a requirement of the permit. Reduction will require shifting the work to existing employees with full workloads and possible gaps in getting required work done for the 2026 dry season.
- 3) The Stormwater Facility Inspection program fulfills requirements of the federal NPDES MS4 stormwater permit. Cutting field inspections by 30% increases risk of non-compliance and penalty.

Budget Detail		
600 - Sewer System Operating Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	(\$352,000)	\$0
Sum:	(\$352,000)	\$0
Revenue	One Time Cost	Ongoing Cost
Charges for Services	(\$352,000)	\$0
Sum:	(\$352,000)	\$0

Position Detail					
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30000338 - Environmental Technician II	(1.00)	\$0	\$0	\$0	\$0
30000339 - Environmental Specialist-Generalist	(1.00)	\$0	\$0	\$0	\$0
Total	(2.00)	\$0	\$0	\$0	\$0

Budget Concept 26563 - Scenario 3 Technical Services - Environmental Information	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

Proposed reductions to this program include one change: one FTE dedicated to the monitoring of our conveyance and pumping systems.

1) This reduction will eliminate one Electronic Systems Technician from the Data Acquisition and Notification Services Program. The position installs and maintains an Operational Technology SCADA system ("HYDRA") that measures rainfall, conveyance system levels and velocities, and pump station conditions to provide data and notifications to support operations, asset management, and regulatory objectives.

Service Impacts

Adverse service impacts of this reduction include:

1) Reduced reliability and level of service from the HYDRA SCADA system. System provides critical CSO alarming to meet permit compliance and is considered an "essential BES function" due to monitoring and notifications functions in BES Pump Stations and CSO diversion structures. Consequences are slower response times to equipment failures, growing backlog of deferred maintenance, and reduced confidence in system data and information. Due to 33% reduction field staffing, after-hours Standby coverage for system response will no longer be feasible at current service levels, which have already been reduced to the maximum extent practicable. This will result in potential conflicts and increased costs due to new PROTEC labor agreement terms.

Equity Outcomes and Impact Tracking

Equity outcomes of this reduction include:

1) Adverse impacts related to the dependencies of operators on the HYDRA system to monitor conveyance system and pump station status to inform operational decisions that minimize potential for sewage releases and potential harm to human health and the environment. FTE reduction could also reduce effectiveness of CSO notifications from the HYDRA system, resulting in sewage releases to public waterways for which the public has not received adequate notification. Internally, there will be adverse workplace equity impacts, as 24/7/365 coverage of the system will now be spread across 3 vs. 4 employees.

Community Engagement and Empowerment

Community Engagement and Empowerment impacts are limited to loss of the Electronic Systems Technician position, whose work supports public facing tools that provide real-time views of the BES Big Pipe and potential to reach overflow conditions, as well a public portal from which real-time rainfall data can be utilized by businesses, organizations, and individuals.

Federal Compliance Activities

The Electronic Systems Technician reductions have adverse federal compliance implications. This position supports regulatory requirements of our federal NPDES wastewater permit and affiliated CSO program requirements.

Budget Detail			
600 - Sewer System Operating Fund			
Expense	One Time Cost	Ongoing Cost

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total

Position Detail

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30000401 - Electronic Systems Technician	(1.00)	\$0	\$0	\$0	\$0
Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26569 - Scenario 3 Integrated Planning

Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

Proposed reduction to professional services contract budget for planning and engineering support.

Service Impacts

These reductions will require further de-prioritization of some projects and/or schedule delays. Fund uses will be more limited, with focus on addressing high risk in areas of specialized expertise for assets such as pump stations, treatment, and large diameter sewers. Also anticipate reduction for resiliency aspects in Pump Station risk framework.

Equity Outcomes and Impact Tracking

The direct impact of these cuts is that less work will be done and at a slower pace for improvements in providing services to the community.

Community Engagement and Empowerment

These reductions are unlikely to impact engagement and empowerment activities.

Federal Compliance Activities

These reductions impact the City's compliance with Environmental Regulations (e.g., Clean Water Act, federal wastewater and stormwater permits) that need to be prioritized.

Budget Detail

600 - Sewer System Operating Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	(\$338,000)	\$0
Sum:	(\$338,000)	\$0

Revenue	One Time Cost	Ongoing Cost
Charges for Services	(\$338,000)	\$0
Sum:	(\$338,000)	\$0

Budget Concept 26578 - Scenario 3 CIP and Project Management Office	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposed reduction includes an additional reduction in transitory dollars. When included with the Scenario 2 reduction brings the funding down from \$6.9M to \$4.9M.

Service Impacts

Additional reduction leaves little capacity to respond to asset emergencies, which may lead to delaying or postponing other important planned CIP work to use those funds. The CIP program has already been prioritized to those projects presenting the most risks. Delaying or postponing projects typically increases project costs due to inefficiencies, inflation, and contractual impacts. It also impacts our ability to catch up with the asset investment or re-investment needs by further delaying planned work, eventually leading to an increased risk of and during emergencies.

600 - Sewer System Operating Fund

Expense	One Time Cost	Ongoing Cost
Capital Outlay	(\$1,000,000)	\$0
Sum:	(\$1,000,000)	\$0

Revenue	One Time Cost	Ongoing Cost
Charges for Services	(\$1,000,000)	\$0
Miscellaneous Fund Allocation	\$0	\$0
Sum:	(\$1,000,000)	\$0

Budget Concept 26583 - Scenario 3 O&M - Collection System	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposed reduction decreases direct BES contributions to ADA ramp construction by PBOT.

Service Impacts

Potential reduction in ADA ramp construction where catch basin changes are needed in order to maintain drainage. Response to the CREEC lawsuit settlement is a Citywide responsibility; BES contributes to PBOT services via overhead, and these directly funded positions are on top of that overhead rate. To maintain CSL for ADA ramp construction, PBOT would require an increase in General Transportation Revenue or General Fund Revenue.

Equity Outcomes and Impact Tracking

ADA ramp construction is led by PBOT. BES does not track or manage ADA ramp construction led by PBOT.

Community Engagement and Empowerment

ADA ramp construction is led by PBOT. BES does not track or manage ADA ramp construction led by PBOT.

Federal Compliance Activities

ADA ramp construction is led by PBOT. BES does not track or manage ADA ramp construction led by PBOT.

Budget Detail

600 - Sewer System Operating Fund

Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	(\$550,000)	\$0
Sum:	(\$550,000)	\$0

Revenue	One Time Cost	Ongoing Cost
Charges for Services	(\$550,000)	\$0
Sum:	(\$550,000)	\$0

Budget Concept 26661 - Grant Scenario	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

There will be delays in utilizing a federal funds grant to support the purchase of replacement mixers and repair kits for the Columbia Boulevard Wastewater Treatment Plant and portable generators to serve the City's network of 98 pump stations.

Service Impacts

Mixers help to treat wastewater by increasing gas generation and breaking down solids, leading to cleaner rivers. Delays in replacing the failing equipment will increase the time that old units are not functional due to ongoing repairs resulting in an overall decrease in service for tens of thousands of Portlanders.

Equity Outcomes and Impact Tracking

Mixers help to treat wastewater by increasing gas generation and breaking down solids and portable generators help the plant operate during storms and power outages. Delays in replacing the failing equipment will increase the time that old units are not functional resulting in decreased service for tens of thousands of Portlanders. Likewise, without additional portable generators there will be increased risk of pump station ceasing to operate during storms and power outages.

Community Engagement and Empowerment

N/A

Federal Compliance Activities

Delays in utilizing the federal funds grant in a timely matter may cause compliance issues and place receiving any future grants at risk.

Revenue	One Time Cost	Ongoing Cost
Intergovernmental	\$1,092,000	\$0
Sum:	\$1,092,000	\$0

Budget Concept 26570 - Vision Zero	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

In September of 2025 resolution #37716 recommitted the city the goal of eliminating fatal and serious injury crashes. The safe system approach recognizes the need to reduce risks in the system through a prevention framework and multidisciplinary approach. The resolution directed specific approaches to increasing coordination across the service areas including development of an internal Vision Zero Task Force and update of the Vision Zero Action Plan. To increase effectiveness of the work across service areas, the citywide coordination work will be led and managed by the Vision Zero Policy Manager currently situated in the Public Works Service Area and funded through the service area base budget.

The Vision Zero Task Force, Action Plan development and implementation will be managed by the Vision Zero Policy Manager and resourced by leadership and technical staff collaborating in each service area in a matrix framework across the service areas.

To support the development of the action plan, outreach for the plan, reporting and coordination among service areas the workplan requires the support of an analyst and office specialist and additional one-time funds to support public engagement for the plan in 2026.

Service Impacts

Without the additional funds to support development of the plan and outreach coordination work, we will be unable to complete anything beyond basic online public communications for the action plan. Resolution #37716 specifically requests that the 'Vision Zero Task Force shall ensure meaningful community engagement in the development of its analysis and action plan and inform communities of the new action plan'.

The one-time funds are intended to support this directive

Equity Outcomes and Impact Tracking

This request is specifically for funds to support outreach and engagement with community on the update to the citywide multidisciplinary Vision Zero Action Plan. The resources will support staff time, materials and development of public facing tools to share data and track progress.

Portland Bureau of Transportation

Run Date: 2/9/26
Run Time: 3:48:52 PM

Budget Concept 26272 - Derelict RV	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

Request for \$1 million in General Fund resources to match prior levels of funding and services.

Service Impacts

Without this funding the Mayor's target level for RV removal cannot be met. If funding is not continued, the bureau will tow approximately 285 fewer RVs off the streets in FY 2026-27.

Equity Outcomes and Impact Tracking

Clearing of trash and vehicles in the right of way allows for the use of streets and sidewalks for all users.

Community Engagement and Empowerment

Federal Compliance Activities

Budget Detail

200 - Transportation Operating Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	\$1,000,000
Sum:	\$0	\$1,000,000
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	\$1,000,000
Sum:	\$0	\$1,000,000

Budget Concept 26464 - Bureau Support Services CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$1.6M and 9.00 positions. These reductions reflect changes to support services that are outside of the core services realignment such as administrative support and activities within the Office of the Director.

Service Impacts

Support for recruitments, device management, purchasing, and other various administrative tasks will shift to management or programmatic staff leaving less time for direct services to the public. The reduction reduces the bureau’s ability to gather information about our asset conditions and align asset management practices across the bureau and with other bureaus and make it more difficult to participate in the Citywide Asset Management Strategy work. We will reduce the amount of funding we have for community sponsorships and organizational memberships in professional associations. These are tools which help greatly with community engagement and help staff with training and learning best practices from peer cities and professionals.

Equity Outcomes and Impact Tracking

Not applicable

Community Engagement and Empowerment

The package includes direct reductions in community event sponsorships, which are a tool that helps with bureau engagement work and also reduces resources for community organizations.

Federal Compliance Activities

Budget Concept 26466 - Environmental Services CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description The package includes reductions totaling \$1.2M and 5.00 positions. The package would eliminate all cleaning and repair of catch basins. Position eliminations include 2 AEO 3: Vactor Operators and 3 – Utility Worker II .
Service Impacts Elimination of all cleaning and repair of catch basins which will result in additional localized flooding at many intersections. The Bureau will not proactively staff for atmospheric river events. Additionally, the catch basin cleaning program is a seasonally based program. The work is often done in fall and is performed by more than 5 staff members.
Equity Outcomes and Impact Tracking This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.
Community Engagement and Empowerment Losses of these services will have direct impacts in all communities.
Federal Compliance Activities Not specifically a current permit requirement; however, the City has reported on inlet cleaning in the past and a reduction to zero may result in a future permit requirement.

Budget Detail		
200 - Transportation Operating Fund		
Expense	One Time Cost	Ongoing Cost

Total	(5.00)	(\$354,026)	\$0	(\$249,105)	(\$630,215)

Budget Concept 26467 - Parking District Management CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$2.3M and 1.00 position. The package eliminates the 51% parking district revenue sharing policy. The districts that place surcharges on parking permits would still receive those funds for allocation within the districts. To implement this package would require an update to the Parking Meter Revenue Allocation Policy (TRN 3.112). These funds are allocated by Parking District Stakeholder Advisory Committees for infrastructure and safety improvements in their districts.

The package also eliminates PBOT’s ability to implement new parking meter districts or area parking permit plans.

Service Impacts

Eliminating district shared funds would significantly impact or eliminate the following: Northwest in Motion Capital improvement projects, including pedestrian improvements like curb extensions and crosswalks, Pedestrian lighting in Northwest, and the Vision Zero “No Turn on Red” pilot project, sidewalk cleaning in the Central Eastside Industrial District, parking data collection, and Stakeholder Advisory Committees.

Additional funding cuts beyond district shared funds would eliminate annual data collection and reporting and would not allow the creation of new parking permit districts or meter areas, including the N/NE Parking District that is on the cusp of being adopted after three years of planning and outreach.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.

Community Engagement and Empowerment

This reduction eliminates funding allocated directly by community partners to implement safety and other improvements in their parking districts.

Federal Compliance Activities

Not applicable

Budget Concept 26468 - Parking Enforcement CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$1.1M and 9.00 positions. Parking Enforcement has authorized funding for 84 parking enforcement officers. These nine positions up for elimination are currently vacant.

Service Impacts

Cutting these positions will affect enforcement operations, particularly enforcement during evening hours in event districts and in neighborhoods during most times of the day. Remaining officers will focus on metered areas during the busiest parking hours.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.

Community Engagement and Empowerment

Program ensures parking availability in communities with parking districts.

Federal Compliance Activities

Not applicable

Budget Concept 26469 - Project Delivery: Engineering CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$1.6M and 12.00 positions. These reductions would be taken in preliminary project scope development, coordination of standard specifications and drawings, landslide site inspection and mitigation, repairs to damaged assets, and pavement management data collection.

Service Impacts

The City would see a reduction in repairs to damaged assets (i.e. guardrail, railings, abutments and other safety elements when damaged by vehicles). These safety devices are struck on a regular basis, and repairs require a qualified engineer to design the fix. Safety elements must be repaired to keep the road/bridge/tunnel/stairs open. Any reduction means the roadway is closed until repairs are funded or the road stays open with greater liability of a now compromised safety element (aka guard rail). There would also be limited response efforts to landslides increasing risk to the City. The pavement management program provides data on asset conditions and recommendations for proper repairs or rehabilitation of PBOT's most visible and largest asset. Data driven decision-making will be affected as the data set ages and becomes unreliable.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities.

Budget Concept 26471 - Right of Way Use Permitting CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$1.0M and 4.00 positions. PBOT, through PP&D, requires the dedication of rights-of-way and other easements as a condition of a developer's permit. It is difficult to charge developers to take their property, therefore this service has been subsidized by General Transportation Resources. The bureau plans to cover this expense through other permit revenues generated in the program.

Other reductions include the elimination of two code specialist positions and abatement funds from the compliance program.

Service Impacts

Slower response due to lack of personnel and reduction in all abatement funding means immediate safety issues will require PBOT Maintenance Operations response at the cost of delays to other needed maintenance work.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.

Community Engagement and Empowerment

The change in funding source for dedications of rights-of-way does not have a community impact. Slower responses to code violations will have impacts across all communities.

Federal Compliance Activities

Budget Concept 26472 - Sidewalks, Signs & Structures CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$2.8M and 6.00 positions. The package eliminates preventative maintenance on bridges and reduces service levels to break/fix only; eliminates all stairway, all retaining wall, and all street furniture maintenance; and reduces sidewalk posting program to minimal levels.

Service Impacts

Stairs will be closed and slower response times to repair guardrails and attenuators will cause increased risk and liability.

Sidewalk posting is a City Charter requirement, so will be met, but at a severely reduced service level. The backlog of sidewalk trip/fall notifications will grow with few staff available for inspection and notification to the property for mandatory repairs. Failure to perform these functions may increase risk claims to the City.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities.

Budget Concept 26473 - Streetlights & Signals CSL Reductions	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$3.5M and 3.00 positions. With these reductions, maintenance will be reduced by up to 50% for traffic signals and crews will typically only be able to respond to emergency events.

Service Impacts

Crews would be able to respond to emergency signal outages only and no damaged streetlights would be repaired. Maintenance on signals would be break/fix only and may be significantly delayed. PBOT expects about 2 signals every year would revert to All-Way Stops.

If a streetlight falls down, it will be removed but not replaced. Streetlight wire theft has doubled this year and costs the bureau \$400-800k annually – stolen wire will be replaced intermittently, leaving streetlights out of commission at times. If signal loops are damaged, they will not be repaired; signals will revert to fixed time operations until new passive detection can be installed, increasing wait times for transit, cars, bicyclists and pedestrians.

School Speed 20 Beacons, Rapid Flashing Beacons at crosswalks, and Accessible Pedestrian signal (APS) pushbuttons will be impacted, with slower response times and potential crosswalk closures. The current backlog of 72 knocked-down streetlights will grow by about 55 each year and push button backlog will grow by 15 per year.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities. Some examples include, no longer responding to community requests for streetlight shields (when lights shine into homes, often noticeable when trees are removed/landscaping changes); elimination of nighttime staff drives which places a higher burden on residents to report streetlight outages; response to outages will be slower, relying on standard relamping schedule of 8-10 years instead of service requests.

Run Date: 2/9/26
Run Time: 3:48:52 PM

Position Detail					
Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
Total	(3.00)	(\$283,015)	\$0	(\$171,172)	(\$475,839)

Budget Concept 26474 - Traffic Ops, Investigations & Regulation CSL Reductions	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$2.2M and 14.00 positions. This level of reduction eliminates the Traffic Safety Community response team (823-SAFE) and the data collection program. Two positions will remain: one to assist city attorneys with claims and other federal requirements (e.g. railroad coordination), and one to address visibility concerns. A reduction of two positions will also take place in the regulatory team.

Service Impacts

Calls for improvements through 311, PEMO, and other City bureaus will no longer be addressed. Any requests to collect traffic volume data will need to be contracted out and paid for by another resource. Neighborhood speed reader boards will be eliminated. The program will also see a reduction in the number of audits and inspections of transportation network companies and tour companies operating in Portland and will eliminate the Safe Ride Home Vision Zero partnership that subsidizes TNC rides on holiday.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget. There is currently a backlog of 1300 traffic safety investigations (as a result of past budget cuts). This backlog will continue to grow by 1000 investigation requests annually.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities. Community members calling 311 with traffic safety requests will get a standard City response and will not be forwarded to PBOT for review.

Budget Concept 26493 - High Speed Rail Development Initiative	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

Request for \$375,000 in one-time General Fund discretionary funding to advance and shape the study of future Cascadia High-Speed Rail (HSR) and evaluate potential station locations within the City of Portland.

In December 2024, Washington State Department of Transportation (WSDOT) secured a \$49.7 million federal grant agreement to advance Cascadia High-Speed Rail planning. A key part of that vision is a fast, frequent, and reliable transportation system that better connects the Cascadia Megaregion. Currently, no funding is allocated to planning HSR at the Oregon State, Portland region or local city level to participate in and inform WSDOT-led planning.

To be prepared to participate in the study and advocate for the Portland station to be within the City of Portland, City staff need to both participate in the WSDOT-led planning and conduct more detailed/city-scale analysis and evaluation.

Service Impacts

The requested funding will support the following:

- PBOT-led study with consultant support to explore HSR potential route options and general station locations within the City of Portland and develop recommendations on most promising locations to meet HSR goals, as well as City of Portland policy, goals, constraints, infrastructure and development opportunities. This task will position city leaders to advocate for the Portland station to be located in the city and frame discussions with potential stakeholders. (\$150,000 consultant/\$50,000 staff)
- Land use, value capture and development potential analysis. Fund staff at BPS, Prosper and other city bureaus staff participation as well as potential consultant support to understand economic impact of HSR on the city and mechanisms for funding improvements through value capture. (\$100,000 consultant and staff)
 - o Development potential of adjacent sites
 - o Land use suitability analysis
 - o Value capture strategy
- PBOT and other city bureau staff participation in HSR planning at the Portland-Metro regional level and broader Cascadia megaregion including supporting Mayor’s Task Force of largest employers to catalyze additional HSR champions. (\$75,000 staff)

Assuming Summer 2026 funding approval, staff work could commence immediately with consultant activities commencing fall 2026.

Equity Outcomes and Impact Tracking

This concept is being brought forward at the request of the Mayor’s Office.

Community Engagement and Empowerment

Draft work products would be ready to be presented at the Cascadia Innovation Summit in fall of 2027.

Budget Concept 26533 - City Support Services CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$1.4M and no positions. The bureau is reducing about 8% of its total position count, therefore we are assuming savings of about 8% in central services interagency costs. The specifics of these savings are not yet known, but should occur in technology, fleet, General Fund overhead, etc.

Service Impacts

No additional service impacts outside of those described in the packages where the position reductions are taking place. The package only reflects savings in internal service fund inter agencies associated with those positions.

Sum:	(\$1,400,000)	\$0

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	(\$1,400,000)	\$0
Sum:	(\$1,400,000)	\$0

Budget Concept 26534 - Mobility & Safety CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$0.8M and no positions. The program currently receives a General Transportation Revenue subsidy until it becomes full cost recovery. This reduction represents almost full cost recovery in FY 26/27 and full cost recovery by FY 2027-28 for fixed speed safety cameras based on projected program revenue.

Service Impacts

The package is phasing out the subsidy of this program over time, therefore there is no service impact.

Equity Outcomes and Impact Tracking

Budget Detail

200 - Transportation Operating Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$750,000)
Sum:	\$0	(\$750,000)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$750,000)
Sum:	\$0	(\$750,000)

Budget Concept 26535 - Project Delivery: Construction CSL Reduction	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The package includes reductions totaling \$1.8M and no positions. The reductions include elimination of the grant matching funds which typically return a 9:1 leverage for outside funding (\$1.5M), elimination of the signals and streetlighting capital project partnership funds (\$0.2M), and about a 10% reduction to capital funding for bridges and structures infrastructure (\$0.1M).

Service Impacts

The bureau would eliminate the grant matching funds on an ongoing basis but would maintain one-time funding for the projects currently under development/construction that are relying on these funds. The loss of these matching funds would lead to the loss of approximately \$13.5M in new capital projects every year. The loss of a capital program will eliminate PBOT's ability to support evolving needs of Portlander's through infrastructure investments. These projects have historically included investments in commercial district streetscapes, pedestrian crossing and cycling infrastructure, transit priority investments, and safety projects.

The signals and streetlight capital funding allocation has been used to partner with developers to upgrade traffic signals and streetlights. When a developer rebuilds a sidewalk or street corner, PBOT can coordinate to replace or install new poles while the sidewalk is under construction, ensuring the new frontage has upgraded infrastructure to support the development while maintaining public infrastructure.

Equity Outcomes and Impact Tracking

This program was chosen for reduction in order to hold harmless programs that received additional investment in the FY 2025-26 budget. Furthermore, the reduction to new capital project development was chosen over reducing maintenance for existing assets so as not to further increase the maintenance backlog faced by the bureau. However ongoing loss of the grant funded capital program will have a profound impact in future years on PBOT's ability to provide upgrades to the transportation system. Loss of grant funded capital projects also substantially reduces staff funding ties in Planning, Engineering and Traffic teams which in turn would no longer produce overhead that funds support services within the bureau causing further staff reductions.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities. PBOT would have a significantly diminished ability to produce projects that respond to community concerns and desired system modernizations or safety upgrades. This will reduce PBOT's ability to constructively engage with community and prepare solutions to their concerns.

Federal Compliance Activities

The commitment to a capital program is a core element of Portland's Transportation System Plan and compliance with growth requirements in the Comprehensive Plan. This reduction would result in further underperformance against projected need to invest to support population and job growth.

Budget Detail		
200 - Transportation Operating Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$1,765,900)
Sum:	\$0	(\$1,765,900)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$1,765,900)
Sum:	\$0	(\$1,765,900)

Budget Concept 26538 - General Fund 3% Reductions	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

PBOT's General Fund allocation of \$1,338,378 is allocated to specific programs as directed by previous Council's. These allocations include the Out of the Mud program (\$551,706) to pave existing gravel streets, the Sustainability program (\$110,591) to address items in the City's Climate Action Plan, Street Cleaning (\$520,673) on various streets including the Central Business District, Sunday Parkways (\$131,135) that promotes healthy active living through a series of free events, and a small allocation to General Transportation Revenues (\$24,273) to backfill for the loss of parking revenues related to the installation of Director Park.

The 3% reduction target totals \$40,151. In prior years reductions were taken across-the-board to all programs equally. For FY 2026-17, the bureau proposes to address the 3% and 10% reductions by only reducing or eliminating the Sustainability program and the Director Park lost revenue backfill.

Service Impacts

At the 3% level, the bureau proposes to focus on providing support for the new Climate Action Plan and Sustainability and Climate Commissioner (SCC), but would not be able to participate in region-wide climate and sustainability work, coordinate responses to Mayoral climate initiatives, or update the greenhouse gas inventory.

Equity Outcomes and Impact Tracking

The bureau believes it is unfeasible to make reductions to the other programs due to the following:

1. The Out of the Mud funding has already been allocated to projects underway and requires continued funding to complete the projects.
2. Street Cleaning was expanded in FY 2025-26 and requires additional funding this year and next to get the program up and running. There is a separate budget concept request for additional funding for this work.
3. Sunday Parkways could be taken as a reduction instead of the cut to Sustainability, but given the popularity in the community for these events, the bureau held this program harmless.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities.

Federal Compliance Activities

Miscellaneous Fund Allocation	\$0	\$0
Sum:	(\$40,151)	\$0

Budget Concept 26539 - Transportation Network Company Fee Code Change	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

Existing code language (Portland City Code Chapter 16.40.030) only allows the city to charge TNC fees on trips that originate in Portland. Rides that start outside of the city limits, but end in the city limits, are not charged a fee even though those rides use and impact our transportation system. If a minor change was made to City Code, PBOT could charge fees for all rides that start or end in the city. The bureau estimates an additional \$1.5 million in General Transportation Resources could be generated from this minor code change. The bureau does not currently receive data for trips that end in the city, therefore this revenue estimate is truly only an estimate and could change once data is received.

Service Impacts

These additional resources could be allocated to address the existing GTR revenue shortfall or fund any other new high priority transportation needs.

Equity Outcomes and Impact Tracking

This is a new revenue proposal, so the outcomes will be determined by the investment made from these new resources.

Community Engagement and Empowerment

The community was not engaged in this proposal.

Sum:	\$1,500,000	\$0

Budget Concept 26670 - TSUP Decision Package	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

- 2 FTE (2 Engineering Tech I positions, \$242,858)
- \$60,000 in EMS (operating supplies)
 - o Supplies and materials (barricades, candlesticks, signage)
 - o Safety gear and uniforms (rain gear, PPE)
 - o Label printer ink, labels, tape
 - o Small tools and field equipment

These additions establish two new Engineering Technician I positions and \$60,000 in operating supplies to support PBOT-installed parking reservation services.

TSUP has assumed responsibility for installing parking reservation signage previously performed by Parking Enforcement. The \$60,000 EMS reflects the full operating supply cost for all parking reservation installations, including both metered and non-metered areas. These costs were historically covered by Parking Enforcement and are now being consolidated within TSUP to align expenses with the program performing the work.

As TSUP expands installation services into non-metered areas, dedicated field staff and operating supplies are required to deliver the service safely, consistently, and at scale. The positions and operating supplies in this package will be supported by TSUP fee revenue, including the proposed Non-Metered Parking Reservation (PBOT Install) fee, and reflect both the transfer of existing installation responsibilities and the expansion of the service into high demand non-metered areas.

- \$4,606,567 – 2025 metered parking revenue
- \$857,692 – projected revenue from PBOT installed non-metered parking reservations in the first year.
 - o A portion of this revenue is collected specifically to cover the additional field staff and operating supplies.

Service Impacts

Approval of these additions will allow TSUP to:

- Sustain and expand City-installed parking reservation services in non-metered areas
- Improve the quality and enforceability of parking reservations by ensuring consistent, City-installed signage
- Reduce applicant costs and administrative burden by eliminating the need for self-posting, verification visits, and multiple enforcement fees
- Decrease reliance on Parking Enforcement for signage verification, allowing officers to focus on core enforcement and safety-related work

Equity Outcomes and Impact Tracking

City-installed parking reservations reduce administrative and financial barriers for applicants by eliminating the need to rent barricades, print signage, and coordinate with Parking Enforcement. These barriers disproportionately impact small businesses and residents with limited time, resources, or familiarity with City processes.

Expanding this service promotes more equitable access to permitted use of the right-of-way across neighborhoods where parking demand is high, regardless of whether the parking is metered.

TSUP will track impacts by monitoring application totals compared to prior years, geographic distribution of installations, and customer service feedback. We will also continue to look at other high demand areas across the city that may be good candidates for future expansion.

Community Engagement and Empowerment

TSUP regularly engages with permit applicants, contractors, residents, and businesses through direct customer support, published guidance, and coordination.

Expansion of the City-installed signage service area responds directly to customer feedback requesting simpler, more predictable parking reservation processes. Ongoing engagement will continue through applicant communications, program updates, and coordination with impacted stakeholders as new areas are added.

Federal Compliance Activities

These additions do not introduce new federal compliance requirements.

Sum:	\$0	\$302,858

Budget Concept 26678 - General Fund 10% Reductions	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

An additional 7% reduction to General Fund supported services totals \$93,687. In prior years reductions were taken across-the-board to all programs equally. For FY 2026-17, the bureau proposes to address the 3% and 10% reductions by only reducing or eliminating the Sustainability program and the Director Park lost revenue backfill.

Service Impacts

At the 10% level, the entire Sustainability program and the Director Park revenue backfill would be eliminated. In this scenario, we would likely eliminate one position responsible for the following work tasks:

- Support for and coordination with the City's new Sustainability and Climate Commission.
- Coordination and support for implementation of the Mayor's climate initiatives (individual climate initiatives will need to be funded separately).
- Participation in the development of a new Climate Action Plan. This is a key effort being led by the City's Chief Sustainability Officer. Without this funding, PBOT will be unable to participate in development of this key citywide plan.
- Coordination with the Bureau of Planning & Sustainability and the Chief Sustainability Officer on greenhouse gas inventories and tracking.
- Review and comment on regional, state and federal climate policy.

Equity Outcomes and Impact Tracking

The bureau believes it is unfeasible to make reductions to the other programs due to the following:

- The Out of the Mud funding has already been allocated to projects underway and requires continued funding to complete the projects.
- Street Cleaning was expanded in FY 2025-26 and requires additional funding this year and next to get the program up and running. There is a separate budget concept request for additional funding for this work.
- Sunday Parkways could be taken as a reduction instead of the cut to Sustainability, but given the popularity in the community for these events, the bureau held this program harmless.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities.

Federal Compliance Activities

Not applicable.

Miscellaneous Fund Allocation	\$0	\$0
Sum:	\$0	(\$133,838)

Budget Concept 26679 - Residential Street Sweeping Implementation	
Budget Concept Type	Magnitude
Add	Current Revenue Forecast (Non-GF)

Package Description

The FY 2025-26 Adopted Budget directed the bureau to initiate a residential street sweeping program and added \$3.1M of resources to begin this work. During the first year of the program, the bureau is expanding the leaf program, hiring and training new staff, acquiring additional sweepers (1-year delivery timeframe), and phasing in the installation of parking signage citywide to notify residents of sweeping periods. Limited street sweeping in residential areas will occur in FY 2025-26. As communicated in last year’s budget process, the implementation plan for residential sweeping will take three years and additional funding to fully implement. This concept requests the additional funding needed to meet the expectations set forth in the Adopted Budget. The bureau requests \$1.1M of new ongoing resources and \$1.3M of new one-time resources to fully implement the program.

Service Impacts

With these additional resources, the bureau can accomplish the following by the end of FY 2027-28:

1. Sweep 2,300 curb miles 4 times per year
2. Flush 1,200 non-curb miles 2 times per year
3. Add 4.00 dedicated parking enforcement officers to allow curb to curb sweeping
4. Expand the leaf program throughout the entire city
5. Create a citywide communications plan

Equity Outcomes and Impact Tracking

The bureau is currently experiencing a shortfall of General Transportation Resources and therefore does not have funding to allocate to the expansion of this program without taking additional cuts to other priority programs. If new resources cannot be found, the bureau proposes implementing the following service levels to remain within the current funding allocation:

1. Sweep 2,300 curb miles 1.5 times per year
2. Flush 1,200 non-curb miles 2 times per year
3. Add 1-2 dedicated parking enforcement officers to allow curb to curb sweeping
4. Expand the leaf program throughout the entire city

Community Engagement and Empowerment

This package represents the continuation of an investment started in the FY 2025-26 budget process, therefore has received public feedback based on the previous budget process.

Budget Concept 26683 - Rate Reduction Scenario: Pavement Maintenance	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

The Mayor’s budget guidance requires a 5% rate reduction concept. Based on discussions with the City Budget Office, it was determined that the bureau would show the impact of freezing General Transportation Revenue fees at their current levels to meet this scenario. Given that inflation on these fees is set at 6.12%, the freezing of these rates exceeds the 5% rate reduction requirement. The fees that would be impacted include parking meter rates, area parking permits, temporary street use permits, and transportation network company fees (TNC). The total loss of revenue from freezing these rates at current levels for one year is \$3.6 million. The bureau is already experiencing a shortfall in revenues for FY 2026-27; therefore, the loss of these increases would need to be offset with program reductions.

PBOT invests \$14.4M in pavement maintenance including paving, pothole repair, crack filling, and other maintenance activities. This concept would reduce the grind and pave program by \$3.6M and 7.00 positions.

Service Impacts

Reductions in this area would cause further decline in the condition of the bureau’s largest and most significant asset class. The concept reduces the grind and pave program from about 8.6 center-lang miles per year to 5.0 miles per year.

Equity Outcomes and Impact Tracking

This program was chosen for reduction due to the level at which all other programs were reduced in the Current Service Level reduction packages.

Community Engagement and Empowerment

Losses of these services will have direct impacts in all communities.

Budget Concept 26223 - Community Center Holiday Closures	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package fully closes PP&R's five regional community centers (Charles Jordan CC; East Portland CC; Matt Dishman CC; Mt Scott CC; Southwest CC) for all observed federal holidays, implementing operation alignment with other City facilities. Currently, regional community centers close only for Independence Day, Thanksgiving, and Christmas Day. Past data shows lower center attendance on holidays, increased costs of permanent staff working holidays, and the required levels of seasonal staff cost needed to open and operate each center. This proposal would align community center operation with general City facility operation. Current holiday schedule staff levels across the five regional community centers include 18 permanent staff and 72 seasonal staff each working between 4 to 8 hour shifts for each of the eight federal holidays that regional centers are open.

Service Impacts

The closure of the five regional community centers for all federal holidays would impact access to the public who want to recreate at a community center on a holiday. Drop-in access and use of the pool, gymnasium, and fitness centers would not be available on federal holidays because of this strategic holiday closure. The closure aligns operation of regional community centers with other City facilities.

Equity Outcomes and Impact Tracking

This proposal savings in staffing costs by a full reduction of casual staff hours on federal holidays as well as the elimination of required holiday overtime pay for permanent staff needed to operate each community center on federal holidays. Review of holiday participation data for the five regional centers show a general decline in admission and participation by the public on these days than regular weekdays or weekends, while the cost of staffing centers for operation remains consistent with higher use days. Holidays are limited to drop-in activities such as open and lap swims; gymnasium use and use of fitness centers. Other neighborhood and arts community centers are closed on all holidays, with only regional community centers providing recreation services on holidays. The impact to the general community through these holiday closures is not as significant as other potential cuts to community center operation and provides an efficiency to center operation.

Community Engagement and Empowerment

This proposal was based on community center usage reports which demonstrate reduced use of facilities on federal holidays. Regional community centers currently close on three of eleven federal holidays and operate on a reduced schedule for the eight holidays they are open. Fully closing community centers for all federal holidays minimizes impact to the public, as well as to community partners who use and have full access to community center spaces and amenities during regular operation days, but reduced use/access on holidays. This proposal creates significant savings with minimal impact to community needs, access and usage of regional community centers.

Federal Compliance Activities

This proposal aligns with Federal, State, and City operation and staffing leaves for federal holidays.

Budget Concept 26547 - Procure Janitorial Services Through Lowest Cost Vendor Option	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal requests City Council authorization for an eligible Labor Peace Agreement (LPA) exception, if needed, to allow PP&R to contract janitorial services with an eligible Oregon Forward firm that meets City labor standards, restores critical scope of services, and ensures responsible use of public funds. Any firm considered under this request must provide equal or better wages and benefits, deliver consistent and high-quality service, meet the scope needs of the bureau, and comply with the Labor Peace Agreement Policy or an eligible exception. Authorization would allow PP&R to restore essential and consistently high-quality janitorial services that the current vendor has been unable to deliver, including daily restroom and work-area cleaning in high-use employee facilities and annual floor-care maintenance in public-facing facilities. PP&R is required by state law to contract with Oregon Forward–certified firms for janitorial services, which support inclusive employment and fair labor practices. While several firms are certified locally, only two have been willing to consider serving the scope of PP&R’s system-wide needs.

Service Impacts

The PP&R janitorial contract serves 22 facilities, including maintenance buildings used by operational staff, public-facing community centers, and indoor swim pools. Inadequate janitorial services create public health and safety concerns and increase operational costs when staff must supplement cleaning, restock supplies, and manage repeated performance issues. Deferred annual floor care accelerates wear and damage, increasing long-term maintenance and replacement costs in high-use facilities.

Approval of this package allows PP&R to restore consistent and effective janitorial services, maintain clean and safe environments, and provide sufficient annual floor care to protect public assets. This request does not weaken worker protections or labor standards. Rather, it seeks City Council authorization, if necessary, to balance the City’s commitments to strong labor practices, fiscal stewardship, and the safe operation of public facilities. Providing this exception would help ensure PP&R can secure reliable service, treat workers fairly, restore critical cleaning services, and responsibly manage public resources.

The recent vendor transition decreased the services PP&R receives for the same cost and, in the first six weeks of service, the new contractor was repeatedly unable to perform or correct the agreed-upon scope of work. PP&R denied full and partial receipt of services for 60 dates of service across eight facilities, with an additional 20 performance issues noted. Without approval, PP&R would continue contracting with the current provider, receive a smaller scope of services for the same cost, and use staff time and resources to address significant service quality issues that present public health risks.

Equity Outcomes and Impact Tracking

This package was selected because it restores lost janitorial service scope, improves service quality and reliability, supports equal or better wages and benefits for contracted workers, and avoids additional General Fund costs associated with staff backfilling or deferred maintenance.

Outcomes will be tracked through contract performance monitoring and compliance reporting, documentation of service delivery and corrective actions, reduction in service denials and performance issues, and facility condition assessments related to cleanliness and floor care.

Restoring janitorial service quality supports PP&R’s service outcomes related to public health, safety, asset stewardship, and access to clean, welcoming facilities, consistent with PP&R operational and equity goals.

Community Engagement and Empowerment

Clean and safe facilities are foundational to community trust, access, and participation in PP&R services. Community members regularly provide feedback when restrooms, locker rooms, fitness spaces, classrooms, and common areas are not adequately cleaned or maintained.

This contract supports janitorial services across facilities located in all Portland districts, serving staff and community members who use community centers, pools, and recreation spaces year-round.

While this package does not add new programming, it directly supports community access to safe, sanitary, and welcoming public facilities. Community needs informing this proposal are identified through facility-based feedback, service complaints, staff reporting, and ongoing public engagement mechanisms used across PP&R.

Federal Compliance Activities

This package operates in compliance with: State of Oregon requirements for the use of Oregon Forward–certified firms for janitorial services, City of Portland Labor Peace Agreement policy and eligible exception process, City procurement and contracting requirements. Council authorization would be used only if required to secure reliable service that meets labor, fiscal, and operational standards.

Sum:	\$0	(\$140,000)

Budget Concept 26548 - Reduce Recreation Discretionary Funds	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces each Recreation manager's discretionary funds by up to \$50,000 total, with the exception of the Recreation Services Manager

Service Impacts

Recreation assigned discretionary funding provides support for program or site-specific support and maintenance needs, supplements training and staff development opportunities, and provides additional department funding as needed. Historical use over time has varied depending upon need. The reduction of this funding could result in additional requests for support and resources sought directly by the Recreation Division Manager or elsewhere outside the Division.

Equity Outcomes and Impact Tracking

Recreation assigned discretionary funding has been utilized in the past to support workgroups, programs, and sites. The usage has been applied in various ways, including safety and vandalism response, site-specific maintenance needs (fencing and equipment repair, etc.), and has supplemented staff development and training costs at the program or site level. While reduction of this funding could result in additional requests for support and resources being elevated elsewhere within PP&R, this proposal was selected over other options due to its limited direct impact to existing staffing levels and program offers.

Community Engagement and Empowerment

Recreation assigned discretionary funding does not provide direct services, programming, or resources for the community. This funding provides incidental support for program/site-based needs and will be covered directly with funding from the Recreation Division Manager or elsewhere within PP&R depending upon need (safety, security, emergency maintenance items, etc.).

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Miscellaneous Fund Allocation	\$0	(\$50,000)
Sum:	\$0	(\$50,000)

Budget Concept 26552 - AMD 1: Reduce Non-Park Use Permit Staffing by 0.5 FTE	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal reduces the Non-Park-Use Permits (NPUP) program staffing by 0.5 FTE and associated administrative funding, reducing the ability for partners or outside entities to make impacts to parks. Examples include the Human Access Project for river clean-up, Portland General Electric utility upgrades, and Portland Water Bureau contractors conducting utility resilience.

Service Impacts

"The Non-Park Use Permit (NPUP) program staffing dedicated to managing NPUP applications will be reduced from 1.5 FTE to 1.0 full time FTE. This reduction will significantly limit PP&R's capacity to review, coordinate, and oversee external parties conducting work in parks and on PP&R properties citywide.

Response times for NPUP inquiries and applications are expected to increase, and fewer permits will be processed and approved within required timeframes. This will delay or prevent partner-led projects that support park maintenance, utility resilience, environmental restoration, and community activation, including work by utilities, City bureaus, and nonprofit organizations. These projects often deliver direct public benefits such as improved access, cleaner waterways, safer infrastructure, and enhanced park amenities.

Reduced staffing will limit PP&R's ability to provide adequate oversight and coordination during permitted work, increasing the risk of scheduling conflicts, incomplete work, or impacts to park users during construction or restoration activities. In some cases, necessary work may be deferred entirely, resulting in prolonged asset deficiencies or missed opportunities for community-serving improvements.

While this reduction directly affects organizations seeking permits, the public would see slower delivery of park improvements, delayed infrastructure upgrades, reduced volunteer and partner activity, and fewer opportunities for park activation. Over time, these impacts may result in diminished park conditions and reduced community access to safe, well-maintained, and activated public spaces."

Equity Outcomes and Impact Tracking

"Outcomes include longer processing times for NPUPs and reduced staff capacity to guide, coordinate, oversee, and ensure compliance. This will result in fewer permits processed, delayed partner-led projects, and diminished oversight of work in parks, increasing schedule, compliance, and user-impact risks.

This reduction was determined to be less central than direct service delivery functions; however, the cost of this decision is reduced operational effectiveness in facilitating community-beneficial work performed by utilities, nonprofits, and public agencies. NPUPs enable infrastructure upgrades, environmental restoration, volunteer-led improvements, and park activation efforts that PP&R does not have the internal capacity to deliver independently.

Outcomes are tracked using permit intake volumes, response and processing times, permit approval and completion rates, and workload metrics maintained in a Smartsheet database. Staffing reductions are expected to increase backlogs, extend NPUP timelines, and limit proactive coordination and risk management.

NPUP staff play a critical role in advancing equity outcomes by guiding applicants to consider community impacts, accessibility needs, and mitigation strategies, and by promoting consistent application of standards across neighborhoods. This proposal reduces PP&R's ability to proactively identify and address disproportionate impacts, weakening equity outcome tracking and accountability.

Reducing NPUP staffing may increase disparities in how projects are reviewed, mitigated, and communicated. Slower NPUP processing and reduced oversight may limit consistent management of compliance and community impacts associated with permitted work. Reduced staffing constrains effective collaboration with utilities, nonprofits, and community partners. "

Community Engagement and Empowerment

"This proposal does not include new direct community services, programming, or resources; however, the NPUP program enables park modifications and activities serving the community by allowing community members, nonprofit organizations, utilities, and public agencies to perform work in parks that supports access, safety, environmental stewardship, and park activation.

NPUP applications have increased by an average of 6% annually over the past three years, reflecting growing demand from community organizations and partners. This reduction would leave 1.0 FTE to manage an increasing workload, limiting PP&R's ability to support permit applicants and oversee projects in a timely and effective manner. Reduced staffing will limit PP&R's capacity to provide adequate coordination, oversight, and communication related to scope, schedule, and outreach, increasing the likelihood of delayed projects, prolonged park disruptions, and reduced responsiveness to community concerns.

Community needs informing NPUP activity are identified through NPUP permit applications, operational demand data, and ongoing coordination with partner organizations rather than through new engagement specific to this budget reduction. No additional community or community-based organization engagement was conducted in the development of this proposal.

This proposal was informed by existing quantitative workload data and program performance metrics rather than community plans or reports. The reduction is expected to affect PP&R's ability to facilitate community-initiated and partner-led projects that benefit park users citywide."

Federal Compliance Activities

"The reduction of NPUP staffing will limit PP&R's ability to ensure that permitted activities comply with applicable Federal, State, and City laws and policies, including zoning, development, environmental, and accessibility requirements triggered by work on public park property. Reduced capacity increases the risk of non-compliance, inconsistent permit conditions, and corrective actions occurring after impacts have already affected park users.

In addition, NPUP staff serve as a key point of coordination between applicants and affected communities, advising permittees on outreach expectations, construction impacts, and best practices for communication when work affects park access or use. Reduced staffing will limit this guidance, increasing the likelihood of inadequate notification, and extended disruptions."

Budget Concept 26557 - Reduce Turf and Horticultural Care in Developed Parks	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces External Materials and Services (EMS) budgets for the Turf and Horticultural Services workgroups by \$165,000. EMS funding supports operating supplies, minor equipment and repairs, maintenance materials, storeroom supplies, and other items essential to daily operations. The Turf EMS reduction would limit the purchase of seed, fertilizer, and mower parts and the Horticultural Services EMS reduction would result in fewer resources for plants, minor equipment, and operating supplies. The proposal also includes a 20% reduction in the water budget for passive turf areas, reducing irrigation from five to four days per week and adjusting watering schedules.

Service Impacts

"The EMS reductions will limit PP&R's ability to maintain landscape quality and appearance. For Turf Services, reduced funding will constrain the purchase of seed, fertilizer, and mower repair parts needed to support healthy turf and reliable equipment, resulting in slower recovery from heavy use, increased visible wear, and reduced turf density. In addition, a 20% reduction in the water budget for passive turf areas will require irrigation to be reduced from five days per week to four days, with further schedule adjustments to meet budget targets, leading to turf becoming dormant or brown during summer months. These changes could impact turf safety or usability and will noticeably reduce visual quality in some areas. Recent replacement of older mowers with new equipment is expected to reduce near-term maintenance needs and partially offset these impacts, with active turf areas and safety-related maintenance continuing to be prioritized.

For Horticultural Services, reduced EMS funding will primarily limit the procurement of plants and horticultural supplies used to support citywide needs, including plant replacements and special projects. As a result, fewer plants will be available for replacement or enhancement, and support for select horticultural projects may be reduced or delayed, while long-term tree health and core horticultural functions continue to be prioritized.

Overall, impacts are expected to be primarily aesthetic, with core services, safety, and access to public spaces maintained."

Equity Outcomes and Impact Tracking

"The anticipated outcome is reduced operational spending while maintaining core services and protecting long-term landscape assets. In the short term, impacts include lower visual quality of turf and landscaped areas and reduced flexibility to address minor maintenance needs. Longer-term limitations on purchasing supplies, combined with rising material and equipment costs, may further constrain operations. The cumulative effect could affect the condition of turf and plant assets and increase deferred maintenance.

This reduction was selected because it focuses on discretionary operating inputs and passive turf irrigation rather than staffing levels, safety-related maintenance, or high-use active recreation areas.

Outcomes are tracked with maintenance schedules and work order completion rates, park reviews of turf and landscaped areas, water usage data and irrigation schedules, and customer feedback and service requests related to landscape conditions. These data sources are used to monitor service levels, identify priority areas, and adjust operations as needed to respond to changing conditions and resource availability.

This proposal does not advance new outcomes but maintains progress toward intended outcomes by prioritizing safety, sustainability, and long-term asset health while absorbing budget reductions. While visual quality may decline in some areas, essential services and equitable access to open spaces are preserved. "

Community Engagement and Empowerment

"This proposal does not include new or expanded direct services, programming, or resources for the community. It impacts the maintenance level of existing public spaces.

The proposal affects users of public turf and landscaped areas citywide, including residents, visitors, and park users. These spaces serve thousands of community members annually.

Community needs were identified through surveys, service requests, and 311 complaints. Open grass areas were rated among the top three most important park features in the 2024 Community Needs Survey, informing the prioritization of maintaining safe, functional spaces. Due to the timing of the budget development process, community was not engaged in the development of this proposal. "

Federal Compliance Activities

This proposal complies with all applicable Federal, State, and City laws and policies. Reductions do not affect ADA accessibility, safety standards, or regulatory maintenance requirements.

Budget Detail

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$265,000)
Sum:	\$0	(\$265,000)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$265,000)
Sum:	\$0	(\$265,000)

Budget Concept 26559 - Reduce Staff Support of Community Groups and Administrative Functions	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates 1.0 FTE supporting community groups and 1 seasonal position supporting administrative functions. The FTE elimination is a 50% reduction in team capacity to serve and coordinate with more than 40 community groups (neighborhood associations, friends groups, and other community organizations) that volunteer in parks to assist with vegetation and land care maintenance. This proposal reduces administrative capacity to support responses to public communications, park signage needs, and the management of trash cans and restrooms in parks.

Service Impacts

"This proposal eliminates one Developed Park Coordinator role. This position attends meetings and events for neighborhood associations, friends group, and other community organizations, often at night or on weekends, and serves as a liaison between PP&R and the public. The position manages relationships with more than 40 community groups that engage with the stewardship of parks. Removing a position reduces PP&R's capacity to serve these groups by 50% of the current level of service. Part of the Developed Park Coordinator role is to help draft and negotiate community partner agreements, ensuring that PP&R rules are applied equitably throughout the park system. Eliminating a position means that supervisors and managers will spend more time, with less information and interaction, to complete the agreements. Without this role, onsite work will be less efficient and effective where maintenance volunteer groups are concerned.

The Community Service Aide (CSA) II performs Land Stewardship division support work such as assisting with the inventory, pick-up, and delivery of publicly posted signs, counting and recording the condition and location of trash cans and restrooms to inform work orders and public communications, and assisting at Land Stewardship events."

Equity Outcomes and Impact Tracking

"The Developed Park Coordinator role is a supporting role that allows onsite staff, supervisors, and managers to focus more on the physical work in developed parks. The Community Service Aide II reduction was selected to preserve permanent full-time staff.

The Get Connected (Galaxy Digital) software program records volunteer participation in maintenance events at our parks. The Developed Park Review program assesses the state of different assets, like horticultural beds, that volunteers may help maintain. Public surveys show a high satisfaction rate with Portland parks overall.

This proposal does not support Service Area intended outcomes for the community.
The Community Service Aide (CSA) II performs Land Stewardship division support work such as assisting with the inventory, pick-up, and delivery of publicly posted signs, counting and recording the condition and location of trash cans and restrooms to inform work orders and public communications, and assisting at Land Stewardship events."

Community Engagement and Empowerment

"Direct services and programming are provided through the Developed Park Coordinator's work with PP&R staff and the community to help host volunteer maintenance events in our developed parks. Approximately 40+ community groups of various sizes throughout Portland work with the Developed Parks Coordinators. For example, Friends of Columbia Park, Leach Botanical Garden, Friends of Peninsula Park Rose Garden, People of Color Outdoors, Friends of Laurelhurst Park, Friends of Pier Park, Lloyd Eco District, Rose City Bluff Volunteer Group, Arbor Lodge Neighborhood Association, and MLK Jr. Middle School are facilitated and engaged by the Developed Park Coordinators. This proposal will remove services that address community needs.

Community was not engaged in the development of this proposal due to the budget timeline. The origin of the Developed Park Coordinator role came from previous community and partner engagement efforts."

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Concept 26561 - Eight Days of Recreation In-Service Closures Between October Through May	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal implements one planned in-service closure per month for Recreation facilities during the non-summer season (October through May), for a total of eight days. On these days, facilities would close to regular public operations. The closures reduce seasonal staff expenses across Recreation programs without reducing morning, evening, or weekend operating hours on service days, and without reducing the overall mix of program offerings.

Service Impacts

The proposed eight in-service closures in eight months apply to the following facilities and programs: Regional and Neighborhood Community Centers, Indoor Swim Pools, Art Centers, SUN Community Schools, TeenForce, Adaptive Recreation, Lifelong Recreation.

On closure dates there will be no registered classes, drop-in activities, or space use permits. Ongoing registered programs would have one fewer meeting date during the affected session (e.g., a 10-class session would meet 9 times). Weekly programs scheduled multiple days per week would operate on the remaining service days that week.

Equity Outcomes and Impact Tracking

Community access to Recreation facilities and programs would be unavailable one day per month during the non-summer season. Rather than reducing daily operating hours or eliminating specific programs—which can fully exclude participants who rely on those times or activities—this approach distributes the impact across all users while preserving access on the remaining service days.

While some individuals may be affected by specific in-service dates, most participants are expected to be able to access services on other days of the week or during other weeks in the month.

The Recreation Division tracks access and outcomes using both qualitative and quantitative measures, including participation and enrollment data, cancellation rates, revenue trends, Access Discount use, and surveys and direct

Community Engagement and Empowerment

Recreation gathers ongoing community input through multiple engagement methods, including the PP&R Community Needs Survey, an ongoing online program feedback survey promoted in facilities and online, periodic class evaluations distributed to participants, and a 2025 intercept survey conducted with Portland State University to gather feedback from drop-in participants at facilities and park-based activities. Community organizations participating in the Recreation Services Community Network are invited annually to gather and share feedback, learn about services, and strengthen partnerships. Community feedback consistently emphasizes the importance of early morning, evening, and weekend programming; access to facility and park permits; and expanded high-demand registered and drop-in activities. This package maintains those priorities by preserving daily operating hours and program variety on service days.

Federal Compliance Activities

This in-service closure reduction does not conflict with any federal, state or city laws and policies.

Budget Concept 26567 - Eliminate an Arts Recreation Coordinator II Position	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This reduction would not affect current levels of service since this position was never hired. PP&R's Arts & Culture department currently provides some level of "Hub & Spoke" programming at partner sites, mostly in East Portland, with existing staff and resources.

Service Impacts

This reduction would not affect current levels of service since this position was never hired. PP&R's Arts & Culture department currently provides some level of "Hub & Spoke" programming at partner sites, mostly in East Portland, with existing staff and resources.

Equity Outcomes and Impact Tracking

This reduction was selected because it would not result in the loss of current programming or service. However, the position was created to address the gaps in PP&R's arts program delivery across Portland. Losing this resource diminishes PP&R's ability to fulfill its mission "to provide equitable access to welcoming places, programs, and services that improve community health" through the arts in underserved neighborhoods and for marginalized communities.

Community Engagement and Empowerment

This position was intended to develop direct arts services, programming, or resources for community. Existing staff within the Arts & Culture department are delivering some level of Hub & Spoke programming but have reached full capacity. The requests from community for program partnership exceed current staff resources.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Concept 26568 - Reduce Environmental Education Programs	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces the Environmental Education operating budget by 25%; shrinks Environmental Education programming including youth programming, summer programming, and classes in parks and natural areas; and increases fees for high-demand programs to be closer to market rate.

Service Impacts

"In 2025, staff undertook a program evaluation process to identify ways programming could be streamlined and restructured to reduce costs while preserving program quality and diversity of offerings. The result of this work is reflected in this proposal, which will reduce the operating budget for the Environmental Education program by 25%. It reduces the casual staff budget by \$414,500 which will eliminate positions that support multiple programs. The proposal reduces the number of summer employment opportunities for youth aged 14 through 18 to develop job skills and explore environmental career paths. The proposal increases fees for summer camp by 25%, reduces the number of field trip opportunities available for local schools by 30%, and increases fees charged to schools. The proposal also reduces program offerings for children ages 2 through 6 and increases fees.

This proposal will reduce the number of community members served by PP&R's youth programming, summer programming, programs for families experiencing poverty, and to preserve classes in parks and natural areas. In general, the public will see a service impact of fewer and more expensive opportunities for youth and adults to connect with nature through programming."

Equity Outcomes and Impact Tracking

"In 2025, staff completed a market analysis and determined that fees could be increased for high-demand programs to be closer to market rate, while preserving discounted opportunities through the Access Discount. This proposal increases fees for summer camp by 25% to be closer, but still below, market rate for similar programs. In 2025, 38% of families participating in camp used the Access Discount to reduce the cost of camp. This fee increase may increase the number of people who use this discount.

The Environmental Education (EE) program tracks demographic data for individuals registering for programs, applying for jobs, and in the case of school field trips, the demographics served by the school. For field trips, priority access is offered to Title I and Head Start programs serving lower income and historically marginalized communities. Programs track location data to serve the geographic diversity of the city, aspiring to offer an EE program to all neighborhoods, while prioritizing under-resourced communities. Retention rates are tracked for all seasonal employees and year over year. The program has maintained consistently high retention rates, showing that programs are desirable and employees want to return.

The proposal limits progress towards PP&R outcomes. This proposal decreases the number of opportunities for EE for Portlanders. In the 2024 Community Needs Survey, respondents rated Nature & Environmental Education classes as one of the top three priorities across PP&R Programs."

Community Engagement and Empowerment

"This proposal reduces direct services and programs for community. It decreases EE programming offered and reduces the number of employees providing services. This proposal consists primarily of reductions in EE programming for youth ages 2 through 14 and environmental employment programs for young adults.

Community needs were identified by looking at class registration rates over time and community feedback was considered in the program evaluation process that staff undertook in Fall 2025, which informed this proposal.

Community was not involved in drafting the reduction proposal. The 2024 Community Needs Survey identified Nature & Environmental Education classes as the third most important PP&R program. This proposal strives to protect classes and programs for youth, teens, and adults while better aligning the number of children and youth served with staffing resources, reducing reliance on seasonal staff to deliver programs, and modifying program delivery models to increase the number of participants served. "

Federal Compliance Activities

The reductions in this proposal will make it more difficult for PP&R to achieve the 2025 Parks Levy commitments around programs for families experiencing poverty; the preservation of classes in parks; and the preservation of natural areas, trails, water quality and wildlife habitat.

Budget Concept 26573 - AM 1: Reduce Staffing and EMS for Condition Assessment Program and Compliance with Fi	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates 1 Analyst II and funding for specialized condition assessments within the Asset Management Condition Assessment Program.

Service Impacts

"This proposal eliminates 1 Analyst II staff position and reduces External Materials and Services (EMS) funding which will affect work to replace the PP&R MicroMain work order system with the Maximo work order system and will eliminate specialty asset condition assessments that are beyond the capacity of internal staff.

The proposal cancels three specialty asset condition assessments which include investigation and documentation of underground utilities, building envelopes, and complex systems. This reduces the reliability of capital needs estimates that articulate PP&R's immediate and long-term major maintenance financial requirements. Additionally, the cut would increase the risks of unplanned asset failure. Other service cuts include eliminating efforts to standardize and streamline business processes, as well as long-term asset management plans in development (see Compliance section below). As a result, PP&R system users may experience longer periods with broken assets or closed parks or park features."

Equity Outcomes and Impact Tracking

"The proposal reduces staffing capacity to transition PP&R to the new Maximo work order system, reduces capacity to maintain asset management plans, and abandons Asset Management standardization and compliance work (see Compliance section). Outcomes impacted include the availability of quantitative asset condition data, completion of asset management plans, and PP&R's ability to meet policy-required planning and reporting standards. Eliminating this position will result in degraded information being transferred into PP&R's new Maximo work order system, embedding inefficiencies and limiting future performance tracking. This proposal maintains PP&R's responsibility to comply with financial, safety, and asset management requirements and support antiracism and equity. Reduced capacity may increase disparities by shifting toward reactive or advocate-driven priorities rather than consistent, data-informed assessments. Loss of standardized processes and specialty condition data may affect transparency and accountability, as well as communication, by limiting PP&R's ability to clearly demonstrate needs, risks, and investment tradeoffs over time. This may reduce the public's experience with well-maintained facilities and parks. Reduced analytical capacity constrains opportunities to collaborate across programs and with external partners on long-term planning. This proposal reflects fiscal responsibility in the short term by reducing staffing costs but may increase vulnerability to long-term fiscal risk associated with unplanned asset failures, inefficiencies, and deferred capital investment."

Community Engagement and Empowerment

"This proposal does not include direct community programming or engagement. However, it has implications for community outcomes by reducing PP&R's ability and capacity to proactively plan for, prioritize, and manage park and facility assets in a safe, reliable, and equitable manner.

Asset condition assessment data, standardized business processes, and long-term asset management plans identify risks, forecast capital needs, and transparently guide the prioritization of investments across the park system. The proposed reductions will limit PP&R's ability to identify emerging asset failures. As a result, community members may experience longer periods of unavailable park amenities, reduced service reliability, and delayed reinvestment—impacts that disproportionately affect communities with fewer alternative recreation options.

Community needs informing current asset management efforts were previously identified through the Community Needs Survey, system condition assessments, regulatory requirements, and ongoing operational data. No additional community or community-based organization engagement was conducted in the development of this budget reduction option."

Federal Compliance Activities

The City of Portland Comprehensive Financial Policy FIN 2.19 – Asset Management specifies: "Developing and implementing Asset Management Plans, as defined by the International Infrastructure Management Manual" as an essential responsibility of asset-owning Bureaus. This proposal eliminates capacity to support that responsibility, along with procedure standardization, and other streamlining and Asset Management compliance work. Asset management plans provide forward-focused actions needed to sustain PP&R's \$2.5 billion portfolio. PP&R has two of an estimated required 25 asset management plans completed.

Budget Concept 26584 - Eliminate Community Engagement Coordinator II	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates one Coordinator II position, in part due to the freeze on System Development Charges (SDC). The SDC freeze significantly reduced capital-related work, resulting in insufficient workload to support two Coordinator II positions. Remaining staff can absorb the reduced workload through reprioritization and streamlined workflows, allowing PP&R to right-size staffing while protecting public-facing services.

Service Impacts

With the elimination of a Community Engagement Coordinator II, the remaining Community Engagement team will be stretched for capacity. Two staff are currently working out of classification due to prior reductions. Core services and the approved workplan will be maintained through shared coverage and stricter prioritization, with less flexibility for discretionary or lower-priority work.

Equity Outcomes and Impact Tracking

This proposal will result in a leaner, more tightly prioritized Community Engagement team while maintaining delivery of City Council-directed and legally required work. Impacts will be monitored through workload distribution, intake volume, delivery timelines, and staff capacity assessments to ensure service continuity.

Community Engagement and Empowerment

This proposal does not include direct services or programming and does not change service access or eligibility. It is an internal staffing adjustment informed by workload data, the SDC freeze, and Citywide budget guidance. No new community engagement was conducted.

Federal Compliance Activities

This proposal complies with all applicable Federal, State, and City laws and policies. Equity and ADA-related work will continue to be prioritized, and impacts are limited to internal coordination capacity.

Budget Concept 26587 - Reduce Recreation Marketing Budget	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces the Recreation Division marketing allocation. During FY 2025-26, Recreation transitioned to an online activity guide and discontinued the production of a costly quarterly 200-page print guide catalog that primarily served current users. This shift to the digital guide provides increased accessibility for screen readers and language translation. The print savings were directed into efforts to educate the Portland community and new users about available Recreation services. Education was done through community-based customer service tabling in all districts and partnerships with organizations to train their staff and volunteers to connect communities to PP&R services. This proposal eliminates the savings and planned expansion of outreach efforts.

Service Impacts

The Recreation Outreach team provides community-based customer service at the request of local organizations and leaders. This team brings the needed technology, tools, and materials (available in 20+ languages) to connect community to PP&R services at community events, resource fairs, Head Start classrooms and PTO meetings, food pantries, low-income housing facilities, parks, libraries, and more. The interest from community is growing and savings from moving to an online activity guide were invested in this initiative. Reducing the Recreation marketing budget will result in the Division declining requests to bring information out to community.

In FY 2024-25 Recreation received one-time funding to pilot collaborative agreements with 14 local organizations and pay them \$5,000 to connect their community with PP&R services. They attended five meetings/trainings throughout the year and learned about services, financial assistance, how to sign up for activities, and were connected with PP&R programs and services of interest. Organizations tracked their actions, completed evaluations, and co-designed events with PP&R. The effort was highly successful, with partners sharing PP&R information at 168 events and creating more than 250,000 touchpoints in-person, through mail, or with digital information sharing. In FY 2025-26, Recreation and Workforce Development combined available resources to secure nine collaborative agreements. Reducing the Recreation marketing budget will reduce collaborative partnerships, allowing for only 4 collaborative partnerships.

Equity Outcomes and Impact Tracking

For years, the community has informed PP&R that the most frequent barrier to participating in PP&R programs is lack of awareness of programs. A 2024 survey reaffirmed this message when the top answer to which reasons may prevent participation was "Not aware of programming," selected by 51% of respondents.

This package limits the ability to educate Portland community about available services, but it retains a portion of each initiative so they can still be scaled up again in the future. This package was selected to preserve critical direct service delivery.

Community Engagement and Empowerment

Recreation has historically invested most of the Division marketing allocation to the IMS print production of the quarterly activity catalog. Two years ago, the Division started an engagement process with staff, community organizations, and community members to balance funding that was primarily focused to current users with efforts to educate Portlanders and new users. Feedback from community lead to the creation of the Recreation Outreach Team, the concept for the collaborative partnership agreements, and the design and functionality of the new online activity guide that was launched in Fall 2025.

Federal Compliance Activities

This package complies with City of Portland, Oregon State, and Federal requirements.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$0	(\$58,983)
Sum:	\$0	(\$58,983)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$58,983)
Sum:	\$0	(\$58,983)

Budget Concept 26588 - Reduce Marketing for Summer Free For All and Free Lunch + Play	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces the Summer Free For All and Free Lunch + Play outreach & marketing budget by 25% or \$50,000. The full budget is \$200,000 with about half of it allocated to fixed expenses including printed guides, translations, onsite signage, event banners, etc. The \$50,000 reduction would eliminate all advertising including radio, TV and digital media.

Service Impacts

The loss of advertising for the Free Lunch + Play (FL+P) and Summer Free For All's (SFFA) Cultural Events (movies, concerts, festivals, etc.) will result in the loss of community awareness of these programs and a decline in participation.

Equity Outcomes and Impact Tracking

Attendance for both FL+P and SFFA have not recovered from pre-pandemic levels. See graphs below. Without advertising and marketing, PP&R will not be able to share the FL+P opportunity to low-income families who are experiencing food insecurity, especially as the cost of living continues to rise.

Most of the SFFA and FL+P budgets are made of up direct program delivery costs, including staffing. This cut is being proposed because it is a large expense within the program budget, while preserving program levels. Additionally, this loss of marketing could potentially be replaced by securing in-kind media sponsorships. This would be dependent on the PP&R Partnership Manager's capacity and PP&R's prioritization of this work.

Community Engagement and Empowerment

This proposal does not include direct services, but the impact of the reduction would result in a decline in participation in direct services provided.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$50,000)
Sum:	\$0	(\$50,000)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$50,000)
Sum:	\$0	(\$50,000)

Budget Concept 26589 - Eliminate Summer Free For All Free Lunch + Play Mobile Program	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package would eliminate the Summer Free For All (SFFA) Mobile Lunch + Play program. The Free Lunch + Play (FP+L) mobile program was established approximately 15 years ago to provide kids with free meals and fun activities in park-deficient areas. Since then, PP&R has built five new parks in East Portland and expanded the of number FP+P sites. As a result, the number of mobile sites has declined from 10 locations to just two apartment complexes today, with the lowest participation numbers across all locations.

Service Impacts

The loss of the Mobile Lunch + Play program would impact the participants at the two apartment complexes that it serves in East Portland – Eastgate Station Apartments and Vine Maple Apartments. In 2025, these two sites had the lowest participation numbers across all 25 lunch sites. In 2025, total youth served for these two sites was 904 meals across nine weeks of service, which represents 1.6% of all meals served (55,435 meals total) by Free Lunch + Play (FL+P). Currently, East Portland has the greatest number of non-mobile FL+P sites (table).

Equity Outcomes and Impact Tracking

The elimination of the Mobile Lunch + Play program was already in discussion prior to the budget process due to low participation numbers and the increase Free Lunch + Play sites in East Portland.

Community Engagement and Empowerment

The Mobile Lunch + Play program was originally founded and co-developed in partnership with an East Portland committee made up of community members and social service organization. Over the years, membership and engagement have declined as the number of sites has decreased and additional Free Lunch + Play sites were launched in parks.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$21,000)
Sum:	\$0	(\$21,000)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$21,000)
Sum:	\$0	(\$21,000)

Budget Concept 26590 - Reduce Recreation Division Administration	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package eliminates one full-time Office Support Specialist III position, reducing administrative support within the Recreation Division and PP&R. The position provides centralized administrative and coordination functions, including janitorial contract invoice processing, committee and liaison coordination, division administrative support (such as Council document coordination), contract and invoice processing support, federal afterschool meal reimbursement coordination, administrative support for the Golf Enterprise Fund and Golf Advisory Board, and executive assistant support to the Recreation Services Manager.

Service Impacts

This position does not regularly provide direct services to the public. Impacts are administrative and operational in nature. Some internal coordination, project management, and liaison functions will be discontinued or reduced. As a result, program and PP&R leadership may experience reduced administrative support and some internal processes may take longer to complete. No direct reduction to public-facing Recreation programs, facility hours, or activity offerings is anticipated.

Equity Outcomes and Impact Tracking

To preserve direct community services, only a limited set of administrative functions will be reassigned within General Fund operations including federal afterschool meal reimbursement coordination, janitorial contract invoice processing, and essential division contract and invoice support. All other duties associated with this position will be discontinued or reassigned within the Golf Enterprise Fund.

Program participation, meal service delivery, and reimbursement compliance will continue to be monitored through existing reporting, financial controls, and program oversight processes to ensure continuity of required services.

Community Engagement and Empowerment

Community priorities are tracked through the PP&R Community Needs Survey, ongoing online program feedback, periodic class evaluations, and targeted intercept surveys conducted at Recreation facilities and park-based activities. Recreation also engages community organizations through the Recreation Services Community Network, which convenes annually to share information and gather feedback.

Community feedback consistently emphasizes the importance of early morning, evening, and weekend programming; access to facility and park permits; and expanded high-demand registered and drop-in activities. This package prioritizes preserving these direct services by reducing administrative capacity rather than reducing public-facing programming.

The federal afterschool meal program supported by this position provides free meals to approximately 138 students participating in community center afterschool programs. Administrative support for this program will be aligned with existing meal service contract coordination for educational preschool programs that use the same vendor, ensuring continuity of service to participants.

Federal Compliance Activities

Meal reimbursement requires adherence to the contract with the federal meal program. This package complies with City of Portland, Oregon State, and Federal requirements.

Budget Concept Summary Report

Run Date: 2/10/26

Page 26 of 102

Portland Parks & Recreation

Run Time: 11:41:16 AM

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30000013 - Office Support Specialist III	(1.00)	(\$70,585)	\$0	(\$49,752)	(\$125,736)
Total	(1.00)	(\$70,585)	\$0	(\$49,752)	(\$125,736)

Budget Concept 26592 - Reduce Director Office Discretionary Funds	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates \$434,639 in discretionary Director Office funds. These funds have historically been used for mid-year emergency major maintenance and other unforeseen priority needs, reducing PP&R's ability to respond to emerging needs quickly and nimbly.

Service Impacts

This proposal will reduce PP&R's most flexible resource to respond to emerging and emergency priorities—community-initiated, City Council-directed, or bureau-identified. The reduction of \$434,639 could fund a significant pool or facility repair, a very large volume of Public Environment Management Office-requested activities, or expedite progress on an emerging priority (like the new focus on partnerships and volunteerism).

Equity Outcomes and Impact Tracking

This reduction was identified as the least impactful way to achieve the reduction targets. No goals or performance indicators are associated with the resource. These funds could be used to opportunistically advance PP&R's Title II Transition Plan or other goals, but do not correspond to specific intended outcomes.

Community Engagement and Empowerment

The proposal reduces PP&R's ability to respond quickly to community input and priorities in emergency situations. No community engagement was done for the development of this proposal.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$434,639)
Sum:	\$0	(\$434,639)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$434,639)
Sum:	\$0	(\$434,639)

Budget Concept 26593 - Eliminate Private Personal Training Services in Fitness Program	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates PP&R's personal training program in community centers. Private personal trainings serve significantly fewer participants than other fitness programming can be subsidized through the Access Discount. Group fitness classes and services will continue for participants rather than private fitness option.

Service Impacts

This proposal will discontinue personal training at regional community centers, creating a gap in fitness offerings for participants. Group fitness classes and training courses will continue as an option but private instruction will no longer be offered.

Equity Outcomes and Impact Tracking

This reduction provides savings in fitness programming costs across PP&R's regional community centers. Private instruction through personal trainings will no longer be an option, but a variety of group fitness classes, trainings, and center access will continue to be available. This reduction impacts fewer participants than other community center programming reductions and opportunities to provide personal training may be implemented through space rentals to external personal training programs. Outcomes will be tracked through ongoing participation in comprehensive fitness classes and fitness center attendance. Equity in services will continue to be available despite the reduction of the private personal training program.

Community Engagement and Empowerment

This proposal eliminates a direct program provided to the community, with the elimination of personal training options. However, the impact will be on participants looking for private instruction only as general fitness and group options and trainings will continue to be available.

Federal Compliance Activities

No compliance issues will result from the program reduction.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$256,772)
Sum:	\$0	(\$256,772)
Revenue	One Time Cost	Ongoing Cost
Charges for Services	\$0	(\$96,447)
Miscellaneous Fund Allocation	\$0	(\$160,325)
Sum:	\$0	(\$256,772)

Budget Concept 26594 - Eliminate Deputy Director III	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal transfers the Deputy Director position from the Vibrant Communities Business Services Group to the Public Works Business Services Group. The transfer will generate General Fund savings for Portland Parks & Recreation (PP&R) by changing the funding responsibility of this position from 100% PP&R to about 25% PP&R since the position costs will now be shared across the Public Works Service Area.

Service Impacts

This position historically played a number of different roles including a strategic support for the PP&R Director, manager over all central services for PP&R, and a chief-of-staff function related to managing implementation of PP&R initiatives. With the creation of Vibrant Communities Support Services - and the successor Public Works Business Services - the scope of the role was reduced to just support service management. With the City Core Service Realignment, it is expected that this position will no longer be needed at the bureau level. A similar role, however, is being created at the service area level with a funding model that is supported by all four bureaus. By eliminating this position, savings is generated for PP&R while also funding the PP&R share of the new service area level position.

Equity Outcomes and Impact Tracking

This is an internal facing position that provides support services to the organization. It does not have any meaningful equity outcomes or impacts. It has been vacant since April 2025.

Community Engagement and Empowerment

This is an internal facing position that provides support services to the organization. It does not have any meaningful community engagement or empowerment impacts. It has been vacant since April 2025.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Concept 26596 - ENG 1: Reduce Engineering Emergency and Environmental Risk Funding	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal reduces the External Materials and Services (EMS) budget that supports emergency environmental remediation, disaster response (e.g., landslides), hazardous materials testing (facilities, water, air), and engineering studies for major and regular maintenance.

Service Impacts

Reducing Engineering Emergency and Environmental Risk EMS funding limits PP&R's ability to deliver timely engineering studies, environmental testing, and emergency response support across PP&R facilities and park sites. The most visible impacts will be delays in consulting engineering support for regular and major maintenance repair projects, reduced capacity to address ADA sidewalk tripping hazards, slower response to landslide risks, and limited design services for unforeseen engineering needs across PP&R's portfolio.

This reduction also constrains PP&R's ability to test for and respond to environmental health and safety concerns, including drinking water quality; indoor air quality (such as mold and radon); hazardous materials testing, abatement, and documentation; contaminated soils investigation and remediation; and rapid response to fuel or chemical spills. As a result, suspected hazards may take longer to assess and remediate, and preventative testing may be deferred.

Public-facing impacts may include extended closures of community centers, parks, and facilities; delayed repairs where hazardous conditions are present; reduced capacity to address ADA Transition Plan barriers; and diminished assurance that facilities meet fire, life, and safety standards. Over time, the risk of asset deterioration, service disruptions, and heightened health, safety, and liability exposure for both the public and City staff would increase.

Equity Outcomes and Impact Tracking

"This reduction will result in a decline in PP&R's ability to identify, assess, and respond to environmental and engineering risks. Reduced capacity results in slower hazard assessments, deferred remediation, and increased reliance on reactive responses after impacts have occurred.

Program outcomes are tracked using the number and duration of facility and park closures, frequency and severity of emergency response events, testing and remediation timelines, completion of ADA sidewalk and accessibility-related repairs, and asset condition indicators. Reduced funding is expected to increase backlogs, extend closures, defer corrective actions, and elevate exposure to environmental, safety, and liability risks.

This proposal constrains PP&R's ability to meet equity and accessibility commitments identified in PP&R equity initiatives, ADA Title II Transition Plans, and asset management priorities by delaying improvements that disproportionately affect vulnerable users.

Reduced engineering and environmental response capacity may increase disparities in how risks are identified and mitigated across facilities and park sites. Delays in testing, remediation, and emergency response limits PP&R's ability to promptly address known hazards and communicate risk mitigation actions to the community. Reduced external service capacity constrains collaboration with specialized consultants and regulators. This proposal avoids immediate staffing reductions, while acknowledging elevated long-term risk related to compliance exposure, facility closures, and potential liability."

Community Engagement and Empowerment

"Community needs are reflected in the broader context of safe, accessible, and well-maintained facilities. Existing performance and risk data—such as facility condition metrics, ADA Transition Plan priorities, and asset management indicators—were the basis for understanding the potential downstream impacts to the public. While the proposal does not directly fund community programs, it has tangible impacts on the accessibility, safety, and reliability of facilities and park services that serve the community, potentially affecting all residents who use PP&R-managed space."

Federal Compliance Activities

"This reduction is expected to significantly increase PP&R's accumulation of conditions that are out of compliance with applicable codes, laws, and industry best practices for environmental and engineering management. Reductions in EMS funding will constrain PP&R's ability to meet multiple regulatory requirements, including OSHA standards, EPA water and air quality regulations, ADA requirements, Oregon Structural Specialty Code, Portland Fire Code, and DEQ mandates.

Without timely engineering studies, environmental testing, and emergency remediation, PP&R faces heightened risk of violations, delayed corrective actions, and exposure to legal, safety, and liability consequences for both the public and City staff. Reduced capacity also limits proactive identification and mitigation of hazards, undermining PP&R's ability to ensure safe, accessible, and code-compliant park and facility operations."

Expense	One Time Cost	Ongoing Cost

General Fund Discretionary	\$0	(\$55,229)
Sum:	\$0	(\$55,229)

Budget Concept 26598 - PL 1: Transfer 1.0 FTE Planner II to the Capital Fund	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

Transfer City Planner II position, currently budgeted at 0.5 FTE General Fund and 0.5 FTE Portland Clean Energy Fund (PCEF) to the Capital Fund – which strengthens support for Non-Park Use Permitting, partnerships, capital project planning, grant development, equity and climate-focused planning, policy development, land use permitting, and inclusive community engagement.

Service Impacts

"Transferring the City Planner II position, funded 0.5 FTE General Fund and 0.5 FTE PCEF, will increase capacity to support Non-Park Use Permitting, partnership-driven projects, and funded capital project planning, including grant applications, concept plans, equity and climate-focused planning, policy development, land use permitting support, and inclusive community engagement.

This Planner II position will replace a vacant Capital Project Manager I position, more efficiently utilizing Capital Fund resources. The transfer will improve the Bureau's ability to respond quickly to public proposals, advance park planning efforts, pursue grant funding, and facilitate community- and partner-initiated capital projects, resulting in faster response times.

The transfer also enhances inclusive public engagement, as the incumbent is PP&R's only Spanish-speaking planner and has provided translation and outreach support for projects such as George Park and Wilkes Headwaters Park. This will increase accessibility of outreach materials, public meetings, and workshops for Spanish-speaking community members and support equity goals."

Equity Outcomes and Impact Tracking

"This budget transfer will increase the Bureau's capacity for inclusive public engagement, partnership facilitation, and grant acquisition—directly advancing equitable park access, trail connectivity, and climate resilience. This option was selected in response to the loss of partial PCEF funding.

Planning outcomes and impacts are tracked through Bureau performance measures for park access (developed through the Level of Service work), trail connectivity, grant leverage, and community engagement. Progress is reported through the annual performance report, the Healthy Parks, Healthy Portland Framework, and external benchmarks, including Trust for Public Land metrics.

City Core Values

This proposal upholds the Bureau's civil rights, land use, and public engagement responsibilities, advancing Antiracism and Equity by reducing disparities in meaningful participation and influence in planning. Increased capacity for public engagement and partnerships supports Transparency and Accountability and Communication and Collaboration, while leveraging external grant funding. The proposal also demonstrates Fiscal Responsibility by reducing General Fund expenses in response to City funding loss.

Bureau Initiatives

This proposal does represent progress toward intended outcomes for community connection, equity, and climate resilience identified in Healthy Parks, Healthy Portland (HPHP), and Parks Levy commitments related to partnerships and natural areas. The increased planning capacity also enhances the Bureau's ability to secure external grant funding that offsets capital and operating costs."

Community Engagement and Empowerment

This funding transfer maintains an existing Planner II position supporting community engagement for the Wilkes Headwaters and George Park projects and coordination with Albina Vision Trust. The role provides essential Spanish-language access for outreach, meetings, and materials, enabling inclusive engagement in diverse, lower-income neighborhoods. The projects serve approximately 178,312 people across 91,029 households. Community needs were identified through ongoing public engagement tied to capital and partner projects, informing planning and sustaining equitable, multilingual partnerships, despite no direct budget development engagement.

Budget Concept 26599 - Finance, Property & Technology EMS Reduction	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates \$150,000 of flexible External Materials and Services (EMS). This EMS has been an ongoing resource for one-off contract needs. Prior to the core service realignment and the loss of PP&R's Technology Manager, the allocation would have been for a Technology Roadmap for PP&R. Future uses include redeveloping PP&R's cost of service analysis, completing market rate studies for fees and rates, funding additional consulting support for Parking Management, etc.

Service Impacts

Instead of having a pool of resource to draw on for specific one-off and sporadically occurring projects, the Finance, Property & Technology team will need to reallocate or request resources on a one-time basis. In some instances, this might delay projects and services due to unavailable resources.

Equity Outcomes and Impact Tracking

NA

Community Engagement and Empowerment

NA

Federal Compliance Activities

This resource is intended to fund consultant work associated with compliance (ex: a recent audit of PP&R cash handling practices). Without it, the Finance, Planning, and Technology team will still strive to perform all necessary and appropriate studies through reallocation of existing resources on a one-time basis or make a request for additional PP&R resources.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$150,000)
Sum:	\$0	(\$150,000)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$150,000)
Sum:	\$0	(\$150,000)

Budget Concept 26600 - Eliminate 1 At-Risk Youth (Teen) Outreach Rec Coordinator II Position	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal would eliminate one of two Recreation Coordinator II–At Risk Youth/Teen Outreach specialty position, eliminating one (1) FTE who supports three TeenForce sites. This position provides program coordination and support for front-line service at three TeenForce sites. This workload would be absorbed by both the remaining Recreation Coordinator II–At Risk Youth/Teen Outreach specialist and the program’s supervisor. The services connected to this position’s portfolio serve over 1,700 individual youth annually.

Service Impacts

This position is a secondary support for programs that serve thousands of youth citywide each year. The proposed cut provides direct services as back up to the regularly scheduled front-line staff. The reduction will reduce the insurance of the built-in, back-up support, as well as reduce the programming and administrative capacity for the TeenForce workgroup. Frontline staff for TeenForce programs are primarily entry level positions. The Coordinator II positions provide experience and knowledge to the team in guiding the day-to-day work at multiple sites. With one less Coordinator II, this oversight will be less available at each location which could result in occasional program closure dates due to reduced staffing capacity and reduced programming flexibility.

Equity Outcomes and Impact Tracking

This reduction was selected as it is the only way of reducing budget without closing a program site or creating unsafe staffing levels. Although one of the two Coordinator II positions is vacant, the incumbent is temporarily assigned to another role within the Recreation division; this means there will be an impact to a current employee with this cut.

TeenForce uses pass registration and pass scans to track participation data and collect demographic information. Programming occurs on a drop-in basis and participants scan their pass each time they come to a TeenForce site to participate in programs or activities. Activities are open to any youth within the adolescent age grouping of 10-20 years old. TeenForce programming strives to provide safe spaces for adolescent age youth to engage in pro-social activities surrounded by caring adults. This is accomplished mainly by holding spaces for teen-age participants to drop-in and engage with both staff and each other in low-structured activities like open-gym times, video games, board games, art exploration and more.

Eliminating one of two Coordinator II programmers responsible for the citywide teen program will reduce capacity for maintaining structured programming and will reduce the ability to be responsive to community requests/demands for new program offerings or immediate changes in current programming.

Community Engagement and Empowerment

The TeenForce program citywide served over 3,400 individual adolescent aged youth during FY 2024-25 and is projected to reach 4,000 individual adolescents served during FY 2025-26. In FY 2024-25, these youth accounted for nearly 38,000 visits to community centers where they engaged in prosocial activities in a safe setting. For FY 2025-26, projected attendance visits are anticipated to exceed 40,000 visits to community centers.

Federal Compliance Activities

TeenForce complies with all local and federal laws while still serving a deeply diverse population of participants.

Total	(1.00)	(\$68,474)	\$0	(\$49,054)	(\$122,766)

Budget Concept 26602 - Debt Management Interagency Realignment	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal moves City Operations Debt Management charges to the capital fund, generating General Fund savings. Currently, City Operations Debt Management charges PP&R for services rendered. These services are for bond issuance costs related to the 2014 Parks Bond. This funding source is more appropriate to the cost.

Service Impacts

This shift of charging City Operations Debt Management from General Fund to capital frees up operating resources but limits further an already minimal funding source for capital major maintenance.

Equity Outcomes and Impact Tracking

This is a technical and appropriate budgeting change that better aligns budget with best practices.

Community Engagement and Empowerment

NA

Federal Compliance Activities

This proposal is a step toward better budgeting practice. Long-term, a revision of PP&R's indirect rate will more appropriately burden non-General Funds with administrative costs. In the meantime, this is an appropriate direct cost to the capital fund.

Budget Detail

100 - General Fund

Budget Concept 26603 - Create External Affairs & Partnership Manager (Manager I) Position	
Budget Concept Type	Magnitude
Add	Current Level of Service

Package Description

This proposal establishes a new External Affairs & Partnerships Manager (Manager I) position. This position is created in response to City Council direction in a FY 2025 Budget Note and funded by 2025 Parks Levy resources. The position addresses a documented capacity gap in partnership coordination, external funding leverage, volunteer accountability, and cross-bureau alignment. The position provides dedicated oversight to ensure external funding, in-kind contributions, and volunteer support are strategically aligned, properly tracked, and compliant with City requirements—reducing pressure on the General Fund while improving transparency and outcomes. This request reflects intentional 2025 Parks Levy promises to protect core services, strengthen equity and accountability, and deliver measurable public value consistent with City Council expectations.

Service Impacts

Pursuant to City Council direction in the FY 2025 Budget Note, this added position—supported, in part, by the 2025 Parks Levy—improves service delivery by increasing PP&R's capacity to coordinate partnerships, volunteers, and external investment. The role ensures community interest results in timely, well-managed projects, clearer communication, and visible improvements in parks. Without this position, partnership activity and external support would remain fragmented, limiting delivery of community-supported projects and increasing strain on operational staff. Input from program leadership and PP&R Financial Planning and Analysis has confirmed that the position's responsibilities cannot be absorbed by existing operational roles without degrading service delivery or financial accountability.

Equity Outcomes and Impact Tracking

"Adding this position strengthens PP&R's ability to secure and align external funding, in-kind contributions, and volunteer support; advance community-supported projects more efficiently; improve equitable access to partnership opportunities; and increase transparency and accountability for external resources.

City Council direction in FY25 identified a structural capacity gap in partnership coordination, fundraising, and volunteer accountability. These functions cannot be absorbed by existing operational roles without degrading service delivery.

Outcomes will be tracked using external funding secured (cash and in-kind), volunteer participation and hours (Galaxy Digital), the number and diversity of partners and Friends groups, project milestones enabled by external support, and partner and community feedback. By replacing informal access to PP&R partnerships with clear, repeatable processes, the role advances equitable distribution of resources and tracks outcomes by geography, partner type, and community served."

Community Engagement and Empowerment

"This position does not provide direct programming but expands resources and on-the-ground support by enabling community members, Friends groups, and partners to contribute funding, labor, and advocacy. Bureau-supported letters of support, grants, and partnerships directly translate into funded programs and capital projects, reducing pressure on the General Fund.

The role supports dozens of Friends groups, community-based organizations, and citywide volunteer efforts generating hundreds of thousands of hours annually, with benefits reaching neighborhoods citywide and targeted outreach to under-resourced areas.

The need for this position came from identified need through Friends group feedback, increased demand for bureau-backed grant support, City Council expectations to leverage external resources, and documented declines in fundraising capacity in recent years. The proposal aligns with PP&R's equity initiative and builds on prior community engagement and earlier PP&R practices when PP&R more effectively leveraged partnerships and philanthropy. The role supports compliant, meaningful engagement by coordinating Friends groups and partners within clear governance frameworks and ensuring community advocacy translates into accountable, funded outcomes."

Federal Compliance Activities

The position strengthens compliance by ensuring partnerships, grants, donations, and volunteer activities are properly structured, documented, and aligned with applicable laws and City policies.

Budget Concept 26604 - Increase Preschool For All Funding from Multnomah County	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal increases enrollment by one additional student in each of PP&R's six Portland Parks Preschool classrooms funded through Multnomah County's Preschool For All (PFA) program.

Service Impacts

Adding Preschool for All revenue reduces PP&R's reliance on General Fund resources while increasing the number of children served.

Equity Outcomes and Impact Tracking

The enrollment increase will maintain the required staff-to-student staffing practices and preserves program quality without notably increasing expenses.

Community Engagement and Empowerment

The increase of six spaces was created in partnership with Preschool For All to meet demand to deliver more service.

Federal Compliance Activities

This package complies with City of Portland, Oregon State, and Federal requirements. Portland Parks Preschool operation is subject to the required model of Multnomah County Preschool For All.

Budget Detail		
100 - General Fund		
Revenue	One Time Cost	Ongoing Cost
Intergovernmental	\$0	\$100,000
Miscellaneous Fund Allocation	\$0	(\$100,000)
Sum:	\$0	\$0

Budget Concept 26605 - Reduce Summer Free For All Event Producers Hours	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces the number of hours worked during the off-season by two Event Producers (Coordinator IIs) for the Summer Free For All Cultural Events program. Hours would be reduced from 40 hours per week to 32 hour per week for 35 weeks out of the year. This proposal is contingent upon BHR and union rules, as these positions are part of the newly organized City of Portland Professional Workers Union (CPPW).

Service Impacts

The Summer Free For All (SFFA) team works intensively while “in-season” during the summer months. The team produces 40-50 events within two months (July-August) with heavy preparation and close out in the month before and after, respectively.

The reduction in hours may compromise responsiveness to SFFA’s community partners (~35-40 partners total per season) and performing artists/contractors/vendors (~45-55 per season) during the planning months. It will also affect the program’s ability to meet its compressed programming timelines and the hiring and training of seasonal staff.

The general public will not likely perceive a change in program service delivery. But the reduction of hours will negatively affect staff morale and the Coordinator IIs whose hours and salaries would be diminished.

Equity Outcomes and Impact Tracking

This reduction package is likely to receive opposition from CPPW and impacted staff, who are active members. It may also result in staff turnover. This cut package was proposed to minimize direct program and service impacts, however most of SFFA’s budget comprises of expenses related to program delivery and staffing costs.

Community Engagement and Empowerment

The general public will not likely perceive a change in program service delivery. However, the reduction in hours may compromise responsiveness and customer service to SFFA’s community partners (~35-40 partners total per season) and performing artists/contractors/vendors (~45-55 per season).

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Miscellaneous Fund Allocation	\$0	(\$40,000)
Sum:	\$0	(\$40,000)

Budget Concept 26607 - Close Mt Tabor SUN School	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This proposal would close Mt Tabor SUN Community School (CS). Mt Tabor SUN CS is one of eleven SUN CS sites led by PP&R in partnership with Multnomah County. Closure of this site will eliminate one Recreation Coordinator I– Generalist position, as well as 3,717 hours of Recreation Support Staff work currently accomplished by 10-15 individuals. This closure also impacts 128 individual middle school students who participate in programs at this site, often times multiple days per week, throughout the year and 200 community participants who take part in the community programs and camps offered at this site.

Service Impacts

This reduction will eliminate the full SUN Community School program operated out of Mt Tabor Middle School and all services provided through this program site including enrichment classes, community recreation activities and day-camps. As one of eleven SUN Community Schools lead by PP&R in partnership with Multnomah County, after-school programs are designed to attract and support underrepresented members of the community including, but not limited to, low-income and BIPOC youth and families, children in non-parental households, and those just needing added support in school, while also being open to all students. Afterschool programs are selected and designed to reinforce students' learning through hands-on experiences while also creating a positive connection to the school in a fun, supportive way. Summer camps and evening programs that are open to the public beyond the school community are offered as well.

With this proposal, all after-school, summer, and evening programming offered by PP&R at this location would be eliminated.

Equity Outcomes and Impact Tracking

This cut was selected when all other options for reducing the budget allocations for SUN Community Schools were identified as not feasible. Cuts to staffing costs and/or materials budget across the eleven SUN sites PP&R operates would result in reduced program offerings and, in turn, make meeting the minimum performance measures set forth by Multnomah County's SUN Service Model impossible. For this reason, it was determined that losing one of eleven sites is the only viable option for reducing support within this portfolio of work.

SUN School outcomes and impacts are tracked and measured by Multnomah County along with all SUN schools throughout the county Service Point database. Mt Tabor SUN Community School served a total of 128 individual youth as well as 200 members of the broader community during FY 2024-25.

Community Engagement and Empowerment

While the community of Mt Tabor SUN Community School be affected by this reduction, this proposal presents the responsible choice based on the budget reductions needed.

When looking at all eleven SUN Community School (SUN CS) sites, Mt Tabor SUN CS is one of two sites that do not meet the County's measure as a "fully funded site." PP&R does fully fund the site, however the school community does not demonstrate a high level of need for school intervention supports. This site is also uniquely located in closer proximity to another PP&R location that serves middle school youth, approximately a 16-minute bus ride to Montavilla Community Center where TeenForce activities are held until 8pm each weekday. All Mt Tabor SUN CS youth participants are eligible for TeenForce passes and can participate in programs at this site. Montavilla Community Center also offers summer camp programs. Adults who attended evening programming will have the option of attending community programs at the newly renovated Mt Scott Community Center (approximately a 15-minute drive or 35-minute Trimet ride) or East Portland Community Center (approximately a 15-minute drive or 24-minute Trimet ride) as the two closest options from this site.

Federal Compliance Activities

The Intergovernmental Agreement for SUN Community School partnership has been edited and is in the review stage to ensure it complies with EOIT. All 11 SUN Community School sites are held to the measures and goals set forth by the Multnomah County SUN Community School Service Model.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$20,903)

Budget Concept 26608 - Eliminate Tree Regulation Subsidy	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal would eliminate the interagency subsidy from PP&R to PP&D in the amount of \$317,505. This subsidy originated with the consolidation of private development permitting functions within a single permitting authority (PP&D). At the time, regulatory responsibilities were shared between PP&R and PP&D which justified joint funding strategies. As of October 1, 2025, at City Council's direction all tree permitting functions now reside in PP&D. With PP&R no longer providing tree permitting services there is no longer justification for continuing the subsidy.

Service Impacts

This proposal would eliminate the redirection of General Fund Discretionary from PP&R to PP&D. It would have the effect of preserving PP&R's current level of service to the public and reduce the need for reductions across its programs.

Equity Outcomes and Impact Tracking

"PP&R's 2023 Healthy Parks, Healthy Portland report contains performance information by outcome area. The most recent report is available here: Healthy Parks, Healthy Portland 2023 Report.
PP&R also reports outcomes in its Parks Levy Annual Report, available here: 2023-24 Parks Levy Annual Report | Portland.gov
"

Community Engagement and Empowerment

PP&R engages in a process of ongoing listening and learning to inform bureau strategies and budgeting decisions. In 2024, the bureau conducted a Community Needs Survey, in partnership with PSU. The purpose of the survey is to inform services provided and delivery goals, assess public perception of PP&R's performance, and to identify differences and specific needs across Portland's diverse populations. The results of the 2024 Community Needs Survey are available online at: <https://www.portland.gov/parks/community-needs-survey>

Federal Compliance Activities

PP&D Tree Permitting Division ensure tree activities are conducted in accordance with requirements established by Title 11 trees. This work is funded by a combination of PCEF and various fees for service in the FY 2025-26 Adopted Budget.

Expense	One Time Cost	Ongoing Cost
Internal Materials and Services	\$0	(\$317,505)
Sum:	\$0	(\$317,505)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$317,505)
Sum:	\$0	(\$317,505)

Budget Concept 26609 - PL 2: Reduce Studies and Special Projects in the Planning Program	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces the capacity of the PP&R Planning program to conduct special planning & research studies, plans, and projects.

Service Impacts

"Reducing the Planning program's budget for special studies and projects will directly affect PP&R's ability to conduct essential research, planning, and design efforts that shape the public's experience of parks and community spaces. This funding has supported critical work such as the Green Gentrification Study, which assessed if and how neighborhood parks influence displacement, the Interstate Firehouse Cultural Center planning and design for the Black community, the Level of Service Part 1 and other high-priority projects including the Sports Court Study, Signage Study, and in the future the PP&R Financial Audit required Level of Service Part 2.

Without these resources, PP&R will have less capacity to evaluate service levels, identify community needs, and implement evidence-based improvements to park and recreation services."

Equity Outcomes and Impact Tracking

"Outcomes include a diminished capacity to conduct planning studies, applied research, and community-focused design work that directly informs equitable investment, resource allocation, and long-term decision-making. This reduction was selected because it limits external services rather than eliminating a staffed position, preserving core planning capacity while achieving budget savings.

Outcomes are tracked using performance measures in park access, trail connectivity, natural area preservation, and community participation. This proposal maintains PP&R's responsibility to support inclusive and lawful planning processes, however reduced capacity for studies and engagement funding may increase disparities in planning and investment decisions. Limited resources for translation, facilitation, and applied research may constrain PP&R's ability to clearly document, communicate, and respond to community-identified needs. While PP&R is not the sole provider of research or engagement services, reduced funding limits opportunities to collaborate with community partners and consultants to inform equitable, data-driven planning. This proposal reflects fiscal responsibility by reducing discretionary study funding, while acknowledging long-term risks associated with less informed decision-making."

Community Engagement and Empowerment

"This proposed reduction would directly impact PP&R's ability to provide community engagement services for critical planning and design projects. Funding currently supports engagement activities on projects such as Wilkes Headwaters and George Park, including workshops, public meetings, and translation services that ensure equitable participation. Eliminating these resources will reduce PP&R's capacity to connect with residents, particularly historically underserved communities, and limits opportunities for residents to shape decisions about parks and natural areas that affect them.

This reduction restricts programming and resources that reach hundreds of residents and households involved in these projects. Community needs were identified through prior public engagement processes on these projects, which highlighted the importance of inclusive outreach and culturally responsive engagement."

Federal Compliance Activities

The proposed reduction in the PP&R Planning program's EMS capacity would hinder the PP&R's ability to comply with federal, state, and city laws and policies. Reducing funding for these studies may limit PP&R's ability to produce the data and analyses necessary to demonstrate compliance with these mandates, as well as other regulatory and policy obligations related to accessibility, inclusivity, and equitable service delivery.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$41,299)
Sum:	\$0	(\$41,299)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$41,299)
Sum:	\$0	(\$41,299)

Budget Concept 26610 - Reduce Urban Forestry Geographic Information Systems (GIS) Support	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal moves 1.0 FTE GIS Tech III in the Urban Forestry Science & Policy work group from the General Fund to the Portland Clean Energy Community Benefits Fund's (PCEF) Strategic Program 34 (Tree Protection & Care). A vacant 1.0 FTE GIS Tech II position, funded by PCEF Tree Protection & Care, would be eliminated. This proposal reduces 1 FTE to the General Fund with no FTE increase to Tree Protection & Care.

Service Impacts

This proposal preserves a GIS Tech III (by moving the position to PCEF funding) that provides technical support to maintain and update Urban Forestry's park and city tree inventories, facilitate citywide tree planting efforts, and provide proactive maintenance of Portland's 25,000 park trees. The PCEF-funded GIS Tech II proposed for elimination was originally requested to support the development and implementation of a citywide street tree maintenance program.

Equity Outcomes and Impact Tracking

Without this capacity, GIS data updates, map production, and analytical work will be delayed or deprioritized. The public and City staff will experience longer response times for requests that rely on accurate and up-to-date spatial data, including emergency mapping needs, tree-related planning and maintenance coordination, and responses to public inquiries for GIS data. Reduced data quality and slower updates will limit the City's ability to make informed, timely decisions and to clearly communicate information to residents.

Community Engagement and Empowerment

The elimination of the GIS Tech II position will delay or diminish the ability to fulfill public requests or provide public maps, data, or reports. The GIS Tech II position supports dozens of front-line staff, and its elimination will reduce these staff members' capacity to respond to service or information requests from the public.

Federal Compliance Activities

This proposal complies with applicable Federal, State, and City laws and policies.

Budget Concept 26611 - PRMS 1: Reduce Professional Repair and Maintenance Services Special Project Funding	
Budget Concept Type	Magnitude
<i>Reduction</i>	<i>10% Reduction</i>

Package Description

This proposal reduces the External Materials and Services (EMS) funding within the Professional Repair and Maintenance Services (PRMS) administrative budget, reducing larger operational project work like playground equipment replacement, dock repairs, park paving work, drainage work, City leadership requested graffiti removal and additional Public Environment Management Office (PEMO) graffiti removal, and pool boiler replacements, etc.

Service Impacts

"The reduction of EMS for PRMS special projects will decrease ability to deliver timely repair and maintenance services associated with special projects that address public safety, accessibility, and protecting and maintaining PP&R assets. The most visible impacts to the public will be slower or deferred responses to playground, dock, sidewalk and other asset repairs; drainage issues; emergency graffiti removal and vandalism repairs; installation and maintenance of security gates and fencing; pool repairs; and protective infrastructure at parks and facilities.

As a result, park users may experience longer periods with broken or closed playgrounds, docks, and other infrastructure; damaged walking surfaces; increased graffiti and vandalism; and delays in repair of security features intended to deter vandalism and unauthorized access. While core emergency response will remain a priority, reduced capacity limits PRMS's flexibility to address unplanned or emerging needs beyond routine maintenance.

Over time, deferred special projects increase the maintenance backlog, accelerate asset deterioration, raise long-term repair costs, and reduce overall park quality – with disproportionate impacts in high-use or high-need areas."

Equity Outcomes and Impact Tracking

"The anticipated outcome of this reduction is a narrower focus on essential and emergency maintenance, with reduced capacity to deliver special projects. This reduction was selected over staffing cuts to preserve core operational capacity, skilled trades expertise, and emergency response readiness within PRMS.

PRMS tracks outcomes using work order volume, response times, backlog trends, labor hours by work type, and input from staff and community-reported safety or asset condition concerns. Reduced EMS funding is expected to result in increased deferred maintenance and longer resolution times for non-emergency repairs.

This proposal maintains compliance with anti-discrimination and accessibility laws. However, reduced capacity for non-emergency projects may increase disparities in access or asset condition over time, particularly in high-use or under-resourced parks. The reduction limits flexibility to collaborate with external contractors and partners on emerging needs, and may affect transparency and accountability as maintenance deferrals and backlogs grow. The proposal emphasizes fiscal responsibility by preserving core staffing and emergency response capacity, while acknowledging that deferred special projects may increase long-term maintenance risk and future costs.

Delayed access and improvements may also slow progress on safety goals identified in the Community Needs Survey, the Employee Survey, and the ADA Title II Transition Plan, particularly for non-emergency barrier removal and access improvements."

Community Engagement and Empowerment

"Community needs related to playgrounds, sidewalk conditions, graffiti, and security infrastructure are typically identified through the Community Needs Survey, 311, or work order service requests, maintenance reporting, ADA assessments, and operational coordination with park staff. While no new community engagement was conducted specifically for this reduction, it is informed by the existing Community Needs Survey, data on asset conditions, deferred maintenance backlogs, and recurring maintenance demands.

Equity impacts are monitored through asset condition data, service requests, and geographic distribution of deferred maintenance. Communities with fewer park resources and the highest levels of asset wear are prioritized but others may experience longer delays, which could exacerbate existing disparities in park conditions and access.

Historically, PRMS special maintenance projects help respond to community concerns raised through the Community Needs Survey, service requests, and neighborhood feedback. Reduced capacity may limit responsiveness to these inputs, particularly in areas with higher usage or vulnerability. Existing community plans and bureau-level assessments continue to guide prioritization, but reducing available resources will limit how quickly identified needs can be addressed."

Federal Compliance Activities

"This reduction does not eliminate PRMS's obligation to comply with federal, state, and city laws, including safety regulations and ADA requirements. However, reduced EMS funding may slow the pace at which non-emergency ADA-related improvements, sidewalk repairs, safety, and protective infrastructure projects can be completed, increasing reliance on prioritization and phased implementation.

Compliance risks are mitigated by prioritizing critical safety and accessibility issues first; however, ongoing reductions increase the likelihood of deferred work accumulating beyond optimal maintenance cycles."

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$381,625)
Sum:	\$0	(\$381,625)

Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$381,625)
Sum:	\$0	(\$381,625)

Budget Concept 26613 - PRMS 2: Eliminate 1 Utility Worker II Position on Amenities Team	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates 1 Utility Worker II position and reduces associated External Materials and Services (EMS) from the Amenities workgroup for maintenance and repair of park amenities like playground equipment, to repair and clean catch basins, roofs, and gutters, to repair and install metal fencing and signage, and to remove graffiti, etc.

Service Impacts

"Eliminating one Utility Worker II position and reducing the associated EMS materials budget with the position will reduce the Professional Repair and Maintenance Services (PRMS) Amenities workgroup's capacity to perform timely maintenance and repair of park amenities, including playground equipment, cleaning catch basins fencing, signage, roof and gutter preventative maintenance, graffiti removal. This is support that enables higher-skilled trades staff to focus on complex repairs while ensuring routine and preventative work continues. Utility Worker IIs in this group are critical to emergency response throughout PP&R and in assisting with citywide emergency response.

Eliminating this position will result in slower response times for amenity repairs, increased backlog of minor but visible maintenance issues, and reduced ability to address vandalism and graffiti promptly. Park users may experience longer periods with damaged or closed amenities, and delayed restoration of safe play and gathering spaces.

Reduced EMS materials funding further constrains the ability of the Amenities workgroup to complete repairs once staff are available, increasing inefficiencies and deferrals. Over time, deferred amenity maintenance can accelerate asset deterioration, increase long-term repair costs, and diminish the overall quality, safety, and usability of parks—particularly in high-use locations."

Equity Outcomes and Impact Tracking

"The anticipated outcome of this reduction is a shift away from preventative and routine amenity maintenance toward more reactive service delivery. This option was selected over reductions to higher-skilled trades to preserve core technical staff capacity.

Outcomes are tracked with work order volume, response times, backlog growth, preventative maintenance ratios, labor distribution by work type, and feedback from staff and community reports. Reductions in Utility Worker capacity are expected to correlate with increased deferred maintenance and fewer preventative interventions. Equity impacts are monitored through geographic distribution of work orders, asset condition data, and service level scores. Communities with fewer park amenities and higher levels of asset wear are prioritized but others may experience longer delays, potentially widening disparities in park conditions and user experience.

This proposal maintains PP&R's responsibility to comply with safety and accessibility requirements. However, reduced Utility Worker capacity may increase disparities in amenity condition and responsiveness across parks over time, particularly in high-use or under-resourced areas. Diminished visible staff presence and slower response to vandalism or safety concerns may affect how community-reported issues are addressed and reduce the public's experience of well-maintained facilities and parks. This proposal preserves higher-skilled trades staff and emergency capacity; however, increased reliance on reactive maintenance may elevate long-term costs and reduce the Bureau's ability to provide timely service expectations to park users."

Community Engagement and Empowerment

"This proposal does not include direct programming or community services, but it affects community access to safe, functional, and welcoming park spaces and amenities. Impacts are citywide, with particular effects in parks that rely heavily on routine amenity maintenance and rapid response to vandalism or damage.

Community needs related to amenity condition and safety are primarily identified through the Community Needs Survey, 311, or work order service requests, park inspections, and operational reporting systems. While no new community engagement was conducted specifically for this reduction, prioritization is informed by existing equity and service level data used in work order assignment.

Utility Worker IIs also often serve as visible, consistent points of presence in parks, contributing to a sense of care and responsiveness. Reduced staffing limits this presence and may delay responses to community-reported concerns."

Federal Compliance Activities

"This reduction does not remove PRMS's responsibility to comply with federal, state, and city regulations related to safety, accessibility, and maintenance standards. However, reduced staffing and EMS materials funding may slow the completion of non-emergency repairs that support ADA access, playground safety standards, and community center, facility or asset risk mitigation. The reduction may slow progress on the ADA Title II Transition Plan ADA work that depends on preparatory and follow-up support provided by Utility Workers.

Community engagement and reporting mechanisms remain in place, but reduced capacity limits responsiveness. Compliance risks are mitigated through prioritization of critical safety issues; however, ongoing reductions increase reliance on deferral strategies that may elevate long-term risk and cost."

100 - General Fund

Expense	One Time Cost	Ongoing Cost

Budget Concept 26615 - Reduce Community Music Center Summer Programming	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces the level of summer programming at the Community Music Center (CMC) and at partner library sites (Midland Library and Kenton Library). Ten-week group classes would be reduced to eight weeks while maintaining fee levels. Private lessons would be eliminated in July through September. Free drop-in lessons at the two libraries would also be reduced in the summer months. Front desk hours and Customer Service Representative part-time staff would also be reduced accordingly. CMC’s summer camps at Y.O.UTH PDX in East Portland would remain at full program levels (4 weeks).

Service Impacts

This proposal would reduce CMC program service levels by approximately 60 group class hours at CMC, 500 private lesson hours at CMC, and 40 free drop-in lesson hours between Midland and Kenton libraries.

This reduction would impact approximately 270 group class youth and adult participants and 100 private lesson youth students.

Equity Outcomes and Impact Tracking

This proposal was selected due to summer months being the slowest at CMC. However, the proposal does not eliminate summer group classes altogether because they are a net positive income source. Discontinuing classes and their associated fees would not decrease expenses.

Private lessons have net negative revenue as one-on-one instruction, with a high expense to low revenue ratio. Eliminating this type of program results in savings.

Community Engagement and Empowerment

This proposal directly impacts public-facing services, programming, and resources for the community. See above for details and data on number of service hours and people impacted.

Due to the budget timeline and process, community was not engaged in the development of this proposal.

Budget Concept 26620 - PRMS 3: Reduce Purchase of Materials for Playgrounds & Park Amenities Maintenance	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces External Materials and Services (EMS) funding for Professional Repair and Maintenance Services (PRMS) to purchase materials such as play equipment, playground safety surfacing, fencing for DOLAS, pools, and parks, metal welding materials, and graffiti removal equipment, etc.

Service Impacts

"Reducing the PRMS Playground & Amenities Maintenance EMS funding will limit the ability to purchase materials and maintain capacity for playground safety inspections and timely maintenance repairs. This will result in slower completion of Consumer Product Safety Commission (CPSC)-related playground repairs, delayed replacement of worn or damaged components, and reduced ability to fabricate or install amenities such as bollards, railings, fencing, gates, and welded safety features.

As materials funding declines, staff may defer repairs even when labor capacity is available, resulting in longer periods of closed or partially restricted playgrounds, facilities, and park amenities. Users may experience reduced access to safe play areas, delayed reopening of amenities following vandalism or wear, and an overall decline in the condition and appearance of park infrastructure.

Over time, deferred maintenance accelerates asset deterioration, increases the maintenance backlog, increases the risk of safety hazards, and raises long-term repair and replacement costs. These impacts are consequential in high-use parks and neighborhoods where playgrounds and amenities serve as primary recreational resources."

Equity Outcomes and Impact Tracking

"The anticipated outcome of this reduction is a shift away from preventative, routine and timely playground and amenity maintenance toward reactive, emergency repairs. This option was selected over staffing reductions to retain core operational capacity, skilled inspection and repair expertise, though reduced materials funding limits the effectiveness of that capacity.

PRMS tracks impacts and outcomes through inspection findings, backlog trends, playground closure duration, labor hours by work type, and input from park operational staff and community-reported safety or asset condition concerns. Reduced EMS funding is expected to increase deferred repairs, extend closures, and reduce preventative interventions.

This proposal maintains PP&R's responsibility to meet safety and accessibility standards. However, reduced capacity may increase disparities in access to safe play spaces, particularly in high-use or underserved neighborhoods. Longer playground closures and delayed safety repairs may limit the PP&R's ability to respond promptly to community-reported hazards. This proposal reflects fiscal responsibility by preserving skilled inspection and repair staff, while acknowledging that deferred repairs and extended closures may increase long-term costs and impact the public's ability to safely use park facilities."

Community Engagement and Empowerment

"This proposal affects community access to safe, clean, and welcoming park and facility spaces as the locations for recreation programming or services. The scope of impact is citywide, with particular effects in neighborhoods where safe, functional playgrounds and shared amenities are central gathering spaces for youth and families.

Community needs related to playground safety and amenity condition are identified through Community Needs Survey, inspections, 311 or work order service requests, and park operations reporting. While no new engagement was conducted specifically for this reduction, prioritization continues to be informed by the existing Community Needs Survey, existing equity and service level data used to assign work orders. Equity impacts are monitored through geographic distribution of inspections, closure data, and work order prioritization. Communities with fewer recreational assets and the highest playground usage are prioritized but others may experience longer delays, increasing disparities in access to safe play environments.

Reduced EMS funding limits responsiveness to community-reported issues, potentially extending the duration of playground closures or incomplete repairs. This may disproportionately affect communities with fewer nearby recreational alternatives or higher reliance on public play spaces."

Federal Compliance Activities

"This reduction does not remove PP&R's obligation to meet federal, state, and city safety and accessibility requirements, including CPSC playground safety guidelines and ADA considerations. However, reduced EMS materials funding may slow the completion of corrective actions identified during inspections, increasing reliance on temporary closures or interim risk-mitigation measures.

Community reporting and inspection systems remain in place, but reduced materials capacity constrains implementation. Compliance risks are managed by prioritizing critical hazards first; however, sustained reductions increase deferred maintenance and long-term risk exposure."

100 - General Fund

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$59,000)
Sum:	\$0	(\$59,000)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$59,000)
Sum:	\$0	(\$59,000)

Budget Concept 26621 - PRMS 4: Eliminate the Professional Repair and Maintenance Services Response Team	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates the three-FTE Professional Repair and Maintenance Services (PRMS) Response Team: 1 Electrician, 1 Plumber, and 1 Facility Maintenance Technician that manage infrastructure failures outside of standard weekday hours.

Service Impacts

"Eliminating the three-person PRMS Response team (Electrician, Plumber, and Facility Maintenance Technician) affects PP&R's ability to provide professional mechanical, electrical, and plumbing response outside of standard weekday hours. This team is intended to support emergency repairs, facility operations, and infrastructure needs for community centers, partner facilities, pools, restrooms, lighting, splash pads, and park assets during weekends and special events.

Without this team, infrastructure failures occurring outside of standard weekday hours and on weekends may remain unaddressed until the next business day. This may result in extended closures of community centers, pools, restrooms, or event spaces, cancelled or disrupted events, and reduced public access to essential services. Event permitting and activation efforts of PP&R properties will be especially impacted, as PP&R may no longer have in-house trade capacity to support electrical, plumbing, or facility needs during weekend activities.

Over time, the absence of after-hours response capacity accelerates asset deterioration, increases deferred maintenance, and elevates safety and liability risks associated with aging infrastructure."

Equity Outcomes and Impact Tracking

"The anticipated outcome of this reduction is the elimination of professional trade response capacity outside standard weekday hours. This option was selected over individual existing staff reductions due to vacancies and preservation of existing skilled trade staff.

Outcomes are tracked through emergency work orders, response times, facility closures, event support metrics, and maintenance backlog trends. Elimination of this team is expected to increase emergency deferrals, extend closures, and shift work into a reactive weekday backlog. Equity impacts are monitored through facility usage patterns, event distribution, and closure data. Communities relying on programming or facilities may experience greater service disruption, increasing disparities in access.

Reduced emergency response capacity outside standard hours increases the likelihood of extended closures and deferred resolution of safety issues, thereby reducing the public's experience of well-maintained facilities and parks. Eliminating this team impacts collaboration with partners and event organizers who depend on weekend facility reliability. This proposal reflects Fiscal Responsibility by achieving the requested budget reduction in a constrained budget environment, while acknowledging increased operational risk, service disruption, and long-term cost exposure associated with delayed repairs and facility downtime."

Community Engagement and Empowerment

"This proposal affects community access to safe, clean, and welcoming park and facility spaces, particularly around community access to weekend operations. Impacts are citywide and especially pronounced for communities that depend on parks, community centers, and pools as affordable gathering spaces.

Community needs related to facility reliability and event support are identified through permitting processes, service requests, and operational coordination with partners and program staff. While no new engagement was conducted for this reduction, it directly affects PP&R's ability to support community-based and culturally specific events that frequently occur on weekends."

Federal Compliance Activities

"This reduction does not remove PP&R's responsibility to comply with federal, state, and city requirements related to health, safety, accessibility, and facility operations. However, the absence of professional trade staff after-hours increases the risk of delayed corrective action, extended closures, and non-compliance with vendor, permitting, or operational expectations. While staff will continue to prioritize critical repairs, the loss of this response capacity increases reliance on deferrals and temporary shutdowns, elevating long-term risk, cost, and service instability across the park system."

Budget Detail

Budget Concept 26622 - Create a New PP&R Systemwide Paid Parking Program	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal creates a new PP&R Systemwide Paid Parking Program as a budget gap closing package. PP&R maintains over 7,000 parking stalls across 230 parking lots at 76 property locations. Currently, only six PP&R properties have a paid parking program in place. This proposal implements a budget gap closing "Systemwide Parking Program," bringing the paid parking program to 30 new properties within the PP&R portfolio. Implementation requires investment of staff time and resources to develop a paid parking management plan, capital investment (signage, striping, vendor contracts, pay station(s) procurement/installation), ongoing maintenance, and regular enforcement. High potential parks were identified as being likely to generate additional revenue due to their size and lack of free on-street parking. Revenue projections have been kept conservative at 10% of proposed potential revenue compared to current pay to park lots.

Service Impacts

"Paid parking programs: 1) Manage parking demand and availability to ensure sites that require parking for specific amenities have that parking available for park users; 2) Help fund the care and maintenance of parking lots; and 3) Prevent unwanted activities which can detract from recreational enjoyment by the public. Paid parking is most commonly applied as a demand management tool as it encourages users to consider alternative parking options (such as nearby, less constrained, or lower priced areas), carpool, or make use of other modes of travel, which aligns with City goals in the City of Portland 2035 Comprehensive Plan. Introducing paid parking to an area that was previously free can be influence parking behavior and potentially cause community frustrations. However, depending on the availability of alternative parking options, it could have long-term benefits and influence healthier transportation alternatives.

The current unpaid parking model in PP&R does not cover capital and operating costs and encourages non-park users to occupy parking spaces due to neighboring parking deficiencies. Multnomah Arts Center is a great example of how a paid parking program can help ensure access in high use parking lots. Pittock Acres pay to park generates 44% of potential revenue. For the New PP&R Systemwide Paid Parking Program, selected properties for conversion to paid parking were identified by parking consultants and staff through complaints, observations, and known traffic congestion and parking patterns in Portland."

Equity Outcomes and Impact Tracking

"New paid parking can be seen as a barrier to entry or a deterrent for visitors. This program was designed to ensure park user access is maintained and focused where there have been historical complaints or known issues related to non-park users occupying spaces. While the PP&R portfolio has over 230 parking lots at 76 locations, only a handful of lots currently have paid parking. This program would bring the total number of paid sites to around 30 properties, leaving over 60% of the PP&R properties with free parking. Staff anticipate some complaints, but it is expected that they will be from non-park users other than the intended beneficiaries.

This revenue proposal was selected to potentially reduce non-park users in PP&R parking lots and ensure that sites with parking are used for their intended purposes.

Currently, parking lots that are not in the systemwide program do not have any metrics or data other than complaints. Parking lots in the systemwide program have Parking Kitty data and reporting, which can track volunteer passes, subsidies, and any other groups. Parking Kitty has ways to discover negative impact to groups, allowing PP&R to provide enhanced support to are easily implemented (passes, hangtags, volunteer codes).

This proposal progresses outcomes, using a paid parking program as a parking management tool. PP&R has a long list of site user complaints about parking lots related to non-users, maintenance, and time of use. Transparent, consistent, and thoughtful management of public resources is what RES strives for in all its initiatives. "

Community Engagement and Empowerment

"The program will provide general information and holding statements for public inquires or political concerns. At this time only two to three sites have active PP&R tenants that would be impacted, and separate meetings would be scheduled with them to discuss monthly or annual passes for their ongoing operational needs. The proposal advances new, unrestricted revenue that could be used for direct services, programming or resources for community.

Most PP&R parks are designed without parking lots, as the goal is to have a park within ½ mile from every home in Portland. Parks that have parking lots are usually required to construct them because of the type of amenities they have, making it very important that these spaces actually provide the park users with the intended resource.

Community was not engaged in the development of this proposal. However, all sites that have adjacent tenants, partners, or community uses would be contacted prior to rolling out new signage to try and accommodate appropriate use of the site or support transitions to other solutions. PP&R has done several parking program studies in recent years, primarily for Washinton Park. The rollout of paid parking at boat ramps over the past few years has gone well and improved the experience many have at these sites, and reduced instances of abandoned vehicles. "

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Concept 26623 - PRMS 5: Reduce Purchase of Materials for Mechanical, Electrical, and Plumbing Maintenance

Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This proposal reduces External Materials and Services (EMS) for the purchase of materials and repairs for mechanical, electrical, and plumbing maintenance in parks and at community centers, and other park facilities for repairs to lighting, boilers, heating, cooling equipment, etc.

Service Impacts

"Reducing EMS funding for PRMS Mechanical, Electrical, and Plumbing (MEP) Shop will decrease the ability to purchase materials and complete timely repairs to critical building systems across PP&R facilities and developed parks. This includes restroom plumbing, HVAC components, electrical parts, plumbing fixtures, lighting, pumps, controls, fire safety and related infrastructure necessary to keep facilities operational and safe.

Without sufficient materials funding, MEP staff may be unable to complete necessary repairs even when staff are available, resulting in delayed fixes to failing systems. Public-facing impacts may include longer restroom outages, intermittent community center or facility closures, reduced reliability of heating and cooling systems, lighting failures, and delayed repairs to drinking fountains, splash pads, and pool infrastructure.

Over time, deferred MEP maintenance accelerates system failures, increases emergency repair needs, and raises long-term replacement costs. These impacts may be most noticeable in community centers, pools, and high-use facilities like Pioneer Court House Square, Pittock Mansion and other PP&R partner facilities where aging infrastructure already requires frequent intervention to remain operational."

Equity Outcomes and Impact Tracking

"The anticipated outcome is a shift away from preventative and timely MEP maintenance toward more reactive, emergency-only repairs. This option was selected over staffing reductions to preserve licensed and specialized staff trade capacity, though reduced materials funding constrains the effectiveness of that capacity.

PRMS tracks impacts through work order completion rates, response times, facility downtime, system failure trends, labor hours, maintenance backlog data, and input from park operations staff and community-reported asset condition concerns. Reduced EMS is expected to correlate with increased deferred repairs, extended outages, and fewer preventative interventions.

This proposal maintains PP&R's responsibility to comply with health, safety, and accessibility requirements. However, reduced capacity to complete timely MEP repairs may increase disparities in facility as asset reliability, particularly in high-use or aging facilities. Longer outages of restrooms, community centers, pools, and HVAC, lighting, and water systems may limit PP&R's ability to provide consistent, reliable services. This reduces the public's experience of well-maintained facilities and assets.

Functioning, code-compliant MEP systems are foundational to ADA accessibility as noted in the ADA Title II Transition Plan, and delays may slow progress on ADA-adjacent improvements."

Community Engagement and Empowerment

"This proposal affects community access to safe, clean, and welcoming park and facility spaces as locations for recreation programming or services. The scope of impact is citywide, particularly affecting users of community centers, pools, restrooms, and other facilities that rely on functioning MEP systems.

Community needs related to facility reliability are identified through the Community Needs Survey, 311 or work order service requests, facility operations staff, inspections, and emergency response data. While no new engagement was conducted for this reduction, prioritization continues to be informed by work order data, existing service demand, the deferred maintenance backlog, and operational reporting.

Reduced materials funding limits the MEP workgroup's ability to respond quickly to community-reported facility issues, potentially extending outages or closures. This may disproportionately affect communities that rely on public facilities as primary access points for recreation, services, and safe gathering spaces. Equity impacts are monitored through facility usage, asset condition and outage data, and geographic distribution of deferred maintenance. Facilities serving higher-need communities are prioritized but may experience longer disruptions."

Federal Compliance Activities

"This reduction does not eliminate PP&R's responsibility to comply with federal, state, and city requirements related to health, safety, and accessibility. However, reduced EMS funding in the MEP Workgroup may slow corrective actions needed to maintain compliant restrooms, pools, splash pads, HVAC systems, lighting, fire/life safety infrastructure, and accessible building features.

Compliance risks are managed through prioritization of critical failures first; however, sustained reductions in materials funding decrease capacity, increase deferred maintenance, elevate emergency repair costs, and heighten long-term operational and compliance risk across the park system."

Sum:	\$0	(\$119,891)

Budget Concept 26624 - PRMS 6: Move 1 Carpenter Position to ADA Transition Plan Funding	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This proposal moves 1 FTE ADA Carpenter position and associated External Materials and Services (EMS) from Professional Repair and Maintenance Services (PRMS) to ADA Transition Plan Major Maintenance (MM) funding.

Service Impacts

"This proposal moves one FTE Carpenter position and the associated EMS for the position from the PRMS operating budget to ADA Transition Plan Major Maintenance (MM) funding. It does not eliminate the staff position but changes the funding source used to support it. While staff capacity remains, this shift reduces the amount of MM funding available for physical barrier remediation and capital improvements identified in the ADA Transition Plan.

As a result, fewer ADA barrier removal projects noted in the ADA Transition Plan can be completed in the near future. Park users with disabilities may experience longer delays before identified access barriers—such as ramps, pathways, door clearances, and related structural improvements—are remediated. Although the Carpenter continues performing work, the diversion of Major Maintenance funds to cover staffing costs limits the scope and pace of larger remediation projects.

Over time, this results in slower progress toward addressing all barriers in the ADA Transition Plan."

Equity Outcomes and Impact Tracking

"The anticipated outcome of this funding shift is a reduction in the number of ADA barriers that can be physically remediated each year. This option was selected over eliminating the position outright but transfers financial pressure to the ADA Transition Plan capital program.

PRMS tracks the number of barriers addressed annually, backlog of identified ADA deficiencies, ADA project completion rates, and capital spending against the ADA Transition Plan. Shifting staff costs to Major Maintenance funding is expected to reduce the total volume of ADA Transition Plan remediation work completed.

This proposal maintains PP&R's responsibility to meet ADA and civil rights requirements. However, it shifts funding away from physical barrier remediation which may slow down barrier removal for people with disabilities, particularly in facilities serving higher-need communities. This proposal reflects fiscal responsibility by preserving skilled staff capacity to address ADA barriers; however, reduced remediation volume may elevate long-term compliance risk and increase future capital costs."

Community Engagement and Empowerment

"This proposal affects community access to safe, clean, and welcoming park and facility spaces as the locations for recreation programming or services for community members who rely on timely ADA improvements to access parks and facilities. The scope of impact is citywide, with disproportionate effects on people with disabilities who experience barriers to participation when remediation is delayed.

Community needs related to ADA accessibility are identified through ADA assessments, service requests, complaints, and the PP&R Bureau's ADA Transition Plan evaluations. Equity impacts are tracked through the number and location of barriers addressed and remaining unmet ADA barrier removal needs. Slower remediation may disproportionately affect facilities serving higher-need populations.

Reduced capital funding for remediation limits PP&R's ability to demonstrate responsiveness to ADA accessibility needs."

Federal Compliance Activities

"This funding shift does not remove PP&R's obligation to comply with the Americans with Disabilities Act or the City's ADA Title II Transition Plan. However, diverting Major Maintenance funding to cover staffing costs reduces resources available for additional physical barrier remediation, increasing the risk of delayed compliance.

While the Carpenter position remains funded, reliance on MM funding introduces long-term risk if capital funding levels decline."

Budget Concept 26626 - PRMS 8: Reduce Purchase of Materials for Carpentry and Concrete Maintenance	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal reduces External Materials and Services (EMS) funding within the Professional Repair and Maintenance Services (PRMS) Structural Services budget. It reduces funding for purchasing materials for lumber, carpentry fittings, concrete work, locksmithing, graffiti abatement, facility repairs, and annual maintenance.

Service Impacts

"Reducing EMS funding for the purchase of materials used in lumber, carpentry fittings, concrete work, locksmithing, graffiti abatement, facility repairs, and annual maintenance will limit PRMS ability to complete both routine and safety-critical repairs. These materials are needed to address failing roofs, damaged restrooms, broken doors and locks, deteriorated signage, structural wood elements, concrete hazards, and graffiti removal.

Without adequate materials, staff may be unable to complete repairs even when staff are available, resulting in delayed or incomplete work. Park users may experience longer closures of facilities and amenities, increased visibility of graffiti, reduced building security, and delayed remediation of hazards. Annual preventative maintenance activities—such as roof repairs, gutter cleaning, and facility upkeep—will be scaled back, increasing the likelihood of asset failure.

Over time, deferred structural maintenance accelerates asset deterioration, increases emergency repair needs, and raises long-term costs to restore facilities to safe and usable conditions."

Equity Outcomes and Impact Tracking

"The anticipated outcome of this reduction is a decline in preventative and routine structural carpentry maintenance, with work shifting toward emergency responses. This option was selected over staffing reductions to preserve core skilled trade capacity and emergency response readiness, though reduced materials funding constrains the effectiveness of that capacity.

Outcomes are tracked through work order completion rates, labor hours, backlog growth, preventative maintenance ratios, facility closures, response times, and input from park operations staff and community-reported safety or asset condition concerns. Reduced EMS funding may result in increased deferred maintenance, longer closures, and fewer preventative interventions.

This reduction affects PP&R's ability to respond to previously identified needs and community-reported safety concerns.

This proposal maintains PP&R's responsibility to meet safety and accessibility standards. However, reduced materials for structural repairs may increase disparities in facility condition and access across the park system, particularly in high-use or under-resourced locations. Increased deferrals and longer closures may limit PP&R's ability to respond promptly to community-reported safety and cleanliness concerns. This proposal preserves skilled trade staffing, while acknowledging that deferred maintenance and asset deterioration may elevate long-term costs and compliance risk."

Community Engagement and Empowerment

"This proposal affects community access to safe, clean, and welcoming park and facility spaces as locations for recreation programming or services. Impacts are citywide, particularly in parks, community centers, and facilities that rely on routine structural repairs and timely graffiti abatement to remain welcoming and functional.

Community needs are identified through the 2024 Community Needs Survey, 311 or work order service requests, inspections, ADA assessments, and operational reporting. While no new engagement was conducted for this reduction, it is informed by the Community Needs Survey, data on asset conditions, deferred maintenance backlogs, and recurring maintenance demands. "

Federal Compliance Activities

"This reduction does not eliminate PP&R's responsibility to comply with federal, state, and city laws, or safety, accessibility, and building code standards. However, reduced materials funding may slow corrective actions related to failing roofs, damaged restrooms, broken doors and windows, vandalized locks and building security, safety repairs, ADA barrier remediation, and structural repairs, increasing the possibility of more temporary closures or risk mitigation measures. It also may slow ADA Title II Transition Plan ADA-adjacent remediation tied to structural repairs.

While staff will continue to prioritize critical safety issues, sustained reductions in materials funding cause an increase deferred maintenance, elevate long-term compliance risk, and undermine the PP&R's ability to maintain safe, accessible, and reliable public spaces."

Budget Detail

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$74,303)
Sum:	\$0	(\$74,303)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$74,303)
Sum:	\$0	(\$74,303)

Budget Concept 26627 - PRMS 9: Eliminate 1 Automotive Equipment Operator Position on Heavy Equipment Team	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates 1 Automotive Equipment Operator I (AEO) position from the Heavy Equipment (HE) team for tall grass mowing for fire suppression, park and dog off-leash area waste removal, green waste hauling and recycling, sinkhole remediation, landslide response, winter storm cleanup, pathway and parking lot maintenance and repairs, drainage and ditching, and playground and outdoor asset installation.

Service Impacts

"This proposal eliminates one FTE Automotive Equipment Operator (AEO) position in the Professional Repair and Maintenance Services (PRMS) Heavy Equipment (HE) workgroup which will reduce the team's capacity to perform essential park maintenance and emergency response functions. This AEO position supports tall grass mowing for fire suppression; garbage and pet waste collection in parks and dog off-leash areas; hauling and managing of green (wood debris) waste for recycling and redistribution as mulch within the park system; sink hole remediation; landslide response; winter storm cleanup; pathway and parking lot maintenance and repairs; paving; drainage and ditching of parks and natural areas; assistance with playground and outdoor asset installation; and servicing specialized infrastructure such as deep refuse containers.

The immediate public impact will include delayed tall grass mowing, increased fire risk during dry seasons, slower or less frequent garbage and debris removal, and fewer playground and pavement repairs – resulting in reduced park cleanliness and usability. Additionally, emergency response to landslides, fallen trees, and storm damage will be slower, potentially resulting in extended trail, roadway, or facility closures.

Over time, reduced HE capacity will increase deferred maintenance, accelerate asset degradation, and raise safety and liability risks. These impacts will be most noticeable during peak seasonal demand and emergency events, when HE staff are already operating at maximum capacity."

Equity Outcomes and Impact Tracking

"This proposal decreases capacity and was selected over EMS equipment reductions due to the position being vacant but removes a critical, qualified operator role from a specialized team, reducing overall operational capacity.

Outcomes are tracked through work order service request volume, response times, emergency event logs, maintenance backlog data, and seasonal service completion (such as tall grass mowing cycles). Eliminating one FTE AEO position is expected to increase response delays, reduce preventative service coverage, decrease tall grass mowing for fire resiliency, and increase reliance on reactive or contracted solutions. Equity impacts are monitored through geographic service coverage, response times, and deferred maintenance patterns. Delays in tall grass mowing and debris removal may disproportionately affect neighborhoods with fewer resources or higher exposure to environmental risk.

This proposal maintains PP&R's commitment to meet community safety and environmental protection requirements. However, reduced HE capacity may increase fire-risk mitigation, disparities in cleanliness, and emergency response across parks, particularly in high-use or higher-risk areas. Response times may limit PP&R's ability to meet community expectations for safe, well-maintained park conditions. This proposal identifies a budget reduction through staff rather than equipment assets; however, increased reliance on reactive responses and the potential for higher long-term safety, liability, and maintenance costs."

Community Engagement and Empowerment

"This proposal does not include direct programming but does significantly affect the community's experience in parks, facilities, and dog off-leash areas. Impacts are citywide, particularly in high-use parks and areas prone to wildfire risk, illegal dumping, pathway damage, or storm-related destruction and hazards.

Community needs related to climate resilience, cleanliness, safety, and emergency response are identified through the Community Needs Survey, 311, or work order service requests, inspections, and operational reporting. While no new engagement was conducted for this reduction, the services affected are highly visible and frequently requested by the public. Communities with fewer nearby park options or higher usage levels may experience disproportionate impacts, including delayed debris removal, reduced fire-risk mitigation, slower emergency event responses, and longer park and facility closures."

Federal Compliance Activities

"This reduction does not remove PP&R's obligations related to public safety, environmental protection, or emergency response. However, reduced Heavy Equipment capacity may slow compliance-supporting activities such as fire-suppression mowing, hazard removals, emergency response, sanitation services, and pathway repairs.

While remaining staff will prioritize critical safety needs, the loss of this position increases operational strain, elevates long-term safety and liability risk, and reduces PP&R's ability to maintain clean, safe, and resilient park spaces."

Budget Detail

Budget Concept 26638 - Transfer Portland Tennis Center Operations to USTA	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal anticipates transition to partner-based delivery of tennis services with the parks and recreation system. The transfer eliminates all seasonal expenses and eliminates all FTE (Supervisor, two Recreation Coordinator Is, and one Recreation Leader). It eliminates all External and Internal Materials and Services.

Service Impacts

Due to US Tennis Association-PNW's (USTA-PNW) commitment to funding and expertise in community engagement, programming opportunities may improve. However, user costs may need to be managed to meet the City's expectations. Ongoing analysis during the agreement negotiations is necessary to understand USTA-PNW's offerings and to ensure access for Portland's diverse tennis community. The initial assessment suggests a potentially favorable outcome for the City.

Equity Outcomes and Impact Tracking

This proposal reduces City costs, as PP&R will no longer operate the Portland Tennis Center (PTC). Four full-time employees (FTE) will be impacted, as will almost 40 casual seasonal employees, including the front desk employees and professional tennis instructors. However, USTA-PNW has shown success in the Northwest with these types of tennis partnerships. This reduction was selected as it could be favorable for the City. USTA-PNW would provide comparable public access, take full responsibility for all PTC operations, and participate in ongoing maintenance and capital investments. USTA-PNW has mentioned adding programs for low-vision populations, autism, wheelchair users, and Special Olympics.

Community Engagement and Empowerment

Current partner groups will need to be engaged to ensure that their partnership with the City will not be impacted. PP&R collaborates with numerous partners, including Kids N' Tennis, the Portland Interscholastic League, and the Rovello family. It is anticipated that these partnerships will continue with USTA-PNW. USTA-PNW has also mentioned its desire to increase partnerships in the future.

Federal Compliance Activities

USTA-PNW has stated that this partnership will be a “comprehensive community solution.” They will continue to operate a safe, inclusive, affordable, high-quality tennis program for all ages and abilities, while “reinforcing Portland’s values of equity, public service and civic well-being.”

Budget Concept 26639 - Eliminate Senior Center Project	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates the Senior Center Project, one Recreation Coordinator I - Adaptive and Inclusive Resources specialty position, and 6,955 hours of seasonal work. The PP&R operated Senior Center Project is partially funded by a fee-for-service contract with Multnomah County. Currently, this program serves 21 adult-aged participants with disabilities. Current participants would not be without this service, rather they would be transitioned into programs provided by other service organizations.

Service Impacts

The Senior Center Project operates two half-day program sites for adults with disabilities who need a high level of direct support. The program operates out of Charles Jordan and East Portland Community Centers and currently serves a total of 21 individuals between the two sites. This cut will result in the elimination of this specific partnership service through the Multnomah County program, the elimination one Recreation Coordinator 1 – Adaptive and Inclusive Resources specialty position, and 6,995 hours of seasonal staff work.

Current participants would not be without this service, rather they would be transitioned into programs provided by other service organizations. The Oregon Department of Human Services website lists more than 10 other providers offering Senior Center Project services in Portland. With 30+ days of transition time, participants and their families would have time to transition into programs offered by other service providers.

Equity Outcomes and Impact Tracking

This cut was selected based on the need for efficient use of limited resources. PP&R pays over \$2,500 per participant above the costs reimbursed by the county. It is also staff intensive, requiring 30+ hours of an FTE position’s weekly time in service to 18-21 individuals at any given time, in addition to 6 or more support staff members, running with a 1:4 staff to participant ration - smaller than any other group activity at PP&R. The core purpose for this program of providing day-center type supervision, though valuable to community and the families it supports, is beyond the scope of PP&R’s core services.

The Senior Center Project centers the needs of an underserved section of the population, older adults with physical and intellectual disabilities who need consistent supervision and support; many of whom have limited resources. Participants are referred to the program by Multnomah County when community members reach out for support.

Community Engagement and Empowerment

The Senior Center Project provides direct service to 21 adult-aged individuals with disabilities. Activities are general simple arts & craft activities and runs for 3.5-4 hours per weekday. Participants sign up for 2, 3 or 5 days of the week participation.

Federal Compliance Activities

Senior Center Project recovers a large portion of over-all expenses through a pay for service grant from Multnomah County. As such, it complies with Multnomah County and the State of Oregon’s eligibility requirements for providing day-center services to the aging and disability community.

Budget Concept 26640 - Reduce and Realign Staffing at Multnomah Arts Center	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal would reduce and re-align Multnomah Arts Center (MAC) staffing levels to be consistent with full-service community centers by eliminating 1.0 Rec Leader-Generalist FTE. In addition, 0.5 FTE Facility Tech would be eliminated as that has been absorbed by other staff at MAC and has remained vacant for 2 years. The proposal would also reduce the current scope of work and number of days serviced by PP&R's janitorial contractor.

Service Impacts

The proposal eliminates 1.0 FTE Recreation Leader – Generalist. This position is one of three that provides forward-facing customer service support at MAC. The workload for that position would be distributed to the two other Recreation Leader – Generalist positions. This position is currently temporarily filled.

It also eliminates 0.5 FTE Recreation Facility Tech position. This position assists in providing ongoing customer and facility support including setting up and tearing down equipment, basic equipment and facility maintenance and ad hoc janitorial duties. This position has been vacant for two years and the work has been absorbed by seasonal and other FTE.

The proposal also reduces, by 50%, the services provided by the janitorial contractor.

Impacts include additional workload for current FTE and seasonal employees and reduced cleanliness throughout the facility.

Equity Outcomes and Impact Tracking

This option was chosen primarily to realign MAC staffing levels to mirror those of full-service community centers who took large FTE cuts in 2018. In addition, the 0.5 Facility Tech position has been held vacant for cost savings over the last two budget cycles and the work has been absorbed.

This package aligns with the Recreation Division's guiding principles in that it does not impact programs provided to the public and focuses more on administrative duties that primarily happen behind the scenes.

Community Engagement and Empowerment

The impacts of these cuts will primarily be felt by staff who will be absorbing tasks into their current workloads. Community impact may be felt by slower customer service response time.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Concept 26641 - Peninsula Park Community Center Staffing Reduction and Alignment	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates 1 FTE Recreation Coordinator I-Generalist Position currently assigned to Peninsula Park Community Center. This reduction aligns staffing operation at this community center with the current operation of other neighborhood community centers. This is a full position reduction, retaining partial funding for increased seasonal/casual staffing support which also aligns with other neighborhood centers.

Service Impacts

The elimination of this Recreation Coordinator I – Generalist position from Peninsula Park Community Center reduces the permanent staff providing building operation coverage, and eliminates one of two program coordination positions, which will impact the creation, production and oversight of classes, events and activities offered at this neighborhood center. Programming for the facility will be adjusted to meet the reduced staffing and oversight.

Equity Outcomes and Impact Tracking

This proposal provides staffing alignment of Peninsula Park Community Center (CC) with other PP&R neighborhood centers, currently operating with a single Recreation Coordinator I – Generalist. With this reduction, Peninsula Park CC will also operate with a single Recreation Coordinator I – Generalist on site. Neighborhood sites offer a valuable service to the surrounding communities but provide less programmed services and operate at reduced hours in comparison to the regional centers. A reduction of one position at a Peninsula Park CC, which aligns staffing with other operating neighborhood centers, should result in minimal programming loss. This service change creates equitable oversight and staff across the smaller neighborhood centers, and outcomes from this staff reduction will be tracked through program/service and participation data. Equity in alignment of staffing levels across neighborhood centers is an outcome of this position reduction. Some level of reduction in classes and general services is anticipated through this staff reduction.

Community Engagement and Empowerment

This proposal may impact the services provided at Peninsula Park CC as the position creates, produces and oversees classes, camps, events and services. These responsibilities will be transitioned to the remaining Recreation Coordinator I–Generalist assigned to the Peninsula Park CC. A strategic review of the overall classes and services provided may require a reduction of direct services at Peninsula Park CC. Existing partners, programs, and classes will continue to be provided and supported based on community interest and participation.

Federal Compliance Activities

This reduction is in compliance with state and city policy.

Budget Detail

30000276 - Recreation Coord I-Generalist	(1.00)	(\$65,688)	\$0	(\$48,196)	(\$118,908)
Total	(1.00)	(\$65,688)	\$0	(\$48,196)	(\$118,908)

Budget Concept 26642 - Reduce Funding of Temporary Appointed Recreation Leader (0.33 FTE) for Summer Free Fo

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This package reduces funding for one (of two) 4-month temporary appointed Recreation Leader positions. This position provides preparation and event production support for Summer Free For All (SFFA) Cultural Events. SFFA produces 40 to 50 large-scale cultural events in two months (July & August) every summer. The seasonal Recreation Leaders provide critical on-the-ground program support to ensure smooth operations of events. This would result in 0.33 FTE funding reduction in FY 2026-27.

Service Impacts

The impact of the reduced funding for the 4-month temp appointed Recreation Leader - Generalist (0.33 FTE) would not be felt directly by the public or SFFA's community partners. However, it would increase the responsibility and work of SFFA Event Producers who be required to absorb this work pre-season and in-season.

Equity Outcomes and Impact Tracking

This reduction was selected to minimize direct program impacts. SFFA's program costs are largely made up of staffing costs. The proposal will compromise program delivery and efficiency, but causes the least harm to operations compared to all other positions.

Community Engagement and Empowerment

This proposal should minimally impact direct service experiences of the community. Due to the budget proposal timeline, community engagement did not occur to inform this proposal.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$33,000)
Sum:	\$0	(\$33,000)
Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$33,000)
Sum:	\$0	(\$33,000)

Budget Concept 26643 - Reduce and Align Afterschool Staffing at Peninsula Park and Charles Jordan Community C

Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal eliminates two (2) FTE Recreation Leader–Instructor positions, one at Peninsula Park Community Center and the other at Charles Jordan Community Center. Afterschool programming would continue with program oversight delegated to each center’s Recreation Coordinator–I Generalist. A portion of the savings from each eliminated position will be reserved for staffing these programs with seasonal staff at each location, including 25 Lead Counselor hours weekly and 10 Seasonal Instructor hours weekly.

Service Impacts

The reduction of Recreation Leader–Instructor positions at Peninsula Park Community Center and Charles Jordan Community Center for afterschool programming will not create a service impact to the participant or community. The afterschool programs at Peninsula Park Community Center and Charles Jordan Community Center have decreased in their participation numbers, and the existing afterschool programs at these locations could be equitably served through oversight by the Recreation Coordinator I–Generalist assigned to each center utilizing seasonal staff to staff this afterschool program, as is current practice for many other recreation programs, services and classes offered at community centers.

Equity Outcomes and Impact Tracking

This reduction aligns afterschool programming with other recreation programs offered at community centers. The addition of FTE Recreation Leader–Instructors for afterschool programming was originally the result of increased attendance and participation in the program at these two locations. Over the past years, attendance in the afterschool programs at Peninsula Park CC and Charles Jordan CC has declined, supporting the reduction of the Recreation Leader–Instructor position assigned to each of these programs, using seasonal support staff as is common practice for many other recreation programs. Oversight of program, staff, and curriculum would be transferred to each center’s Recreation Coordinator I–Generalist, with seasonal staff added to work in ratio to support the production of the afterschool program. This efficiency would not result in any service impact to the afterschool program participants or community.

Tracking outcomes will be done through participation and attendance.

Community Engagement and Empowerment

This program involves direct services to the community through program staffing changes, however there is no service impact to participants as a result of this proposal.

Federal Compliance Activities

This proposal aligns with federal, state and city laws and policies.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost

Sum:	\$0	(\$120,250)

Position Detail

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30002408 - Recreation Leader-FT-Instructor	(2.00)	(\$106,745)	\$0	(\$88,822)	(\$203,731)
Total	(2.00)	(\$106,745)	\$0	(\$88,822)	(\$203,731)

Budget Concept 26644 - Summer Free For All Free Lunch + Play Program Reduction	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This proposal eliminates one (1) Free Lunch + Play site (out of 23 sites total), two (2) Fleet vehicles, and reduces funding for one (1) 3-month Recreation Leaders (.25 FTE). This program provides free lunches and play activities for kids in low-income neighborhoods.

Service Impacts

The Free Lunch + Play (FL+P) program operates every weekday at 23 park sites across the City all summer long. It is one the largest hunger relief providers for kids when school is out of session. In 2025, the program served 55,435 meals. The program can only be sited in neighborhoods where 50% or more of the kids qualify for free or reduced school lunches. Eliminating one park site will mean that one community will lose access to daily lunches for kids in the summer.

Each park site is run by 2-4 seasonal staff (often youth in their first jobs) who distribute meals and provide activities for kids, without an onsite supervisor. Recreation Leaders drive from site to site to provide critical on-the-ground support to the approximately 100 onsite seasonal staff with operational needs including meal or supply shortages and safety issues. Reducing funding of one Recreation Leader position will compromise support for on-the-ground staff.

Reducing funding for a Recreation Leader position would mean one less Fleet vehicle would be needed. This package also eliminates a second Fleet vehicle used by the program Supervisor, who would instead use their personal vehicle to perform their duties across 23 sites citywide.

This reduction would decrease meal service to families experiencing food insecurity and compromise staff supports and efficiencies.

Equity Outcomes and Impact Tracking

The Free Lunch + Play budget is largely comprised of direct program expenses and staffing costs. Additional reductions would impact PP&R's ability to serve meals and provide enrichment activities. Any reductions in program budget, positions, or funding will decrease meal service to food insecure children, reduce direct program activities and compromise the supports for FL+P's approximately 100 seasonal staff.

Community Engagement and Empowerment

Community opposition is likely in the neighborhood where the eliminated site is cut.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Personnel	\$0	(\$52,000)
Sum:	\$0	(\$67,000)
Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$67,000)
Sum:	\$0	(\$67,000)

Budget Concept 26645 - Reduce Staffing and Care of Natural Areas and Trails	
Budget Concept Type	Magnitude
Reduction	3% Reduction

Package Description

This proposal eliminates 2.0 FTE Natural Areas positions (Botanic Technician Trainee and Botanic Technician I), reduces External Materials and Services (EMS) for routine maintenance of 8,000 acres of natural areas and 120 miles of soft surface trails, and eliminates funding for large-scale trash and vandalism cleanup in natural areas and on regional trails.

Service Impacts

"This proposal eliminates two Natural Area program positions and reduces EMS by 10%. It eliminates funding for large scale trash and vandalism clean up, which address the ecological impacts of unsanctioned camping in natural areas and regional trails.

Eliminating the Botanic Technician Trainee position reduces vegetation management along trails, wildfire fuels reduction, and post-storm recovery to restore safe public use. Without this position, routine stewardship and post-storm cleanup will be slower and more limited in scope, resulting in longer recovery times after storms, less fuels reduction, and a less consistent on-the-ground presence in natural areas. The position also supports Emerald Ash Borer (EAB) response, including survey support, follow-up stewardship, and assistance with hazard mitigation. This reduction will further limit proactive response to EAB-related safety concerns.

Eliminating a Botanic Technician I position reduces proactive and technical natural area maintenance and trail work. This includes invasive plant removal, drainage improvements, erosion control, tread repair, and early intervention on emerging trail safety issues, as well as post-storm assessments and repairs needed to reopen trails. This reduces PP&R's ability to maintain natural areas and trail conditions that visitors consistently identify as important for safe, comfortable, and reliable access, including timely drainage repairs, tread stabilization, and early intervention before minor issues become larger safety concerns.

The 10% EMS reduction further constrains purchase of materials, contracting for specialized work, and response to unplanned site needs. This reduces flexibility to address trail issues, vegetation management, post-storm impacts, and site-specific concerns in a timely manner. Community members may experience natural areas and soft-surface trails as less predictable and less consistently maintained, with more frequent minor obstructions, overgrown vegetation, and delayed trail reopenings following storms."

Equity Outcomes and Impact Tracking

"This reduction will slow progress on priority natural area work. Over time, deferred maintenance and reduced field presence increase the likelihood of larger, more costly issues in natural area maintenance, trail conditions, visitor safety, and ecological health, shifting work toward reactive response and limiting the ability to prevent problems early. This reduction also limits capacity to proactively respond to emerging climate pressures such as invasive pests like the EAB, storm-related damage, and climate-driven impacts, increasing reliance on delayed or partial responses that affect access, safety, and long-term stewardship of natural areas.

The proposal prioritizes maintaining core access to natural areas while reducing staffing and operational capacity. While this approach preserves basic public access, it shifts natural area management toward a more reactive posture and increases long-term risk to assets and service quality.

Access, safety, and stewardship outcomes are tracked through visitor feedback and reported maintenance or safety concerns; staff observations and assessments of trail condition, weedy vegetation encroachment, and post-storm impacts; backlog for trail maintenance, storm recovery, and hazard mitigation; asset condition assessments; episodic trail counters estimating user numbers; ecological records related to invasive species control, fuels reduction, and habitat condition. Outcomes are identified through Natural Areas Standards of Care, ADA requirements and Trails standards, the 2025 Parks Levy commitments, and Healthy Parks, Healthy Portland (HPHP), which establish expectations for stewardship of natural areas, hazard reduction, climate resilience, and safe, reliable access to trails. This proposal reduces the capacity and ability to deliver on those expectations and meet HPHP and Parks Levy outcomes for natural area management."

Community Engagement and Empowerment

"This proposal reduces capacity for direct natural area maintenance and services that support community use of and safe, sustainable access to natural areas. It limits the ability to provide timely maintenance, post-storm recovery, and visible stewardship that support safe and welcoming public use of natural areas. It also eliminates funding used to remove large trash and vandalism impacts, leading to more persistent site hazards, degraded visitor experience, and increased strain on remaining staff responding to unsafe conditions.

Impacts from this proposal will be experienced systemwide, particularly by people who regularly use natural area access points, soft-surface trails and nearby parks for walking, recreation, and connection to nature.

Community needs related to natural areas were identified through City Nature visitor feedback, prior engagement efforts, and the Community Needs Survey. These inputs consistently indicate that community members value safe and reliable access to natural areas, timely response to hazards and storm impacts, and visible stewardship that supports comfort and confidence while using trails and natural areas. Respondents from the 2024 Community Needs Survey (CNS) ranked ""Trees with shaded areas"" and ""Natural areas with native plants and habitat"" as the first and second most important park features. Additionally, 82.2% of respondents ranked the quality rating for natural areas was Good or Excellent.

Existing visitor feedback, prior engagement efforts, and the CNS were used to understand community priorities related to natural areas. HPHP also informed how reductions in capacity may affect community experience. No new community plans or engagement processes were undertaken as part of this proposal."

Federal Compliance Activities

"The Natural Areas program complies with a complex regulatory framework that includes federal, state, and local environmental and land use requirements. These include protections for regulated habitats and species, wetlands and waterways, environmental overlay zones (conservation and protection zones), erosion and stormwater controls, terms of conservation easements, and trail design and maintenance standards intended to minimize impacts to natural resources. It includes tree maintenance consistent with Title 11, Title 33, and Natural Areas Standards of Care. Compliance with these requirements relies not only on project review and permitting, but on ongoing field-based stewardship, maintenance, and monitoring.

This proposal does not remove or alter City Nature’s regulatory obligations. However, reductions in staffing and EMS reduce the natural areas staff’s capacity to proactively implement stewardship and maintenance practices that support compliance. Decreased field capacity may result in slower response times to storm damage, drainage failures, vegetation impacts, and trail safety concerns. Over time, this increases reliance on reactive responses and limits the ability to address issues early, raising the likelihood that small problems escalate into compliance risks when impacts to regulated resources are harder to avoid. "

Budget Concept 26646 - Reduce Horticulturalists and Green Asset Maintenance in Developed Parks	
Budget Concept Type	Magnitude
<i>Reduction</i>	<i>10% Reduction</i>

Package Description

This proposal eliminates 9.0 FTE and decreases maintenance and management of green assets in parks. The proposal eliminates eight Horticulturist positions responsible for the maintenance of plants, shrubs, and trees in parks landscaped areas. It eliminates the Horticulturist Trainee position, from the Nature Patch/Ecologically Sustainable Landscape Initiative, that assists with horticultural maintenance of nature patch plantings, stormwater maintenance projects, and volunteer coordination. Plant material budget will be reduced, limiting replacement plantings, response to changing site conditions, and the adoption of landscape standards across developed parks.

Service Impacts

"This proposal eliminates eight developed park Horticulturist positions responsible for maintaining landscapes, gardens, and green spaces in developed parks. Reduced staffing will lower service for plant and shrub care, watering and irrigation repairs, pruning and planting, and weeding and leaf removal—shifting work from preventative to reactive maintenance. Park users may experience increased overgrown vegetation, declining plant health, reduced visual quality of landscaped and lawn areas, and elevated safety risks associated with unmanaged vegetation. Volunteer opportunities in parks will be reduced, as Horticulturists are the primary coordinators of volunteer work in developed parks.

The elimination of the Horticulturist Trainee position will reduce PP&R's ability to care for Nature Patch landscapes and provide meaningful, entry level field-based positions. Nature Patches are installed in neighborhood parks to bring access to native plants, native pollinators, and stewardship opportunities within easy access of all Portlanders. Elimination of this position means park users may experience increased overgrown vegetation, declining plant health, reduced access to nature, and potential safety concerns associated with unmanaged vegetation. Additionally, opportunities to engage volunteers in this work will be reduced with the elimination of this position, approximately 475 volunteer hours annually.

This proposal reduces funding for plant materials used by developed park Horticulturists. Without sufficient plant budget, failed or declining plant material will not be replaced in a timely manner, resulting in visible gaps in plantings, reduced seasonal interest, and an overall decline in landscape quality. The public may perceive parks as less well-maintained as landscape standards cannot be consistently met. "

Equity Outcomes and Impact Tracking

"These reductions prioritize preservation of core safety, cleanliness, and access functions. While horticultural landscapes and green assets provide significant environmental, climate resilience, ecological, and aesthetic benefits, reductions in this area are anticipated to have a less immediate effect on park access than reductions in core operations such as restroom cleaning, trash removal, or facility safety. However, this proposal may result in longer-term declines in landscape health, user experience, and environmental performance.

PP&R uses Level of Service assessments, maintenance frequency standards, asset condition data, work order completion rates, volunteer participation hours, and community and staff surveys to track program access and service outcomes.

Collectively, these reductions negatively impact PP&R's ability to support ecological health, community engagement, climate resilience, and routine maintenance. PP&R's Level of Service report recommends providing access to a natural area within two miles of every residence. Nature Patches address gaps in natural area access within neighborhood parks. Eliminating the Horticulturist Trainee from the ESLI program will eliminate progress towards this goal."

Community Engagement and Empowerment

"This proposal reduces direct services, programming, and resources provided to community members through direct landscape maintenance services, Nature Patch maintenance and stewardship, volunteer opportunities, and investment in park landscapes and plants.

This proposal affects all users of PP&R facilities with landscaped areas, as it reduces the level of horticultural services provided across the park system. Impacted groups include daily park users and visitors, as well as community members and volunteers who participate in Nature Patch stewardship and environmental education activities.

The 2024 Community Needs Survey (CNS) ranked trees or shaded areas, natural areas with native plants and habitat, and open grass fields as the top three neighborhood park features. Natural areas with native plants and habitat—the second-ranked priority—reflect strong public interest in access to ecological landscapes that support wildlife, pollinators, and opportunities for environmental engagement. Proposed reductions to staffing and plant materials will limit the bureau's ability to maintain these natural areas, reducing residents' access to well-maintained, ecologically rich park spaces.

Due to the budget process and timeline, community was not involved in drafting the budget reduction cut package. Responses from the CNS were considered when developing this proposal. "

Federal Compliance Activities

"Horticulturists in the Land Stewardship Division provide oversight for vegetation stewardship and stormwater management within a regulatory framework that includes federal, state, and local environmental and land use requirements. It also includes the Programmatic Permit for tree maintenance consistent with Title 11 and PP&R's Developed Parks Maintenance Best Practices.

This proposal does not remove or alter PP&R's regulatory obligations. However, reductions in staffing and plant material budgets reduce staff's capacity to proactively implement stewardship and maintenance practices that support compliance. "

Budget Concept 26647 - Reduce Volunteer Coordination and Increase Fees for Community Gardens	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

"Thie proposal eliminates 1.0 Community Gardens FTE focused on recruiting, training, and supporting volunteer garden leaders to support community garden operations, and increases plot fees paid by gardeners.
"

Service Impacts

"This proposal eliminates one Botanic Specialist I position that recruits, trains, and supports volunteer garden leaders who support community garden operations. This eliminates one of two positions charged with volunteer leader recruitment, training, and coordination. The current programmatic operational model relies on volunteer leaders recruited from each garden to organize garden clean-up days, welcome and support new gardeners, share information and updates from program staff, and report garden maintenance, safety, and resource needs to staff. Currently 47 of 61 Community Garden sites have volunteer garden leadership teams.

The proposal also increases fees for individual community garden plot rentals by 20%. This may result in a greater percentage of gardeners using the Access Discount to reduce cost.

Gardeners may experience a reduced feeling of belonging and connection without dedicated volunteers to facilitate community building activities and communication. Garden and park users may experience an overall decline in the appearance and quality of community gardens. Reduced volunteer-led clean-up events and coordinated reporting of maintenance needs will lead to more unmanaged vegetation, accumulated debris and garbage, and slower response to repair needs, creating a perception that gardens are less well-maintained over time. Gardeners provide about 19,000 hours of service annually and donate over 27,000 pounds of produce to the emergency food system through the Produce for People Program."

Equity Outcomes and Impact Tracking

"This proposal preserves core services, eliminating additional services that enhance inclusion and participation, while still enabling the program to meet minimum legal requirements.

The program tracks demographic data for gardeners and individuals on garden waitlists and uses data to inform decisions such as translation services. Information on participants receiving discounted plot fees helps determine the allocation of resources such as free compost or garden tools. We expect to see a decline in volunteer leadership in general due to the reduction of staff support, and likely a greater decline from members of immigrant and refugee communities and other communities with a history of disenfranchisement from civic participation.

This proposal does not advance maintenance of gardens, community engagement and civic connections, employee safety, and all people feeling welcome in community gardens. "

Community Engagement and Empowerment

"This proposal reduces direct services, programming, and resources for community. It reduces staff time to recruit, train, coordinate, and mentor garden leaders who support community members, act as the liaison between gardeners and staff, help new gardeners integrate into the community, and educate gardeners on program rules and community involvement. Registered gardeners using the 2,919 garden plots will be impacted by the lack of garden leadership at their site.

The proposal increases fees for individual community garden plot rentals by 20%. Currently 30% of garden participants use the Access Discount to reduce plot cost. We anticipate the fee increase will also increase the number of people who use this discount.

The Community Gardens Program operates with community members and partners as essential components of the service delivery model. New gardens are developed in direct response to community demand and in collaboration with community-based organizations. Due to the budget process timeline, community was not involved in drafting the proposal."

Federal Compliance Activities

This proposal would make it more difficult to achieve the Mayor's Budget Guidance and 2025 Parks Levy commitments. This proposal does not conflict with City of Portland, Oregon State, and Federal legal requirements.

Total	(1.00)	(\$79,446)	\$0	(\$52,477)	(\$138,001)

Budget Concept 26648 - Reduce Mowing in Parks	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates 1.0 FTE in the Turf workgroup, reducing capacity to mow PP&R turf areas, leading to taller grass, overgrown and uneven, grass, accumulated clippings, and reduced visual quality in passive and non-permitted turf areas.

Service Impacts

Eliminating 1.0 FTE in the Turf workgroup will reduce PP&R’s ability to mow turf areas across Portland, particularly affecting passive and non-permitted spaces. Turf in these areas will grow taller between mowings, which will increase labor time, accelerate turf decline, stress root systems, and increase weed encroachment. Once mowed, turf areas will accumulate clippings, creating less aesthetically appealing and less comfortable spaces for public use. While sports fields and permitted areas will continue to be mowed to maintain safety and usability standards, the visual quality, accessibility, and general recreational experience in passive areas will be noticeably degraded. This reduction will compromise the public’s perception of park maintenance, reduce overall community satisfaction, and create long-term maintenance challenges that could require additional resources in the future to restore turf health and appearance.

Equity Outcomes and Impact Tracking

"This reduction was submitted as a proposal that less directly affects safety and permitted recreation. Maintaining mowing FTEs is critical to preserve routine care, prevent turf decline, and avoid creating long-term operational challenges that could ultimately cost more in repairs and restoration.

Outcomes are tracked with mowing schedules, field inspections, park reviews, and public feedback to evaluate operational effectiveness. Eliminating this position would hinder PP&R’s ability to maintain high-quality, safe, and accessible turf areas, particularly in passive and non-permitted spaces, and would represent a step back from the Service Area’s goal of equitable, well-maintained recreational spaces.

Reducing mowing will disproportionately affect passive and non-permitted areas, which are free and heavily used by families, children, and informal recreation users, creating inequitable access to well-maintained park spaces. This proposal will result in turf decline and visual degradation. "

Community Engagement and Empowerment

"This proposal reduces direct services as routine mowing directly supports public access to safe, usable, and aesthetically maintained turf areas across Portland. Reducing this service diminishes the quality and usability of these public spaces. Passive and non-permitted areas will be most affected, potentially impacting broad public use of parks citywide.

Community needs were identified through the surveys, user feedback, and ongoing maintenance priorities. Open grass areas were rated as a top three most important park feature in the 2024 Community Needs Survey.

Due to the budget process and timeline, community engagement was not conducted in the development of this proposal. "

Federal Compliance Activities

This proposal preserves compliance with safety and accessibility standards for permitted fields. Reducing mowing in passive areas will not violate legal requirements but will degrade the quality of public amenities.

Budget Concept 26649 - Core Services Realignment	
Budget Concept Type	Magnitude
Reduction	Current Level of Service

Package Description

This proposal is a placeholder for reductions associated with Core Services Realignment. Per City Budget Office (CBO) Director Levine's 12/8 email, PP&R and Public Works Business Services (PWBS) should expect that a portion of the \$8.1 million General Fund reduction target allocated to PP&R/PWBS will be addressed by the Core Services Realignment. Director Levine concurred with PP&R's estimate of that reduction using the 'Enterprise Efficiency Cuts by Bureau' spreadsheet that was provided by CBO.

Service Impacts

Impacts will be highly dependent on the choices made by the Core Services Realignment project team. They are unknown to bureaus at the time of this writing.

Equity Outcomes and Impact Tracking

Impacts will be highly dependent on the choices made by the Core Services Realignment project team. They are unknown to bureaus at the time of this writing.

Community Engagement and Empowerment

Budget Concept 26656 - Eliminate 2FTE , Seasonal Park Rangers and Reduce Contract Security Services	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates (1) of five Park Ranger Supervisor position, reducing oversight of field operations and capacity for planning and follow up coordination. It eliminates (1) Water Securities Specialist that prevents theft and vandalism at priority maintenance facilities. The proposal reduces Park Ranger Seasonal positions to 29, limiting PP&R’s ability to respond to public safety incidents, patrol, and support first responders. The proposal also reduces budget to contract security services at maintenance sites.

Service Impacts

"Reducing budget to contract security services at select maintenance sites compromises the protection of park assets. This limits response to large-scale theft and vandalism and reduces the number of priority locations. It reduces visible security presence at maintenance sites, increasing vulnerability at locations with high theft rates.

Eliminating (1) of five Park Ranger Supervisors would reduce Park Ranger effectiveness and accountability. This elimination reduces oversight of field operations and the ability to strategically deploy Rangers. The loss of this position would also reduce capacity for coordination and planning with maintenance crews, first responders, and community partners, as well as for timely follow-up with the Code Hearings Office to ensure violations are properly documented, enforced, and upheld.

Reducing (1) Water Security Specialist would eliminate the City’s ability to be present at maintenance sites and compromise the capacity to protect park assets. This reduction would limit efforts to prevent theft and vandalism and reduce coverage at priority maintenance facilities that require a 24-hour security presence. The loss of a visible security presence at maintenance sites like Mt. Tabor Yards would increase vulnerability at locations that already experience high levels of theft.

Eliminating Seasonal Park Rangers would compromise park safety. It limits response to public safety incidents, reduces priority patrols, and hinders support for first responders across the city. Eliminating Seasonal Park Rangers leaves only 29 permanent Park Rangers to cover more than 12,000 acres of PP&R property. It limits Title 20 enforcement and diminishes visible safety presence. "

Equity Outcomes and Impact Tracking

"This reduction was selected because is least impactful to safety oversight, regulatory compliance, and the continuity of citywide programs, while avoiding reductions that would significantly increase the City’s liability.

With program software such as Quick Capture and Mark43, PP&R can track program data daily, weekly, monthly, quarterly, and annually.

This proposal does not represent progress toward PP&R and Service Area outcomes for community. "

Community Engagement and Empowerment

"Reducing seasonal Park Ranger capacity would directly affect neighborhood safety. It would also hinder the PP&R’s ability to fulfil 2025 Parks Levy commitments for park safety patrols, which could erode public trust. With only 29 permanent Park Rangers overseeing more than 12,000 acres PP&R property, this reduction would severely limit enforcement of Title 20, reduce proactive patrols, and weaken the visible safety presence that helps keep parks welcoming, safe, and accessible.

The reduction in seasonal Park Rangers would affect the program’s ability to uphold the “Community Engagement” framework, which helps everyone in parks feel welcome. This includes reduced capacity to participate in community and city events. Community was not involved in the development of this proposal due to the budget timeline. Existing plans and surveys such as the PP&R Employee Survey, Employee Development Survey, and 2024 Community Needs Survey were considered. "

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Detail

100 - General Fund

Expense	One Time Cost	Ongoing Cost

Budget Concept 26660 - Reduce Care of Athletic Fields	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates a Turf Maintenance Technician (1.0 FTE) and reduces the External Materials and Services (EMS) budget for turf maintenance on athletic fields. These fields are highly used by the public, including for permitted sports. Decreased staff capacity and reduced EMS funding will mean less preventative care, thinner turf coverage, increased compaction, slower recovery from play, and declining field quality.

Service Impacts

The elimination of the tractor-based Turf Maintenance Technician position and the reduction in the turf maintenance EMS budget will reduce PP&R's ability to perform essential turf health maintenance on athletic fields. The position currently performs all tractor-based turf operations for athletic fields, including aeration, overseeding, fertilization, topdressing, rolling, and verti-cutting. These practices are critical to maintaining safe, durable, and high-quality playing surfaces. With fewer staff and reduced funding for fertilizer and seed, athletic fields will receive less preventive care, resulting in thinner turf coverage, increased compaction, slower recovery from play, and declining field quality. While weekly mowing of athletic fields will continue, overall turf health and playability will decline over time.

Equity Outcomes and Impact Tracking

"This reduction was selected due to limited operational flexibility. All remaining Turf Maintenance Technicians are assigned to weekly mowing routes that are necessary to maintain baseline service levels and ensure athletic fields remain usable. Reassigning or eliminating those other positions would result in immediate and highly visible service failures, including missed mowing cycles and unsafe playing conditions. The selected position is the only position not assigned to weekly mowing and is the only reduction that does not immediately disrupt baseline operations. Similarly, the reduction to EMS —used to purchase fertilizer, seed, and other essential turf inputs—was selected because it is one of the few discretionary funding areas available. While this reduction directly impacts turf quality and long-term field health, it avoids more immediate and disruptive impacts to core athletic field maintenance functions.

Reduced athletic field maintenance may disproportionately affect communities with limited access to alternative athletic facilities.

Intended outcomes are identified through PP&R maintenance standards for athletic fields. Turf quality is evaluated through routine park reviews that rate overall field condition, turf density, and playability, as well as work order records, materials tracking, and maintenance logs, including the number of athletic fields treated and the acreage fertilized or seeded. User group permit data is used to track field demand and intensity of use, while field closure records document impacts to access. Qualitative feedback is also gathered through user complaints and service requests, which provide insight into user experience and perceived field safety.

This proposal does not represent progress toward intended outcomes related to providing safe, high-quality, and equitable athletic fields.

Community Engagement and Empowerment

"This reduction affects anyone who uses or permits PP&R-maintained sports fields, including youth and adult sports participants, schools, leagues, and community organizations. The reduction would affect all users by decreasing field quality, limiting turf recovery, and increasing the likelihood of field restrictions or closures.

Community needs related to athletic field quality and availability have been identified through multiple sources, including field permitting data, coordination with sports organizations, customer service requests, ongoing operational experience, and results from community needs surveys. These sources provide insight into demand for athletic fields, field condition expectations, and priorities for safe and playable turf, which help inform the impacts of this proposed reduction.

No, due to the budget process timeline, community was not involved in drafting the reduction package. Existing Parks athletic field standards, park review data, and prior engagement with sports organizations indicate strong demand for safe, well-maintained athletic fields and help contextualize the impacts of the proposed reduction.

Federal Compliance Activities

N/A - this proposal does not conflict with City of Portland, Oregon State, and Federal requirements.

Budget Concept 26664 - Reduce Support of Green Assets in Parks and Ecologically Sustainable Landscape Initiative

Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates 4.0 FTE and decreases maintenance and management of green assets in parks. Two horticulturist positions that maintain plants, shrubs, and trees in parks landscaped areas, and increase safety concerns associated with unmanaged vegetation will be eliminated. It reduces plant material budgets that replace failed plantings, respond to changing site conditions, and maintain adopted landscape standards across developed parks. The proposal reduces materials and supplies and postpones the replacement of the central irrigation control platform, reducing water-use efficiency and increasing long-term maintenance needs for the irrigation system that supports vegetation. The proposal eliminates two positions on the Nature Patch/Ecologically Sustainable Landscape Initiative, reducing or eliminating nature patch maintenance, stormwater maintenance projects, volunteer coordination, and public-private partnership deliverables.

Service Impacts

"This proposal eliminates the Ecologically Sustainable Landscape Initiative (ESLI) Coordinator (1 FTE) and a Horticulturalist Trainee position (1 FTE). These positions are responsible for designing, installing, and supporting maintenance of "Nature Patches," spaces for people and volunteers to explore and interact with nature, support native pollinators, increase soil and plant health, and decrease maintenance inputs. Nature Patches are installed and maintained in collaboration with staff, community groups, City bureaus, and volunteers and provide access to native plants, pollinators, and stewardship opportunities. Eliminating these positions may cause increased overgrown vegetation, declining plant health, reduced access to nature, reduced volunteer opportunities, and potential safety concerns associated with unmanaged vegetation. This proposal reduces PP&R's ability to care for Nature Patches and provide meaningful, entry level field-based positions for staff. Productivity in developed park maintenance will be reduced as resources are needed to care for Nature Patches. Additionally, volunteer engagement in this work will be eliminated, approximately 475 volunteer hours annually. Visitors may perceive these areas as less welcoming or actively managed, reducing effectiveness as neighborhood nature spaces.

This proposal reduces funding to purchase irrigation components and repair parts, limiting completion of timely irrigation repairs. PP&R's Central Irrigation Control platform needs replacement. Park users may observe stressed or failing plant material, dry or overwatered landscape areas, brown or dying turf and plants, and increased irrigation system outages. Deferred irrigation maintenance will reduce overall system efficiency and contribute to long-term landscape decline in developed parks.

This proposal reduces funding for plant materials used by developed park Horticulturists. Without sufficient plant budget, failed or declining plant material will not be replaced in a timely manner, resulting in visible gaps in plantings, reduced seasonal interest, and an overall decline in landscape quality. The public may perceive parks as less well-maintained as landscape standards cannot be consistently met.

This proposal eliminates two developed park Horticulturist positions (2 FTE) responsible for maintaining all landscape plantings in developed parks. Reduced staffing will lower service frequencies, shift work from preventative to reactive maintenance, and delay corrective actions. Park users may experience increased overgrown vegetation, declining plant health, reduced visual quality of landscaped areas, and potential safety concerns associated with unmanaged vegetation. Reduced service will lead a perception that parks are less well-maintained over time."

Equity Outcomes and Impact Tracking

"These reductions were proposed to prioritize preservation of core safety, cleanliness, and access functions. While horticultural landscapes and green assets provide important environmental, climate resilience and aesthetic benefits, reductions in this area are anticipated to have a smaller immediate impact on basic park access compared to reductions in core operations such as restroom cleaning, trash removal, or facility safety.

PP&R uses Level of Service assessments, maintenance frequency standards, asset condition data, work order completion rates, volunteer participation hours, and community and staff surveys.

These reductions will affect programs and services that support equitable access to healthy, well-maintained park landscapes. Reduced funding for irrigation and horticultural maintenance, combined with the elimination of key positions, will limit PP&R's capacity to care for green assets. As a result, residents—particularly those in historically underserved communities—may experience decreased access to high-quality green spaces, ecological learning opportunities, and community stewardship programs.

PP&R's Level of Service report recommends providing access to a Natural Area within 2 miles of every residence. Nature Patches provide opportunities to address gaps in access to natural areas within neighborhood parks. Elimination of the staff in this proposal will negatively impact PP&R's ability to achieve priority outcomes. In addition, it will reduce our ability to meet Parks Levy commitments related to routine maintenance, natural area quality, and partnerships."

Community Engagement and Empowerment

"This proposal reduces direct services, programming, and resources to community members. Reduced irrigation services limit health and quality of green spaces used by the public. Reduced plant budgets constrain maintenance and visually appealing green spaces for community. Eliminations of horticulturalists and ESLI positions reduce maintenance and stewardship of developed parks, volunteer and environmental education opportunities, and community engagement in natural areas.

This reduction affects all users of PP&R properties with landscaped areas, as it reduces the level of horticultural and irrigation services provided across the park system. It also impacts community members who participate in Nature Patch stewardship at 26 sites citywide, as well as neighborhood groups, schools, and community organizations that partner with PP&R to support landscape stewardship.

Community needs were identified through the 2024 Community Needs Survey (CNS), which ranked trees or shaded areas, natural areas with native plants and habitat, and open grass fields as the top three neighborhood park features. Natural areas with native plants and habitat—the second-ranked priority—reflect strong public interest in access to healthy ecological landscapes. The ESLI and Nature Patches directly address this priority. Proposed reductions to staffing, plant materials, and irrigation funding will limit PP&R’s ability to maintain these natural areas, reducing residents’ access to well-maintained, ecologically rich park spaces.

Community was not involved in drafting the reduction package. Each Nature Patch is designed, installed, and maintained with support from neighbors and community groups such as neighborhood associations and nearby schools. With limited runway time, these partners were not engaged in the development of this proposal.

Responses from the CNS were considered when developing this budget reduction proposal. While community feedback helped inform the context of this proposal, no additional outreach or engagement with residents or partner organizations was conducted specifically for these reductions. These reductions are not aligned with outcomes from the CNS and the 2022 Level of Service Guidance study, both of which included community engagement and prioritized access to natural areas."

Federal Compliance Activities

The proposed reduction to the Irrigation EMS impacts funding used to purchase parts for irrigation backflow preventers. PP&R tests over 700 backflows annually, as required by the Oregon Health Authority. Any backflow that does not pass testing must be repaired and retested until it passes, using parts funded through this EMS. While these repairs are mandatory for regulatory compliance, reductions to the EMS may limit PP&R’s ability to fund other irrigation system repairs across the park system, potentially affecting system-wide landscape performance.

Budget Detail

30002503 - Horticulturist-CL	(1.00)	(\$74,370)	\$0	(\$50,917)	(\$130,976)
Total	(2.00)	(\$140,306)	\$0	(\$99,239)	(\$250,278)

Budget Concept 26666 - Reduce Use of Water on Passive Turf	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal reduces the water budget for passive turf areas by \$200,000, which will reduce irrigation amounts and require adjusting watering schedules.

Service Impacts

"The proposal decreases watering by two days per week, reducing irrigation of passive turf areas by approximately 40 percent.

By concentrating the reduction of resources on passive turf areas, this change preserves the appearance and quality of sports fields and recreational turf areas and the use of water for splash pads.

Overall, the short-term impacts are expected to be primarily aesthetic, with core services, safety, and access to public spaces maintained, but with a diminished quality of experience.

Service impacts include visibly degraded turf conditions in picnic areas and around trees, and potential long-term turf or plant loss in affected park areas. In some locations, reduced irrigation may result in permanent turf loss or damage to landscaped areas, requiring future restoration if funding becomes available.

Equity Outcomes and Impact Tracking

"The anticipated outcome is reduced operational spending related to water usage while maintaining core services. This reduction is expected to impact park conditions, including potential loss of turf and plant materials, and reduced recreational opportunities for the public.

This reduction was selected because it focuses on passive turf irrigation rather than staffing levels, safety-related maintenance, or high-use active recreation areas. This option is less disruptive than alternative reductions.

While passive turf areas are valued by the community, they were identified as areas where immediate operational savings could be achieved to avoid position reductions that perform critical and high-need duties in parks. This option was put forward to help retain staff and minimize impacts to other essential park services and facilities.

Reduced irrigation of passive turf areas may disproportionately affect communities that rely on free, publicly accessible parks for recreation. Reduced irrigation may also result in uneven park conditions across the system, with visible turf and plant loss potentially more pronounced in areas with fewer resources or limited alternative park options nearby. This proposal may increase disparities in park experience and access and does not advance equity-related goals for community health, recreation, or climate resilience. Equity considerations are addressed by applying service reductions consistently across passive turf areas while prioritizing high-use and safety-sensitive locations. PP&R will continue to monitor impacts through service requests and condition assessments to ensure disproportionate impacts are minimized.

Program access and service outcomes are tracked through Park Reviews documenting turf and plant condition; feedback from staff regarding site conditions and usability; flow sensor data that records irrigation water use and irrigation schedules; service requests, complaints, and public inquiries; and historical usage estimates for park areas."

Community Engagement and Empowerment

"This proposal does not include new or expanded direct services, programming, or resources for the community. It impacts the maintenance level of existing public spaces.

The proposal affects users of public turf and landscaped areas citywide, including residents, visitors, and park users, particularly those using open grassy areas for informal activities. While exact numbers are not tracked, these spaces serve thousands of community members annually.

Community needs were identified through multiple sources, including results from the Community Services Needs Survey, service requests, and 311 complaints. Open grass areas were rated among the top three most important park features in the 2024 Community Needs Survey, informing the prioritization of maintaining safe, functional spaces.

Due to the budget development timeline,?additional?community or community-based organization engagement was not conducted for this proposal.? While this proposal does not include new community engagement activities, it draws on past engagement and aligns with existing PP&R practices. It maintains access to essential services and publicly accessible spaces, ensuring that the community continues to benefit from safe, functional park and landscape areas. "

Federal Compliance Activities

"This proposal complies with all applicable Federal, State, and City laws and policies. Reductions do not affect ADA accessibility, safety standards, or regulatory maintenance requirements."
"

Budget Detail		
100 - General Fund		
Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$200,000)
Sum:	\$0	(\$200,000)
Revenue	One Time Cost	Ongoing Cost
General Fund Discretionary	\$0	(\$200,000)
Sum:	\$0	(\$200,000)

Budget Concept 26667 - Reduce Care of and Increase Fees for Community Gardens	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates 1.0 FTE in the Community Gardens workgroup that coordinates with schools, teen employees, and volunteers and reduces funding for a part-time Seasonal Maintenance Worker supporting the Native Gathering Garden. The proposal eliminates portable toilets and yard waste disposal in community gardens and eliminates contracted orchard care. It reduces funding for asset repairs and replacement and eliminates funding for proactive ADA accessibility improvements. It also increases plot fees paid by gardeners.

Service Impacts

"This proposal eliminates one Botanic Specialist I position, reducing volunteer and partner coordination and capacity to host interns and a Youth Conservation Crew. The proposal also eliminates a part-time Seasonal Maintenance Worker supporting seasonal tending and events at the Native Gathering Garden. Garden users may experience slower response to replacement of assets like storage sheds and raised and will experience fewer opportunities for education and resource support for volunteer stewardship of gardens.

The proposal eliminates funding for systematic, proactive ADA accessibility improvements to gardens, and preserves only a small amount for responses to complaints or specific accommodation. It reduces funding for garden repairs and replacements and ability to respond to unexpected needs. The proposal eliminates portable toilets in gardens where public toilets are not readily accessible, making gardens less accessible to people who need restroom access and increasing likelihood of human waste deposited in undesired places. Regular yard waste pick-up will be eliminated, resulting in accumulating debris for staff to remove, increasing potential injuries, and rodent habitat. Elimination of contracted orchard care services reduces the health of the trees and amount of fruit that is edible and donated, increases spoiled fruit drop, attracts rodents, and increases maintenance time.

Fees for individual community garden plot rentals will be increased by 20%. This may result in a greater percentage of gardeners using the Access Discount to reduce the cost of their plot.

Park users may experience an overall decline in the appearance and quality of community gardens across developed parks and orchards. Reduced service frequencies will lead to more unmanaged vegetation, and fewer proactive improvements, creating a perception that gardens are less well-maintained over time."

Equity Outcomes and Impact Tracking

"This package attempts to preserve core services – providing access to land for gardening to people in Portland – but eliminates additional services that reduce barriers to participation. It retains responsibility to meet minimum legal requirements.

The program tracks demographic data for individuals on the waitlist for each garden and assigned garden uses. Data informs program operational decisions. For example, staff provide proactive language access services based on reported preferred language and provide yard waste disposal service to gardens when a high percentage of participants live in apartments which lack yard waste service. The program uses information on number of participants receiving discounted plot fees to determine the allocation of resources such as free compost or garden tools.

Reductions in program budget will affect progress towards intended outcomes for the program, including maintenance of gardens, community engagement and civic connections, employee safety, and all people feeling welcome in community gardens.

This proposal negatively impacts accessible and well-maintained spaces, healthy ecosystems, and community and employee wellness and connection."

Community Engagement and Empowerment

"This proposal reduces direct services, programming, and resources for community. It reduces staff to coordinate educational opportunities for community members, eliminates programming and coordination with partners, and eliminates toilets and yard waste services at gardens where participants otherwise lack access to these amenities.

The proposal increases fees for individual community garden plot rentals by 20%. Currently 30% of garden participants use PP&R's Access Discount to reduce the cost of their plot. Fee increase may also increase the number of people who use this discount.

The Community Gardens program operates with community members and partners as essential components of the service delivery model. New gardens are developed in direct response to community demand and in collaboration with community-based organizations. Volunteers support operations by welcoming and educating new gardeners, organizing garden clean-up events, and communicating with staff regarding garden needs. The Native Gathering Garden, which would be impacted by this proposal, is co-managed by staff and individuals and organizational representatives from the Native American Community. Due to the budget process timeline, community was not involved in drafting the reduction package. "

Federal Compliance Activities

This reduction does not eliminate PP&R's obligation to comply with federal, state, and city laws, including safety regulations and ADA requirements. However, proposal eliminates funding for systematic, proactive ADA accessibility improvements to gardens, and preserves only a small amount for responses to complaints or specific accommodation.

Budget Concept 26685 - Move 1 Carpenter Position to Legacy Bench Program Funding	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

Move 1 FTE Carpenter position & associated External Materials and Services (EMS) from the Professional Repair and Maintenance Services (PRMS) operating budget to the Legacy Bench Program funding – which means less critical support for repairs to restrooms, roofs, signage, railings, decking, docks, benches, brick walls and pathways, ADA barriers, and other structural assets

Service Impacts

This proposal moves one FTE Carpenter position and the associated EMS for the position from the PRMS operating budget to the Legacy Bench Program funding to support the Program, so it does not eliminate the staff position. This proposal will focus this FTE's work on benches - significantly narrowing how that position can be deployed across the park system. Carpenters within the PRMS Structures workgroup provide critical support for repairs to roofs, shelters, restrooms, signage, railings, decking, docks, non-Legacy benches, and other structural park assets, as well as ADA-adjacent access improvements and safety-related remediation.

By dedicating one FTE Carpenter primarily to the Legacy Bench Program, Carpentry staff will have reduced capacity to respond to general carpentry needs across park zones. This may result in slower response times for structural repairs, longer periods with unsafe or deteriorating assets, and increased deferral of preventative maintenance work unrelated to benches. Park users may experience delayed repairs to community centers, restrooms, and other high-use facilities.

Within the Legacy Bench Program, there is currently sufficient funding to support this position and associated bench fabrication, installation, and replacement in the near term. However, the long-term sustainability of both the position and the program is dependent on continued fundraising. Without sustained philanthropic support, staffing and material costs will consume a significant share of program resources and may constrain future program capacity. This position will co-exist with, and be supported by, the External Affairs & Partnerships team, which is committed to leading ongoing fundraising and partnership efforts to sustain and grow the Legacy Bench Program over time.

Equity Outcomes and Impact Tracking

The anticipated outcome of this funding shift is increased support for the Legacy Bench Program with a reduction in flexible, park, and facility-responsive carpentry capacity. This option preserves staffing but limits system-wide responsiveness by concentrating limited carpentry resources on a single asset type, thus increasing pressure on the broader Structures backlog of work.

PRMS tracks outcomes through quantitative work order volume, response times, backlog growth, preventative maintenance ratios, and completion of structural and ADA-adjacent repairs, supplemented by qualitative input from parks operations staff and community-reported safety or asset condition concerns. Redirecting carpentry time to the Legacy Bench Program is expected to increase deferred maintenance for non-bench assets and reduce the workgroup's ability to proactively address safety risks and emerging structural issues.

City Core Values
This proposal maintains compliance with safety and accessibility obligations, supporting Antiracism and Equity, while concentrating carpentry capacity within a single program may increase disparities in the condition and safety of facilities across park zones, particularly in underserved areas. Reduced flexibility to address non-bench structural needs may affect Transparency and Accountability and Communication by extending response times, increasing visible maintenance backlog items, and reducing the public's experience of well-maintained facilities and parks. While PP&R remains the primary provider of carpentry services, this funding shift limits the Bureau's ability to Collaborate across programs to deploy resources where needs are most urgent. The proposal reflects Fiscal Responsibility by preserving trained trades staffing levels, while acknowledging that deferred structural repairs may increase long-term maintenance risk and future costs.

Bureau Initiatives
This proposal does help advance Healthy Parks, Healthy Portland (HPHP) outcomes related to community and civic partnership outcomes and bench repairs, but does not support HPHP goals for broader scale park and facility reliability and equitable access, nor Parks Levy commitments and Mayor's Budget Guidance to prioritize critical maintenance and repairs. Reduced flexible carpentry capacity may also affect Community Needs Survey priorities related to safety and facility condition, particularly in underserved areas where timely structural repairs are most impactful.

Community Engagement and Empowerment

This proposal does include direct services for the community by supporting the Legacy Bench Program but it also affects community access to safe, functional park facilities and structures. It improves the condition of one of our park assets, benches, but does not support Carpenters maintaining community centers, restrooms, shelters, and non-bench amenities for daily community use, not emergency maintenance responsiveness.

Community needs related to structural repairs are identified through the Community Needs Survey, 311, service requests, inspections, ADA assessments, and operational reporting systems. While no new engagement was conducted for this funding shift, it directly affects PRMS's ability to respond to previously identified needs and community-reported safety concerns.

Dedicating carpentry capacity to a single program may disproportionately affect communities that rely on timely repairs to core facilities rather than discretionary amenity upgrades, potentially widening service disparities across park zones.

Federal Compliance Activities

This funding shift does not change PP&R's obligations related to federal, state, and city codes for safety, accessibility, or building standards. However, reducing general carpentry capacity may slow repairs that support ADA compliance, safe access, and structural integrity when those needs fall outside the Legacy Bench Program scope.

Equity impacts are monitored through work order prioritization, geographic distribution of deferred maintenance, and service level scores. Limiting flexible carpentry deployment reduces the Bureau's ability to respond equitably to structural needs across diverse neighborhoods.

While the Carpenter position remains funded, reliance on program-specific funding introduces long-term risk if Legacy Bench Program resources are not sustained, potentially affecting both bench delivery and the broader structural maintenance function.

Budget Concept 26687 - Reduce Emergency Tree Services and Park Tree Maintenance and Planting	
Budget Concept Type	Magnitude
Reduction	10% Reduction

Package Description

This proposal eliminates 2.0 FTE Arborist II positions, one of which is vacant. It reduces Community Service Aide support in the Urban Forestry Science & Policy work group and Seasonal Maintenance Worker support in the Urban Forestry Tree Maintenance Operations work group. This proposal shifts the maintenance of Heritage Street Tree Maintenance to Portland Clean Energy Community Benefits Fund's (PCEF) Strategic Program 34.

Service Impacts

Arborist II staff are essential employees who respond to tree-related emergencies 24 hours a day, 7 days a week in public rights-of-way, in parks, and on City-owned and managed property. Response time to emergencies in the public right of way will increase. The elimination of 2.0 FTE Arborist II positions will directly impact field employee safety, public safety, and basic tree maintenance and operations. It will also reduce implementation of the Parks Levy-supported, first-ever proactive Park Tree Maintenance service. Loss of Seasonal Maintenance Workers (SMW) will result in fewer park trees planted and curtail establishment care of recently planted trees, in conflict with Title 11 tree replacement requirements and resulting in higher new tree mortality. Reducing the Community Service Aide (CSA) budget in Science, Outreach, and Planting will reduce capacity to inventory and maintain trees on PP&R property, conduct monitoring of planted trees, and future canopy analysis to support urban forest management.

Equity Outcomes and Impact Tracking

"The elimination of 2.0 FTE Arborist II positions will put the remaining staff under more pressure during the response to hazardous tree situations, thereby reducing field staff safety as well as increasing the need to use contractors, potentially eliminating any cost savings and increasing management and coordination needs. Proactive Park Tree Maintenance will be reduced, resulting in increased reactive and emergency park tree care which is a less efficient use of resources and more expensive. Stumps will take longer to remove, going from generally one or two years to three or four years, which will likely result in increased complaints and public safety concerns.

This will result in the reduction in service to under-served communities. City-wide there are neighborhoods that have received inequitable tree care due to the reactive nature of emergency response which has been the City's approach until Parks Levy funding provided for creation of the first-ever proactive Park Tree Maintenance program. The regular implementation of Park Tree Maintenance allows Urban Forestry to prioritize underserved communities. Reducing staffing will directly result in reduced service levels to underserved communities due to demands from high priority and complaint driven emergency service requests."

Community Engagement and Empowerment

No community was engaged in the development of this proposal due to the timeline.

Federal Compliance Activities

This proposal will increase the time required to replace trees removed from parks from two to approximately four years. Replacing these trees by planting new is required by Portland City Code Title 11 Trees.

Budget Concept 26404 - END CONTRACTED SECURITY AT THE CUSTOMER SERVICE WALK- IN CENTER ON N TILL

Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

With the transition of Bureau security staff to the Interstate location, this package will eliminate the contracted security armed guard. This location is the customers "in-person" access to pay water, sewer, and stormwater bills at 664 N. Interstate. There will be security staff in the building but not stationed at Customer Service desk.

Service Impacts

Customer Service staff and customers may see increased escalations without highly visible armed security services stationed in the lobby.

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

On average we have approximately 300 customers that come to the Service Center monthly. Minimal customer impact is expected.

Federal Compliance Activities

None

Budget Concept 26482 - FACILITIES MANAGEMENT	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

This proposal will reduce and slow capital improvement to maintain operational Water Bureau facilities and properties, including managing cell tower leases on tanks and the disposal of surplus properties.

Service Impacts

Maintenance of bureau facilities and properties will take longer. Coordination with cell tower leases will take longer as well. There would also be increased costs over the long-term due to temporary repairs by maintenance staff until capital work can be programmed and managed.

Equity Outcomes and Impact Tracking

None

Community Engagement and Empowerment

Vacant properties may have visual impact on surrounding properties.

Federal Compliance Activities

None

Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26483 - SOURCE PROTECTION & INTERGOVERNMENTAL COORDINATION	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal reduces manager-level oversight for Water's Source Protection & Planning programs for the Bull Run Watershed and Columbia South Shore Wellfield, and reduces engagement with local, state, and federal policy issues, and oversight for legislative affairs.

Service Impacts

Reassignment of work increases pressure on other staff. Reduced coordination with Federal and State regulators and city and regional partners.

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

Reduced legislative advocacy and support for drinking water source protection.

Federal Compliance Activities

Reduced oversight and coordination of compliance work.

Sum:	\$0	(\$100,000)

Budget Concept 26485 - CUSTOMER ENGAGEMENT PORTAL (CEP) TRANSITION CUSTOMERS TO PAPERLESS BIL

Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

About 40% of utility customers are enrolled in paperless (electronic) billing. The cost of paper bills is estimated at \$500,000/yr for the remaining 60% of customers (75 cents/bill). Water will automatically enroll all new customers in paperless billing by default. For existing customers with new access to the Customer Engagement Portal, conditional prompts will encourage customers to enroll in paperless billings to receive bills electronically going forward, with estimated enrollment to increase by 30%. Water will also transition all initial non-payment correspondence to electronic for customers with emails on file, and with Customer Engagement Portal implementation, all customers with emails on file to transition to electronic communications (other than for pre-disconnection notices).

Service Impacts

Customer Service staff expects moderate increase in contacts regarding the communications change and auto enrollment. Customers that prefer paper, hard copies of bills will need to proactively opt-in to receive paper bills.

Equity Outcomes and Impact Tracking

Limited

Community Engagement and Empowerment

Auto enrollment of customers in paperless billing by default.

Federal Compliance Activities

Expense	One Time Cost	Ongoing Cost
External Materials and Services	\$0	(\$200,000)
Sum:	\$0	(\$200,000)

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$200,000)
Sum:	\$0	(\$200,000)

Budget Concept 26496 - PP&D CREDIT CARD FEES	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

The Bureau currently pays the credit card fees for all development project permit charges. This is true for all permits within Portland Permitting & Development, and would need to be changed system-wide. The proposed savings would require the customer to cover the credit card fee when paying for permits.

Service Impacts

There will be increased time for permit team to explain new policy.

Equity Outcomes and Impact Tracking

This change charges only the development customers, rather than spreading the cost of credit card fees across all Water customers.

Community Engagement and Empowerment

This would add a small cost to the developer.

Federal Compliance Activities

None

Sum:	\$0	(\$200,000)

Budget Concept 26497 - STRATEGIC INTEGRATION AND POLICY	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal reduces the bureau's knowledge management activities, including cataloging plans and regulations to preserve institutional knowledge, developing documentation and operating procedure standards to facilitate future AI integration, supporting performance management efforts for enterprise optimization, and facilitating change during utility integration. Supports UCIP documentation requirements and establishes knowledge infrastructure.

Service Impacts

Removes dedicated knowledge management capacity during organizational change and workforce turnover. Risks: Failed UCIP documentation standards, stalled performance management, accelerated knowledge loss from retiring staff, reduced BES-PWB integration capacity, and increased operational vulnerability from undocumented processes.

Budget Concept 26500 - CUSTOMER SERVICE BILLING	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This package reduces Billing staffing. Customers calling to resolve billing concerns will experience increased hold time. These calls include inquiries for leak adjustments, understanding the charges, etc. It is anticipated that this will further be exacerbated by additional workload related to the new fee implementation for Flood Safety and Smart Metering (AMI).

Service Impacts

Lengthened time periods to resolve billing issues including providing leak adjustments.

Equity Outcomes and Impact Tracking

Leak adjustments and billing corrections extended durations to resolve will impact financial assistance customers.

Community Engagement and Empowerment

Potential for increase in customer escalations to Ombudsman, Councilors, and Executive leadership given increased resolution times.

Federal Compliance Activities

Limited

Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26509 - WATER EFFICIENCY	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This reduces staffing in the Water Loss and Efficiency Program reduces capacity to complete the City of Portland's annual drinking water system Water Loss audit and implementation of the Water Loss Action Plan, mandated by State water resource and conservation requirements, and outlined in WB's Water Management and Conservation Plan to ensure the City continued access to future water supply in Columbia South Shore Well Field undeveloped water rights. This reduction also significantly reduces planning capacity for emergency drinking water curtailment communications and organizing the development and implementation of all public facing and internal curtailment messaging for a potential curtailment event. This reduction will compromise evaluation and analysis of AMI data to support water use efficiency programming, long-term demand planning, and forecasting.

Service Impacts

While required work has been reassigned, this position played a key role in coordination within the bureau. These opportunities for alignment will be missed or initiated by others.

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

Potential for less advancement of curtailment planning and preparation goals.

Federal Compliance Activities

Compliance work has been reassigned, but loss of the position increases risk that the city will not advance its water loss reduction goals.

Budget Concept 26510 - WATER LABORATORY	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

This reduction would decrease staffing in the accredited Water Laboratory responsible for analyzing and testing drinking water and reporting results to ensure compliance with drinking water quality regulations. As a result, turnaround times for certain inorganic samples are expected to increase. In 2025, the laboratory analyzed approximately 13,000 samples representing more than 40,000 discrete analytes.

Service Impacts

This will result in increased turnaround time for results on metals and physicals samples. In the event of a water quality concern requiring increased testing (e.g. lead crisis in Flint, MI) WB would send samples to a contract laboratory as in-house capacity would be insufficient.

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

Minimal

Federal Compliance Activities

The bureau will prioritize samples for compliance.

30001283 - Laboratory Analyst II	(1.00)	\$0	\$0	\$0	\$0
Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26511 - BACKFLOW INSPECTION	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal will require streamlined operations and a new technology platform implementation to fulfill the Cross Connection Program requirement under the Safe Drinking Water Act, regulated through OHA's Drinking Water Program. The bureau must find alternate resources to submit required annual compliance report and provide subject-matter expert support for the permitting process when a backflow preventer is required to protect the drinking water system from potential cross connections. Efficiencies may jeopardize regulatory compliance and/or result in decreased customer satisfaction due to longer permit review and approval times. If development rates increase, this reduction could result in increased backflow plan review times and forestall the customer-paid pilot testing program.

Service Impacts

Reduces number of backflow reviews and testing of Fireline backflow assemblies. Reduction precludes the planned 27-28 pilot backflow testing program (desired customer streamline/service option/revenue generator that can reduce delinquency and improve compliance with cross connection drinking water regulations).

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

If development increases in the City, this could impact backflow plan review turnaround times.

Federal Compliance Activities

Please see service impact

Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26512 - UNIDIRECTIONAL FLUSHING	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

The proposal would reduce the Unidirectional Flushing Team from its original full staff level of 8; adding an additional reduction to bring the team to 5 positions who systematically flush water mains throughout the distribution system. This critical flushing of mains improves and maintains overall water quality by cleaning pipes and valves throughout the distribution system through a controlled removal of sediment and biofilm. Current performance indicators include flushing approximately 250-300 miles of pipeline and inspecting 4,000-5,000 valves annually (will be reduced to 175–225 miles flushed per year and fewer valve inspections). The goal to flush 1800 miles by 2027, covering the entire distribution system prior to bringing filtration online, preventing water quality issues caused by biomass and deposits during this transition. With this additional reduction, an entire system flush will take approximately 10 to 12.5 years.

Service Impacts

Significant increase flushing time to cover entire distribution system, with potential impacts such as increased biomass, sediment, and deposits in the distribution system, which can lead to water quality issues such as elevated chlorine demand, taste and odor problems, and other operational concerns. Severe cases can impact drinking water regulation compliance. Reduced valve inspections and operations each year increases the likelihood of non-functional valves going undetected, causing extended water flow during emergency shutdowns, such as main breaks, until the next operational valve can be located and closed. Decreased asset data and system feedback on condition and operability of citywide water system assets.

Equity Outcomes and Impact Tracking

Low

Community Engagement and Empowerment

Potential impact to customers due to closed valves in the system and increased potential for discolored water events.

Federal Compliance Activities

Over time this could become an indirect compliance issue. Please see service impact bullet.

Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26513 - WATER QUALITY	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal reduces critical reporting and responder capacity on City's drinking water compliance reports and lead Total Coliform Rule (TCR), as well as reducing backup for TCR sampling, investigating system anomalies, and compiling data for the Annual Drinking Water Quality Report, to meet regulatory requirements.

Service Impacts

This will impact ability to ensure compliance with required reporting.

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

Minimal

Federal Compliance Activities

Aiming to reduce impact by spreading existing and required work around to other staff; if this is not sustainable then we would need to revisit.

Total	(1.00)	\$0	\$0	\$0	\$0

Budget Concept 26514 - WORKFORCE ENGAGEMENT & EMPLOYEE EXPERIENCE	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description This package reduces community engagement with trades workforce development and pre-apprentice pipeline programs including classrooms, career fairs and expos, and workforce trainings for under-represented Portlanders. This package also reduces employee supports for field and trades positions including employee well-being education, exercise classes and equipment inventory and maintenance, vaccine clinics and ergonomic assessments.
Service Impacts This will have a direct impact to field employee health and wellbeing resources
Equity Outcomes and Impact Tracking Reduced engagement with community workforce organizations supporting under-served Portlanders.
Community Engagement and Empowerment Reduced engagement with community workforce and education partners, reduced trades workforce pipeline partnerships.
Federal Compliance Activities Minimal

Job Class - Name	FTE	Salary	Supplemental	Benefit	Total
30003983 - Coordinator II - CPPW	(1.00)	(\$103,418)	\$0	(\$27,602)	(\$138,932)
Total	(1.00)	(\$103,418)	\$0	(\$27,602)	(\$138,932)

Budget Concept 26515 - EXTENDED BOND TERMS	
Budget Concept Type	Magnitude
Reduction	Current Revenue Forecast (Non-GF)

Package Description

Utilize 40-year Water revenue Bonds issued through FY 2029-30 to fund the Water Capital Improvement Program including the Bull Run Treatment Projects. This allows for lower retail water rate increases through the 5-year forecast, but higher rate increases thereafter compared to utilizing 30-year bonds assumed in Budget Scenario 1. Therefore, the impact to the Single-Family Residential customer monthly bill will be less compared to Budget Scenario 1 initially, but customers will ultimately be paying more in the long term.

Service Impacts

Customers will pay more with 40-year term bonds due to greater interest costs incurred.

Equity Outcomes and Impact Tracking

This will be trading near-term rate stability for increased long-term rigidity and exposure to uncertainty. 40-year bonds push cost burden to future generations, and the carried costs reduces our ability to adapt as future conditions differ from today's assumptions.

Community Engagement and Empowerment

None

Federal Compliance Activities

None

Revenue	One Time Cost	Ongoing Cost
Miscellaneous Fund Allocation	\$0	(\$2,860,934)
Sum:	\$0	(\$2,860,934)

Budget Concept 26690 - WATER RESOURCE EDUCATION	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal reduces staffing to the Water Resources Education Program that offers educational services and resources to help students and the community learn about Portland's drinking water sources and the city's water system. It includes school field trips, classroom programs, and workforce development activities that teach topics like water quality, water conservation, water cycle, forest ecology and water pressure. The program also provides community-focused events and tours, such as Bull Run Watershed tours, Groundwater 101, and other opportunities for adults and families to explore how water travels from its source to the faucet. All these services aim to increase public understanding and responsible stewardship of water resources.

Service Impacts

This will reduce the coordination with educators to lead community tours over weekends, to host school groups, and to facilitate tours for elected officials. This reduction will reduce the number of school and general public tours each year by more than half.

Equity Outcomes and Impact Tracking

The bureau has doubled its program participation from Title 1 schools over the last few years. With the reduction, the program will have significantly less capacity for outreach and engagement with new school partners.

Community Engagement and Empowerment

Over the last two years, the bureau provided education services to more than 3,800 students and 608 adults. With reduced staff, the bureau will only be able to serve less than half of these community members. A reduction will limit the scope of awareness the Portland community has about its water system.

Federal Compliance Activities

The city has committed to public education it it's Co-management Agreement with the United States Forest Service, and in its Water Management and Conservation Plan with the State of Oregon. With the reduction in staff, there will be significant impact on program capacity and delivery, this level of reduction will not likely jeopardize current compliance. The bureau is in the middle of relicensing its Hydroelectric Power dams, and a common requirement issued by FERC is public education. Once the regulatory process is complete in 2029, the bureau may need to expand this program again. Training an educator is time intensive, given the amount of information they need to retain.

Budget Detail

602 - Water Fund

Expense	One Time Cost	Ongoing Cost
Personnel	\$0	(\$185,000)
Sum:	\$0	(\$185,000)
Revenue	One Time Cost	Ongoing Cost
Charges for Services	\$0	(\$185,000)
Sum:	\$0	(\$185,000)

Budget Concept 26691 - EMERGENCY MANAGEMENT	
Budget Concept Type	Magnitude
Reduction	5% Rate Reduction (Non-GF)

Package Description

This proposal will reduce staffing in the bureau's emergency responses on other City and State plans. In addition, the position is responsible for ensuring the bureau stays current with all Emergency Response Plans required for compliance with Environmental Protection Act and Federal Energy Regulatory Compliance regulations.

Service Impacts

Delayed response on water emergency related event and will have limited capacity to assist in Citywide emergency events. Reduced participation in regional emergency coordination.

Equity Outcomes and Impact Tracking

Minimal

Community Engagement and Empowerment

This will reduce the ability to coordinate with key customers for emergency planning work.

Federal Compliance Activities

Potential impacts to future documentation and required exercises.
